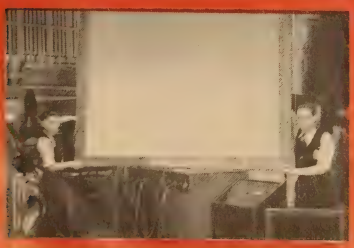
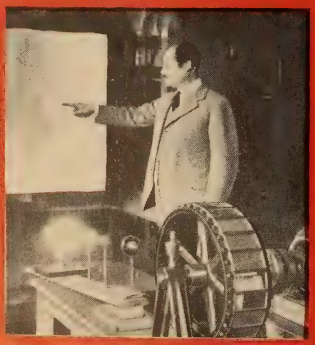
There are 25 years of television experience behind our ability to supply ALL your TV equipment needs.....

GENERAL ELECTRIC TV 'FIRSTS' PIONEER TRANSMITTER AND



25 YEARS AGO...



First Home TV Receiver. In 1927, at Schenectady, Dr. Alexanderson reveals his console model with a tiny 3" screen. The receiver used a rotating perforated disc to scan the image. Sound was received on a different wave length through speaker at right.

First Television "Camera." As light from electric arc at left is projected through 48 holes of revolving disc, the flashes are picked up by 4 electric eyes protruding from wooden frame on table. The impulses are then broadcast much the same as any radio message

First Theatre Television. In May, 1930, Dr. Alexanderson produced a picture 7 feet square on a screen in [illegible] Theatre, Schenectady. Receiver used a light [illegible] by Dr. August Karolus.

First Television "Transmitter" is demonstrated by its inventor. Each of the 24 mirrors mounted on a wheel of the machine was set at a different angle to televise an image before 7 photocells.

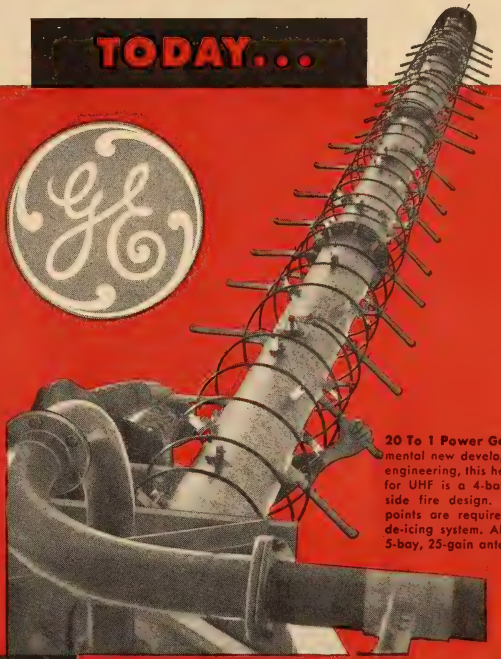
First Remote Pickup. Pioneer G-E equipment at Albany, 15 miles from Schenectady, picked up the image and voice of Governor Alfred E. Smith accepting Democratic presidential nomination.

Complete 1952 Line of Broadcast Equipment Shows Startling Advance in Electronic Science

ON December 16, 1926, when Dr. E. F. W. Alexanderson, famed General Electric scientist, first demonstrated a system for transmitting pictures by radio, The New York Times hailed the event as a major achievement in electronic science.

This prolific inventor, who was issued a patent on an average of every 7 weeks during his 45-year active tenure with the company, established the tradition of bold, challenging television research that sparks the efforts of G-E engineers today. The first home receiver, the first remote pickup, the first theatre projection of TV—all were developed in Alexanderson's laboratory. He and his associates have kept up the pace for 25 years.

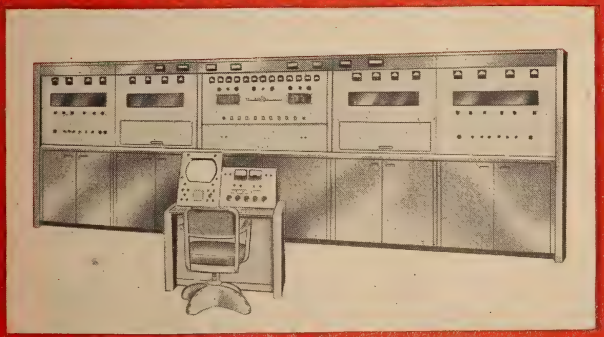
You can put your confidence in—



SPAN QUARTER CENTURY FROM RECEIVER TO LATEST UHF EQUIPMENT

TODAY...

Today, with the greatest new industry in America on the threshold of unprecedented expansion—with UHF channels soon to be claimed by scores of applicants—G.E.'s latest television developments deserve your attention. Complete studio units for VHF and UHF operation, television transmitters ranging in power from 100 watts to 50 kw, and antenna systems with effective power gains up to 25 times—are available to existing stations and prospective broadcasters.



In an expensive business, it pays to examine carefully your investment in basic station equipment. Here at Electronics Park we believe we have the most modern television factory in the world. We'd like you to see it before you make any equipment decisions. Your General Electric Broadcast Man will be glad to make the arrangements.

General Electric Company, Electronics Park, Syracuse, N. Y.

20 To 1 Power Gain! A fundamental new development of G-E engineering, this helical antenna for UHF is a 4-bay radiator of side fire design. Only 4 feed points are required. Simplified de-icing system. Also available: 5-bay, 25-gain antenna.

GENERAL ELECTRIC

World's Most Powerful UHF Television Transmitter. This 12 kw unit offers a unique frequency control system. One crystal oscillator controls both the visual and the aural carriers, locking them together with a fixed separation of 4.5 mc. A number of broadcasters have already placed orders for this UHF transmitter.

High-Power UHF Klystron Tube. A successful solution to the difficult problem of high power at UHF. Designed and built to G-E specifications, this tube's remarkable amplification and extreme stability actually make high-power UHF television a reality.

channel stations. In support of the counterproposal it was urged that the operation of Channel 3 in Norfolk would result in a total gain of service; that the interference free area of a station operating on Channel 3 would be greater than the operation of a station on Channel 12 in Norfolk. It was also urged that as a result of the exchange of Channels 3 and 12 between Norfolk and Richmond, the area which would receive interference-free service and the area which would receive Grade A service would be increased.

(c) **Oppositions and Conflicting Counterproposals to the WTAR Counterproposal I.** An opposition to the counterproposal of WTAR Broadcasting Company was filed by Larus and Brother Company, Inc., Richmond, Virginia, urging that the operation of Channel 3 in Richmond would provide Grade B service to a greater area than the operation of Channel 12 in Richmond. A conflicting counterproposal was filed by Hampton Roads Broadcasting Corporation, Newport News.

(d) **Second Alternative Counterproposal of WTAR Broadcasting Company.** In its second alternative counterproposal to the assignments proposed by the Commission in the Third Notice, WTAR Broadcasting Company requested the additional assignment of VHF Channel 2 to Norfolk and modification of the WTAR-TV license to specify operation on that channel without changes in any other assignments proposed by the Commission in the Third Notice.

(e) **Statement in Support of WTAR Counterproposal II.** In support of this counterproposal it was urged by WTAR Broadcasting Corporation that in the event that the Commission assigned Channel 2 to Norfolk, WTAR would have no objection to shifting the frequency of WTAR-TV from Channel 4 to Channel 2. It was further urged that the assignment of Channel 2 to Norfolk would provide a third VHF channel to the area; that the population of the standard metropolitan area of Norfolk-Portsmouth was 13½% of the population of the State of Virginia and that the assignment of a third VHF channel, or a sixth channel, to Norfolk-Portsmouth was in accordance with the mandates of Section 307(b) of the Communications Act. It was recognized by the WTAR Radio Corporation that the minimum co-channel separation which would result under this alternative counterproposal would be 169 miles from Norfolk to Baltimore on Channel 2 and that this separation was below the minimum proposed by the Commission.

(f) **Oppositions and Conflicting Counterproposal to WTAR Counterproposal II.** The A. S. Abell Company licensee of WMAR-TV, Baltimore, Maryland, opposed the second alternative counterproposal of the WTAR Radio Corporation asserting that interference would result to the service area of WMAR-TV as a result of the reduced separation on Channel 2 between Baltimore and Norfolk. A conflicting counterproposal was filed by Hampton Roads Broadcasting Company, Newport News.

Newport News

729. (a) **The Counterproposal of Hampton Roads Broadcasting Corporation.** Hampton Roads Broadcasting Corporation requested the additional assignment of VHF Channel 12 to Newport News by deleting that channel from Norfolk-Portsmouth and replacing it with VHF Channel 2 as follows:

	Third Notice		Counterproposal	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Newport News, Va.		33	12†	33
Norfolk-Portsmouth, Va.	10, 12	15, *21, 27	2†, 10	15, *21,27

(b) **Statement in Support of Hampton Roads Broadcasting Corp. Counterproposal.** Hampton Roads urged that the economic and industrial importance of Newport News warrants the assignment of a first VHF channel; that the cities of Norfolk - Portsmouth - Newport News had previously been classified as a metropolitan district in the Hampton Roads area; that in the television assignments proposed by the Commission in April of 1947 and in July of 1949 the Norfolk-Portsmouth-Newport News were treated as one unit and were made a common assignment. It was urged that Hampton Roads is a 50-square mile harbor and serves the ports of Norfolk, Portsmouth and Newport News; that the Hampton Roads area has traditionally been considered as a composite area; that Newport News is situated across the Bay at a distance of 11.7 miles north of Norfolk; that Newport News has many large and diversified industrial activities. It was urged by Hampton Roads Broadcasting Corporation that Newport News, with a population of 41,551 and a thriving industrial capacity warrants the assignment of at least one VHF channel, particularly when no other community under the Hampton Roads proposal would be deprived of television service by making the changes requested in the counterproposal. It was recognized by Hampton Roads Broadcasting Corporation that a co-channel separation of 169 miles would result from the operation of Channel 2 at Norfolk and Baltimore.

(c) **Oppositions and Conflicting Counterproposals to Hampton Roads Counterproposal.** A. S. Abell, Baltimore, and the Beach View Broadcasting Corporation of Norfolk both opposed the counterproposal of Hampton Roads because of the 169 miles separation that would be created by a grant thereof. WTAR Radio Corp. filed a conflicting counterproposal.

(d) **The Norfolk-Portsmouth Educational Reservation.** The JCET and the School Board of Norfolk supported the reservation of Channel 21 in Norfolk-Portsmouth for non-commercial educational use. No objection was made to the proposed reservation.

Conclusions: The Norfolk-Portsmouth Educational Reservation

730. On the basis of the record, the reservation of Channel 21 in Norfolk-Portsmouth for non-commercial educational use is finalized.

Conclusions: Additional VHF Assignments in Norfolk-Portsmouth and Newport News

731. The counterproposals seeking the additional assignment of a VHF channel to Norfolk-Portsmouth (WTAR second alternative counterproposal) and to Newport News would result in the following co-channel assignment separation below 170 miles in Zone I:

Channel	Cities	Miles
2	Norfolk-Baltimore (WMAR-TV)	169

Since the minimum assignment separation of co-channel stations in Zone I is 170 miles these counterproposals must be denied. Accordingly, the second alternative counterprosal of WTAR Broadcasting Company and the counterproposal of Hampton Roads Broadcasting Company are denied.

Under the 1940 census Norfolk-Portsmouth-Newport News were contained in one metropolitan district. Under the revised 1950 census definitions Newport News was not included within the same area, since Newport News is located in Warwick County, whereas, Norfolk and Portsmouth are located in Norfolk County. We do not believe, however, that the census definitions should be controlling here for assignment purposes. Newport News is located 11.7 miles from Norfolk and the record establishes that the Norfolk-Portsmouth-Newport News area has traditionally been regarded as a unit and that there is a high degree of common interests within these three cities. Accordingly, although the counterproposal of Hampton Roads cannot be granted because of the violation of our standards for minimum co-channel spacing resulting under its proposal, we believe that the proposal of Hampton Roads should be granted in part by making available to Norfolk-Portsmouth-Newport News the channels assigned to each of these cities. It is our view that the first alternative counterproposal of WTAR is meritorious and it is therefore granted as modified above.

Conclusions: Answer to Show Cause Order and First Alternative Counterproposal of WTAR Broadcasting Company

732. The first alternative counterprosal of WTAR Radio Corporation for the assignment of Channel 3 to Norfolk is in compliance with the Commission's standards and is consistent with the counterproposals of Shenandoah Valley Broadcasting Corporation, Harrisonburg, Virginia, and WSAZ, Inc., Huntington, West Virginia, both of which have been granted elsewhere in this Report.

733. It is our view that the first alternative counterproposal of WTAR Radio Corporation is meritorious, and it is therefore granted. An appropriate authorization will be issued to WTAR Radio Corporation to specify operation of WTAR-TV on Channel 3.

Final Assignments and Reservations

734. The following assignments and reservation are adopted:

City	Channel No.
Norfolk-Portsmouth-Newport News	3, 10, 15, *21, 33
Norfolk-Portsmouth [150]	27

[150] Channel 27 cannot be used under the table of minimum separations in Newport News. Accordingly, Channel 27 is assigned to Norfolk-Portsmouth only.

RICHMOND, CHARLOTTESVILLE AND PETERSBURG, VIRGINIA

735. (a) **Prosoped Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Charlottesville		45
Petersburg	8	41
Richmond	3, [151] 6	*23, 29

(b) **Census Data.** The Standard metropolitan area of Richmond has a population of 328,000 and the City of Richmond has a population of 230,000. The City of Charlottesville has a population of 26,000. The City of Petersburg has a population of 35,000.

(c) **Existing Station.** Havens and Martin, Inc., is licensed for the operation of WTVR, Richmond, on Channel 6.

Richmond

736. (a) **Counterproposals of Larus and Brother Company, Inc. and Richmond Newspapers, Inc.** Larus and Brother Company, Inc. and Richmond Newspapers, Inc. requested the additional assignment of VHF Channel 8 to Richmond by deleting that channel from Petersburg, Virginia and substituting therefor UHF Channel 59.

(b) **Statement in Support of Larus and Brother and Richmond Newspapers Counterproposal.** Larus and Brother Co., Inc. and Richmond Newspapers, Inc. urged that the economic importance and population of Richmond as compared with Petersburg justifies the deletion of Channel 8 from Petersburg and the assignment of that channel to Richmond. It was urged that the population of the City of Richmond had increased by more than 19%, and the population of the standard metropolitan area by more than 24% since 1940. It was also contended that its counterproposal would comply with the Commission's standards for minimum separation of co-channel and adjacent channel assignments. It was pointed out that the closest co-channel assignment on Channel 8 from Richmond would be at Lancaster, Pennsylvania, a distance of 184 miles. In further support of the counterproposal it was urged that the operation of Channel 8 at Richmond would render service to a substantial area and population; that the operation of Channel 8 at Richmond would result in a net gain of coverage; and that the area losing Grade B service would be served by from two to nine other services. It was also urged that the operation of VHF Channel 8 at Richmond would provide Grade A service to Petersburg. In further support of the counterproposal of Richmond Newspapers, Inc. it was urged that a minimum of three or four VHF assignments is required in Richmond to afford the required number of major outlets and to avoid monopoly.

(c) **Oppositions and Conflicting Counterproposals to the Larus and Brother and Richmond Newspapers Counterproposals.** An opposition to the counterproposals was filed by

[151] In accordance with our decision to grant the counterproposal of WTAR Radio Corp., Norfolk, we have adopted the assignment of Channel 12 in Richmond in lieu of Channel 3 as proposed in the Third Notice.

Louis H. Peterson, Petersburg, Virginia.[152] In the opposition it was urged that Channel 8 be retained in Petersburg. It was asserted that the City of Petersburg was not part of the Richmond standard metropolitan area and that the distance between the cities was 23 miles. It was urged that the deletion of Channel 8 from Petersburg and the assignment of that channel to Richmond would result in a substantial loss of the only VHF Grade B service to persons residing along the Virginia-North Carolina boundary. It was asserted that the operation of Channel 8 at Petersburg would render service to a large area and population. The City of Charlottesville, the Chamber of Commerce of Charlottesville, Virginia, and Barham and Barham, Radio Station WCHV filed a conflicting counterproposal to that of the Richmond parties.

(d) **The Richmond educational reservation.** The City of Richmond supported the reservation of Channel 23 in Richmond for non-commercial educational use. No objection was filed to the reservation.

Charlottesville

737. (a) **Joint Counterproposal of City of Charlottesville, the Chamber of Commerce of Charlottesville, Virginia, and Barham and Barham, Radio Station WCHV.** In a joint counterproposal the Charlottesville parties requested the deletion of VHF Channel 8 from Petersburg and the assignment of that channel to Charlottesville and the substitution of UHF Channel 59 in Petersburg for the deleted channel.

(b) **Statement in Support of Charlottesville Counterproposal.** The Charlottesville parties urged that if Channel 8 were assigned to Charlottesville it was proposed to locate the transmitter at Bucks Elbow, at a distance of 13¾ miles from the city and at an elevation of 2,450 feet above average terrain and 3,180 feet above mean sea level. It was urged that the operation of Channel 8 at Charlottesville as proposed at the mountain site would render service to very large area and population. It was further stated that the operation of VHF Channel 8 from a downtown site in Charlottesville would also render the first VHF service to a large area in the northern portion of the State of Virginia. It was also contended that a grant of the counterproposal would be consistent with the Commission's standards for minimum separation of co-channel and adjacent channel assignments. In addition it was urged that the closest station which could render Grade A service to the area of Charlottesville was assigned to Waynesboro on Channel 42 at a distance of 23 miles and that the Blue Ridge Mountains separate the two cities with elevations of about 3,000 feet. It was concluded that it was unlikely that satisfactory service would be provided to the city of Charlottesville from the operation of a UHF channel.

(c) **Oppositions and Conflicting Counterproposals to the Charlottesville Counterproposal.** Oppositions to the foregoing joint counterproposal were filed by Larus and Brother Company, Inc., and Richmond Newspapers, Inc., both of Richmond, urging that it was inappropriate to consider the use of Channel 8 in Charlottesville operating with a transmitter site assumed at a mountain. It was urged that the use of Channel 8 at the downtown site of Charlottesville would not provide service to as many persons as would be served by the operation of that station from either Richmond or Petersburg. It was also urged in the opposition that the use of Bucks Elbow mountain site would be equally advantageous in the UHF and that Channel 64 could be assigned to Charlottesville. An opposition to the counterproposal was also filed by Louis H. Peterson. WSAZ, Inc. has filed an opposition to this counterproposal since it would involve the assignment of Channel 8 in Charlottesville, a distance of 173 miles from Charleston, West Virginia, where WSAZ-TV proposed the assignment of Channel 8.

(d) **The Charlottesville Educational Reservation.** The University of Virginia supported the reservation of Channel 45 in Charlottesville for non-commercial educational use. No objections were made to the reservation.[153]

Conclusions: Educational Reservations in Richmond and Charlottesville

738. On the basis of the record the reservation of Channel 23 and 45 at Richmond and Charlottesville, respectively, for non-commercial educational use are finalized.

Conclusions: Additional VHF Assignments in Richmond and Charlottesville

739. We are of the view that no basis has been established on the record for the deletion of Channel 8 assigned to Petersburg in order to assign that channel to Richmond or Charlottesville.

740. We are of the view that the deletion of the sole VHF channel from Petersburg, a city of 35,000, in order to assign a third VHF channel to Richmond or a total of five channels to that city is in view of the circumstances presented unwarranted. Similarly, we believe that the assignment of a VHF channel to Charlottesville at the expense of deleting the only VHF channel proposed for Petersburg, a larger community, is unwarranted. It is recognized that Charlottesville would not, under the Third Notice, have any commercial assignments. However, one of the parties has proposed the use of Channel 64 in Charlottesville for that purpose and we find that this channel should be assigned to Charlottesville.

741. In view of the foregoing, the counterproposals of Larus and Brother Company, Inc., and Richmond Newspapers, Inc., and the counterproposal of the City of Charlottesville, the Chamber of Commerce of Charlottesville, Virginia, and Barham and Barham, Radio Station WCHV, are denied.

Final Assignments and Reservations

742. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Charlottesville		*45, 64
Petersburg	8	41
Richmond	6, 12	*23, 29

BLACKSBURG, DANVILLE, LYNCHBURG, AND ROANOKE, VIRGINIA

743. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Blacksburg		*60
Danville		24
Lynchburg	13	16
Roanoke	7, 10	27, *33

(b) **Blacksburg Educational Reservation.** The JCET supported the reservation of Channel 60 in Blacksburg for non-commercial educational use. No objection was made to the proposed reservation.

(c) **Roanoke Educational Reservation.** The JCET and the Virginia Polytechnic Institute supported the reservation of Channel 33 in Roanoke for non-commercial educational use. No objection was made to the proposed reservation.

(d) **Danville.** The population of the city of Danville is 35,000. Piedmont Broadcasting Corporation filed a sworn statement in support of the Commission's proposed assignment for Danville, Virginia, stating that the location, size and economic position of Danville require and can readily sustain a television broadcast station. No opposition to the Commission's proposed assignment for Danville has been filed in this proceeding.

(e) **Lynchburg.** The city of Lynchburg has a population of 48,000. Lynchburg Broadcasting Corporation, Lynchburg, Virginia, filed a sworn statement supporting the Commission's proposed assignments for Lynchburg, Virginia. In the sworn statement it was asserted that the City of Lynchburg is within 14 miles of the geographical center of the State of Virginia, and is the dominant city in the area in which it is located; that Lynchburg is the geographical, economic and cultural center of central Virginia and that the assignments proposed by the Commission are necessary to serve the needs of the area. Old Dominion Broadcasting Corporation also filed a sworn statement supporting the assignments proposed for Lynchburg. No opposition to the assignments proposed for Lynchburg has been filed in this proceeding.

Conclusions

744. On the basis of the record the following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Blacksburg		*60
Danville		24
Lynchburg	13	16
Roanoke	7, 10	27, *33

NASHVILLE AND COOKEVILLE, TENNESSEE

745. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Cookeville		24
Nashville	*2, 4, 8	30, 36

(b) **Census Data.** The standard metropolitan area of Nashville has a population of 322,000 and the City of Nashville has a population of 174,000. The City of Cookeville has a population of 7,000.

(c) **Existing Station:** WSM, Inc., is licensed for the operation of Station WSM-TV at Nashville on Channel 4.

Nashville

746. (a) **Joint Counterproposal of WLAC Broadcasting Station and WSIX Broadcasting Service, and Counterproposal of Capital Broadcasting Company.** In a joint counterproposal WLAC Broadcasting Service and WSIX Broadcasting Station and in an identical counterproposal, Capital Broadcasting Company, all requested an additional assignment of VHF Channel 5 in Nashville and the deletion of the educational reservation from Channel 2 without any other changes in the assignments proposed in the Third Notice.

(b) **Statement in Support of WLAC, WSIX, and Capital Counterproposals.** In support of the request for the additional assignment of VHF Channel 5 at Nashville it was urged that it would not require any other changes in the assignments proposed by the Commission in the Third Notice; that the assignment of Channel 5 to Nashville meets the Commission's standards for minimum separation of co-channel and adjacent channel stations. It was asserted that the operation of Channel 5 at Nashville would render service to a substantial area and populations; that there were approximately 43,393 VHF television sets in the Nashville area. It was also asserted that UHF channels would be inadequate to serve the needs of the Nashville area since UHF stations would serve a substantially smaller service area than would VHF stations.

(c) **Conflicting Counterproposals to the WSIX, WLAC and Capital Counterproposals.** A conflicting counterproposal was filed by WHUB, Inc., Cookeville, Tennesee.

(d) **The Nashville Educational Reservation.** The JCET supported the reservation of VHF Channel 2 for use by a non-commercial educational station and submitted a sworn statement of Vanderbilt

---

[152] Larus and Brother Company, Inc. filed a Motion to Strike certain portions of the sworn statement of Louis H. Peterson, filed on August 27, 1951. In particular the Motion to Strike is directed against Exhibit A and B on the grounds of hearsay. A Motion to Strike was directed against evidence in Paragraph 7 of the sworn statement on the ground that they are conclusions purportedly based on Exhibit A which is objected to as inadmissible in evidence. The Motions to Strike are DENIED for they go only to the weight to be given to the evidence and not to its admissibility.

A Motion to Strike is directed against an "Engineering Statement supporting Louis H. Peterson's Support of FCC Proposal to Assign Channel 8 to Petersburg, Virginia", sworn to by Peterson's consulting engineer and filed with the Commission on October 22, 1951. The last paragraph on Page 1 of this statement includes this sentence. "Statements supporting the opposition of Louis H. Peterson to these proposals have been filed with the FCC and they are incorporated herein by reference." The Motion to Strike states that the affiant attempts to incorporate by reference the statement of Louis H. Peterson of June 6, 1951, on file with the Commission; that this statement was submitted on behalf of Louis H. Peterson by his counsel prior to the adoption by the Commission of the Order of Hearing Procedure of July 25, 1951, that the statement was not sworn to by Louis H. Peterson, nor has he filed a "sworn statement verifying the matters of fact set out therein" as required by paragraph 5(b) of the Order of Hearing Procedure. This Motion to Strike is GRANTED. The affiant engineer may not incorporate this material by reference under the Order of Hearing Procedure. Such material in the affiant engineer's statement, other than that incorporated by reference, is properly before the Commission for consideration.

[153] A comment recommending that this channel be assigned for commercial use was filed by Radio Station WCHV and by the Charlottesville Chamber of Commerce. However, these parties failed to submit a sworn statement in this proceeding.

University in Nashville. The University indicated that it was "fully conscious of the advantage that such a station would be to its operation, and is proposing to make full investigation and to seek the necessary funds for this purpose." Vanderbilt University stated that it recognized the importance of this opportunity and that it was the purpose of the University administration to make a thorough study of the situation. The University reported that it hoped that on its own account, it might find the way to avail itself of the use of a television channel. The Davidson County Board of Education also supported the reservation.

(e) **Opposition to Nashville Educational Reservation.** WLAC Broadcasting Service and WSIX Broadcasting Station, Nashville, Tennessee, and Capital Broadcasting Co.[154] opposed the proposed reservation of VHF Channel 2. Their sworn statement included an affidavit of the Mayor of Nashville stating that the commercial radio stations had been cooperative with the city educational institutions in the broadcasting of public service programs, and that the city was not financially able within the predictable future to support an educational television station. Affidavits were also presented from Scarritt College for Christian Workers, Fisk University, George Peabody College for Teachers, and David Lipscomb College indicating that these institutions had no objection to making Channel 2 available for commercial use in light of the great doubt that they would be able to operate a station in the near future.

Cookeville

747. (a) **Counterproposal of WHUB, Inc.** In a counterproposal to the Commission's Third Notice, WHUB, Inc., requested the additional assignment of VHF Channel 5 to Cookeville without any other changes in the assignments proposed in the Third Notice.

(b) **Statement in Support of WHUB, Inc. Counterproposal.** WHUB urged that Cookeville is located about 72 miles east of Nashville, 90 miles west of Knoxville and 80 miles north of Chattanooga; that the population of Putnam County in which Cookeville is located is 29,825; that the trade area of Cookeville encompasses an area of approximately 50 miles around Cookeville with a population of approximately 300,000. It was further urged that the industrial, agricultural and economic growth of the Cookeville region and the importance to the nation of the continued development of the area warrant the best service possible in every field of communications including television. It was urged that Cookeville's strategic location, its position as a geographic, cultural and economic center make it the logical site of a VHF station that will give service to the area and thereby assist in the continuing growth and advancement of the area.[155] In further support of the WHUB counterproposal it was asserted that the assignment of Channel 5 to Cookeville would comply with the Commission's standards for minimum separation of co-channel and adjacent channel assignments and would provide a service to a substantial area and population.

(c) The counterproposal would result in the following co-channel assignment separations below 190 miles in Zone II:

Cities	Channel	Mileage
Cookeville, Tenn.-Atlanta, Ga.	5	180
Cookeville, Tenn.-Bristol, Tenn.	5	185

(d) **Oppositions and Conflicting Counterproposals to WHUB, Inc., Counterproposal.** Oppositions and conflicting counterproposals were filed by Capital Broadcasting Co., WSIX Broadcasting Station and WLAC Broadcasting Service, all of Nashville, and the Fort Industry Company, Atlanta, Georgia.

Conclusions: Nashville Educational Reservation

748. We find on the basis of the evidence that the proposed reservation of VHF Chanel 2 in Nashville for use by a non-commercial educational station should be finalized.[156] The record establishes that Vanderbilt University is seriously considering the establishment of a non-commercial educational station in Nashville. It is our view that the educational community in Nashville must be afforded time in which to establish such a station. Accordingly, on the basis of the record, the proposed reservation of Channel 2 for use by a non-commercial educational station is finalized; and the counterproposal of WLAC Broadcasting Station, WSIX Broadcasting Service and Capital Broadcasting Company are denied insofar as they request the deletion of the reservation of Channel 2 at Nashville.

Conclusions: Additional VHF Assignments in Nashville and Cookeville

749. The counterproposal of the Nashville parties seeking the additional assignment of VHF Channel 5 to Nashville and the counterproposal of WHUB seeking the additional assignment of the same channel to Cookeville are mutually exclusive since Cookeville and Nashville are approximately 72 miles apart. We believe on the basis of the record that the assignment of Channel 5 should be made to Nashville rather than to Cookeville. The Cookeville counterproposal would result in two co-channel assignment separations below the minimum adopted herein for Zone II; whereas, the assignment of Channel 5 to Nashville is in accordance with our standards. Moreover, it is our view that the assignment to Nashville, a city of 174,000 with a metropolitan area of 322,000 is to be preferred to Cookeville with a population of 7,000. In view of the foregoing, the joint counterproposal of WLAC Broadcasting Service, WSIX Broadcasting Station and the counterproposal of Capital Broadcasting Company are granted and the counterproposal of WHUB, Inc., is denied.

Final Assignments and Reservation

750. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Cookeville		24
Nashville	*2, 4, 5, 8	30, 36

CHATTANOOGA AND KNOXVILLE, TENNESSEE: EDUCATIONAL RESERVATIONS

751. (a) **Proposed Reservations.** In the Third Notice the Commission proposed the following reservations for non-commercial educational use:

City	VHF Channel No.	UHF Channel No.
Chattanooga, Tenn.		*55
Knoxville, Tenn.		*20

(b) **Chattanooga.** The Board of Education of the Chattanooga Public Schools supported the reservation of Channel 55 for non-commercial educational use. No objections were made to the proposed reservation.

(c) **Knoxville.** The University of Tennessee supported the reservation of Channel 20 for non-commercial educational use. No objections were made to the reservation.

Conclusions

752. On the basis of the record, the reservations of Channels 55 and 20 at Chattanooga and Knoxville, respectively, are finalized.

KINGSPORT, TENNESSEE

753. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the assignment of one channel to Kingsport, Tennessee, UHF Channel 28.

(b) **Census Data.** The City of Kingsport has a population of 20,000.

(c) **Counterproposal of Kingsport Broadcasting Company.** The Kingsport Broadcasting Company requested the additional assignment of VHF Channel 2 to Kingsport without any other changes in the assignments proposed in the Third Notice.

(d) **Statement in Support of Kingsport Counterproposal.** Kingsport Broadcasting Company urged that the size, economic importance and population of Kingsport warranted the assignment of a VHF channel to that community. It was recognized that the assignment of Channel 2 to Kingsport would result in a co-channel separation of 159 miles to Greensboro, North Carolina, where that channel is also assigned but it was argued that consideration should be given by the Commission to the unusual terrain conditions which exist in the area. It was stated that a mountain range between Kingsport and Greensboro rises to an elevation of 5,000 feet or higher and that the normal separation required between transmitters should not apply in this instance. It was also urged that more television services could be made available if the required separations were reduced to 150 miles for VHF channels. Finally, it was asserted that if Channel 2 were assigned to Kingsport that the interference level could be held to that value contemplated by the Commission 170 mile rule for proposed transmitter to transmitter spacings by the proper site selection or reduction in power below 20 dbk or 100 kw.

Conclusions

754. It is our view that the counterproposal of the Kingsport Broadcasting Company, Inc., must be denied. The counterproposal would result in a co-channel assignment separation of 159 miles on Channel 2 between Kingsport and Greensboro, North Carolina in Zone II. The minimum co-channel assignment separation for this Zone is 190 miles. Elsewhere in this Report we have set forth the reasons for the denial of requests for a special class of low power stations and for assignments at reduced separations due to high intervening terrain. Accordingly, the counterproposal of Kingsport Broadcasting Company, Inc., is denied, and the assignments proposed by the Commission in the Third Notice for Kingsport are adopted.

BRISTOL, TENNESSEE AND BRISTOL, VIRGINIA

755. (a) **Proposed Assignments.** In the Third Notice, the Commission proposed to assign two channels to Bristol, Tennessee, VHF Channel 5 and UHF Channel 46; and did not propose the assignment of any channels to Bristol, Virginia.

(b) **Census Data.** The population of the City of Bristol, Tennessee, is 17,000 and the population of the City of Bristol, Virginia is 16,000.

(c) **Support of Proposed Assignments to Bristol.** Radio Phone Broadcasting Station supported the Commission's proposed assignment for Bristol, Tennessee, stating that the assignments proposed by the Commission were necessary to render service to that area.

(d) **Counterproposal of Appalachian Broadcasting Company, Bristol, Virginia.** Appalachian Broadcasting Company requested that the assignments proposed by the Commission to Bristol, Tennessee, also be assigned to Bristol, Virginia. It was urged that Bristol, Tennessee, and Bristol, Virginia, are adjacent municipalities separated by the state line; that although the two cities constitute one market, Bristol, Virginia, is, in many respects, the central community; that two colleges are located within the City of Bristol, Virginia, and that Bristol, Virginia compares favorably with Bristol, Tennessee, with respect to the number of retail stores, service establishments, wholesale establishments, manufacturing establishments and production works. No opposition was filed to the counterproposal of Appalachian Broadcasting Company.

Conclusions

756. It is our view that, on the basis of the common identity of the two communities, the assignments proposed in the Third Notice for Bristol, Tennessee, should be revised to provide those assignments to Bristol, Tennessee-Bristol, Virginia, rather than to Bristol, Tennessee, only. Accordingly, the assignments proposed by the Commission are revised to assign Channels 5 and 46 to Bristol, Tennesee-Bristol, Virginia.

NORTH CAROLINA EDUCATIONAL RESERVATIONS

757. (a) **Proposed Reservations.** In the Third Notice the Commission proposed the reservation of

---

[154] Capital Broadcasting Company opposed the principle of reservation for non-commercial educational use in general in addition to the specific objection at Nashville.

[155] Capital Broadcasting Company, Nashville, Tennessee, filed a Motion to Strike the affidavit of Luke Medley submitted in support of the WHUB counterproposal, on the grounds that it was argumentative and an expression of the opinion of the affiant in all material respects and that such factual statements as appear in it are not material or relevant to any of the issues in this proceeding. WHUB, Inc., filed an opposition to the Motion to Strike saying that the affidavit is not argumentative and that it is a statement of facts which is material and relevant to the issues in this proceeding. The Motion to Strike is DENIED since it goes only to the weight to be given to the evidence and not to its admissibility as evidence in this proceeding.

[156] In arriving at this conclusion we have not relied on the filing dated November 13, 1951, by the JCET.

the following assignments for non-commercial educational use:

City	VHF Channel No.	UHF Channel No.
Asheville		*56
Chapel Hill	*4	
Charlotte [157]		*42
Durham		*40
Greensboro		*51
Raleigh		*22
Wilmington		*35
Winston-Salem [157]		*32

(b) **Asheville.** Western Carolina Teachers College, Cullowhee, North Carolina; City of Asheville, the Asheville Chamber of Commerce and the Asheville Schools and the JCET supported the reservation of Channel 56 in Asheville. No objection was filed to the proposed reservation.

(c) **Chapel Hill.** The JCET, the Chapel Hill Schools and the Consolidated University of North Carolina supported the reservation of Channel 4 in Chapel Hill for non-commercial educational use. No objection was filed to the proposed reservation.

(d) **Durham.** The Durham City Schools, Durham, North Carolina, Duke University and the JCET supported the reservation of Channel 40 in Durham for non-commercial educational use. No objection was filed to the proposed reservation.

(e) **Greensboro.** The Greensboro Public Schools, the Agricultural and Technical College, Greensboro, North Carolina, and The Consolidated University of North Carolina, Chapel Hill, North Carolina, the Board of Trustees of Greensboro City Administrative Unit and the JCET supported the reservation of Channel 51 at Greensboro for non-commercial educational use. No objection was filed to the proposed reservation.

(f) **Raleigh.** The Consolidated University of North Carolina at Chapel Hill, Raleigh and Greensboro and the JCET supported the reservation of Channel 22 at Raleigh for non-commercial educational use. Incorporated in the filing of the JCET were letters from the Raleigh Public Schools and the East Carolina College, Greenville, North Carolina, supporting the reservation. No objection was filed to the proposed reservation.

(g) **Wilmington.** The Board of Education, New Hanover County and Wilmington Schools, the County Council of the P.T.A. of New Hanover County, Wilmington College and Williston College and the JCET supported the reservation of UHF Channel 35 in Wilmington for non-commercial educational use. Incorporated in the filing of the JCET was a telegram from the State Superintendent of Public Instruction supporting the Wilmington reservation. No objection was filed to the proposed reservation.

Conclusions

758. On the basis of the record the reservations of the following assignments for non-commercial educational television use are finalized:

City	VHF Channel No.	UHF Channel No.
Asheville		*56
Chapel Hill	*4	
Durham		*40
Greensboro		*51
Raleigh		*22
Wilmington		*35

[157] The Charlotte and Winston-Salem educational reservations are discussed and finalized in another portion of this Report.

SPARTANBURG, COLUMBIA, SOUTH CAROLINA AND MIDDLESBOROUGH, KENTUCKY

759. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the following assignments and reservation:

City	VHF Channel No.	UHF Channel No.
Columbia	7, 10	*19, 25
Spartanburg		17
Middlesborough	7	57

(b) **Census Data.** The standard metropolitan area of Columbia has a population of 143,000 and the City of Columbia has a population of 87,000. The City of Spartanburg has a population of 37,000. The City of Middlesborough has a population of 14,500.

(c) **Counterproposal of Spartan Radiocasting Company.** Spartan Radiocasting Company requested the assignment of VHF Channel 7 to Spartanburg by deleting this assignment from Columbia and making the following changes in the assignments proposed in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
University, Ala.	*7		*2†	
Rome, Ga.	9	59	7†	59
Middlesborough, Ky.	7	57	10†	57
State College, Miss.	*2		*4†	
Columbia, S. C.	7, 10	*19, 25	†, 10	*19, 25
Spartanburg, S. C.		17	7†	17
Chattanooga, Tenn.	3, 12	43, 49, *55	3, 9†	43, 49, *55
Knoxville, Tenn.	6, 10	*20, 26	6, 12†	*20, 26

(d) **Statement in Support of Spartan Radiocasting Company Counterproposal.** Spartan Radiocasting Company urged that the assignment of VHF Channel 7 to Spartanburg in lieu of the assignment of that channel to Columbia, South Carolina, would result in a fairer, more efficient and equitable distribution of the available frequencies. It was contended that under the Commission's proposed assignments no Grade A VHF service would be available to a substantial number of persons in the Spartanburg area, and that in view of the size and particularly the economic importance of Spartanburg as compared with Columbia that the assignment of Channel 7 to Spartanburg is to be preferred. It was further urged that the operation of Channel 7 at Spartanburg would render service to a greater area and population than would the operation of this channel at Columbia. With respect to the population of the respective communities it was asserted by Spartan Radiocasting Company that Spartanburg County, in which the City of Spartanburg is located, has a population of 150,349 whereas Richland County, in which the City of Columbia is located has a population of 142,565. The counterproposal would result in a 188 mile co-channel assignment separation on Channel 2 between University, Alabama, and WSB-TV at Atlanta in Zone II.

(e) **Oppositions and Conflicting Counterproposals to the Spartan Radiocasting Company Counterproposal.** Oppositions and conflicting counterproposals were filed by the following parties; Meridian Broadcasting Company, Meridian, Mississippi; Southeastern Broadcasting Company and Middle Georgia Broadcasting Company, Macon, Georgia; Johnstown Broadcasting Company and Voice of Dixie, Inc., Birmingham, Alabama; Tuscaloosa Broadcasting Company, Tuscaloosa, Alabama; Radio Athens, Inc., Athens, Georgia; The Broadcasting Company of the South and Intercity Advertising Company, Charlotte, North Carolina; Atlanta Newspapers, Inc., Atlanta, Georgia; Marseco Broadcasting Company, Palmetto Broadcasting Corp., and the City of Columbia, Columbia, S. C.

(f) Marseco Broadcasting Company, Palmetto Broadcasting Corp., and the City of Columbia urged that Columbia is the Capital of the State, that it is the largest city in the State and that it is centrally located within the State, that the population of the City of Columbia is 104,843 which is more than twice the population of the City of Spartanburg and is entitled under Section 307(b) of the Communications Act to a second VHF channel in preference to a first VHF to the City of Spartanburg. It was further urged that the economic importance and educational interests of the City of Columbia justified the retention of the second VHF channel in Columbia. Further, it was urged that evidence adduced on behalf of the counterproposal of Spartan Radiocasting Company did not include data with respect to the UHF services that would be available to the area that would be served by the operation of Channel 7 in Spartanburg and that in fact between four and eleven other services would be available to the Grade B service area of a station operating on Channel 7 in Spartanburg.

Columbia

760. **The Columbia Educational Reservation.** The JCET supported the reservation of Channel 19 at Columbia for non-commercial educational use. Attached to its filing was a sworn statement of Benedict College at Columbia expressing a definite interest in the channel. The JCET submitted sworn statements of support from the Mayor of Columbia, The University of South Carolina at Columbia, and the Superintendent of Schools in Columbia. No objections to the proposed reservation were filed.

Conclusions: Columbia Educational Reservation

761. On the basis of the record the reservation of Channel 19 at Columbia for non-commercial educational use is finalized.

Conclusions: Additional VHF Assignment to Spartanburg

762. We believe on the basis of the record that a VHF channel should be assigned to Spartanburg as proposed by Spartan Radiocasting Company. We have in this Report consistently followed the policy that cities of the size and importance of Spartanburg will be assigned a first VHF assignment before another community will be assigned a second VHF assignment. In view of the size of the City of Spartanburg and the extensive population living in the surrounding area in Spartanburg County, we believe the record requires the deletion of one of the two VHF assignments proposed for Columbia so that Spartanburg may receive a first VHF assignment. However, because of the mileage separation of 188 miles on Channel 2 between University, Alabama, and Atlanta, Georgia (WSB-TV), the Commission is unable to grant the proposal of Spartan Radiocasting Company. Channel 7, however, may be assigned to Spartanburg by the deletion of that channel from Middlesborough, Kentucky, a city of 14,500. We believe, on the basis of the record, in view of the size and importance of Spartanburg and the extensive population surrounding Spartanburg that Channel 7 should be deleted from Middlesborough, Kentucky, in order to make possible the assignment of Channel 7 to Spartanburg. We believe, however, in view of these reassignments that Channel 67 should be assigned to Columbia, South Carolina, and Channel 63 to Middlesborough, Kentucky.

Final Assignments and Reservation

763. The following assignments are adopted:

City	VHF Channel No.	UHF Channel No.
Columbia, S. C.	10	*19, 25, 67
Spartanburg, S. C.	7	17
Middlesborough, Ky.		57, 63

CHARLESTON, CLEMSON AND GREENVILLE, SOUTH CAROLINA

764. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Charleston	2, 5, *13	
Greenville	4	23, *29

No channel was assigned to Clemson in the Third Notice.

(b) **Charleston Educational Reservation.** The JCET supported the reservation of Channel 13 in Charleston for non-commercial educational use. Attached to its filing were statements of support from the Medical College of the State of South Carolina and the Charleston Public Schools at Charleston. The College stated that it has under construction a large teaching hospital and laboratory addition, and has provided in plans and specifications for the development of educational television. No objection was made to the proposed reservation.

(c) **Clemson Educational Reservation.** Clemson Agricultural College requested that a channel be assigned to Clemson and that it be reserved for educational use. Clemson College stated that it originates remote live broadcasts which are carried by Radio Stations WSPA, Spartanburg, and WIS, Columbia and that it furnishes a transcription service to 26 radio stations. The Board of Trustees indicated that they are planning to survey the matter of costs of con-

struction and operation of a television station, and that a television station would be used in the agricultural extension program of the College. Since Clemson has a population of approximately 3,000, the College stated that it was unlikely that a commercial station would be established in the community.

(d) **Statement in Support of Greenville Assignments.** Greenville News-Piedmont Company, Greenville, South Carolina, supported the Commission's proposed assignments for Greenville. It was asserted that the assignments proposed by the Commission meet the Commission's standards for minimum separation of co-channel and adjacent channel stations; that the operation of a VHF channel in Greenville would render service to a substantial population and area; that the wholesale and retail trade sales each approximate one-half billion dollars and that there are more than 100,000 employees within the coverage area of the station with a payroll of nearly a quarter of a million dollars. It was asserted that the importance of the area establishes the need for the assignments proposed by the Commission. No oppositions to the Commission's proposed assignments for Greenville have been filed in this proceeding.

(e) **The Greenville Educational Reservation.** Furman University at Greenville and JCET supported the reservation of Channel 29 in Greenville for use by a non-commercial educational station. The University stated that it was surveying the costs of construction and operation. The University reported that it has assets amounting to over 5 million dollars, and in addition is one of the beneficiaries in the Duke Endowment to the extent of 5 percent of the income from a fund of $40,000,000. The JCET submitted a statement of the School District of Greenville County in support of the reservation. No objection was made to the proposed reservation.

Conclusions

765. On the basis of the record the following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Charleston	2, 5, *13	
Clemson		*68
Greenville	4	23, *29

ATHENS, ATLANTA, MACON, GEORGIA

766. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Athens	*8	60
Atlanta	2, 5, 11	*30, 36
Macon	13	*41, 47

(b) **Census Data.** The City of Athens has a population of 28,000. The standard metropolitan area of Atlanta has a population of 672,000 and the City of Atlanta has a population of 331,000. The standard metropolitan area of Macon has a population of 135,000 and the City of Macon has a population of 70,000.

(c) **Existing Stations.** Broadcasting, Inc., is licensed for the operation of Station WLTV, Atlanta, Georgia, on Channel 8. The Commission ordered Broadcasting, Inc., formerly Atlanta Newspapers, Inc., to show cause why the license of WLTV (formerly WSB-TV) should not be modified to specify operation on Channel 11 in lieu of Channel 8. No opposition to the Order to Show Cause was filed by Broadcasting, Inc. The Fort Industry Company is licensed for the operation of Station WAGA-TV, Atlanta on Channel 5. Atlanta Newspapers, Inc., has a construction permit for Station WSB-TV, Atlanta, on Channel 2 an is operating under special authority.

Athens

767. (a) **The Athens Educational Reservation.** The University of Georgia supported the reservation of Channel 8 in Athens for non-commercial educational use. The University described its experience in producing radio and television programs over commercial stations. The University stated that its committee on television has been considering the problems presented by the construction and operation of an educational television station including such matters as the services to be rendered, programming methods, the cost of installation and annual operating costs, and the administrative organization. It estimated that the cost of constructing a television station would be between $250,000 and $300,000, and that by utilizing staff personnel it could operate with an annual budget of $100,000.

(b) **Counterproposals of Radio Athens, Inc.** Radio Athens, Inc. submitted two alternative counterproposals for the additional assignment of one commercial VHF channel to Athens. The first alternative counterproposal requested the reservation of UHF Channel 60 for non-commercial use in lieu of Channel 8 and the assignment of Channel 8 in Athens for commercial use. The second alternative proposal requested the assignment of VHF Channel 11 in Athens by making the following changes in the assignments proposed in the Third Notice:

City	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.	Third Notice VHF Channel No.	Third Notice UHF Channel No.
Huntsville, Ala.		31	11†	31
Athens, Ga.	*8	60	*8, 11†	60
Atlanta, Ga.	2, 5, 11	*30, 36	2, 5, 7†	*30, 36

(c) **Statement in Support of Radio Athens Counterproposals.** In support of the request for the reservation of a UHF channel in lieu of a VHF channel in Athens for non-commercial educational use, Radio Athens asserted that it had, in the operation of Station WRFC, cooperated with the University in the broadcast of educational programs; that the construction of an educational station would be delayed for a long period of time; and that commercial interests would construct a station immediately in order to meet the need for television service.

(d) In support of the counterproposal to add Channel 11 to Athens it was urged that the operation of Channel 11 in Athens would meet the Commission's requirements for minimum separation of co-channel and adjacent channel stations; that the closest co-channel separation resulting from the operation of Channel 11 in Athens would be at Johnson City, Tennessee, at a distance of 173 miles; that the closest adjacent channel separation under the counterproposal would be between Atlanta on Channel 7 and Athens on Channel 8 at a distance of 60 miles. It was further urged that the counterproposal would assign a second channel to Huntsville, Alabama.

(e) The counterproposal would, in addition, result in a co-channel assignment separation of 185 miles on Channel 7 between Atlanta and University, Alabama, in Zone II.

(f) **Oppositions and Conflicting Counterproposals to the Radio Athens Counterproposal.** Oppositions and conflicting counterproposals were filed by the following parties: Southeastern Broadcasting Company and Middle Georgia Broadcasting Company, Macon, Georgia; Spartan Radiocasting Company, Spartanburg, South Carolina; WEAS, Inc., Decatur, Georgia; Georgia Institute of Technology, Atlanta, Georgia; Johnstown Broadcasting Company and Voice of Dixie, Inc., Birmingham, Alabama; Broadcasting, Inc., Atlanta, Georgia and WJKL, Inc., Johnson City, Tennessee.

Atlanta

768. (a) **Counterproposals of WEAS, Inc., Decatur, Georgia and Georgia Institute of Technology, Atlanta, Georgia.** WEAS, Inc. requested the assignment of Channel 8 to Atlanta by the deletion of that channel from Athens, where it was proposed to be reserved by the Commission for non-commercial educational use. In identical counterproposals the Georgia Institute of Technology and WEAS, Inc., requested the additional assignment of Channel 7 to Atlanta. The addition of Channel 7 to Atlanta would be accomplished with no other changes in the assignments proposed in the Third Notice.

(b) **Statement in Support of the WEAS and Georgia Institute of Technology, Counterproposal.** In support of its counterproposals to assign Channel 8 to Atlanta by deleting this assignment from Athens WEAS urged that the Atlanta area was the most important center of industry and population in the entire south and that a nationwide television service required at least four commercial VHF stations in Atlanta. It was further asserted that Atlanta would be deprived of service by one of the major networks unless it was assigned four commercial VHF channels.

(c) In support of the identical counterproposal of Georgia Institute and WEAS it was urged that the assignment of Channel 7 to Atlanta would not violate any of the Commission's standards for minimum separation of co-channel and adjacent channel stations; that the nearest co-channel assignment resulting from its counterproposal would be at University, Alabama, a distance of 185 miles, and the nearest adjacent channel assignment would be Channel 8 at Athens, Georgia, at a distance of 60 miles. It was further urged that the assignment of Channel 7 to Atlanta would result in a net gain of VHF service to a substantial area and population.

(d) **Conflicting Counterproposals to the WEAS and Georgia Institute of Technology Counterproposals.** Conflicting counterproposals were filed by the following parties: Radio Athens, Inc., Athens, Georgia; Southeastern Broadcasting Company and Middle Georgia Broadcasting Co., Macon, Georgia; Johnstown Broadcasting Co. and Voice of Dixie, Inc., Birmingham, Alabama; Spartan Radiocasting Co., Spartanburg, S. C.; and Broadcasting Company of the South and Intercity Advertising Co., Charlotte, North Carolina.

(e) **The Atlanta Educational Reservation.** The Atlanta Board of Education supported the reservation of Channel 30 in Atlanta for non-commercial educational use. The Board of Education stated that it has been licensed to operate a non-commercial educational FM station, WABE-FM since 1949; that the facilities of this station have been made available to six public school systems, serving 4,100 classrooms and 125,000 students; and that the Board has one of the finest film libraries which would be available for use on television. It was also stated that various FM programs produced by the Board could be adopted for television presentation. No objection was filed to the proposed reservation.

Macon

769. (a) **The Macon Educational Reservation.** The JCET supported the reservation of Channel 41 in Macon, Georgia, and submitted a statement in support of this reservation from Mercer University at Macon. No objections to the proposed reservation were filed.

(b) **Joint Counterproposal of Southeastern Broadcasting Company and Middle Georgia Broadcasting Company.** In a joint counterproposal Southeastern Broadcasting Company and Middle Georgia Broadcasting Company requested the additional assignment of Channel 7 to Macon, Georgia. No other changes in the assignments proposed in the Third Notice were requested.

(c) **Statement in Support of Southeastern Broadcasting Company and Middle Georgia Broadcasting Company Counterproposal.** It was urged that the assignment of Channel 7 to Macon was in accordance with the Commission's standard for minimum separation of co-channel and adjacent channels. It was stated that the closest co-channel separation to Macon on Channel 7 would be at Columbia, South Carolina, at a distance of 170 miles. Further it was urged that the operation of Channel 7 at Macon would result in a net gain of service to a substantial area and population.

(d) **Oppositions and Conflicting Counterproposals to Southeastern Broadcasting Company and Middle Georgia Broadcasting Company Counterproposal.** Oppositions and conflicting counterproposals were filed by the following parties: Radio Athens, Inc., Athens, Georgia; WEAS, Inc., Decatur, Georgia; Georgia Institute of Technology, Atlanta, Georgia; Spartan Radiocasting Company, Spartanburg, South Carolina; Broadcasting

Company of the South and Intercity Advertising Company, Charlotte, North Carolina and Marseco Broadcasting Company, Columbia, South Carolina.

Conclusions: Athens Educational Reservation

770. The request of Radio Athens, Inc., for the shift of the educational reservation in Athens to a UHF channel is based on the asserted need of that city for the assignment of a VHF commercial channel. The request of WEAS, Inc., for the deletion of Channel 8 from Athens in order to assign that channel to Atlanta is based on the asserted need of Atlanta for a fourth VHF channel. On the other hand, the University of Georgia has established its interest in constructing a station to serve the community and believes that the maintenance of the reservation will serve to aid the University in its plan.

771. With respect to the request of WEAS, Inc., we find no merit in the deletion of the only VHF channel from Athens to provide a fourth VHF channel to Atlanta. With respect to both requests for the deletion of the reservation it is to be noted that Athens has been designated as a "primarily educational center." In the Third Notice, we stated that we would reserve, where possible, a VHF channel for non-commercial use in primarily educational centers. We see no basis in the record for deviating here from this policy. Accordingly, the counterproposal of Radio Athens, Inc., is denied in so far as it requests the reservation of a UHF channel in lieu of a VHF channel in Athens for noncommercial educational use; and the counterproposal of WEAS, Inc., for the deletion of Channel 8 from Athens is denied. The reservation of VHF Channel 8 in Athens for non-commercial educational use is finalized.

Conclusions: Requests for Additional VHF Assignments in Athens, Atlanta and Macon

772. The counterproposals seeking the additional assignment of a VHF channel to Athens, Atlanta and Macon, respectively would result in the following co-channel assignment separations below 190 miles in Zone II:

Counterproposal	Channel	Cities	Miles
Radio Athens, Inc. (II)	11	Athens—Johnson City	173
Radio Athens, Inc. (II)	7	Atlanta—University	185
WEAS, Inc. & Ga. Inst. of Tech.	7	Atlanta—University	185
S. E. Broadcasting Co. & Middle Georgia Broadcasting Co.	7	Macon—Columbia	170

Since the minimum separation of co-channel stations in Zone II is 190 miles these counterproposals must be denied. Accordingly, the counterproposals of Radio Athens, WEAS, Inc., Georgia Institute of Technology, Southeastern Broadcasting Company and Middle Georgia Broadcasting Company, are denied.

773. An appropriate authorization will be issued to Broadcasting, Inc., to specify operation of WLTV on Cannel 11.

Conclusions: Atlanta and Macon Educational Reservations

774. On the basis of the record the reservation of Channel 30 in Atlanta and Channel 41 in Macon are finalized.

Final Assignments and Reservations

775. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Athens	*8	60
Atlanta	2, 5, 11	*30, 36
Macon	13	*41, 47

COLUMBUS AND SAVANNAH, GEORGIA, EDUCATIONAL RESERVATIONS

776. (a) **Proposed Reservations.** In the Third Notice the Commission proposed to reserve the following assignments for non-commercial educational use:

City	VHF Channel No.	UHF Channel No.
Columbus		*34
Savannah	*9	

(b) **Columbus.** The JCET supported the reservation of Channel 34 in Columbus for non-commercial educational use. No objection was made to the reservation.

(c) **Savannah.** The JCET supported the reservation of Channel 9 in Savannah for non-commercial educational use. No objection was made to the proposed reservation.

Conclusions

777. On the basis of the record the reservation of Channels 34 and 9 in Columbus and Savannah, respectively, for non-commercial educational use is finalized.

DAYTONA BEACH AND TALLAHASSEE, FLORIDA

778. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the following assignments and reservation:

City	VHF Channel No.	UHF Channel No.
Daytona Beach	2	
Tallahassee	2, *11	24

(b) The foregoing proposed assignments would result in a separation of 214 miles between Daytona Beach and Tallahassee on Channel 2 in Zone III.

(c) **Census Data.** The City of Daytona Beach has a population of 30,000. The City of Tallahassee has a population of 27,000.

(d) **Tallahassee Educational Reservation.** The JCET and Florida State University supported the reservation of VHF Channel 11 in Tallahassee for non-commercial educational use. The University stated that the reservation was necessary to provide it with the time to obtain funds and organize its resources. No objection to the reservation was filed.

Conclusions: Deletion of Proposed VHF Assignment

779. In the Third Notice the Commission proposed the assignment of Channel 2 to Daytona Beach and Tallahassee at a separation of 214 miles in Zone III. Since this separation in Zone III is below the minimum adopted herein for zone III we are required to delete one of the two assignments to comply with the separation requirements. The population of Daytona Beach is somewhat larger than the population of Tallahassee and Channel 2 is the only assignment proposed for Daytona Beach. On the other hand three channels were proposed to be assigned to Tallahassee. In view of the relative size of these cities and the number of channels proposed to be assigned to these cities, we believe the deletion of Channel 2 from Tallahassee and the assignment of that channel to Daytona Beach is warranted. In replacement for Channel 2 in Tallahassee we are assigning UHF Channel 51.

Conclusions: Tallahassee Educational Reservation

780. On the basis of the record the reservation of Channel 11 in Tallahassee for non-commercial educational use is finalized.

Final Assignments and Reservation

781. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Daytona Beach	2	
Tallahassee	*11	24, 51

PENSACOLA, FLORIDA, ALBANY, GEORGIA AND JACKSON, MISSISSIPPI

782. (a) **Proposed Assignments and Reservations:** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Pensacola	3, 10	15, *21
Albany	10	25
Jackson	3, 12	*19, 25

(b) The foregoing proposed assignments would result in the following separations below 220 miles in Zone III:

Channel	Cities	Separation
3	Pensacola-Jackson	218
10	Pensacola-Albany	199

(c) **Census Data.** The City of Pensacola has a population of 43,000. The City of Albany has a population of 31,000. The standard metropolitan area of Jackson has a population of 142,000. The City of Jackson has a population of 98,000.

Pensacola

783. **The Educational Reservation.** C. P. Mason, Mayor of Pensacola, supported the reservation of UHF Channel 21 in Pensacola for non-commercial educational use. No objection to the reservation was filed.

Jackson

784. (a) **Counterproposal of Lamar Life Insurance Co., Jackson, Mississippi.** Lamar Life Insurance Company requested the additional assignment of VHF Channel 5 to Jackson by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposal VHF Channel No.	Proposal UHF Channel No.
Jackson	3, 12	*19, 25	3, 5†, 12	*19, 25
Mobile	5, 8	*42, 48	8, 10†	*42, 48
Pensacola	3, 10	15, *21	3, 5†	15, *21

(b) **Statement in Support of Lamar Life Insurance Co. Counterproposal.** It was asserted that the assignment of VHF Channel 5 to Jackson would not result in the reduction of the number of VHF assignments proposed by the Commission for any other city in the Third Notice; and that the lowest co-channel separation resulting under the counterproposal would be Lafayette, Louisiana, on Channel 5 at a distance of 180 miles. The counterproposal would, in addition, result in the following co-channel assignment separations below 220 miles in Zone III:

Channel	Cities	Mileage
5	Pensacola, Fla.-Jackson, Miss.	218
10	Mobile, Ala.-Baton Rouge, La.	188

(c) **Oppositions and Conflicting Counterproposals to the Lamar Life Insurance Co. Counterproposal.** The following parties filed oppositions and conflicting counterproposals to the counterproposal of Lamar Life Insurance Co.: Giddens and Rester, Mobile, Alabama; the Houston Post Co., licensee of Station KPRC-TV, Houston, Texas; Voice of Longview, Longview, Texas; and Deep South Broadcasting Co., Montgomery, Alabama.

(d) **The Jackson Educational Reservation.** The JCET supported the reservation of UHF Channel 19 in Jackson for non-commercial educational use. No objection to the reservation was filed.

Conclusions: Deletion of Proposed Assignment

785. In the Third Notice the Commission proposed the assignment of Channel 3 to Pensacola and to Jackson at a separation of 218 miles; and the assignment of Channel 10 to Pensacola, and to Albany at a separation of 199 miles. Since these separations are below the minimum for Zone III we are required to delete one assignment of Channel 3 and one assignment of Channel 10 to provide the requisite seperations.

786. With respect to Channel 10 we are presented with the choice of deleting that channel from Pensacola or Albany. The City of Pensacola with a population of 43,000 is somewhat larger than the City of Albany. In the Third Notice two VHF and two UHF channels were proposed to be assigned to Pensacola, and only one VHF and one UHF channel were proposed to be assigned to Albany. In view of the fact that Channel 10 is the only channel proposed for Albany we believe that the deletion of that channel from Pensacola and the assignment to Albany is warranted. In replacement for Channel 10 in Pensacola we are assigning UHF Channel 46. With respect to Channel 3 we are presented with the choice of deleting that channel from Pensacola or from Jackson. The City of Jackson has a population of 98,000 and the standard metropolitan area has a population of 142,000. In the Third Notice we proposed the assignment of two VHF and two UHF channels to Jackson. Since our decision herein has deleted Channel 10 from Pensacola, there remains assigned to that city only one VHF channel. It is our view that the deletion of the second channel assigned to Jackson is to be preferred to the deletion of the only remaining VHF channel assigned to Pensacola. In replacement for VHF Channel 10 in Jackson we are assigning UHF Channel 47.

Conclusions: Request for VHF Assignment in Jackson

787. Since the counterproposal of Lamar Life Insurance Company for the assignment of Channel 5 to Jackson would create a co-channel assignment separation of 180 miles between Jackson and Lafayette, Louisiana, on Channel 5, 218 miles between Pensacola, Florida, and

Jackson, Miss., on Channel 5, and 188 miles between Mobile, Alabama and Baton Rouge, Louisiana, on Channel 10, in Zone III, the counterproposal is denied.

Conclusions: Jackson Educational Reservation

788. On the basis of the record the reservation of UHF Channel 21 in Pensacola and UHF Channel 19 in Jackson are finalized.

Final Assignments and Reservations

789. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Pensacola, Fla.	3	15, *21, 46
Albany, Ga.	10	25
Jackson, Miss.	12	*19, 25, 47

AUBURN, MOBILE, AND UNIVERSITY, ALABAMA EDUCATIONAL RESERVATIONS

790. (a) Proposed Reservations. In the Third Notice the Commission proposed the following reservations for non-commercial educational use:

City	VHF Channel No.	UHF Channel No.
Auburn		*56
Mobile		*42
University	*7	

(b) **Auburn.** The Alabama Polytechnic Institute and JCET supported the reservation of Channel 56 in Auburn for non-commercial educational use. No objection was filed to this proposed reservation.

(c) **Mobile.** The JCET and the Mobile Public Schools supported the reservation of Channel 42 in Mobile for non-commercial educational use. No objection to the proposed reservation was filed.

(d) **University.** The University of Alabama supported the reservation of Channel 7 in University for non-commercial educational use, and submitted letters in support of the reservation of VHF Channel 7 from the Superintendent, City Schools, Tuscaloosa, Alabama, the Superintendent of the Tuscaloosa County Schools and the State Superintendent of Education. The University of Alabama stated through its President that it has had more than twenty years of experience in educational radio broadcasting and that "It is our sincere hope that we shall be able to begin operating our own television station within a period of two or three years following the final allocation of television channels." No one objected to the proposed reservation of VHF Channel 7 for educational purposes in University, Alabama.[158]

Conclusions

791. On the basis of the record, the following reservations for non-commercial educational use are finalized:

City	VHF Channel No.	UHF Channel No.
Auburn		*56
Mobile		*42
University	*7	

BIRMINGHAM, MONTGOMERY, AND TUSCALOOSA, ALABAMA

792. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Birmingham	6, *10, 13	42, 48
Montgomery	12	20, *26, 32
Tuscaloosa		45, 51

(b) **Census Data.** The standard metropolitan area of Birmingham has a population of 559,000 and the City of Birmingham has a population of 326,000. The standard metropolitan area of Montgomery has a population of 139,000 and the City of Montgomery has a population of 107,000. The City of Tuscaloosa has a population of 46,000.

(c) **Existing Stations.** Voice of Alabama, Inc., is licensed for the operation of Station WAFM-TV, Birmingham, Alabama, on Channel 13. Birmingham Broadcasting Company is licensed for the operation of Station WBRC-TV, Birmingham, Alabama, on Channel 4. The Commission ordered Birmingham Broadcasting Company to show cause why the license of WBRC should not be modified to specify operation on Channel 6 in lieu of Channel 4. Birmingham Broadcasting Company stated that it did not object to the modification of license of WBRC-TV to specify Channel 6.

Birmingham

793. (a) **The Birmingham Educational Reservation.** The Jefferson County Board of Education and the JCET supported the reservation of Channel 10 in Birmingham for non-commercial educational use. The Jefferson County Board of Education requested the permanent reservation of VHF Channel 10 until the five public school systems and three institutions of higher learning in Jefferson County could perfect arrangements for establishing and maintaining an educational television station.

(b) **Counterproposals of Johnston Broadcasting Company and Voice of Dixie, Inc., Birmingham, Alabama.** Johnstown Broadcasting Company and Voice of Dixie, Inc., in separate counterproposals, requested the additional assignment of Channel 7 to Birmingham. Johnstown Broadcasting Company requested the assignment of Channel 7 by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Birmingham, Ala.	6, *10, 13	42, 48	6, 7†, *10, 13	42, 48
University, Ala.	*7		*2†	
State College, Miss.	*2		*4†	

Voice of Dixie, Inc., requested the additional assignment of Channel 7 by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Birmingham, Ala.	6, *10, 13	42, 48	6, 7†, *10, 13	42, 48
University, Ala.	*7		*2†	
Meridian, Miss.	11	30, *36	4†	30, *36
State College, Miss.	*2		*8†	
West Point, Miss.	8	56	11†	56

(c) **Statement in Support of Johnston Broadcasting Company and Voice of Dixie, Inc. Counterproposals.** In support of both counterproposals for the additional assignment of Channel 7 to Birmingham it was urged that two stations are presently on the air in Birmingham and that there are 60,000 sets in the area that would receive service from the operation of an additional VHF station in that community. It was also urged that UHF stations are undesirable in the Birmingham area because of the mountainous terrain, and because licensees of UHF stations would not be able to compete successfully with VHF operations. In addition it was urged by Voice of Dixie, Inc., that a grant of its counterproposal would permit the operation of Channel 11 in Biloxi as requested by Deep South Broadcasting Company. The counterproposals would result in the following co-channel assignment separations:

Channel	Cities	Mileage	Zone
2	University, Ala.—Atlanta, Ga. (WSB-TV)	188	II
4	Meridian, Miss.-New Orleans, La.	185	III

(d) **Oppositions and Conflicting Counterproposals to Johnstown Broadcasting Co. and Voice of Dixie, Inc.** Oppositions and conflicting counterproposals were filed by the following parties: WEAS, Inc. and Georgia Institute of Technology, Atlanta, Georgia, Radio Athens, Inc., Athens, Georgia, Tuscaloosa Broadcasting Co., Tuscaloosa, Ala., Spartan Radiocasting Co., Spartanburg, S. C., Atlanta Newspapers, Inc. (now Broadcasting, Inc.), Atlanta, Ga., and Deep South Broadcasting Co., Montgomery, Ala.

Montgomery

794. (a) **Counterproposal of Deep South Broadcasting Company.** Deep South Broadcasting Company requested the additional assignment of VHF Channel 3 to Montgomery by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Montgomery, Ala.	12	20, *26, 32	3†, 12	20, *26, 32
Pensacola, Fla.	3, 10	15, *21	10, 13†	15, *21
Biloxi, Miss.	13	*44, 50	11†	*44, 50
Meridian, Miss.	11	30, *36	4†	30, *36

(b) **Statement in Support of Deep South Broadcasting Company Counterproposal.** Deep South urged that the assignment of VHF Channel 3 to Montgomery and the other changes requested in the counterproposal are in accordance with the Commission's standards for minimum co-channel and adjacent channel station separation. It was stated that the nearest co-channel assignment to Montgomery on Channel 3 would be at Chattanooga at a distance of 193 miles and that the nearest adjacent channel would be at Columbus, Georgia, on Channel 4 at a distance of 77 miles. In further support of the counterproposal it was urged that the size, economic importance and population of Montgomery required the assignment of a second VHF channel to that community. The counterproposal would result in a 185-mile co-channel assignment separation between Meridian, Miss., and New Orleans, La., on Channel 4 in Zone III.

(c) **Oppositions and Counterproposals to Deep South Broadcasting Co. Counterproposal.** Oppositions to the counterproposal of Deep South Broadcasting Company were filed by the following parties: Loyola University of the South, New Orleans, La., Lamar Life Insurance Company, Jackson, Miss., Meridian Broadcasting Co., Meridian, Miss., Tuscaloosa Broadcasting Co., Tuscaloosa, Ala., Voice of Dixie, Inc., and Johnston Broadcasting Co., Birmingham, Ala.

(d) **The Montgomery Educational Reservation.** The Montgomery Public Schools and the JCET supreported the reservation of Channel 26 in Montgomery for non-commercial educational use. No Objection was filed to the proposed reservation.

Tuscaloosa

795. (a) **Counterproposal of Tuscaloosa Broadcasting Company.** Tuscaloosa Broadcasting Company requested the additional assignment of VHF Channel 2 to Tuscaloosa. This additional assignment of Channel 2 to Tuscaloosa would be accomplished by the substitution of Channel 4 for educational

[158] The Tuscaloosa Broadcasting Company, Tuscaloosa, Ala., proposed as part of one of its plans to add a VHF channel in Tuscaloosa to shift the VHF channel in University, Ala., from VHF Channel 7 to VHF Channel 2. The same shift for University, Ala., was proposed by the Voice of Dixie, Inc., Birmingham, Ala., as part of its plan to add VHF Channel 7 to Birmingham. Neither company objected to the reservation of a VHF channel in University, Ala. The Commission has, however, in another portion of this Report denied the requests of the Tuscaloosa Broadcasting Company, Tuscaloosa, Ala., and the Voice of Dixie, Inc., Birmingham, Ala. Accordingly, no shift in the proposed VHF reservation is required.

use in State College, Miss., as follows: [159]

City	Third Notice		Counterproposal 1	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Tuscaloosa, Ala.		45, 51	2†	45, 51
State College, Miss.	*2		*4†	

(b) **Statement in Support of Tuscaloosa Broadcasting Co. Counterproposal.** It was urged that the additional assignment of Channel 2 to Tuscaloosa would meet the Commission's standards for minimum separation of co-channel and adjacent channel stations. It was urged that the operation of Channel 2 in Tuscaloosa would provide service to a substantial area and population. The counterproposal would result in a 188 mile co-channel assignment separation between University and WSB-TV at Atlanta on Channel 2 in Zone II.

(c) **Oppositions and Conflicting Counterproposals to Tuscaloosa Broadcasting Co. Counterproposal.** Oppositions and conflicting counterproposals were filed by the following parties: Spartan Radiocasting Co., Spartanburg, S. C., Johnstown Broadcasting Co., and Voice of Dixie, Inc., Birmingham, Ala., Deep South Broadcasting Co., Montgomery, Ala., Atlanta Newspapers, Inc., Atlanta, Ga., and Meridian Broadcasting Co., Meridian, Miss.

Conclusions: The Birmingham and Montgomery Educational Reservations

796. On the basis of the record the reservations of Channel 10 in Birmingham and Channel 26 in Montgomery, for non-commercial educational use are finalized.

Conclusions: Requests for Additional VHF Assignments in Birmingham, Montgomery and Tuscaloosa

797. The counterproposals seeking the additional assignment of a VHF channel to Birmingham, Montgomery, and Tuscaloosa, respectively, would result in the following co-channel assignment separations:

Counterproposal	Channel
Johnstown Broadcasting Co.	2
Voice of Dixie, Inc.	2
Voice of Dixie, Inc.	4
Deep South B/cng. Co.	4
Deep South B/cng. Co.	4

798. Since the minimum separations of co-channel stations in Zones II and III are 190 and 220 miles, respectively, these counterproposals must be denied. Accordingly, the counterproposals of Johnstown Broadcasting Co., Voice of Dixie, Inc., Deep South Broadcasting Co., and Tuscaloosa Broadcasting Co. are denied.

799. **Conclusions: Show Cause Order.** An appropriate authorization will be issued to Birmingham Broadcasting Company to specify operation of Station WBRC-TV on Channel 6 in lieu of Channel 4.

Final Assignments and Reservations

800. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Birmingham	6, *10, 13	42, 48
Montgomery	12	20, *26, 32
Tuscaloosa		45, 51

MERIDIAN, MISSISSIPPI

801. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposes the following assignments and reservation:

City	VHF Channel No.	UHF Channel No.
Meridian	11	30, *36

(b) **Census Data.** The City of Meridian has a population of 42,000.

(c) **Counterproposal of Meridian Broadcasting Company, Meridian, Mississippi.** Meridian Broadcasting Company requested the additional assignment of VHF Channel 4 to Meridian. No other changes in the assignments proposed in the Third Notice were requested. The counterproposal of Meridian Broadcasting Company is mutually exclusive with the counterproposals of Tuscaloosa Broadcasting Company, Tuscaloosa, Ala., Voice of Dixie, Inc., and Johnstown Broadcasting Co., both of Birmingham, Ala.

Cities	Miles	Zone
University-Atlanta (WSB-TV)	188	II
University-Atlanta	188	II
Meridian-New Orleans	185	III
Meridian-New Orleans	185	III
University-Atlanta (WSB-TV)	188	II

However, it was suggested by Meridian Broadcasting Company that the conflict between the counterproposals requesting an additional assignment to Tuscaloosa and Meridian could be resolved as follows:

City	Third Notice		Counterproposal	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Tuscaloosa, Ala.		45, 51	2†	45, 51
Meridian, Miss.	11	30, *36	4†, 11	30, *36
State College, Miss.	*2		*8†	
West Point, Miss.	8	56	†	56

Alternatively it was also suggested by Meridian Broadcasting Company that the conflict between the counterproposals seeking an additional assignment to Birmingham and Meridian could be resolved as follows:

City	Third Notice		Counterproposal	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Birmingham, Ala.	6, *10, 13	42, 48	6, 7†, *10, 13	42, 48
University, Ala.	*7		*2†	
Meridian, Miss.	11	30, *36	4†, 11	30, *36
State College, Miss.	*2		*8†	
West Point, Miss.	8	56	†	56

(d) **Statement in Support of Meridian Broadcasting Company Counterproposals.** Meridian Broadcasting Company urged that the City of Meridian is the second largest city in the State of Mississippi; that the size, population and economic importance of Meridian warrant the assignment of a second VHF channel to that community; that the population of the city is largely rural and that television service must be supplied to such rural areas by the operation of VHF stations rather than by the operation of UHF stations. It was urged that the operation of Channel 4 in Meridian, Mississippi, would provide service to a substantial area and population. The three alternative counterproposals would each result in a 185-mile co-channel separation on Channel 4 between Meridian and New Orleans in Zone III.

(e) **Oppositions and Conflicting Counterproposals to Meridian Counterproposals.** In addition to the two parties mentioned above oppositions and conflicting counterproposals were filed by the following parties: Deep South Broadcasting Co., Montgomery, Ala., and Spartan Broadcasting Co., Spartanburg, S. C.

(f) **The Meridian Educational Reservation.** Meridian Municipal Junior College and the JCET supported the reservation of Channel 36 in Meridian for non-commercial educational use. No party objected to the reservation.

Conclusions: Educational Reservation

802. On the basis of the record the reservation of Channel 36 in Meridian, for non-commercial educational use is finalized.

Conclusions: Request for Additional VHF Assignment in Meridian

803. The counterproposals seeking the additional assignment of a VHF channel to Meridian would result in a 185 mile co-channel assignment separation on Channel 4 between Meridian and New Orleans in Zone III. Since the minimum separation of a co-channel station in Zone III is 220 miles this counterproposal must be denied. Accordingly, the counterproposal of Meridian Broadcasting Company is denied.

Final Assignments and Reservation

804. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Meridian	11	30, *36

BILOXI, STATE COLLEGE AND UNIVERSITY, MISSISSIPPI EDUCATIONAL RESERVATIONS

805. (a) **Proposed Reservations.** In the Third Notice the Commission proposed the following reservations for non-commercial educational use:

City	VHF Channel No.	UHF Channel No.
Biloxi		*44
State College	*2	
University		*20

(b) **Biloxi.** The JCET supported the reservation of Channel 44 at Biloxi for non-commercial educational use. No objections were filed to the reservation.

(c) **State College.** Mississippi State College and the JCET supported the reservation of VHF Channel 2 for a non-commercial educational television station at State College, Mississippi. It was pointed out that Mississippi State College is the land grant institution of the State and as such it anticipated using television to bring programs of interest to the farm population of Mississippi. The College also anticipated that the television station would serve as an important training ground for students. Included with the Joint Committee's filing was a sworn statement of the Mississippi State College for Women supporting the reservation.[160] No objection was filed to the proposed reservation.

(d) **University.** The University of Mississippi and the Board of Trustees for State Institutions of Higher Learning supported the reservation of UHF Channel 20 in University for non-commercial educational use. No objection was filed to the proposed reservation.

CONCLUSIONS

806. On the basis of the record the following reservations for non-commercial educational use are finalized:

City	VHF Channel No.	UHF Channel No.
Biloxi		*44
State College	*2	
University		*20

FORT LAUDERDALE, GAINESVILLE, JACKSONVILLE, ORLANDO, PANAMA CITY, WEST PALM BEACH, FLORIDA

807. **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Fort Lauderdale		17, 23
Gainesville	*5	20
Jacksonville	4, *7, 12	30, 36
Orlando	6, 9	18, *24
Panama City	7	*30, 36
West Palm Beach	5, 12	*15, 21

Fort Lauderdale

808. (a) **Census Data.** The City of Fort Lauderdale has a population of 36,000.

(b) **Counterproposal of Gore Publishing Company.** Gore Publishing Company requested the assignment of Channel 9 to Fort

[159] Tuscaloosa Broadcasting Company filed an alternate counterproposal requesting the additional assignment of Channel 8 to Tuscaloosa. Tuscaloosa Broadcasting Company made this alternative counterproposal contingent upon the second alternative counterproposal of WREC Broadcasting Service and WMPS, Inc., Memphis, Tennessee. Under the alternative counterproposal of Tuscaloosa Broadcasting Company it was requested that in addition to the changes of the proposed assignments in the Commission's Third Notice set forth in the second alternative of the Memphis proposal, Tuscaloosa Broadcasting Company would make five other changes in the Commission's proposed assignments. Elsewhere in this Report we have denied the second alternative counterproposal of the Memphis parties. Since the alternative counterproposal of Tuscaloosa Broadcasting Company was made expressly contingent upon the grant of that second alternative counterproposal of the Memphis parties the alternative counterproposal of the Tuscaloosa Broadcasting Company will not be discussed further.

[160] Voice of Dixie, Inc., Birmingham, Ala., Tuscaloosa Broadcasting Company, Tuscaloosa, Ala., Hoyt B. Wooten, d/b as WREC Broadcasting Service and WMPS, Inc., Memphis, Tenn., and Spartan Radiocasting Company, Spartanburg, S. C., proposed to delete VHF Channel 2 from State College, Miss., and substitute another VHF channel there as part of a plan to add another VHF channel to their respective cities. No such shift is required, however, since these counterproposals have been denied for the reasons stated elsewhere in this Report.

Lauderdale by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice		Proposal	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Fort Myers	11		12†	
Fort Lauderdale		17, 23	9†	17, 23
Miami	*2, 4, 7, 10		*2, 4, 7, 13†	*15, 21
West Palm Beach	5, 12	*15, 21	5, 11†	

(c) Statement in Support of Gore Publishing Company Counterproposal. Gore Publishing Company urged that Fort Lauderdale, with a population of 37,000 persons had increased by 100% since 1940; that during the tourist season the population of Fort Lauderdale exceeds 100,000; that of the 248 cities in the United States with a population between 25,000 to 50,000 Fort Lauderdale ranks 19th in total retail sales; that the assignments proposed by the Commission were inadequate to meet the needs of the Fort Lauderdale community; and that the assignment of a first VHF channel to that community would result in a fair, equitable and efficient distribution of the available channels.

(d) Oppositions and Conflicting Counterpproposals to Gore Publishing Company Counterproposal. Oppositions and conflicting counterproposals to the counterproposal of Gore Publishing Company with filed by Miami Broadcasting Company, Isle of Dreams Broadcasting Corporation, the Fort Industry Company and WKAT, Inc.

(e) The Gore Publishing Company counterproposal would result in a co-channel separation of 183 miles on Channel 9 between Fort Lauderdale and Orlando in Zone III.

Gainesville

809. **The Educational Reservation.** The JCET supported the reservation of VHF Channel 5 in Gainesville for non-commercial educational use. No objection to the reservation was filed.

Jacksonville

810. (a) **Census Data.** The standard metropolitan area of Jacksonville has a population of 304,000. The City of Jacksonville has a population of 205,000.

(b) **Existing Stations.** Florida Broadcasting Company is licensed for the operation of WMBR-TV, Jacksonville on Channel 4.

(c) Counterproposal of Jacksonville Broadcasting Corporation. Jacksonville Broadcasting Corporation requested the additional assignment of Channel 10 to Jacksonville. No other changes in the assignments proposed by the Commission in the Third Notice were requested.

(d) Statement in Support of Jacksonville Broadcasting Corporation Counterproposal. Jacksonville Broadcasting Corporation urged that the nearest assignments on Channel 10 proposed by the Commission are at Tampa—St. Petersburg, and Albany; that the distance from Jacksonville to Albany and to Tampa is 171 miles, the distance to St. Petersburg is 186 miles. It was further stated that the nearest adjacent channel assignments would be to Orlando on Channel 9 at a distance of 124 miles from Jacksonville. It was stated that the operation of Channel 10 in Jacksonville would cause interference within the Grade B service of the Albany station and to the operation of Channel 10 in Tampa. It was urged, however, that two or more services would be provided from the operation of other stations to the area receiving interference.

(e) Opposition to the Jacksonville Broadcasting Corporation Counterproposal. The Tribune Company, Tampa, Florida, opposed the counterproposal of Jacksonville Broadcasting Corporation urging that the operation of Channel 10 in Jacksonville might preclude the use of Channel 10 in Tampa.

(f) Counterproposal of City of Jacksonville, Jacksonville, Florida. The City of Jacksonville requested the additional assignment of VHF Channel 2 to Jacksonville by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice		Proposal	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Daytona Beach, Fla.	2		11†	
Jacksonville, Fla.	4, *7, 12	30, 36	2†, 4, *7, 12	30, 36
Tallahassee, Fla.	2, *11	24	6†, *11	24
Thomasville, Ga.	6	27	3†	27

(g) Statement in Support of City of Jacksonville Counterproposal. The City of Jacksonville urged that a grant of its counterproposal would not decrease the number of channels proposed by the Commission in the Third Notice and that the economic importance of the City of Jacksonville warranted the assignment of a third VHF channel.

(h) The City of Jacksonville counterproposal would result in the following co-channel assignments in Zone III.

Channel	Cities	Distance
3	Thomasville, Ga.-Pensacola	195
11	Daytona Beach-Tallahassee	215

(i) Opposition and Conflicting Counterproposal to the Counterproposal of City of Jacksonville. Opposition to the counterproposal of the City of Jacksonville was filed by Central Florida Broadcasting Company since the counterproposal was mutually exclusive with its counterproposal to assign VHF Channel 2 to Orlando, Florida.

(j) The Jacksonville Educational Reservation. The Duval County Board of Public Instruction and the JCET supported the reservation of Channel 7 in Jacksonville for non-commercial educational purposes. The Board stated that the educational needs of the county warranted the reservation of a channel; and that although the Board has no present plans to construct a television station it is proposed to conduct a survey to determine whether, alone or in cooperation with other educational institutions, it could construct or use a television station.

(k) **Opposition to the Jacksonville Reservation.** Jacksonville Broadcasting Corporation opposed the reservation of VHF Channel 7 for educational purposes, and requested that it be made available for commercial use. It contended that the Commission is without authority to reserve any channels for non-commercial educational stations;[161] that the reservation of VHF Channel 7 at Jacksonville is arbitrary and capricious as no showing was made in this proceeding of any need or interest in the use of any channel in Jacksonville; that the Jacksonville Junior College is the only educational institution in the area which possibly could use the channel and it has as yet shown no interest in owning and operating a television station.

Orlando

811. (a) **Census Data.** The standard metropolitan area of Orlando has a population of 115,000. The City of Orlando has a population of 52,000.

(b) Counterproposal of Central Florida Broadcasting Company. Central Florida Broadcasting Company requested the assignment of VHF Channel 2 to Orlando, Florida by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice		Proposal	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Daytona Beach, Fla.	2		11†	18†
Orlando, Fla.	6, 9	18, *24	2†, 6, 9	†, *24

(c) Statement in Support of Central Florida Broadcasting Counterproposal. It was urged that the counterproposal would result in providing Orlando with an additional VHF channel and Daytona Beach with a second channel.

(d) The Central Florida counterproposal would result in the following co-channel assignments in Zone III.

Channel	Cities	Distance
11	Daytona Beach-Tallahassee	215
11	Daytona Beach-Fort Meyers	184
2	Orlando-Miami	204

(e) Oppositions and Conflicting Counterproposals. Oppositions and conflicting counterproposals to the counterproposal of Central Florida Broadcasting Company were filed by the following parties: WKAT, Inc., Miami, Florida; the New Journal Corporation, Daytona Beach, Florida; the Isle of Dreams Broadcasting Corporation, Miami, Florida, the City of Jacksonville, Jacksonville, Florida.

(f) The Orlando Educational Reservation: John B. Stetson University, Leland, Florida, and the JCET supported the reservation of UHF Channel 24 in Orlando, for non-commercial educational use. The University stated that it is equipped to train students in the preparation and presentation of educational and religious television programs and that it expects to use television as an instrument of education. No opposition was filed to the proposed reservation.

Panama City

812. **The Educational Reservation.** The JCET supported the reservation of UHF Channel 30 in Panama City for non-commercial education use. No objection to the reservation was filed.

West Palm Beach

813. **The Educational Reservation.** The Board of Public Instruction of Palm Beach County supported the reservation of UHF Channel 15 in West Palm Beach for non-commercial educational use. No objection to the reservation was filed.

Conclusions: Educational Reservations in Gainesville, Panama City, West Palm Beach and Orlando

814. On the basis of the record the reservation of VHF Channel 5 in Gainesville and UHF Channels 30 in Panama City, 15 in West Palm Beach and 24 in Orlando are finalized.

Conclusions: Educational Reservation in Jacksonville, Florida

815. Educational institutions in Jacksonville supported the reservation of VHF Channel 7 for non-commercial educational use. The Jacksonville Broadcasting Corporation opposed the reservation. We are of the view that the educational reservation in Jacksonville should be maintained. In the Third Notice we stated that a VHF channel would be reserved in all communities with three or more VHF channels where all such VHF assignments were not in operation. In view of the evidence adduced by educational institutions in Jacksonville on behalf of the reservation of Channel 7, we are of the view that no basis has been established in this record for a deviation from the policy announced in the Third Notice. Accordingly, the counterproposal of Jacksonville Broadcasting Corporation, in so far as it requested the deletion of the reservation of Channel 7 for non-commercial educational use, is denied.

Conclusions: Requests for Additional VHF Assignments

816. The counterproposals seeking the additional assignment of a VHF channel to Fort Lauderdale, Jacksonville and Orlando would result in the following co-channel assignment separations below 220 miles in Zone III:

Counterproposals	Channel	Cities	Separation
Gore Publishing Co.	9	Fort Lauderdale-Orlando	183
Jacksonville B/cng. Co.	10	Jacksonville-Albany	171
City of Jacksonville	3	Thomasville, Ga.-Pensacola	195
City of Jacksonville	11	Daytona Beach-Tallahassee	215
Central Florida B/cng. Co.	2	Orlando-Miami	184
Central Florida B/cng. Co.	11	Daytona Beach-Tallahassee	215
Central Florida B/cng. Co.	11	Daytona Beach-Fort Myers	184

[161] The contention that the Commission is without authority to reserve channels for non-commercial educational use was disposed of in the Commission's decision of July 12, 1951.

817. Since each of the counterproposals would result in one or more co-channel assignment separations below the minimum they must be denied. Accordingly, the counterproposals of Gore Publishing Company, Jacksonville Broadcasting Company, City of Jacksonville and Central Florida Broadcasting Company are denied.

Final Assignments and Reservation

818. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Fort Lauderdale		17, 23
Gainesville	*5	20
Jacksonville	4, *7, 12	30, 36
Orlando	6, 9	18, *24
Panama City	7	*30, 36
West Palm Beach	5, 12	*15, 21

MIAMI AND TAMPA— ST. PETERSBURG, FLORIDA VALDOSTA, GEORGIA

819. **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.
Miami, Fla.	*2, 4, 7, 10
Tampa-St. Petersburg, Fla.	*3, 8, 10, 13
Valdosta, Ga.	8

820. The foregoing proposed assignments would result in the following co-channel separations below 220 miles in Zone III:

Channel	Cities	Separation
8	Tampa-St. Petersburg-Valdosta	203
10	Tampa-St. Petersburg-Miami	204

Miami

821. (a) **Census Data.** The standard metropolitan area of Miami has a population of 495,000. The City of Miami has a population of 249,000.

(b) **Existing Stations.** Southern Radio and Television Equipment Company has a construction permit for WTVJ: Miami, on Channel 4, and is operating under special authority.

(c) **Counterproposals of Miami Broadcasting Company, Isle of Dreams Broadcasting Corp., The Fort Industry Company and WKAT, Inc.** Miami Broadcasting Company, Isle of Dreams Broadcasting Corp., The Fort Industry Company and WKAT, Inc., requested the additional assignment of one or more VHF and UHF channels to the City of Miami. Isle of Dreams Broadcasting Corp., and Fort Industry Company submitted three alternative plans to accomplish the additional assignments requested. Following are the plans submitted by the Miami parties: ⟶

NOTE: A blank space opposite a city indicates that under the plan no change in channel assignments were requested for that city.

(d) **Statements in Support of Miami Broadcasting Co., Isle of Dreams Broadcasting Corp., The Fort Industry and WKAT, Inc. Counterproposals.** In support of the foregoing Miami counterproposals it was urged that a fair, efficient and equitable distribution of facilities among the several states and communities warranted the assignment of additional channels to the Miami area; that the City of Miami is the second largest city in Florida and the Miami metropolitan area has the greatest population of any metropolitan area in the State of Florida; that Miami is a well known resort center whose population is swelled by tourists and vacationists each year and that Miami is one of the country's playgrounds, a center of entertainment, talent, showmanship and events of special interest; that Miami is located in the Southern Peninsula and where few outside television services would be available; that Miami supports 11 AM and 6 FM stations; that the economic resources of the area are adequate to support the operation of additional television stations; that there are presently pending 5 applications for commercial television assignments for the City of Miami; and that the assignments proposed by the Commission for Miami, of 4 VHF channels are inadequate to meet the needs of the Miami area in view of the proposed reservation of one VHF channel for educational purposes.

(e) The Miami counterproposals would result in the following co-channel separations below 220 miles in Zone III:

ISLE OF DREAMS

Plan 1

Channel 9
Miami-Orlando 204 miles
Channel 13
Miami-Tampa 205 miles

Plan 2

Channel 9

Channel 2
Tampa-Miami 205 miles
Channel 4
Tampa-Miami 205 miles

(f) **Oppositions and Conflicting Counterproposals to the Miami Counterproposals.** Gore Publishing Company, Fort Lauderdale, Florida, filed a mutually exclusive counterproposal seeking the additional assignment of VHF Channel 9 to Fort Lauderdale, and opposed the mutually exclusive counterproposal of the Miami parties.

(g) **The Miami Educational Reservation.** The Board of Public Instruction of Dade County, Florida, and University of Miami supported the reservation of VHF Channel 2 in Miami for non-commercial educational use. The Board of Public Instruction of Dade County, Florida, submitted statements in support of the reservation from numerous organizations and individuals, including the Mayor of the City of Miami, The Mayor of Miami Shores Village, The Greater Miami Council of Churches, certain members of the Board of County Commissioners, Miami, Florida, State Congressman Dante B. Fascell and the Classroom Teachers' Association of Dade County. The Board of Public Instruction stated that non-commercial educational broadcasting facilities were necessary to meet the educational needs of the Dade County area and that the Superintendent of Schools was directed to include in the education budget for the scholastic year 1951-1952 sufficient funds to finance the television station. The Board asserted that Dade County has an annual budget of approximately $30 million and is therefore able to construct and operate a television station. The Board presently operates educational radio Station WTHS-FM, and the Board asserted that it spent approximately $60,000 in the operation of that station to provide a modern educational radio service to Dade County. The Board also stated that it proposes to utilize the television station to present a wide range of educational programs to serve the schools and the general public, in cooperation with other educational institutions.

(h) **Opposition to the Miami Reservation.** The Fort Industry Company[163] opposed the reservation of VHF Channel 2 in Miami and proposed the reservation of both UHF Channels 29 and 35 for non-commercial educational use in lieu of VHF Channel 2. The Fort Industry Company stated the reservation would tend to impair freedom of competition by limiting the number of commercial stations with substantially equal facilities, and that the reservation would prolong the length of time the public would have to wait for the inception of a second commercial service since the scarcity of commercial channels thus created might well result in protracted hearings. The Fort Industry Company claimed the most that would be expected of an edu-

[162] We have below deleted the assignment of Channel 8 at Valdosta.

cational television station was a service designed primarily to train students in television techniques, supplemented by perhaps a few hours weekly of regular educational programs. The Fort Industry Company contended a commercial UHF station would be at a competitive disadvantage in the Miami market since a substantial number of VHF sets were in the hands of the public.[164]

Tampa—St. Petersburg

822. (a) **Census Data.** The Tampa-St. Petersburg standard metropolitan area has a population of 409,000. The City of Tampa has a population of 125,000. The City of St. Petersburg has a population of 97,000.

(b) **Tampa-St. Petersburg Educational Reservation.** The Public School System of Hillsborough County, The Pinellas County School System, Pinnellas Broadcasting Co., and the JCET supported the reservation of VHF Channel 3 in Tampa-St. Petersburg for non-commercial educational use. The Public School System stated it would act in cooperation with the School System of Pinellas County and possibly other educational institutions to bring non-commercial educational television to the area; that several departments of the School system now develop and produce radio programs and that an educational television station would render a type of service which could not be expected from commercial television. The Pinellas County School System stated that the reservation was indispensable to the establishment of an educational television station. Pinellas Broadcasting Company stated that educational television was a new field, and that it would require time for the formulation of practical and detailed plans for the utilization of non-commercial educational purposes in St. Petersburg-Tampa area; that such an educational station could be financed by the Boards of Education of five surrounding counties, the University of Tampa, the General Extension Division of the University of Florida and the St. Petersburg Junior College.

(c) **Opposition to the Tampa-St. Petersburg Reservation.** The Tampa Times Company and The Tribune Company opposed the reservation of VHF Channel 3 in Tampa-St. Petersburg and proposed that it be made available for commercial use. The Tampa Times stated there was a public need for the commercial use of Channel 3 as evidenced by the filing of five applications for television stations in the Tampa-St. Petersburg market; that there was a definite probability that educational organizations would not apply for a non-commercial educational television station because of a lack of funds; and that a channel in the 782-890 Mc. band could be assigned for non-commercial educational purposes if and when a need should arise. The Tribune Company opposed the reservation of non-commercial educational channels on the grounds that it was illegal under Sections 307, 309 and 326 of the Communications Act, and on the further ground that reservation was unwise.[165]

Valdosta, Georgia

823. **Census Data.** The City of Valdosta has a population of 20,000.

Conclusions: Deletion of Proposed Assignments

824. In the Third Notice the Commission proposed the assignment of Channel 10 to Tampa-St. Petersburg and to Miami at a separation of 204 miles, and the assignment of Channel 8 to Tampa-St. Petersburg and to Valdosta at a separation of 203 miles. Since these separations in Zone III are below the minimum for this area we are required to delete one assignment of Channel 10 and one assignment of Channel 8 to comply with the requisite separations.

825. With respect to Channel 10 we are presented with a choice of deleting that channel from Tampa-St. Petersburg or from Miami. In the Third Notice the Commission proposed the assignment of 4 VHF channels to Miami and 4 VHF channels to Tampa-St. Petersburg. In both communities one VHF channel was proposed to be reserved for non-commercial educational use. The City of Miami has a population of 247,000 and the metropolitan area has a population of 495,000. The City of Tampa has a population of 125,000, the City of St. Petersburg has a population of 97,000 and the metropolitan area has a population of 409,000. It is our view based on the record in this proceeding and relative size of these communities that the deletion of Channel 10 from Tampa-St. Petersburg and the assignment of that channel to Miami is warranted. In replacement for Channel 10 in Tampa-St. Petersburg we are assigning Channel 30 to that community.

826. With respect to Channel 8 we are presented a choice of deleting that channel from Tampa-St. Petersburgh or from Valdosta. The City of Valdosta has a population of about 20,000. In view of the great disparity in the size in these communities we believe the deletion of Channel 8 from Valdosta and the assignment of that channel to Tampa-St. Petersburg is warranted. In replacement for Channel 8 in Valdosta we are assigning UHF Channel 37 to that community.

Conclusions: Additional VHF Assignment in Miami

827. As indicated above each of the counterproposals submitted by the Miami parties for the additional assignment of one or more VHF channels to that community would result in assignment separations below the minimum of 220 miles in Zone III. Accordingly, the counterproposals of Isle of Dreams, Fort Industry, Miami Broadcasting Company and WKAT, Inc., are denied in so far as these counterproposals request the additional assignment of one or more VHF channels to Miami.

Conclusions: Miami and Tampa-St. Petersburg Educational Reservations

828. Educational institutions in Miami supported the reservation of VHF Channel 2 and educational institutions in Tampa-St. Petersburg supported the reservation of VHF Channel 3 for non-commercial educational use in their respective communities. The Fort Industry in Miami, The Tampa Times Company and the Tribune Company in Tampa-St. Petersburg opposed the reservations in their communities and requested the substitution of UHF channels for educational use.

829. We are of the view that the educational reservation in Miami and Tampa-St. Petersburg should not be shifted to the UHF. In the Third Notice we stated that a VHF channel would be reserved in all communities with three or more VHF channels where all such VHF assignments were not in operation. In view of the evidence adduced by educational institutions in Miami and Tampa-St. Petersburg on behalf of the reservation of the VHF channel we are of the view that no basis has been established in this record for a deviation from the policy announced in the Third Notice. Accordingly, the counterproposal of Fort Industry, The Tampa Times Company and The Tribune Company in so far as they requested the substitution of UHF channels for the VHF channels reserved for non-commercial educational use in Miami and Tampa-St. Petersburg are denied.

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposal VHF Channel No.	Proposal UHF Channel No.
Baton Rouge, La.	10	28, *34, 40	2†, 10	28, *34, 40
New Orleans, La.	*2, 4, 6, 7	20, 26, 32	4, 6, 7, *9†	20, 26, 32
Hattiesburg, Miss.	9	17	11†	17
Meridian, Miss.	11	30, *36	9†	30, *36

Conclusions: Additional UHF Assignments in Miami

830. Miami Broadcasting Company requested the additional assignment of UHF Channels 27 and 33 to Miami. It is our view that the record supports the assignment of these channels to Miami. Accordingly, a counterproposal of Miami Broadcasting Company is granted in so far as it requests the additional assignments of UHF Channels 27 and 33 to Miami.

Final Assignments and Reservations

831. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Tampa-St. Petersburg, Fla.	*3, 8, 13	38
Miami, Fla.	*2, 4, 7, 10	27, 33
Valdosta, Ga.		37

BATON ROUGE, HOUMA, LAKE CHARLES, NEW ORLEANS, AND SHREVEPORT, LOUISIANA

832. (a) **Proposed Assignments and Reservations:** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Baton Rouge	10	28, *34, 40
Houma		30
Lake Charles	7	*19, 25
New Orleans	*2, 4, 6, 7	20, 26, 32
Shreveport	3, 12	

The foregoing proposed assignments would result in the following co-channel assignment separation below 220 miles in Zone III:

Channel	Cities	Mileage
7	Lake Charles-New Orleans	189

(b) **Census Data.** The standard metropolitan area of Baton Rouge has a population of 158,000, and the City of Baton Rouge has a population of 126,000. The population of the City of Houma is 12,000. The standard metropolitan area of New Orleans has a population of 685,000 and the City of New Orleans has a population of 570,000. The City of Lake Charles has a population of 41,000. The standard metropolitan area of Shreveport has a population of 177,000 and the City of Shreveport has a population of 127,000.

(c) **Existing Station.** WDSU Broadcasting Corporation is: licensed for the operation of Station WDSU-TV on Channel 6 in New Orleans.

Baton Rouge

833. (a) **Counterproposal of Baton Rouge Broadcasting Company, Inc.** Baton Rouge Broadcasting Company requested the additional assignment of VHF Channel 2 to Baton Rouge by making the following changes in the assignments proposed by the Commission in the Third Notice:

(b) **Statement in Support of Baton Rouge Counterproposal.** Baton Rouge Broadcasting Company urged that Baton Rouge is the third largest city and the Capital of the State of Louisiana; that the population of Baton Rouge had increased by 262% between 1940 and 1950; that the City of Shreveport with approximately the same population as Baton Rouge and the City of Alexandria with approximately one-fourth the population of Baton Rouge were each assigned two VHF channels. It was urged that the size and economic importance of Baton Rouge warrant the assignment of two VHF channels to that community. It was further urged that the assignment of Channel 2 would be in conformance with the Commission's standards for minimum separation of co-channel and adjacent channel stations. It was pointed out that under the counterproposal the closest resultant co-channel separation would be between New Orleans and Meridian, Mississippi on Channel 9 at a distance of 185 miles; and between Alexandria, Louisiana, and Hattiesburg, Mississippi, on Channel 11 at a distance of 187 miles.[166] It was asserted that the operation of Channel 2 in Baton Rouge would afford a total gain of VHF service to a substantial area and population. The counterproposal would in addition result in a co-channel assignment separation on Channel 9 between Meridian, Mississippi, and Dothan, Alabama, of 210 miles.

[163] The Fort Industry Company proposal that the Commission adopt a rule providing for a six-month review of steps taken by educational institutions to utilize the reserved channels has been considered in another portion of this Report.

[164] The Fort Industry Company filed a Motion to Strike those portions of the brief of The Board of Public Instruction which it is alleged introduce new evidentiary matter and raise new contentions in contravention of the Commission's Order of Hearing Procedure at such a time in the proceedings as to deny other interested parties an opportunity to reply. A response to this Motion was filed by the Board of Public Instruction of Dade County in which it contends that the material objected to is entirely appropriate for fair comment and argumentation in a legal brief. The Motion to Strike is GRANTED since the material objected to is clearly raised for the first time, not supported by sworn written testimony and not in accordance with Paragraphs 5(b), or 5(c) of the Commission's Order of Hearing Procedure.

In view of the action herein taken it is unnecessary to rule upon the alternative request of The Fort Industry Company for other appropriate relief.

[165] The Commission's decision of July 13, 1951, disposed of this contention.

[166] In view of the action taken elsewhere in this Report this assignment separation in violation of the minimum would be removed.

(c) **Conflicting Counterproposal to the Baton Rouge Broadcasting Company Counterproposal.** A conflicting counterproposal was filed by Loyola University of the South, New Orleans.

(d) **The Baton Rouge Educational Reservation:** Louisiana State University and Agricultural and Mechanical College at Baton Rouge, Louisiana, supported the reservation of Channel 34 at Baton Rouge for non-commercial educational use stating that advanced students in the College of Engineering and the Department of Physics will be available to assist in the technical aspects of television. The University stated that it is presently negotiating a one-year interim contract with local commercial television stations for the production of educational television programs pending the time it can put into operation a non-commercial educational television station. No objections were filed to the proposed reservation.

Houma

834. (a) **Counterproposal of Charles Wilbur Lamar, Jr.** Charles Wilbur Lamar, Jr., requested the additional assignment of VHF Channel 12 to Houma, without any other changes in the assignments proposed in the Third Notice.

(b) **Statement in Support of Lamar Counterproposal.** Lamar urged that the assignment of Channel 12 to Houma would comply with the Commission's minimum standards for co-channel and adjacent channel separation. It was pointed out that the nearest assignments on Channel 12 proposed by the Commission are at Jackson, Mississippi, and Shreveport, Louisiana, which are 190 and 270 miles, respectively, from Houma. Adjacent channel assignments proposed by the Commission which are nearest to Houma are at Biloxi, Mississippi, and Alexandria, Louisiana, at distances of 122 and 165 miles, respectively, from Houma. It was urged that the operation of Channel 12 in Houma would render service to a substantial area and population.

(c) **Conflicting Counterproposal to Charles W. Lamar, Jr. Counterproposal.** A conflicting counterproposal was filed by Loyola University of the South, New Orleans.

New Orleans

835. (a) **Counterproposal of Loyola University of the South.** Loyola University requested the additional assignment of VHF Channel 11 to New Orleans, without any other changes in the assignments proposed in the Third Notice.

(b) **Statement in Support of Loyola University Counterproposal.** Loyola University urged that VHF Channel 11 could be assigned to New Orleans without reducing the number of channels proposed by the Commission for assignments to any other city, or without changing the assignments proposed by the Commission for any other city. It was urged that the UHF assignments proposed by the Commission for New Orleans were inadequate to serve the needs of that area since a considerable period of time would elapse before converters or new receivers capable of utilizing ultra high frequency signals could be distributed in the area. It was urged that this circumstance would prolong for an indefinite period the existing television monopoly in the New Orleans area.

(c) The Loyola counterproposal would result in the following co-channel separations in Zone III:

Channel	Cities	Mileage
11	New Orleans-Alexandria [167]	170
11	New Orleans-Meridian, Miss.	185

(d) **Oppositions and Conflicting Counterproposals to Loyola University Counterproposal.** Oppositions and conflicting counterproposals were filed by the following parties: Charles W. Lamar, Jr., Houma; Baton Rouge Broadcasting Company, Baton Rouge; The Houston Post Company, Houston; and Deep South Broadcasting Company, Montgomery.

(e) **The New Orleans Educational Reservation.** Tulane University supported the reservation of Channel 2 at New Orleans for non-commercial educational use, stating that it hoped the Commission would maintain the reservation until such time as the educational groups in the area could complete their studies on educational television.

(f) **Opposition of Loyola University to New Orleans Educational Reservation.** Loyola University contended that the Commission's proposed reservation of VHF Channel 2 at New Oreans for non-commercial educational use, and the attendant withdrawal of that channel from use for general broadcasting purposes, was beyond the power and discretion of the Commission. This contention that the Commission is without legal power to reserve channels in the Table of Assignments for use by non-commercial educational stations has been disposed of in the Commission's Opinion of July 12, 1951.

Lake Charles

836. (a) **Support of Proposed Assignments.** Calcasieu Broadcasting Company filed a sworn statement supporting the assignments proposed by the Commission for Lake Charles. It was stated that the assignment of a total of 3 channels to Lake Charles, with one channel reserved for educational use, appears to be an equitable assignment of the available channels to that city.

(b) **Educational Reservation.** The JCET supported the reservation of Channel 19 at Lake Charles for non-commercial educational use. Various other civic and educational leaders of Lake Charles also supported the reservation. No objections were made to the reservation.

Shreveport

837. **Support of Proposed Assignments.** International Broadcasting Corporation, Shreveport, Louisiana filed a statement supporting the assignments proposed by the Commission for Shreveport. No oppositions have been filed to the Commission's assignments for Shreveport.

Conclusions: Baton Rouge and New Orleans Educational Reservations.

838. On the basis of the record, the reservations of Channel 34 at Baton Rouge and Channel 2 at New Orleans, for non-commercial educational use are finalized.

Conclusions: Request for Additional VHF Assignments in Baton Rouge, Houma and New Orleans

839. The counterproposals seeking the additional assignment of a VHF channel in those cities would result in the following co-channel assignment separations below 220 miles in Zone III:

Proposal	Channel
Baton Rouge Broadcasting Co.	9
	9
Charles W. Lamar	12
Loyola University	11

[167] In view of our action elsewhere in this Report this co-channel assignment separation would no longer exist.

Cities	Mileage
Meridian, Miss.-Dothan, Ala.	210
New Orleans-Meridian, Miss.	185
Houma-Jackson, Miss.	192
New Orleans-Meridian, Miss.	185

Accordingly, the counterproposals of Baton Rouge Broadcasting Company, Charles W. Lamar, Jr., and Loyola University of the South are denied.

Conclusions: Deletion of Proposed Assignment

840. In the Third Notice the Commission proposed the assignment of Channel 7 to Lake Charles and New Orleans at a separation of 189 miles. Since this separation is below the minimum of 220 miles for Zone III we are required to delete one assignment of Channel 7 to comply with the requisite minimum separation.

841. The City of Lake Charles has a population of 41,000 and the City of New Orleans has a population of 570,000. In the Third Notice only 1 VHF Channel was proposed for Lake Charles while 4 VHF channels were proposed for New Orleans. We believe on the basis of the record that the deletion of Channel 7 from New Orleans and the assignment of that channel to Lake Charles is warranted. In replacement of Channel 7 at New Orleans we are assigning UHF Channel 61.

Final Assignments and Reservations.

842. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Baton Rouge	10	28, *34, 40
Houma		30
Lake Charles	7	*19, 25
New Orleans	*2, 4, 6	20, 26, 32, 61
Shreveport	3, 12	

ALEXANDRIA AND LAFAYETTE, LOUISIANA, BILOXI, MISSISSIPPI

843. (a) **Proposed Assignments and Reservations:** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Alexandria, La.	11, 13	
Lafayette, La.	5	38
Biloxi, Miss.	13	*44, 50
Galveston, Texas	11	35, 41, *47
Houston, Texas	2, *8, 13	23, 29

(b) The foregoing proposed assignments would result in the following co-channel assignment separations below 200 miles in Zone III.

Channel	Cities	Mileage
11	Galveston-Alexandria	197
13	Houston-Alexandria	204
13	Alexandria-Biloxi	217

(c) **Census Data.** The City of Alexandria has a population of 35,000. The City of Lafayette has a population of 34,000. The City of Biloxi has a population of 37,000. The standard metropolitan area of Galveston has a population of 113,000 and the City of Galveston has a population of 67,000. The standard metropolitan area of Houston has a population of 807,000 and the City of Houston has a population of 596,000.

Conclusions: Deletion of Proposed VHF Assignments

844. In the Third Notice, the Commission proposed the assignments of Channel 13 to Alexandria and Houston at a separation of 204 miles and to Alexandria and Biloxi at a separation of 217 miles in Zone III. Since these separations in Zone III are below the minimum for the area we are required to delete one or two assignments on Channel 13 to comply with the requisite separation. The population of both Houston and Biloxi is greater than that of Alexandria. Two VHF channels were proposed for Alexandria, one for Biloxi and three for Houston. In order to remove the sub-standard separation on Channel 13 we are faced with the choice of deleting this channel from Alexandria or from both Houston and Biloxi. In view of the foregoing, we believe the deletion of Channel 13 from Alexandria is warranted. In replacement for Chanel 13 in Alexandria we are assigning UHF Channel 62.

845. Further the assignments proposed in the Third Notice would result in the assignment of Channel 11 to Alexandria and Galveston at a separation of 197 miles in Zone III. Since this separation is below the minimum for this area we are required to delete one assignment of Channel 11 to comply with the requisite separation. The population of Galveston is approximately twice that of Alexandria. In view of the relative size of these cities we believe the deletion of Channel 11 from Alexandria and the assignment of that channel to Galveston is warranted.

846. In view of the action taken above the City of Alexandria would be left with no VHF assignments. In the Third Notice Channels 5 and 38 were proposed to be assigned to Lafayette, a city of 34,000. Since we are required to delete the assignments proposed for Alexandria, that city with a somewhat larger population than Lafayette, would have no VHF channels assigned to it. In view of the comparative size of Lafayette and Alexandria, it is our view that the deletion of Channel 5 from Lafayette and the assignment of that channel to Alexandria is warranted. As a replacement for Channel 5 at Lafayette we are assigning UHF Channel 67.

Final Assignment[168]

847. The following assignments are adopted:

City	VHF Channel No.	UHF Channel No.
Alexandria, La.	5	62
Lafayette, La.		38, 67
Biloxi, Miss.	13	*44, 50

PROPOSED UHF ASSIGNMENTS IN AREA II BELOW THE MINIMUM CO-CHANNEL ASSIGNMENT SEPARATIONS

848 (a) In the Third Notice the Commission proposed the following LHF assignments which do not meet the minimum co-channel assignment separations:

City	UHF Channel No.
Kingston, N. C.	26
Bad Axe, Mich.	15
Clinton, Mo.	15
Muskogee, Okla.[169]	39
Pryor Creek, Okla.	64
Harriman, Tenn.	45
Marysville, Tenn.	42
Shelbyville, Tenn.	52

(b) The foregoing proposed assignments would result in the following co-channel assignment separations below 175 miles in Zone II:

Channel	Cities	Mileage
26	Kinston, N. C.-Winston Salem, N. C.	162
15	Bad Axe, Mich.-Manistee, Mich	168
39	Duncan, Okla.-Muskogee, Okla.	170
64	Pryor Creek, Okla.-Chickasha, Okla.	171

[168] The final assignments for Galveston and Houston appear elsewhere in this Report.

42	Springfield, Tenn.-Maryville, Tenn.	171
52	Gainesville, Ga.-Shelbyville, Tenn.	172
15	Clinton, Mo.-Claramore, Okla.	173
45	Laurens, S. C.-Harriman, Tenn.	173

Since the above co-channel assignment separations are below the minimum for Zone II we are faced with the necessity of changing 8 assignments in order to comply with the requisite separation. Accordingly, we have deleted the UHF assignments listed above and substituted other UHF assignments which meet the minimum separations in Zone II.

FINAL ASSIGNMENTS

849. The following assignments are adopted:

City	UHF Channel No.
Kinston, N. C.	45
Bad Axe, Mich.	46
Clinton, Mo.	49
Muskogee, Okla.	66
Pryor Creek, Okla.	54
Harriman, Tenn.	67
Maryville, Tenn.	51
Shelbyville, Tenn.	62

DENVER, BOULDER, CRAIG, COLORADO SPRINGS, PUEBLO, DURANGO, GRAND JUNCTION, AND MONTROSE, COLORADO; LARAMIE, WYOMING

850. **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Denver	2, 4, *6, 7	20, 26
Boulder	*9	22
Craig		19
Colorado Springs	10, 12	*17, 23
Pueblo	3, 5, *8	28, 34
Durango		15
Grand Junction		21
Montrose		18
Laramie	*8	18

Denver

851. (a) **Census Data.** The standard metropolitan area of Denver has a population of 564,000 and the City of Denver has a population of 416,000.

(b) **Counterproposals of Senator Edwin C. Johnson.** Senator Johnson proposed that an additional VHF channel be assigned to Denver, by the adoption of one of the following three alternative proposals.[170]

(c) **Statement in Support of Senator Johnson's Counterproposal.** Senator Johnson stated that Denver is the largest city in the Rocky Mountain area encompassing more than 9 states; that Denver is the hub of the rail, motor, air, banking, communications and commercial activities of the West; and the economic potential and marketing facilities of Denver are more than sufficient to support adequately five commercial VHF stations. It was also stated that priorities set forth in the Commission's Third Notice for the assignment of television channels should not control where extraordinary or peculiar factors require otherwise. It was claimed that as a consequence of having only three commercial VHF channels the people of Denver would be deprived of the programs of a number of networks and the adverse influence of monopoly would affect national and local advertisers who seek Denver markets. In this connection it was urged that no competitive nationwide network system could be effected without service to and through the City of Denver. In view of the foregoing it was claimed that the proposed assignments to Denver did not constitute a fair and equitable assignment of facilities.

(d) **First Alternative Counterproposal of Senator Johnson.** The first alternative counterproposal of Senator Johnson would delete Channel 9 from Boulder and assign that channel to Denver, Colorado and redesignate UHF Channel 22 in Boulder as reserved for noncommercial educational use. It was stated that Boulder, which is only a short distance from Denver, would be able to receive television service without difficulty from Denver. It was also urged that Boulder is within the retail trade area of Denver and that the people of Boulder look to Denver as the center of their business and cultural interests. It was submitted that the assignment of a VHF channel to Boulder, less than 26 miles away from Denver, is not justified since such a channel would not be operated in the foreseeable future on a non-commercial basis. It was claimed that the Commission could impose a condition upon the commercial user of this channel in Denver to reserve time on it for educational purposes by the University of Colorado. Finally, it was urged that the reassignment of Boulder's Channel 9 to Denver would not seriously affect, in any practical way, the priorities set forth in the Commission's Third Notice and that such reassignment could be done without causing interference to other proposed assignments in the Commission's plan.

(e) **Second Alternative Counterproposal of Senator Johnson.** The second alternative counterproposal of Senator Johnson would delete Channel 12 from Colorado Springs, and assign that channel to Denver. It was stated that the grant of this request would result in a much improved assignment plan without causing any interference with any co-channel or adjacent channel operation.

(f) **Third Alternative Counterproposal of Senator Johnson.** The third counterproposal would add a VHF channel to Denver by shifting assignments proposed by the Commission in the Third Notice for five other cities and without reducing the number of assignments proposed by the Commission for these cities. In support of the third alternative counterproposal it was urged that the Commission could maintain its present proposed plan and add an additional VHF channel to Denver without degrading the Commission's engineering principles and standards. It was also stated that the Commission had proposed the assignment of only ten channels to Colorado state, with three reserved for non-commercial education use; whereas other states, such as New Mexico, Arizona and Utah, each with less than half of Colorado's population were assigned, proportionately, a greater number of channels. New Mexico was assigned fifteen VHF channels with three reserved for non-commercial educational use; Arizona was assigned fourteen VHF channels with two reserved for non-commercial educational use; Utah was assigned nine VHF channels with one reserved for non-commercial educational use. Wyoming, which has one-quarter of Colorado's population, was assigned ten VHF stations with one reserved for non-commercial educational use. In addition, it was pointed out that such cities as Grand Junction, Montrose, Alamosa, Fort Collins, Greeley and Trinidad, all in Colorado, and other progressive Colorado cities, were not assigned a VHF channel.

(g) **Oppositions and Conflicting Counterproposals to Senator Johnson's Counterproposal (Plan 3).** Northwestern Broadcasting Company filed a counterproposal to assign VHF Channel 5 to Craig, which is in conflict with Senator Johnson's Plan 3. Northwestern Broadcasting Company stated that the conflict could be resolved by assigning VHF Channel 13 to Craig in lieu of VHF Channel 5. This would be accomplished by the substitution of VHF Channel 8 for VHF Channel 13 at Rock Springs, Wyoming. Western Slope Broadcasting Company filed a counterproposal to assign VHF Channel 3 to Grand Junction, which is in conflict with Senator Johnson's Plan 3. Western Slope Broadcasting Company stated that the conflict could be resolved by assigning VHF Channel 5 to Grand Junction in lieu of VHF Channel 3. Uncompahgre Broadcasting Company filed a counterproposal requesting the assignment of VHF Channel 11 to Montrose, which is in conflict with Senator Johnson's Plan 3. Uncompahgre Broadcasting Company stated that the conflict could be resolved by the assignment of either VHF Channel 8 or 9 or 10 to Montrose in lieu of VHF Channel 11. Warren M. Mallory filed a counterproposal requesting the assignment of either Channel 3 or VHF Channel 5 to Laramie, which is conflict with Senator Johnson's Plan 3. Warren M. Mallory stated that the conflict could be resolved by the assignment of one channel to Cheyenne in lieu of two channels as proposed.

(h) **The Denver Educational Reservation.** The Denver Public Schools (School District Number One, City and County of Denver), the University of Denver (Colorado Seminary), the Adult Education Council of Denver, the Denver Public Library, and the Colorado State Department of Education supported the reservation of VHF Channel 6 at Denver, Colorado for non-commercial educational use. The University of Colorado, Boulder, Colorado also requested the Commission to reserve channels in Denver for such use. It appears that an executive committee has been established in Denver, consisting of representatives of the University of Denver, the Board of Education of the City and County of Denver, the Public Library System of Denver and the Adult Educational Council of Denver. The task of the executive committee is to set up a program of specific study of Denver's educational needs and resources as they pertain to the reservation. In addition, an analysis of the problems of programming, costs, and audience interest has been undertaken by a faculty group of the University of Denver. The University of Denver stated it possessed resources and facilities which could be used in television broadcasting. In anticipation of the arrival of television to the Denver area, the University in 1948 employed a full-time television expert. University officials conferred in 1948-1949 with studio design engineers of the Radio Corporation of America to develop plans for a community television studio. A thorough study was made of equipment and program costs and the problems of programming. The University stated that although "the cost factors in that 1948-1949 study are no longer valid, the general conclusions that a co-operative educational television undertaking can be practicable in Denver remain unshaken . . ." The Denver Public Schools, as evidence of the financial responsibility of the school system for any educational program that it might undertake, stated that their budget for 1950-1951 was $18,443,000. The Denver Public Schools said it believed that the schools had the staff and organization which would make a television program feasible, and that its possibilities are being thoroughly studied. Pending the results of such study they requested that a suitable channel for television be reserved for educational use in Denver. In accordance with this view, the Public Schools stated that they had embarked on a program of study of the uses of television in cooperation with other educational institutions and cultural organizations of Denver.

(i) **Opposition to the Denver Educational Reservation.** Senator Johnson opposed the reservation of a VHF channel in Denver for non-commercial educational use, and Senator Johnson's Plans 1, 2 and 3 would substitute the reservation of a UHF channel in Denver for the VHF channel. Senator Johnson stated: "Television is a powerful

	Third Notice		Counterproposals					
			Plan 1		Plan 2		Plan 3	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Denver, Colo.	2, 4, *6, 7	20, 26	2, 4, 6, 7, 9†	20, *26	2, 4, 6, 7, 12†	20, *26	2, 4, 6, 7, 9†	20, *26
Boulder, Colo.	*9	22	†	*22	*9	22	*12†	22
Colorado Springs, Colo.	10, 12	*17, 23						
Cheyenne, Wyo.	11, 13				10, †	*17, 23	11†, 13†	*17, 23
Rawlings, Wyo.	12						3†, 5†	
Alliance, Nebr.	12	21					11†	
							13†	21

[169] Channels 8 and *45 were also proposed for Muskogee.

[170] Each of the three alternative counterproposals of Senator Johnson included a request for the shift of the educational reservation in Denver from VHF Channel 6 to UHF Channel 26. This request will be considered separately. Senator Eugene D. Millikin also filed a comment urging additional assignments to Denver but submitted no sworn evidence in support of the comment.

and effective medium for the teacher. It is the finest educational tool of our time. However, television is far too valuable as a national resource and much too intricate and delicate a process to waste away through idleness, lack of funds and in experience. I want this medium to be available to the people of Colorado now. I am positive that neither the University of Denver nor any other educational group will be ready during the next ten years to apply for a license and state that they are 'fit, willing and able' to operate a television station." Senator Johnson also recommended that the Commission could and should impose a condition in all television licenses that a certain amount of time be made available for educational purposes in the public interest.

Boulder[171]

852. **The Education Reservation.** Boulder is the site of the University of Colorado and has been designated as "a primarily educational center." Boulder is approximately 26 miles from Denver. The University of Colorado and the Board of Regents supported the reservation of a television channel for Boulder. The Board of Regents stated the University would continue to make studies of the feasibility and the cost of educational television and educational television operations and the progress being made at other educational institutions. The University reported it would then make a determination within a reasonable period of time as to when the University of Colorado might construct a television facility. The University of Colorado stated that if educational television lived up to its potentialities, it would be educationally sound to invest the large sums required to operate and build the facilities. Otherwise, the University stated, it would be forced to limit its television services to producing programs for presentation on commercial stations. The Colorado State Department of Education also supported the reservation.

Craig

853. (a) **Census Data.** The population of Craig is 3,000.

(b) **Counterproposal of Northwestern Colorado Broadcasting Company.** Northwestern Colorado Broadcasting Company requested the assignment of VHF Channel 5 to Craig without any other changes in the assignment proposed in the Third Notice. In the alternative it was requested that VHF Channel 13 be assigned to Craig by the substitution of Channel 8 for Channel 13 at Rock Springs.

(c) **Statement in Support of Northwestern Colorado Broadcasting Company Counterproposal.** Northwestern Colorado Broadcasting Company stated that assignment of VHF Channel 5 or VHF Channel 13 to Craig would afford a first and second television service to an appreciable area; and, accordingly, a grant of the counterproposal would constitute an equitable assignment to the area.

(d) **Conflicting Counterproposal to Northwestern Colorado Broadcasting Company Counterproposal.** The third alternative counterproposal of Senator Edwin Johnson to assign Channel 5 to Cheyenne is in conflict with the Northwestern Colorado Broadcasting Company counterproposal to assign Channel 5 to Craig. The request of Northwestern Colorado Broadcasting Company to assign VHF Channel 5 to Craig and the request of Senator Johnson (Plan 3) to assign Channel 5 to Cheyenne would result in a co-channel separation of 152 miles in Zone II. The request of Northwestern Colorado Broadcasting Company to assign VHF Channel 5 to Craig and the request of Warren M. Mallory to assign Channel 5 in Laramie would result in a co-channel separation of 117 miles in Zone II. The alternative request of Northwestern Colorado Broadcasting Company to assign VHF Channel 13 to Craig requires the assignment of VHF Channel 8 to Rock Springs and would result in a co-channel separation of 189 miles between Rock Springs and Laramie on Channel 8 in Zone II. Senator Johnson's counterproposal (Plan 3) would assign VHF Channel 13 to Colorado Springs; and the assignment of VHF Channel 13 to Craig would result in a co-channel separation of 186 miles between Craig and Colorado Springs in Zone II.

Colorado Springs

854.(a) **Census Data.** The population of Colorado Springs is 45,000.

(b) **The Educational Reservation.** The JCET supported the reservation of Channel 17 in Colorado Springs for non-commercial educational use. Included in the statement of the JCET was a letter from the Colorado Springs Fine Arts Center stating that it supported the efforts of the JCET to obtain the reservation of television channels for the region. No opposition to this reservation was filed.

Pueblo

855. **The Educational Reservation.** The Pueblo Public Schools, District 60 and the Pueblo Junior College supported the reservation of Channel 8 in Pueblo for non-commercial educational use. Resolutions of the Board of Education of the Pueblo Public Schools and the Pueblo Junior College Committee requested this reservation, pending completion of studies of the problems of educational television broadcasting such as costs and areas of use. No opposition to this reservation was filed.

Durango

856. (a) **Census Data.** The population of Durango is 7,000.

(b) **Counterproposal of San Juan Broadcasting Co., Inc.** San Juan Broadcasting Company, Inc., requested the assignment of VHF Channel 6 to Durango. In support of the counterproposal it was urged that the assignment of a VHF channel to Durango would provide a first television service to an appreciable area.

Grand Junction

857. (a) **Census Data.** The population of Grand Junction is 15,000

(b) **Counterproposal of Western Slope Broadcasting Company.** Western Slope Broadcasting Company, Grand Junction, requested that VHF Channel 3 be assigned to Grand Junction without any changes in the assignments proposed in the Third Notice. Since the counterproposal of Western Slope Broadcasting Company conflicted with Senator Johnson's Plan 3, Western Slope Broadcasting Company suggested that the conflict could be resolved by the assignment of Channel 5 to Grand Junction in lieu of Channel 3.

(c) **Statement in Support of Western Slope Broadcasting Co. Counterproposal.** Western Slope stated that its proposal would supply a first and second television service to an appreciable area. In addition it was urged that the assignment of a VHF channel is justified because the economic resources and size of Grand Junction evidence the ability of that community to support a VHF television station.

Montrose

858. (a) **Census Data.** The population of Montnose is 5,000. ,

(b) **Counterproposal of Uncompahgre Broadcasting Co.** Uncompahgre Broadcasting Company requested the assignment of VHF Channel 11 to Montrose without any otrer changes in the assignments proposed in the Third Notice. Since the counterproposal of Uncompahgre conflicted with Senator Johnson's Plan 3, Uncompahgre suggested that the conflict could be resolved by the assignment of Channel 8 or 9 or 10 to Montrose.

(c) **Statement in Support of Uncompahgre Counterproposal.** Uncompahgre Broadcasting Company urged that the assignment of a VHF channel to Montrose would result in a first television service to an appreciable area.

Laramie

859. (a) **Census Data.** The population of Laramie is 16,000.

(b) **Counterproposal of Warren M. Mallory.** Warren M. Mallory, Laramie, requested that either VHF Channel 3 or VHF Channel 5 be assigned to Laramie in addition to the assignments proposed in the Commission's Third Notice.

(c) **Statement in Support of Mallory Counterproposal.** Mallory urged that commercial interests in Laramie could not establish a television station in the immediate future on UHF Channel 18 proposed for Laramie because no UHF transmitting equipment is presently available on the market, but that if a VHF channel were made available commercial interests in Laramie have expressed a willingness to establish immediately a commercial station which would not only provide commercially sponsored entertainment but would also provide time for educational programs sponsored by the University of Wyoming, located in Laramie. It was also urged that the isolation of Laramie due to mountainous geographical terrain would prevent that city from receiving service from stations located in such other communities as Cheyenne, Wyoming, and Denver, Colorado.

(d) **Conflicting Counterproposals to Mallory Counterproposal.** The counterproposal of Warren M. Mallory and the third alternative counterproposal of Senator Johnson are mutually exclusive. Mallory, however, suggested that the conflict between the two counterproposals could be resolved by the assignment of Channel 3 to Laramie and Channel 5 to Cheyenne or the assignment of Channel 5 to Laramie and the assignment of Channel 3 to Cheyenne. The counterproposal of Warren H. Mallory to assign Channel 5 to Laramie is mutually exclusive with the counterproposal of Northwestern Colorado Broadcasting Company to add that channel to Craig, Colorado.

(e) **The Educational Reservation.**[172] The University of Wyoming and its Board of Trustees supported the reservation of VHF Channel 8 at Laramie for use by a non-commercial educational station. No oppositions to this proposed reservation were filed.

Conclusions: Denver Educational Reservation

860. We have in another portion of this Report considered the proposal of Senator Johnson that the Commission impose a condition on all television licensees that a certain amount of time be made available for educational purposes as an alternative to the establishment of reservations for non-commercial educational use. Accordingly, it will not be discussed further.

861. We believe on the basis of the record that the proposed educational reservation of Channel 6 in Denver should be finalized. The educational institutions in Denver have demonstrated on the record their interest in establishing a non-commercial educational television station. They have banded together to solve the problems connected with the establishment and operation of such a station; the University of Denver, in particular, has shown on the record a strong interest in bringing educational television to the Denver area; and the educational institutions established on the record that they are proceeding to develop plans for the early establishment of a non-commercial educational television station in Denver. On the basis of the record, and in view of the foregoing, the Commission finds it must deny the counterproposal of Senator Edwin Johnson insofar as it would substitute UHF Channel 26 for VHF Channel 6 as the reserved channel in Denver, Colorado. Accordingly, the reservation of VHF Channel 6 in Denver, Colorado for non-commercial educational television use is finalized.

Conclusions: The Boulder Educational Reservation

862. We find no adequate basis on the record for deleting the proposed reservation of Channel 9 for non-commercial educational use in Boulder. Boulder has been designated as a "primarily educational center" and the University of Colorado has established its interest in establishing a non-commercial educational station in Boulder. Under these circumstances we find no adequate basis for deviating from our policy of attempting to provide VHF educational reservations in "primarily educational centers". On the basis of the record and in view of the foregoing, the Commission finds that it must deny the counterproposal of Senator Edwin Johnson insofar as the reservation of UHF Channel 22 instead of VHF Channel 9 at Boulder, Colorado is concerned. In view of our grant of Senator Johnson's third plan, Channel 12 will be substituted at Boulder for Channel 9. Accordingly, the Commission is finalizing the reservation of Channel 12 in Boulder for use by a non-commercial educational station.

Conclusions: The Colorado Springs and Pueblo Educational Reservations

863. The Commission is of the opinion, on the basis of the record, that a reservation for non-commer-

[171] Plan 1 of Senator Johnson's counterproposal would reserve UHF Channel 22 in lieu of VHF Channel 9 in Boulder for non-commercial educational use.

[172] In its Comments of May 7, 1951 Warren M. Mallory requested the reservation of UHF Channel 18 in Laramie for non-commercial educational use in lieu of VHF Chanel 8. No sworn statement in support of this request was filed. Accordingly, it will not be considered further.

cial educational television is warranted in Colorado Springs and Pueblo. Accordingly, the reservation of UHF Channel 17 in Colorado Springs, and VHF Channel 8 in Pueblo, are finalized.

Conclusions: The Laramie Educational Reservation

864. On the basis of the record the reservation of Channel 8 in Laramie for non-commercial educational use is finalized.

Summary of Requests for Additional VHF Assignments

865. The remaining counterproposals consist of: (1) a proposal by Senator Johnson for the assignment of either VHF Channel 9 or 12 to Denver; (2) a proposal by Northwestern Colorado Broadcasting Company for the assignment of either VHF Channel 5 or 13 to Craig; (3) a proposal by the San Juan Broadcasting Company, Inc., for the assignment of VHF Channel 6 to Durango, Colorado; (4) a proposal of Western Slope Broadcasting for the assignment of VHF Channel 3 or 5 to Grand Junction, Colorado; (5) a proposal by the Uncompahgre Broadcasting Company for the assignment of either VHF Channel 8, 9, 10 or 11 to Montrose, Colorado; (6) a proposal by Warren M. Mallory for the assignment of either VHF Channel 3 or 5 to Laramie.

Conclusions: Additional VHF Assignments to Denver, Craig and Laramie

866. The first and second alternative counterproposals of Senator Johnson would add a 4th commercial VHF assignment or a total of 5 VHF assignments to Denver by deleting the only VHF assignment to Boulder and the second VHF assignment to Colorado Springs, respectively. We have above denied the first counterproposal in connection with Boulder educational reservation discussion. With respect to the second alternative counterproposal, we do not believe the record supports the basis for the deletion of the second VHF channel in Colorado Springs, a city of 45,000, in order to effect the assignment of a 4th commercial VHF channel (with a total of 5 VHF channels) to Denver. The third alternative counterproposal of Senator Johnson would result in the additional assignment of VHF Channel 9 to Denver without deleting a channel from any other community. This counterproposal is, however, mutually exclusive with the counterproposal seeking the assignments of VHF channels in Craig and Laramie. The Commission is of the opinion that a fifth VHF channel in Denver, one of the major cities of the United States and a city of 416,000, is to be preferred to the assignment of a first VHF channel to Craig, a city of 3,000 and a second VHF channel to Laramie, a city of 16.000. We believe that in view of the great disparity in size, population and importance between Denver and the Cities of Craig and Laramie that the assignment of an additional VHF channel to Denver is warranted. The Northwestern Colorado Broadcasting Company's counterproposal to resolve the conflict between Senator Johnson's and its proposal would result in a mileage separation of 189 miles between Rock Springs, Wyoming, and Laramie, Wyoming, and of 186 miles between Craig, and Colorado Springs, in Zone II. Since the minimum co-channel separation in Zone II is 190 miles the alternative counterproposal of Northwestern Colorado Broadcasting Company must be denied.

867. The counterproposal of Mallory to resolve the conflict between Senator Johnson's and his proposal would require the deletion of a VHF channel from Cheyenne. We do not believe the record warrants the deletion of one of the two VHF channels from Cheyenne, a city of 32,000, in order to provide a second VHF assignment for Laramie, a city of 16,000. Accordingly, the second alternative counterproposal of Senator Johnson, the counterproposal of Northwestern Colorado Broadcasting Co., and the counterproposal of Warren M. Mallory are denied and the third alternative counterproposal of Senator Johnson in so far as it requests the addition of a VHF channel to Denver is granted.

Conclusions: Additional VHF Assignment to Grand Junction, Durango and Montrose

868. It is the Commission's view that the counterproposals of Western Slope Broadcasting Company for a VHF channel in Grand Junction; San Juan Broadcasting Company, Inc., for a VHF channel in Durango and the Uncompahgre Broadcasting Company for a VHF channel in Montrose should be granted. The assignments are consistent with the Rules and standards adopted herein and will result in television service to areas and persons which would otherwise not receive VHF service. Accordingly, the counterproposals of Western Slope Broadcasting Company and San Juan Broadcasting Co., Inc., as modified and the counterproposal of Uncompahgre Broadcasting Company are granted.

Final Assignments and Reservations

869. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Boulder, Colo.	*12	22
Colorado Springs, Colo.	11, 13	*17, 23
Denver, Colo.	2, 4, *6, 7, 9	20, 26
Durango, Colo.	6	15
Grand Junction Colo.	5	21
Montrose, Colo.	10	18
Pueblo, Colo.	3, 5, *8	28, 34
Alliance, Nebr.	13	21
Cheyenne, Wyo.	3, 5	
Laramie, Wyo.	*8	18
Rawlins, Wyo.	11	
Craig, Colo.		19

WALLA WALLA, WASHINGTON

870. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the assignment of VHF Channels 5 and 8 to Walla Walla.

(b) **Census Data.** The population of the City of Walla Walla is 24,000.

(c) **Counterproposal of Salt Lake Pipe Line Company.** Salt Lake Pipe Line Company requested that VHF Channel 5 not be assigned to Walla Walla.

(d) **Statement in Support of Salt Lake Pipe Line Company Counterproposal.** Salt Lake Pipe Line Company stated that it is the permittee of operational fixed stations in the Petroleum Radio Service at Pasco, Washington on 72.15 Mc, Adams, Oregon on 74.02 Mc, and Mt. Emily, Oregon on 75.74 Mc, 74.50 Mc, and 74.42 Mc, in the band 72-76 Mc; that these stations are a part of a communication system constructed at a cost of more than $400,000 for the operation and maintenance of its petroleum pipe line; that when construction permits were requested a check was made of possible interference to television channels based upon an earlier Notice in these proceedings which did not propose assignment of Channel 5 to Walla Walla; that equipment operating on other frequencies was used at locations where interference might occur to television but no interference was then expected in the vicinity of Walla Walla; that the above stations are located 37 miles, 25 miles, and 46 miles, respectively, from Walla Walla, and thus may be expected to cause interference to a television station operating on Channel 5 at Walla Walla where the channel is proposed to be assigned under the Third Notice; and that to redesign the communications system by changing frequency of the stations at Pasco, Adams, and Mt. Emily in order to eliminate television interference would require the erection of other stations at heavy expense.

(e) In its Report and Order released May 6, 1948, in Docket 8487 with respect to the sharing of television channels and assignments of frequencies to television and non-government fixed and mobile services the Commission stated:

Allocation of the Band 72-76 Megacycles

The band 72 to 76 megacycles, except for the guard band around the 75 Mc marker, is presently allocated to non-government fixed and mobile services. It is in between television Channel 4 (66 to 72 Mc) and Channel 5 (76 to 82 Mc) and hence is a source of potential adjacent channel interference to each channel. The evidence showed that at least so far as mobile operations are concerned, operation in this band is not feasible since destructive interference to television reception is inevitable. However, the evidence did show that some use can be made of these frequencies with no interference to television on the basis of careful engineering and the formulation of engineering and interference standards. The establishment and application of such standards appear to be capable of solution for the fixed service. They do not appear to be practical in the case of the land mobile service whose requirements are most acute in the same areas which require either television Channels 4 or 5, or both. Accordingly, the Commission has determined that the frequencies 72 to 76 megacycles should be assigned only to the fixed service on an engineered basis and on condition that no adjacent channel interference will result to the reception of television stations which may be authorized or provided for in the Commission's Rules. The Commission recognizes that this allocation does remove some of the flexibility in the television allocation table but this is restricted to television Channels 4 and 5 and not all the television channels, as would be the case if assignments were made for shared use of television channels on an engineered basis. Morever, if the band 72 to 76 megacycles is not to be used by the fixed service on an engineered basis, it would be difficult to assign any service therein. This would constitute a waste of frequencies.

(f) Pursuant to the above Report and Order, Part 2 of the Commission's Rules and Regulations—Rules Governing Frequency Allocations and Radio Treaty Matters; General Rules and Regulations—provides that:

Operational fixed stations may be authorized to use frequencies in this band [72-76 Mc] in accordance with columns 10 and 11 of the table of frequency allocations, on the condition that harmful interference will not be caused to the reception of television stations on Channels 4 and 5.

(g) Part 11—Rules Governing Industrial Radio Services—provided in Section 11.303(a):

Subject to the condition that no harmful interference will be caused to reception of television Channels Number 4 or 5, the following frequencies are available for assignment to fixed stations in the Petroleum Radio Service on a shared basis with other services: [72-76].

Conclusions

871. The Commission has given careful consideration to the possibility of substituting another VHF television channel at Walla Walla for Channel 5 but the assignments for Walla Walla are closely interrelated with the proposals for other cities in the Pacific Northwest area and with Canadian assignments. Such a substitution would deprive another city of a VHF television channel without an adequate VHF substitute and, therefore, does not appear to be feasible. In view of the foregoing and the fact that the authorizations of operational fixed stations in the 72-76 Mc band were expressly made on the basis of non-interference to television assignments, the counterproposal of Salt Lake Pipe Line Company is denied. Other pipe line companies have employed microwave frequencies for communications systems of the type which Salt Lake operates. Such frequencies possess characteristics suitable to the fixed operations and present no problem of interference to television. It is our opinion that the potentiality of interference to television in Walla Walla can best be avoided by Salt Lake Pipe Line Company changing its communications to microwave frequencies. Accordingly, the Salt Lake City Pipe Line Company will have to vacate the frequencies involved when a television station is prepared to commence operation on Channel 5 in Walla Walla.

Final Assignments

872. The assignments of VHF Channels 5 and 8 to Walla Walla are adopted.[173]

TACOMA AND OLYMPIA, WASHINGTON

873. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the following assignments and reservation:

City	VHF Channel No.	UHF Channel No.
Tacoma, Wash.	11, 13	*56, 62
Olympia, Wash.		60

(b) **Census Data.** The metropolitan area of Tacoma has a population of 276,000. The City of Tacoma has a population of 144,000. The City of Olympia has a population of 16,000.

(c) **Counterproposal of Tom Olsen.** Tom Olsen requested the additional assignment of VHF Channel 11 to Olympia by the deletion of that channel from Tacoma.

(d) **Statement in Support of Tom Olsen Counterproposal.** Tom Olsen

[173] The assignment of UHF Channel 22 in Walla Walla and its reservation for non-commercial educational use is discussed elsewhere in this Report.

stated that the operation of Channel 11 in Olympia would not cause objectionable interference to any proposed assignment; that it would provide additional Grade A service and a second television station for Olympia; and that Tacoma would receive a total of 6 VHF and 7 UHF services of at least Grade A quality under the FCC allocation proposal: 4 from Tacoma, 2 from Bremerton, 6 from Seattle, and 1 from Olympia.

(e) **Opposition to Tom Olsen Counterproposal.** The Tribune Publishing Company, Tacoma, Washington, opposed the counterproposal of Tom Olsen to move VHF Channel 11 from Tacoma to Olympia.

(f) **The Tacoma Educational Reservation.** Tacoma Public Schools, Tacoma Vocational - Technical School, College of Puget Sound, and the State Superintendent of Public Instruction supported the reservation of Channel 56 at Tacoma. No objection was filed to the proposed reservation.

Conclusions: Tacoma Educational Reservation

874. On the basis of the record the reservation of Channel 56 at Tacoma is finalized.

Conclusions: Olympia and Tacoma

875. It is our view, on the basis of the record, that the deletion of Channel 11 from Tacoma to provide a VHF assignment to Olympia is not warranted. Tacoma has a population of 144,000, as compared to Olympia with a population of 16,000; and Tacoma is one of the largest cities in the State of Washington. Accordingly, the counterproposal of Tom Olsen is denied.

Final Assignments and Reservation

876. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Tacoma, Wash.	11, 13	*56, 62
Olympia, Wash.		60

BELLINGHAM, SEATTLE, LONGVIEW, WASHINGTON, AND ALBANY, OREGON

877. **Proposed Assignments.** In the Third Notice the Commission proposed the following assignments and reservation:

City	VHF Channel No.	UHF Channel No.
Bellingham		18, 24
Seattle	4, 5, 7, *9	20, 26
Longview		33
Albany		55

Bellingham

878. (a) **Census Data.** The City of Bellingham has a population of 34,000.

(b) **Counterproposal of KVOS, Inc.** KVOS, Inc., Bellingham, Washington, requested the additional assignment of VHF Channel 12 to Bellingham. The assignment of Channel 12 to Bellingham would be accomplished by the assignment of Channel 3 to Chilliwack, Canada, in lieu of Channel 12.

(c) **Statement in Support of KVOS, Inc., Counterproposal.** KVOS, Inc., stated that the assignment of Channel 12 to Bellingham would not deprive any city listed in the Third Notice of a VHF or a UHF channel; that the shift of Channel 12 from Chilliwack meets the mileage separation requirements; that a grant of the counterproposal would provide additional Grade A service; and that a VHF channel would provide a more dependable service to a considerable area than would a UHF service.

(d) The KVOS, Inc., counterproposal would result in an adjacent channel separation of 81 miles between Chilliwack on Channel 3 and Victoria, Canada, on Channel 2 and an adjacent channel separation of 105 miles between Chilliwack on Channel 3 and Seattle, Washington, on Channel 4.

(e) **Oppositions and Conflicting Counterproposals to KVOS, Inc. Counterproposal.** Oppositions and conflicting counterproposals were filed by Fisher's Blend Station, Inc., Seattle; Totem Broadcasters, Inc., Seattle; Twin Cities Broadcasting Corp., Longview, all of Washington; and Central Willamette Broadcasting Company, Albany, Oregon.

Seattle

879. (a) **Census Data.** The Seattle metropolitan area has a population of 733,000. The City of Seattle has a population of 468,000.

(b) **Counterproposal of Totem Broadcasters, Inc.** Totem Broadcasters, Inc., requested the additional assignment of VHF Channel 2 to Seattle,[174] by the assignment of Channel 3 to Victoria, Canada, in lieu of Channel 2.

(c) **Statement in Support of Totem Broadcasters, Inc. Counterproposal.** Totem Broadcasters, Inc., stated that Channel 2 at Seattle would comply with the standards, that the economic resources of Seattle were adequate to support an additional channel and that the assignment of 4 VHF commercial channels to Seattle would result in a healthy competitive situation.

(d) The Totem Broadcasters, Inc., counterproposal would create an adjacent channel separation of 75 miles between Victoria, Canada, on Channel 3 and Seattle on Channel 2.

(e) **Oppositions and Conflicting Counterproposal to Totem Broadcasters, Inc., Counterproposals.** Oppositions and conflicting counterproposals were filed by KVOS, Inc., Bellingham, Twin Cities Broadcasting Corp., Longview, both of Washington, and Central Willamette Broadcasting Co., Albany, Oregon. The Totem Broadcasters, Inc., counterproposal together with the counterproposal of KVOS, Inc., would create an 81 mile co-channel separation between Victoria and Chilliwack on Channel 3.

(f) **Counterproposal of Fisher's Blend Station, Inc.** Fisher's Blend Station, Inc., requested the additional assignment of VHF Channel 2 to Seattle in two alternative counterproposals. Plan 1 would add Channel 2 to Seattle by the assignment of Channel 3 to Victoria, Canada, in lieu of Channel 2.[175] Plan 2 would make the following changes in the assignments proposed in the Third Notice.

City	Third Notice		Proposed Changes (Plan 2)	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Seattle, Wash.	4, 5, 7, *9	20, 26	2†, 4, 5, 7, *9	20, 26
Victoria, B. C.	2	40, 46	12†	40, 46
Chilliwack, B. C.	12	42	3†	42

(g) **Statement in Support of Fisher's Blend Station, Inc. Counterproposal.** Fisher's Blend Station, Inc., stated that the assignment of VHF Channel 2 to Seattle would comply with the Standards, would provide a gain of Grade B interference-free service, that Seattle is the largest city in the Pacific Northwest located in the center of the most densely populated region in that area, that the population of Seattle had increased since 1940; that nearly one-third of the entire population of the State of Washington resides in the Seattle metropolitan area; and that the economic resources of the area were adequate to support the additional station requested.

(h) The Fisher's Blend Plan 1 would create an adjacent channel separation of 75 miles between Victoria, B. C., on Channel 3 and Seattle on Channel 2. Plan 2 would create an adjacent channel separation of 90 miles between Victoria, B. C., on Channel 12 and Tacoma, Washington, on Channels 11 and 13.

(i) **Opposition and Conflicting Counterproposals to Fisher's Blend Station, Inc., Counterproposal.** Oppositions and conflicting counterproposals were filed by KVOS, Inc., Bellingham, Washington; Twin Cities Broadcasting Corporation, Longview, Washington; and Central Willamette Broadcasting Company, Albany, Oregon. The Fisher's Blend Plans 1 and 2, together with the counterproposal of KVOS, Inc., would create, respectively, an 81 mile co-channel separation between Victoria and Chilliwack on Channel 3 and a 48 mile co-channel separation between Victoria and Bellingham on Channel 12.

(j) **The Seattle Educational Reservation.** Educational institutions in Seattle supported the reservation of VHF Channel 9 for noncommercial educational use. No objections were filed to the proposed reservation.

Longview

880. (a) **Census Data.** The City of Longview has a population of 20,000.

(b) **Counterproposal to Twin Cities Broadcasting Corporation.** Twin Cities Broadcasting Corporation requested the additional assignment of VHF Channel 2 to Longview. Plan 1 would assign Channel 2 to Longview without making any other changes in the assignments proposed in the Third Notice. Plan 2 would shift Channel 6 or 8 or 10 from Vancouver, Canada, to Victoria, Canada, shift Channel 2 from Victoria to Vancouver, and make the additional assignment of Channel 2 to Longview.

(c) **Statement in Support of Twin Cities Broadcasting Corporation Counterproposal.** Twin Cities Broadcasting Corporation stated that the City of Longview has a diversity of industries; that it is the center of a trading territory of more than 75,000 people; that the area could support a VHF channel; that the population of the City of Longview has increased 63% since 1940; that Cowlitz County in which the city is located has a population of 53,132 persons and has increased 32% since 1940; and that VHF channels were not made available for use in the southwest section of the State of Washington due to the fact that they were assigned to the large areas in northern Washington.

(d) Plan 1 would result in a co-channel separation of 158 miles between Longview and Victoria, B. C., on Channel 2. Plan 2 would create a 75 mile adjacent channel separation between Victoria on Channel 6 or 8 or 10 and Seattle, Washington, on Channels 7 and 9; and 190 mile co-channel seperation between Vernon, B. C., and Vancouver, B. C. on Channel 2.

(e) **Oppositions and Conflicting Counterproposals to Twin Cities Broadcasting Corporation Counterproposal.** Opposition and conflicting counterproposals to the counterproposal of Twin Cities Broadcasting Corporation were filed by Central Willamette Broadcasting Co., Albany, Oregon; KVOS, Inc., Bellingham, Washington; Totem Broadcasters, Inc., KING Broadcasting Co.; and Fisher's Blend Station, Inc., of Seattle, Washington. The Twin Cities Broadcasting Corporation Plan 2 together with the counterproposal of KVOS, Inc., would create an adjacent channel separation between Vancouver-New Westminster on Channel 2 and Chilliwack on Channel 3. The distance from Vancouver to Chilliwack is 58 miles and the distance from New Westminster to Chilliwack is 47 miles.

Albany

881. (a) **Census Data.** The City of Albany has a population of 10,000.

(b) **Counterproposal of Central Willamette Broadcasting Company.** Central Willamette Broadcasting Company requested that VHF Channel 4 be assigned to Albany,[176]

[174] Queen City Broadcasting Company also filed a comment in which it stated that it had no objection to the assignment of Channel 2 to Seattle provided such assignment does not result in the removal of Channel 4 from Seattle, but submitted no sworn statement. Accordingly, the request has not been considered further.

[175] Plan 1 of Fisher's Blend Station, Inc., is identical with the counterproposal of Totem Broadcasters, Inc.

[176] In a counterproposal filed May 7, 1951, Central Willamette Broadcasting Company requested the assignment of VHF Channel 12 to Albany. In its sworn statement, however, Central Willamette requested Channel 4 in lieu of Channel 12. Although several parties have opposed the request for the assignment of Channel 4 on the merits, no party has objected to the acceptance of the new counterproposal in this proceeding. Accordingly, the Commission is considering the request for the assignment of Channel 4 in Albany on the merits.

by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Albany, Ore.		55	4†	55
Medford, Ore.	4, 5		5, 8†	
Yreka, Calif.	11		10†	
Eugene, Ore.	*9	20, 26	*9, 11†	20, 26
Salem, Ore.	3	*18, 24	2†	*18, 24
Portland, Ore.	6, 8, *10, 12	21, 27	5†, 8, *10, 12	21, 27
Longview, Wash.		33	3†	33
Seattle, Wash.[177]	4, 5, 7, *9	20, 26	2†, 4, 6†, 7, *9	20, 26
Bellingham, Wash.		18, 24	12†	18, 24
Victoria, B. C.	2	40, 46	5†	40, 46
Chilliwack, B. C.	12	42	†	42
Vancouver-New Westminster, B. C.	6, 8, 10	14, 30, 36	3†, 8, 10	14, 30, 36

(c) **Statement in Support of Central Willamette Broadcasting Company Counterproposal.** Central Willamette Broadcasting Company stated that the proposed assignment of 1 UHF channel to Albany is inadequate, that the City of Albany had a 78% increase in population between 1940 and 1950, that the terrain in the area is better adapted to VHF than UHF, and that the assignments in the counterproposal would result in a fairer and more efficient utilization of the available frequencies.

(d) The Central Willamette Broadcasting Company counterproposal would result in co-channel separations of 200 miles between Victoria and Portland on Channel 5, and 212 miles between Vancouver-New Westminster and Longview on Channel 3; an adjacent channel separation of 75 miles between Victoria on Channel 5 and Seattle on Channel 6; and the deletion of Channel 12 from Chilliwack. It was suggested in the counterproposal that the Canadian Government could assign Channel 3 to Chilliwack to replace Channel 12 instead of to Vancouver-New Westminster. This suggestion, however, would result in the deletion of Channel 6 from Vancouver-New Westminster with no VHF replacement. It was also suggested that the Canadian Government could assign a UHF channel to Chilliwack to replace Channel 12. In any event the Central Willamette Broadcasting Company counterproposal would require the deletion of a VHF assignment from a Canadian city.

(e) **Opposition and Conflicting Counterproposals to the Central Willamette Broadcasting Company Counterproposal.** Oppositions and conflicting counterproposals to the counterproposal of Central Willamette Broadcasting Company have been filed by King Broadcasting Company, Seattle; KVOS, Inc., Bellingham, Totem Broadcasters, Inc., Seattle; Twin Cities Broadcasting Corp., Longview; Fisher's Blend Station, Inc., Seattle, all of Washington; and Lane Broadcasting Company, Eugene, Oregon.

Conclusions: Seattle Educational Reservation

882. On the basis of the record the reservation of Channel 9 at Seattle for non-commercial educational use is finalized.

Conclusions: Albany

883. The Central Willamette Broadcasting Company counterproposal would result in a 200 mile co-channel assignment spacing between Victoria, B.C. and Portland on Channel 5, and a 212 mile co-channel assignment spacing between Vancouver-New Westminster, B.C. and Longview on Channel 3; and Channel 5 at Victoria would be 75 miles from the adjacent channel assignment, Channel 6, at Seattle. Further, this counterproposal would require the deletion of Channel 12 from Chilliwack in Canada. Central Willamette Broadcasting Company suggested that Channel 12 could be replaced in Chilliwack by assigning Channel 3 to Chilliwack instead of to Vancouver-New Westminster as proposed in the Central Willamette counterproposal, or by assigning an additional UHF channel to Chilliwack. However, in any event, the Central Willamette Broadcasting Company counterproposal would require the deletion of a VHF assignment from a Canadian community. The Central Willamette Broadcasting Company counterproposal must be denied for the reasons set forth above in our discussion of Canadian-United States television assignments.

Conclusions: Bellingham, Longview, Seattle

884. Twin Cities Broadcasting Corporation (Plan 1) would assign Channel 2 to Longview, without making any other changes in assignments. However, Channel 2 at Longview would be 158 miles from the co-channel assignment at Victoria, B.C. The Twin Cities Broadcasting Corporation (Plan 1) counterproposal must be denied for the reasons set forth above in the discussion of Canadian-United States television assignments.

885. The remaining counterproposal of Twin Cities Broadcasting Corporation (Plan 2), seeks a first VHF channel for Longview; the counterproposal of KVOS, Inc. seeks a first VHF channel for Bellingham; and the counterproposals of Fisher's Blend Station, Inc. and Totem Broadcasters, Inc. seek a fifth VHF channel for Seattle. Only one of the above counterproposals can be granted since they are all conflicting. We are of the view that the assignment of a first VHF channel to Bellingham, a city of 34,000 people, is to be preferred to the assignment of a first VHF channel to Longview, a city with a population of only 20,000, or to the assignment of a fifth VHF channel to Seattle. Accordingly, the KVOS, Inc. counterproposal is granted and Channel 12 is assigned to Bellingham. In order to accomplish this, Channel 3 will be assigned to Chilliwack, B.C. in place of Channel 12.

886. Since we have granted the KVOS, Inc. counterproposal for Bellingham, the conflicting counterproposals of Fisher's Blend Stations' Inc., (Plans 1 and 2), Totem Broadcasters, Inc., and Twin City Broadcasting Corporation (Plan 2) must be denied.

887. Fisher's Blend Stations, Inc. (Plan 1) and Totem Broadcasters, Inc., in assigning a fifth VHF channel to Seattle, would assign Channel 3 to Victoria, B.C. However, the KVOS, Inc. counterproposal assigns Channel 3 to Chilliwack, B.C., 81 miles from Victoria. The Totem Broadcasters, Inc. counterproposal and Fisher's Blend Stations, Inc. (Plan 1) counterproposal must be denied for the reasons set forth above in our discussion of Canadian-United States television assignments.

888. The Fisher's Blend Stations, Inc. (Plan 2) counterproposal, in assigning a fifth VHF channel to Seattle, would assign Channel 12 at Victoria, B.C. However, Channel 12 at Victoria would be only 48 miles from the assignment of Channel 12 in Bellingham resulting from our grant of the KVOS, Inc., counterproposal. The Fisher's Blend Stations, Inc. (Plan 2) counterproposal must be denied for the reasons set forth above in our discussion of Canadian-United States television assignments.

889. The Twin City Broadcasting Corporation (Plan 2) counterproposal, in assigning a VHF channel to Longview, would assign Channel 2 to Vancouver-New Westminster, B.C. However, in granting the KVOS, Inc. counterproposal for Bellingham, Channel 3 is assigned to Chilliwack, B.C. Channel 3 at Chilliwack would be 47 miles from New Westminster and 58 miles from Vancouver where adjacent Channel 2 is proposed to be assigned by Twin City. The Twin City Broadcasting Corporation (Plan 2) counterproposal must be denied for the reasons set forth above in our discussion of Canadian-United States television assignments.

Final Assignments and Reservation

890. The following assignments and reservation are adopted:[178]

City	VHF Channel No.	UHF Channel No.
Bellingham, Wash.	12	18, 24
Longview, Wash.		33
Seattle, Wash.	4, 5, 7, *9	20, 26
Albany, Ore.		55

ELLENSBURG, WASHINGTON

891. (a) **Proposed Assignment.** In the Third Notice the Commission proposed the assignment of UHF Channel 49 to Ellensburg.

(b) The Central Washington Broadcasters, Inc., supported the proposed assignment of Channel 49 to Ellensburg. No objections were filed to the assignment of this channel.[179]

Conclusions

892. In view of the foregoing the proposed assignment of Channel 49 for Ellensburg is adopted.

THE WASHINGTON EDUCATIONAL RESERVATIONS

893. (a) **Proposed Reservations.** In the Third Notice, the Commission proposed the following reservations in Washington for non-commercial educational use:

City	VHF Channel No.[180]	UHF Channel No.
Pullman	*10	
Seattle	*9	
Spokane	*7	
Tacoma		*56

(b) **Pullman.** The State College of Washington and the State Superintendent of Public Instruction supported the reservation of Channel 10 in Pullman for non commercial educational use. No objections were filed to the reservation of this channel.

(c) The Spokane Public Schools and the State Superintendent of Public Instruction supported the reservation of Channel 7 in Spokane for non-commercial educational use. No objections were filed to the reservation of this channel.

(d) **Counterproposal of Washington State Superintendent of Public Instruction.** The State Superintendent of Public Instruction requested the assignment of one channel at each of the following communities and its reservation for non-commercial educational use: Omak-Okanogan, Wenatchee, Ellensburg, Yakima, Kennewick-Richland-Pasco and Walla Walla.

(e) **Statement in Support of Counterproposal of State Superintendent of Public Instruction.** The State Superintendent of Public Instruction stated that the middle portion of the State of Washington could not receive educational coverage from the educational reservations proposed for Tacoma, Seattle, Spokane, and Pullman. No objections were filed to the counterproposal of the State Superintendent of Public Instruction.

Conclusions

894. It is our view that the record supports the reservation of Channel 10 at Pullman and Channel 7 at Spokane for non-commercial educational use. It is our view that the record also supports the assignment and reservation for non-commercial educational use of a UHF channel in Omak-Okanogan, Wenatchee, Ellensburg, Yakima, Kennewick-Richland-Pasco, and Walla Walla. Accordingly, the counterproposal of the State Superintendent of Public Instructions for the assignment and reservation of channels to these communities for non-commercial educational use is granted.

Final Assignments and Reservations[181]

895. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Pullman, Wash.	*10	
Spokane	*7	
Omak-Okamogan		*35
Wenatchee		*45
Ellensburg		*65
Yakima		*47
Kennewick-Richland-Pasco		*41
Walla Walla		*22

BOISE, IDAHO EDUCATIONAL RESERVATION

896. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the assignment to Boise of VHF Channels 4, 7 and 9 with Channel 4 re-

[177] King Broadcasting Corporation is licensed for the operation of Station KING-TV on Channel 5 in Seattle. The Central Willamette counterproposal to delete Channel 5 from Seattle would require modification of the KING-TV license to terminate its operation on Channel 5.

[178] No request was made on the record for an educational reservation in Bellingham.

[179] The additional assignment of Channel 65 to Ellensburg and its reservation for non-commercial use is discussed elsewhere in this Report.

[180] The Seattle and Tacoma educational reservations are discussed elsewhere in this Report.

[181] The Seattle and Tacoma educational reservations are discussed elsewhere in this report.

served for non-commercial educational use.

(b) The JCET and the College of Idaho supported the reservation of Channel 4 in Boise for non-commercial educational use.

(c) **Counterproposal of KIDO, Inc.** KIDO, Inc. requested that Channel 9 be reserved for non-commercial educational use instead of Channel 4.

(d) **Statement in Support of KIDO, Inc. Counterproposal.** KIDO, Inc. stated that VHF Channels 2-6 were preferable to VHF Channels 7-13 for coverage of rural areas such as surround Boise; that it did not appear likely a non-commercial educational station would be established in the community in the foreseeable future; and that Channel 4 should be assigned for commercial use.

(e) **Counterproposal of Boise Valley Broadcasters.** Boise Valley Broadcasters requested that VHF Channel 7 or 9 be reserved for non-commercial educational use instead of Channel 4.

(f) **Statement in Support of Boise Valley Broadcasters Counterproposal.** It was asserted that it did not appear likely that a non-commercial educational station would be established in the foreseeable future and that Channel 4 should be assigned for commercial use.

Conclusions

897. We are of the view that the record supports the reservation of Channel 4 in Boise for non-commercial educational use. We do not recognize differences in VHF channels for assignment purposes; accordingly, the requests of KIDO, Inc., and Boise Valley Broadcasters that the educational reservation be shifted to Channel 7 or 9 are denied and the reservation of Channel 4 in Boise for non-commercial use is finalized.

MOSCOW, IDAHO EDUCATIONAL RESERVATION

898. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of UHF Channel 15 in Moscow for non-commercial educational use.

(b) The University of Idaho supported the reservation of Channel 15 in Moscow for non-commercial educational use. No objection was filed to the proposed reservation of this channel.

Conclusions

899. In view of the foregoing the reservation of Channel 15 in Moscow for non-commercial educational use is finalized.

LOGAN, SALT LAKE CITY, OGDEN, PRICE. PROVO, VERNAL, UTAH

900. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the following assignments and reservation.

City	VHF Channel No.	UHF Channel No.
Logan	2	30
Ogden	12	*18, 24
Price	11	
Provo	9	22, *28
Salt Lake City	4, 5, *7	20, 26

No assignment was proposed for Vernal.

(b) **Census Data.** The standard metropolitan area of Salt Lake City has a population of 275,000 and Salt Lake City has a population of 182,000. The City of Price has a population of 6,000. The City of Vernal has a population of 3,000.

(c) **Existing Stations.** Intermountain Broadcasting and Television Corporation is licensed to operate Station KDYL-TV in Salt Lake City on Channel 4. Radio Service Corporation of Utah is licensed to operate Station KSL-TV in Salt Lake City on Channel 5.

Salt Lake City

901. (a) **Counterproposal of Salt Lake City Broadcasting Company.** Salt Lake City Broadcasting Company, Inc. requested that VHF Channel 2 be assigned to Salt Lake City by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Logan	2	30	12+	30
Ogden	12	*18, 24	9+	*18, 24
Price	11		3+	
Provo	9	22, *28	11+	22, *28
Salt Lake City	4, 5, *7	20, 26	2+, 4, 5, *7	20, 26

(b) **Statement in Support of Salt Lake City Broadcasting Co. Counterproposal.** Salt Lake City Broadcasting Co. stated that the counterproposal would afford an additional channel to Salt Lake City without depriving any other community or state of a television facility proposed under the Commission's Third Notice; that the assignment of VHF Channel 2 as requested would meet the Commission's standards; that petitioner proposed to use a site located on Ocquirrh Mountain Ridge which is about 5,000 feet above the populated area in and around Salt Lake City; that the operation of Channel 2 in Salt Lake City as proposed would result in a first service to a substantial area and population; that the large number of persons in Salt Lake City justified the grant of an additional VHF assignment to that city; and that the population of Salt Lake City had increased approximately 20% during the ten-year period following the 1940 census. No oppositions were filed to the Salt Lake City counterproposal.[182]

(c) **The Salt Lake City Educational Reservation.** Utah State Board of Education, Ogden City Board of Education, Brigham Young University at Provo, University of Utah at Salt Lake City, and Utah State Agricultural College at Logan supported the reservation of Channel 7 at Salt Lake City for non-commercial educational use. No objections were filed to the proposed reservation.

Price

902. (a) **Counterproposal of Eastern Utah Broadcasting Co.** Eastern Utah Broadcasting Company, Price, Utah, requested that VHF Channel 6 be assigned to Price, Utah, in lieu of Channel 11.

(b) **Statement in Support of Eastern Utah Broadcasting Co. Counterproposal.** It was urged that the assignment of Channel 6 to Price in lieu of Channel 11 would result in greater coverage and that the operation of Channel 6 in Price would comply with the Commission's Standards for minimum co-channel and adjacent channel separations.

(c) **Oppositions and Conflicting Counterproposals to Eastern Utah Broadcasting Co. Counterproposal.** Salt Lake City Broadcasting Company, Inc. stated that its proposed ". . . move of Channel 2 to Salt Lake City can be accomplished with either Channel 6 or Channel 3 substituted for Channel 11 assigned to Price," and therefore that it had no objection to the assignment of Channel 6 to Price.

Vernal

903. (a) **Counterproposal of Uintah Broadcasting Company.** Uintah Broadcasting Company requested the assignment of VHF Channel 8 to Vernal. In addition, Uintah Broadcasting Company pointed out that conflicts resulting from the requested assignment of Channel 8 to Vernal could be resolved by the assignment of Channel 3 to Vernal in lieu of Channel 8.

(b) **Statement in Support of Uintah Broadcasting Company Counterproposal.** Uintah Broadcasting Company urged that operation on Channel 3 or Channel 8 in Vernal would afford a first television service to a substantial area and population.

Ogden

904. **The Educational Reservation.** The Utah State Board of Education supported the reservation of Channel 18 in Ogden. The Board requested that this reservation be maintained until educational institutions in the area had the opportunity to secure adequate data upon which to base decisions as to how this channel might best be used co-operatively for educational television. No objections to the reservation were filed.

PROVO

905. **The Educational Reservation.** The Utah State Board of Education supported the reservation of Channel 28 in Provo. The Board requested that this reservation be continued until educational institutions in the area had the opportunity to secure adequate data upon which to base decisions as to how this channel might best be used co-operatively for educational television. Brigham Young University also supported the reservation of the channel and submitted resolutions from the Provo School District Board of Education, the Nebo School District, the Alpene School District, and the Central Utah Vocational School favoring the development of non-commerical educational television in Provo. No objections to the reservation were filed.

Logan

906. **The Educational Reservation.** Utah State Agricultural College at Logan, Utah, requested the reservation of a channel on 782-890 Mc band for non-commercial educational use in Logan. The College stated that its administration and faculty believe it to be their responsibility to make the educational resources of the College available to as many persons as possible through the means of an educational television station. Accordingly, the College reported that it would give all possible support to a non-commercial educational television station by providing talent, information, and technical assistance. No objections were filed to the College's request.

Conclusions: Utah Educational Reservations

907. On the basis of the record the proposed reservations for non-commercial educational use in the State of Utah are finalized. With regard to Logan, the Commission is of the opinion, on the basis of the record, that an assignment to that city for educational use is warranted. Accordingly, UHF Channel 46 is assigned to Logan, Utah, and reserved for non-commercial educational use.

Conclusions: Additional VHF Assignments in Salt Lake City and Vernal

908. The counterproposals for additional VHF assignments in Salt Lake City and Vernal are in conformance with the Rules and standards adopted herein. We believe, on the basis of the record, that the assignment of a 4th VHF channel to Salt Lake City and a 1st VHF channel to Vernal are warranted. Accordingly, the counterproposals of Salt Lake City Broadcasting Co. and Uintah Broadcasting Company are granted.

909. With respect to the request of Eastern Utah Broadcasting Co. for the assignment of Channel 6 in Price in lieu of Channel 11, we would deny this request since the Commission does not recognize differences in VHF or UHF channels for assignment purposes. However, since the Salt Lake City counterproposal which we have granted above required a change in the Price assignment and since Channel 6 at Price would be consistent with that proposal, the request of Eastern Utah Broadcasting Co. is granted.

Final Assignments and Reservations

910. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Logan	12	30, *46
Ogden	9	*18, 24
Price	6	
Provo	11	22, *28
Salt Lake City	2, 4, 5, *7	20, 26
Vernal	3	

PORTLAND, OREGON

911. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the assignment to Portland of VHF Channels 6, 8, 10 and 12 and UHF Channels 21 and 27, with Channel 10 reserved for non-commercial educational use.

(b) **Support of Proposed Assignments.** KOIN, Inc. supported the assignments proposed for Portland.

(c) **The Portland Educational Reservation.** The University of Portland, the Portland Public Schools and the Portland Art Museum supported the reservation of Channel 10 in Portland for non-commercial educational use. No objection was filed to the reservation of this channel.

Conclusions: The Educational Reservation

912. It is our view that the record supports the proposed reservation of Channel 10 in Portland for non-commercial educational use.

Final Assignments and Reservation

913. The following assignments

[182] Oquirrh Radio and Television Company filed a mutually exclusive counterproposal requesting the assignment of VHF Channel 2 to Tooele, Utah. On October 1, 1951, Oquirrh Radio and Television Company withdrew its counterproposal for the use of Channel 2 at Tooele ". . . in favor of the allocation of that channel to Salt Lake City." Accordingly, the counterproposal of Oquirrh Radio and Television Company will not be considered further.

and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Portland, Ore.	6, 8, *10, 12	21, 27

EUGENE, OREGON

914. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment to Eugene of VHF Channel 9 and UHF Channels 20 and 26 with Channel 9 reserved for non-commercial educational use.

(b) **Census Data.** The City of Eugene has a population of 36,000. The City of Medford has a population of 17,000.

(c) **Counterproposal of KUGN, Inc.** KUGN, Inc. requested the additional assignment of VHF Channel 11 to Eugene without making any other changes in the assignments proposed in the Third Notice.

(d) **Statement in Support of KUGN, Inc. Counterproposal.** KUGN, Inc. stated that the City of Eugene and Lane County in which it is situated contain the second largest concentration of population in the State of Oregon; KUGN, Inc. recognized that the separation between Eugene and Yreka City, California, where Channel 11 is proposed to be assigned by the Third Notice is 163 miles, but asserted that the intervening terrain is composed of rough mountainous areas and that no serious interference would occur.

(e) Channel 13 can be assigned at Eugene in accordance with the standards without making any other changes in the assignments proposed in the Third Notice.

(f) **Opposition and Conflicting Counterproposals to KUGN, Inc., Counterproposal.** No opposition or conflicting counterproposals were filed to the counterproposal of KUGN, Inc.

(g) **Counterproposal of Lane Broadcasting Company, Eugene, Oregon.** Lane Broadcasting Company requested that either VHF Channel 4 or 5, proposed to be assigned in the Third Notice to Medford, Oregon, be deleted from that community and assigned to Eugene.

(h) **Statement in Support of Lane Broadcasting Counterproposal.** Lane Broadcasting Company stated that Eugene is one of the principal market areas of the State of Oregon and with respect to population, commercial market data and cultural background is second only in the State of Oregon to the City of Portland.

(i) **Opposition and Conflicting Counterproposal to Lane Broadcasting Company Counterproposal.** A conflicting counterproposal was filed by Central Willamette Broadcasting Company, Albany, Oregon. We have elsewhere in this Report denied this proposal for the reasons there stated.

(j) **The Eugene Educational Reservation.** The University of Oregon at Eugene and School District No. 4 of Lane County supported the reservation of Channel 9 in Eugene for non-commercial educational use. No objection was filed to the reservation of this channel.

Conclusions: The Educational Reservation

915. In view of the foregoing, the reservation of Channel 9 in Eugene for non-commercial educational use is finalized.

Conclusions: Additional VHF Assignment in Eugene

916. We believe that the record supports the addition of a VHF channel in Eugene. The counterproposal of KUGN, Inc., to assign Channel 11 to that community cannot be granted since it would result in an assignment separation below the minimum separation requirements adopted herein.

917. The counterproposal of Lane Broadcasting Company would result in the deletion of a VHF channel proposed to be assigned to Medford. Although it is our view that the record supports the basis for the assignment of an additional VHF channel to Eugene, we do not believe that this assignment need be achieved at the expense of deleting one of the two VHF channels assigned to Medford. We are persuaded to this conclusion in view of the feasibility of the assignment of VHF Channel 13 at Eugene. Accordingly, the counterproposal of KUGN, Inc., and Lane Broadcasting Company in so far as they request the assignment of an additional VHF channel to Eugene are granted by the assignment of VHF Channel 13 to that community.

Final Assignments and Reservation

918. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Eugene, Ore.	*9, 13	20, 26

CORVALLIS, OREGON: EDUCATIONAL RESERVATION

919. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of VHF Channel 7 in Corvallis for non-commercial educational use.

(b) Oregon State Agricultural College supported the reservation of Channel 7 in Corvallis for non-commercial educational use. No objections were filed to the reservation of this channel.

Conclusions

920. In view of the foregoing, the reservation of Channel 7 in Corvallis for non-commercial use is finalized.

SALEM, OREGON: EDUCATIONAL RESERVATION

921. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of UHF Channel 18 in Salem for non-commercial educational use.

(b) Willamette University and Oregon State Department of Education supported the reservation of Channel 18 in Salem for non-commercial educational use. No objections were filed to the reservation of this channel.

Conclusions

922. In view of the foregoing, the reservation of Channel 18 in Salem for non-commercial educational use is finalized.

BUTTE, MONTANA

923. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment to Butte of VHF Channels 4, 6, and 7 with Channel 7 reserved for non-commercial educational use.

(b) **Census Data.** The City of Butte has a population of 33,000.

(c) **Counterproposal of Copper Broadcasting Company.** Copper Broadcasting Company requested the additional assignment of UHF Channel 15 to Butte without making any other changes in the channels proposed in the Third Notice.

(d) **Statement in Support of Copper Broadcasting Company Counterproposal.** Copper Broadcasting Company stated that two commercial VHF channels were insufficient to meet the needs of Butte.

(e) **Oppositions and Conflicting Counterproposals to Counterproposal of Copper Broadcasting Company.** No oppositions or conflicting counterproposals were filed to the counterproposal of Copper Broadcasting Company.

(f) **The Butte Educational Reservation.** The JCET supported the reservation of Channel 7 in Butte for non-commercial educational use. No objections were filed to the reservation of this channel.

Conclusions: Educational Reservation

924. In view of the foregoing, the reservation of VHF Channel 7 in Butte for non-commercial educational use is finalized.

Conclusions: Channel 15

925. It is our view that the record supports the basis for the grant of an additional channel to Butte. Accordingly, the counterproposal of Copper Broadcasting Company is granted and Channel 15 is assigned to Butte.

Final Assignments and Reservation

926. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Butte, Mont.	4, 6, *7	15

STATE OF MONTANA: EDUCATIONAL RESERVATION

927. (a) **Proposed Reservations.** In the Third Notice the Commission proposed the following reservations for non-commercial educational use:

City	VHF Channel No.	UHF Channel No.
Billings, Mont.	*11	
Bozeman, Mont.	*9	
Great Falls, Mont.		*23
Miles City, Mont.	*6	
Missoula, Mont.	*11	

(b) **Billings.** The Eastern Montana College of Education supported the reservation of VHF Channel 11 at Billings. The following educational organizations and groups joined with Eastern Montana College in support of the reservation: Billings Business College; Billings Commercial Club; Mayor of Billings; Billings Ministerial Association; Superintendent of Schools, Laurel, Montana; County Superintendent of Schools, Yellowstone County, Billings; Rocky Mountain College; Postmaster, U.S. Post Office, Billings; P.T.A. City Council; Superintendent School District #2, Billings; and Central Catholic High School. The JCET also supported this reservation. No objection was filed to this reservation.

(c) **Bozeman and Miles City.** The JCET supported the reservation of VHF Channel 9 in Bozeman and VHF Channel 6 in Miles City and requested that these reservations be made final. No objections were filed to these reservations.

(d) **Great Falls.** The College of Great Falls supported the reservation of Channel 23 at Great Falls. The JCET also supported this reservation. The College of Great Falls requested that UHF Channel 23 be reserved until it, either alone or in cooperation with other educational institutions, was able to establish and maintain an educational television station. No oppositions to the reservation were filed.

(e) **Missoula.** The University of Montana and the Executive Board of the University supported the reservation of VHF Channel 11 at Missoula, Montana. Support of the reservation was also received from the Public Schools of Missoula and the Missoula P.T.A. Council, Missoula County Schools, Missoula County High School, and the Montana Federation of Women's Clubs. No objection to the proposed reservation was received.

Conclusions

928. In view of the foregoing, the proposed reservation of the above channels for non-commercial educational use are finalized.

Final Reservations

929. The following reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Billings, Mont.	*11	
Bozeman, Mont.	*9	
Great Falls, Mont.		*23
Niles City, Mont.	*6	
Missoula, Mont.	*11	

ALBUQUERQUE, ROSWELL, AND SANTA FE, NEW MEXICO EDUCATIONAL RESERVATIONS

930. (a) **Proposed Reservations:** In the Third Notice the Commission proposed the reservation of the following channels in New Mexico:

City	VHF Channel No.
Albuquerque	*5
Roswell	*3
Santa Fe	*9

(b) **Albuquerque.** The JCET supported the reservation of Channel 5 in Albuquerque submitting statements of the University of Mexico and the New Mexico State Department of Education. No oppositions to the proposed reservations were filed.

(c) **Roswell.** The JCET supported the reservation of Channel 3 in Roswell submitting a statement of the New Mexico Military Institute at Roswell. In addition, the University of Eastern New Mexico and the New Mexico Board of Education supported the reservation. No oppositions to the proposed reservation were filed.

(d) **Santa Fe.** The Santa Fe Municipal Schools supported the reservation of Cannel 9 in Santa Fe. The Board of Education of New Mexico stated that it was engaged in a survey as to the needs of the community, the costs of construction and operation, and the extent that educational television could be used in the community. The JCET also supported the reservation, submitting a statement of the Archdiocese of Santa Fe expressing interest in and a willingness to cooperate with other educational agencies in the establishment and support of a non-commercial educational television station. No oppositions to the proposed reservation were filed.

Conclusions

931. In view of the foregoing, the reservation of Channel 5 in Albuquerque, Channel 3 in Roswell and Channel 9 in Santa Fe for non-commercial educational use are finalized.

GALLUP, RATON AND SILVER CITY, NEW MEXICO

932. (a) **Proposed Assignments.** In the Third Notice the Commis-

sion proposed the following assignments:

City	VHF Channel No.	UHF Channel No.
Gallup	3, 10	
Raton		46
Silver City	12	

(b) **Census Data.** Gallup has a population of 9,000; Raton a population of 8,000; and Silver City a population of 7,000.

(c) **Counterproposal of New Mexico State Department of Education.** The New Mexico State Department of Education requested the reservation of channels in Gallup, Raton, and Silver City for non-commercial educational use, as follows:

	Third Notice		Counterproposal	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Gallup	3, 10		*3†, 10	
Raton		46		*46†
Silver City	12		*12†	

(d) **Statement in Support of New Mexico State Department of Education Counterproposal.** The Department of Education pointed out that New Mexico is a rural state with population unevenly distributed and that approximately one-half of the counties in the state, the more rural counties, do not have supervisors or special teachers to aid the state's educational program. The Department of Education urged that the use of educational television would enable available personnel to extend their services and made them more effective. The Department of Education stated that the education of adults is a particularly pressing problem in the state, and that it believes the use of television would make it possible and feasible to carry on adult educational programs without the expenditure of large sums which are not now available. The Department of Education stated that the reservation of six channels in New Mexico (three proposed in the Third Notice and three additional requested) would afford adequate coverage to the State. It was contended that the topography requires six stations to obtain the desired coverage. The Department of Education argued that the reservation of these channels was indispensable in order to provide sufficient time to explore all aspects of educational television and to raise funds necessary for the construction and operation of the non-commercial educational television stations. No oppositions to the proposed reservations were filed.

Conclusions

933. The Commission is of the view that the record supports the basis for reserving channels in Gallup, Raton and Silver City for non-commercial educational use. However, we do not believe the only channels in Raton and Silver City and one of two channels in Gallup should be reserved in light of the needs in these communities for commercial service. Accordingly, Channel 8 will be added to Gallup, Channel 52 will be added to Raton, and Channel 10 will be added to Silver City, all to be reserved for non-commercial educational use. The addition of Channel 10 in Silver City, which is within 250 miles of the Mexican border, has been reflected in the Mexican-United States Television Agreement, as modified.

Final Assignments and Reservations

934. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Gallup	3, *8, 10	
Raton		46, *52
Silver City	*10, 12	

YUMA, ARIZONA

935. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the assignment of two channels to Yuma, Arizona: VHF Channels 11 and 13.

(b) **Census Data.** Yuma, Arizona has a population of 9,000.

(c) **Counterproposal of American Broadcasting Company, Inc.** American Broadcasting Company, Inc., Los Angeles, California, filed a counterproposal which, among other changes, would substitute VHF Channel 9 and UHF Channel 47 in Yuma for VHF Channels 11 and 13 in an effort to avoid duplication of VHF Channels 7 and 9 in Los Angeles and Mexicali, Mexico as proposed in the Third Notice. Since the filing of the ABC counterproposal, however, the Mexican-United States Television Agreement has substituted Channel 3 in Mexicali for Channels 7 and 9 and ABC has supported these assignments. Accordingly, the counterproposal of ABC for Yuma is moot and will not be discussed further in this Report.

Final Assignments

936. The following assignments are adopted:

City	VHF Channel No.	UHF Channel No.
Yuma, Ariz.	11, 13	

PHOENIX AND TUCSON, ARIZONA EDUCATIONAL RESERVATION

937. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of VHF Channel 8 in Phoenix and VHF Channel 6 in Tucson for non-commercial educational use.

(b) **Phoenix.** The JCET supported the reservation of Channel 8 in Phoenix submitting statements of the Dean of Phoenix College and Arizona State College at Tempe, Arizona, in support of the reservation. No oppositions to the proposed reservation were filed.

(c) **Tucson.** The University of Arizona supported the reservation of Channel 6 in Tucson stating that the Tucson Public Schools had expressed a willingness to cooperate in the establishment and operation of an educational television station. The JCET also supported the reservation. No oppositions to the proposed reservation were filed.

Conclusions

938. In view of the foregoing the reservation of Channel 8 in Phoenix and Channel 6 in Tucson for non-commercial educational use is finalized.

SACRAMENTO, FRESNO, SANTA BARBARA, VISALIA, CALIFORNIA

939. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Sacramento	6, 10	*40, 46
Fresno	12	*18, 24
Santa Barbara		20, 26
Visalia	3	

(b) **Census Data.** The Sacramento standard metropolitan area has a population of 277,000 and the City of Sacramento a population of 138,000. The Fresno standard metropolitan area has a population of 277,000 and the City of Fresno has a population of 92,000. Santa Barbara has a population of 45,000. Visalia has a population of 12,000.

Sacramento

940. (a) **Counterproposal of McClatchy Broadcasting Company.** McClatchy Broadcasting Company requested the additional assignment of VHF Channel 3 to Sacramento by substituting VHF Channel 4 in Reno, Nevada for VHF Channel 3, as follows:[188]

	Third Notice		Counterproposal	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Sacramento, Calif.	6, 10	*40, 46	3†, 6, 10	*40, 46
Reno, Nevada	3, 8	*21, 27	4†, 8	*21, 27

(b) **Statement in Support of McClatchy Broadcasting Company Counterproposal.** McClatchy Broadcasting Company stated that Sacramento is the capital of California and is one of the fastest growing metropolitan areas in the United States. It was asserted that Sacramento increased 28.1% in population in the 10 year period between 1940 and 1950, and that during this same period, the Sacramento metropolitan area increased 61.8% in population. McClatchy urged that the assignment of Channel 3 in Sacramento is justified, in that it would meet the objectives of Sections 1 and 307(b) of the Communications Act, to provide a fair, more efficient and equitable distribution of television facilities than would the Third Notice. It was submitted that this assignment would conform to the principles expressed by the priorities. McClatchy Broadcasting Company submitted that those counterproposals conflicting with the assignment of VHF Channel 3 to Sacramento should be rejected in light of the urgent need for an additional VHF assignment at Sacramento. McClatchy pointed out that the Commission has proposed five VHF and five UHF channels for San Francisco and a total of only four channels for Sacramento, and argued that the equities favor the assignment of an additional channel to Sacramento. It was also contended that an additional VHF channel in Sacramento is to be preferred over an additional channel for Fresno.

[188] It was stated that Channels 2, 5, and 11 could also be assigned to Reno.

(c) **Counterproposal of Harmco, Inc., and KCRA., Inc.** Harmco, Inc. and KCRA, Inc., filed a joint counterproposal requesting the assignment of an additional VHF channel to Sacramento. Two plans for accomplishing this assignment were proffered: Plan 1 would substitute Channel 2 or 4 in Reno for Channel 3, and Plan 2 would substitute a UHF channel in Monterey for VHF Channel 8 and Channel 11 for Channel 8 in Reno, as follows:

	Third Notice		Counterproposal 1		Counterproposal 2	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Monterey	8		8		†	19†, 53† or 64†
Sacramento	6, 10	*40, 46	3†, 6, 10	*40, 46	6, 8†, 10	*40, 46
Reno	3, 8	*21, 27	2† or 4†, 8	*21, 27	3, 11†	*21, 27

(d) **Statement in Support of Harmco-KCRA Counterproposal.** Harmco, Inc., and KCRA, Inc., noted that there are four AM and three FM stations operating in Sacramento; and that there were 18,500 VHF television receivers in use in the Sacramento trading area as of September 1, 1951. It was urged that Sacramento could support an additional VHF channel and that such assignment would enable the establishment of "a truly competitive television service."

(e) Channel 3 in Sacramento would be 209 miles from the closest co-channel assignment in Eureka, California; and 80 miles from the adjacent channel Station KRON-TV operating on Channel 4 in San Francisco; and 75 and 68 miles, respectively, from the adjacent channel assignment of Channel 2 in San Francisco-Oakland. Channel 4 in Reno would be 190 miles from the transmitter of KRON-TV operating in San Francisco on Channel 4. All of the above communities are situated in Zone II and the above assignments would meet the minimum required separations for assignments in this Zone. Channel 2, 5, or 11 in Reno, however, would not meet the required 190 mile minimum separation for co-channel assignments. Channel 8 at Sacramento would meet the minimum required mileage spacings for Zone II.

(f) **Oppositions and Conflicting Counterproposals to the McClatchy Broadcasting Company and Harmco-KCRA Counterproposals.** The McClatchy Broadcasting Company counterproposal was opposed by the California Inland Broadcasting Company, Fresno, California; Columbia Broadcasting System, Inc.; and the Chronicle Publishing Company, licensee of Station KRON-TV operating on Channel 4 in San Francisco. The McClatchy counterproposal conflicts with the California Inland Broadcasting Company counterproposal and several counterproposals seeking additional VHF channels for San Francisco-Oakland. The San Francisco-Oakland counterproposals have been denied elsewhere in this Report. The Harmco-KCRA counterproposal was opposed by the Monterey Radio-Television Company, Monterey, California; Kenyon Brown,

Reno, Nevada; the American Broadcasting Company, Inc., operating Station KGO-TV on Channel 7 in San Francisco; and the Chronicle Publishing Company. The Harmco-KCRA counterproposal conflicts with the counterproposals of Television California, Oakland, California; California Inland Broadcasting Company, Fresno, California; Kenyon Brown, Reno, Nevada; Tribune Building Company, Oakland, California; Salinas Broadcasting Company, Salinas, California; KROW, Inc., Oakland, California; and CBS, Inc., San Francisco, California. In its oppositions to the Sacramento counterprosal, CBS argued that it was more important, in order to afford the opportunity for a nationwide competitive television service, to provide an additional VHF channel in San Francisco than to provide an additional VHF assignment for Sacramento. Chronicle Publishing Company opposed the assignment of Channel 3 in Sacramento contending that it would degrade the service of Station KRON-TV on Channel 4 in San Francisco. For the same reason, KRON-TV opposed the assignment of Channel 4 in Reno. Monterey Radio-Television Company opposed the Harmco-KCRA plan insofar as it would delete VHF Channel 8 from Monterey, and urged that it was possible to assign an additional VHF channel to Sacramento without deleting the Monterey assignment. ABC, Inc., opposed the assignment of Channel 8 in Sacramento if it would mean a limitation on the power of Station KGO-TV operating on Channel 7 in San Francisco.

(g) Sacramento Educational Reservation. The Sacramento City Unified School District supported the proposed reservation of UHF Channel 40 in Sacramento for noncommercial educational use, stating the preparations were under way to study and advise with the Sacramento Area Educational Television Committee concerning the joint cooperation in the operation of an educational station. The Director of the Grant Union High School and Technical College filed a request on behalf of the Sacramento Area Educational Television Committee that VHF Channel 6 be reserved in Sacramento rather than UHF Channel 40. This Committee represents the Amador, Colusa, Sacramento, Stanislaus, Yolo, and Yuba County Public School Systems. It was contended that a VHF assignment was required in Sacramento to provide adequate coverage in a region of high mountain ranges and large valleys. No oppositions to the proposed reservation or the request for a VHF reservation were filed.

Fresno

941. (a) **Counterproposal of McClatchy Broadcasting Company.** McClatchy Broadcasting Company requested the additional assignment of three additional VHF channels to Fresno by substituting Channel 11 for Channel 5 in Goldfield, Nevada; Channel 13 for Channel 9 in Tonopah, Nevada; and Channel 12 for Channel 13 in Las Vegas, Nevada, as indicated below:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Fresno, Calif.	12	*18, 24	5†, 7†, 9†, 12	*18, 24
Goldfield, Nevada	5		11†	
Las Vegas, Nevada	8, *10, 13		8, *10, 12†	
Tonopah, Nevada	9		13†	

(b) Statement in Support of McClatchy Broadcasting Company Counterproposal. McClatchy Broadcasting Company urged that Fresno is the central city of the Fresno standard metropolitan area, which increased in population 53.6% since 1940. It was also stated that the Fresno city population increased 49.3% since 1940. It was urged that the assignments proposed for Fresno in the Third Notice are inadequate, particularly since only one VHF channel is assigned to that community and one of the two UHF channels is reserved for non-commercial educational use. It was argued that the size and importance of Fresno requires the assignment of at least three additional VHF channels. McClatchy argued that the operation of Channels 5, 7 and 9 would be feasible in Fresno. It was stated that Channel 5 at Fresno would be 161 miles from Station KPIX operating on Channel 5 in San Francisco; Channel 7 would be 162.5 miles from Station KGO-TV operating on Channel 7 in San Francisco; and Channel 9 would be 161 miles from San Francisco and 155 miles from Oakland, where Channel 9 is assigned. McClatchy submitted that while these assignments would result in separations "somewhat less than those specified" in the Third Notice, the safety factor provided by the mountain range between Fresno and San Franciso "will set off the effect of reduced distance and enable full power operations from the Fresno site." It was argued that where there are unusual terrain conditions, such as exist in California, it would be good engineering practice to apply these geographical advantages to the assignment of television facilities. Data has been submitted concerning high frequency field intensity measurements made across a mountain path between the period of August 17 and September 17, 1951, in support of McClatchy's proposal. McClatchy contended that mountainous terrain has a substantial effect on the propagation along the same length path over relatively smooth terrain. It was argued that the measurements submitted by McClatchy demonstrate that the reduction in signal due to the mountainous terrain would be on the order of 7 db, and that such a reduction should permit closer spacings of co-channel stations in this area. McClatchy also submitted that the same degree of protection afforded by a co-channel spacing of 170 miles could be obtained by a slight reduction in power. McClatchy urged that the Commission must strike a balance between the need for more VHF service and an endeavor to give a few stations a wider service range. It was also urged that, if necessary, distances could be maintained by proper site selection.

(c) Conflicting Counterproposals and Oppositions to McClatchy Broadcasting Company Counterproposal. Oppositions to the McClatchy Company counterproposal have been filed by KPIX, Inc., and American Broadcasting Company, Inc., San Francisco, California. American Broadcasting Company, Inc., licensee of Station KGO-TV operating on Channel 7 in San Francisco, pointed out that the McClatchy counterproposal would involve co-channel operation between KGO-TV and Fresno at 162.5 miles. ABC urged that, while there is no question that the terrain may affect the coverage which a television station may expect to provide, the terrain between the transmitter and the receiver, separated by a distance comparable to that between Fresno and San Francisco, may have little or no effect on the tropospheric propagation over that path. It was noted that tropospheric propagation includes all transmissions resulting from departure from the standard atmosphere and that the troposphere is that portion of the earth's atmosphere occupying the space above the earth up to about 6 miles. ABC contended that when this is taken into consideration, the existence of a mountain range of only a few thousand feet in height, occupying but a small percentage of the total path, might have little influence on interfering signals propagated through the troposphere. It was stated that, moreover, service field calculations indicate that under certain conditions higher than a normal field behind a mountain might be expected than would be predicted from propagation curves based on the assumption of a smooth earth. It was also urged by ABC that the field intensity measurements submitted on behalf of McClatchy were made at a single point approximately 100 miles from the transmitter site of KRON-TV in the direction of Fresno. The measurements consisted of continuous recordings of the field strength of KRON-TV over a period of only one month. It was noted in the discussion of these field intensity measurements that no information was offered as to whether investigations were made to determine that the site selected for the recordings was one in which a generally homogenous field existed, nor was informaion given as to whether the general area was probed at pertinent locations or at antenna heights different from those used for the recordings. It was also noted that Channel 7 is in a different portion of the spectrum from Channel 4, and from the FM frequencies under which the measurements were made. It was, therefore, submitted by ABC that any conclusions drawn from these measurements can only be applicable to the FM frequency spectrum or to Channels 2 through 6. It was urged that it would be unsound to assign co-channel television stations in Fresno and San Francisco based on very limited data such as that offered by McClatchy. It was also pointed out that there was no indication given whether the fields received were due to ground wave transmissions or to tropospheric propagation and that there was no information to indicate whether the field intensity level on Channel 7 might be the same or entirely different from the field intensities which were actually recorded. It was also noted that there was no information indicating that the field intensity of the stations which were recorded and of the other stations in San Francisco might be the same or entirely different, 10, 20, or 30 miles farther from San Francisco. ABC pointed out that there was no information in the report indicating what level field intensity might be expected in the San Francisco service area from a television station operating in Fresno. Accordingly, ABC concluded that the only thing that might be derived from this report is that during the period from August 17 to September 17, 1951, the received field intensity of KRON-TV, KNBC-TV and KCRA-FM was of the magnitude shown in this report at the particular receiving location selected. ABC argued that in light of the foregoing it would be unsound to assign Channel 7 to Fresno.

(d) Counterproposal of KARM, The George Harm Station. KARM, The George Harm Station, Fresno, California, requested the assignment of three additional VHF channels to Fresno, by substituting Channel 11 for Channel 5 in Goldfield, Nevada; Channel 6 for Channel 9 in Tonopah, Nevada; and Channel 12 for Channel 6 in Ely, Nevada, as indicated below:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Fresno, Calif.	12	*18, 24	5†, 7†, 9†, 12	*18, 24
Ely, Nevada	3, 6		3, 12†	
Goldfield, Nevada	5		11†	
Tonopah, Nevada	9		6†	

It was suggested, as an alternative, that only UHF channels be assigned to Fresno.

(e) Statement in Support of KARM, The George Harm Station, Counterproposal. KARM, The George Harm Station, stated that there were seven pending applications for new television stations in Fresno. KARM asserted that additional VHF channels for Fresno could only be obtained by co-channel assignments with San Francisco-Oakland. It was conceded that since the distance from Fresno to San Francisco is 161 miles, such co-channel assignments would require deviations from the required minimum assignment spacing. However, it was argued that the assignment of channels to both cities would be feasible with operation in Fresno so situated as to provide the grade of service to Fresno specified in the Third Notice, and at the same time to maintain a 170 mile transmitter-to-transmitter spacing. It was urged that such operation could be achieved from a transmitter location midway between Fresno and Visalia.

(f) Conflicting Counterproposals and Oppositions to the KARM, The George Harm Station, Counterproposal. Oppositions to the counterproposal of KARM, The George Harm Station, were filed by KPIX, Inc., and the American Broadcasting Company, Inc., both of San Francisco.

(g) Counterproposal of California Inland Broadcasting Company. California Inland Broadcasting Company, Fresno, California, requested the additional assignment

of a VHF channel to Fresno by substituting UHF Channel 49 for VHF Channel 3 in Visalia, California, as indicated below:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposed Changes VHF Channel No.	Proposed Changes UHF Channel No.
Fresno, Calif.	12	*18, 24	3†, 12	*18, 24
Visalia, Calif.	3		†	49†

(h) Statement in Support of California Inland Broadcasting Company Counterproposal. California Inland Broadcasting Company contended that Channel 3 would be capable of widespread rural coverage only if transmitting facilities capable of radiating maximum power, with maximum permissible antenna height are utilized. It was argued that such would not be the case in Visalia, a community of only approximately 11,000 people. It was argued that the priorities would be better served by assigning VHF Channel 3 to Fresno where it would be utilized "to its maximum effectiveness." Under its counterproposal, California Inland Broadcasting Company stated that the closest co-channel assignment to Channel 3 at Fresno would be at Reno, Nevada, 192 miles distant. It was also stated that UHF Channel 49 at Visalia would meet all minimum mileage spacing requirements.

(i) Conflicting Counterproposals and Oppositions to California Inland Broadcasting Company Counterproposal. The California Inland Broadcasting Company counterproposal conflicts with the counterproposal of McClatchy Broadcasting Company, Sacramento, California; Harmco, Inc., and KCRA, Inc., Sacramento; Tribune Building Company, Oakland, California; Columbia Broadcasting System, Inc., San Francisco, California; Television California, San Francisco, California; and Radio KIST, Inc., Santa Barbara, California. Oppositions to the California Inland Broadcasting Company counterproposal have been filed by Television California; Tribune Building Company; Columbia Broadcasting System, Inc., and Radio KIST, Inc.

(j) Fresno Educational Reservation. The JCET supported the reservation of UHF Channel 18 in Fresno for non-commercial educational use, submitting statements of the Superintendent of the Fresno County Schools and Reedley College located in Fresno County. No oppositions to the reservation were filed.

Santa Barbara and Visalia

942. **(a) Counterproposal of Radio KIST, Inc.** Radio KIST, Inc., Santa Barbara, California, originally filed a counterproposal seeking the assignment of Channel 8 at Santa Barbara. Subsequently, Radio KIST, Inc., filed an alternate counterproposal[184] requesting the assignment of VHF Channel 3 to Santa Barbara to be accomplished by deleting Channel 3 from Visalia and substituting two UHF channels as indicated below:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposed Changes VHF Channel No.	Proposed Changes UHF Channel No.
Santa Barbara		20, 26	3†	20, 26
Visalia	3		†	43†, 49†

[184] On December 11, 1951, Radio KIST, Inc., filed a petition for leave to file further comments and evidence in the proceeding requesting, as an alternative to its previous counterproposal, that VHF Channel 3 be assigned to Santa Barbara. The Commission granted this petition by Order (FCC 52-28) of January 9, 1952 and accepted the new Radio KIST, Inc., counterproposal in this proceeding.

(b) Statement in Support of Counterproposal of Radio KIST, Inc. Radio KIST, Inc., urged that in light of the Mexican-United States Television Agreement removing VHF Channel 3 from San Diego, the assignment of VHF Channel 3 be made to Santa Barbara. It was noted that the distance from Santa Barbara to Mexicali, where VHF Channel 3 is assigned by the Mexican-United States Television Agreement, is 274 miles. It was urged that the distance to the adjacent channel transmitter on VHF Channels 2 and 4 on Mount Wilson, Los Angeles, would be 94 miles and that this distance meets the minimum separation requirements. The distance between Santa Barbara and San Diego where VHF Channel 8 is assigned is 188 miles.

(c) Oppositions and Conflicting Counterproposals to the Radio KIST, Inc. Counterproposal. Oppositions to the counterproposal of Radio KIST, Inc., seeking the assignment of VHF Channel 8, were filed by the following parties: American Broadcasting Company, Inc., Los Angeles, California; Kennedy Broadcasting Company, San Diego, California; McClatchy Broadcasting Company, Bakersfield, California; and Thomas S. Lee Enterprises, Inc., Los Angeles, California. This counterproposal conflicts with the McClatchy Broadcasting Company counterproposal for Bakersfield. Oppositions to the counterproposal of Radio KIST, Inc., seeking the assignment of VHF Channel 3 in Santa Barbara, were filed by Columbia Broadcasting System, Inc., Los Angeles, California; California Inland Broadcasting Company, Fresno, California; and National Broadcasting Company, Inc., Los Angeles, California. This counterproposal conflicts with the California Inland Broadcasting Company counterproposal for Fresno.

(d) In its opposition to the Radio KIST, Inc., counterproposal, National Broadcasting Company, Inc., licensee of KNBH operating on VHF Channel 4 in Los Angeles from Mount Wilson, alleged that a station in Santa Barbara on VHF Channel 3 would cause interference to an area of approximately 1,600 square miles within the KNBH service area. NBC urged that this would represent a substantial part of the entire KNBH interference free service area, and that the population within such area would be 109,612 persons. If the Santa Barbara station would operate at greater height than 500 feet, or at a lesser distance from KNBH, NBC noted that the interference area would be correspondingly greater.

(e) In its opposition to Radio KIST, Inc., CBS urged that the KIST counterproposal for VHF Channel 3 is contrary to the public interest. CBS noted that although Santa Barbara is 87 miles from Los Angeles, signals transmitted on VHF Channels 2 and 4 in Los Angeles are received in Santa Barbara, and that several thousand VHF receivers are on hand in Santa Barbara receiving programs from Los Angeles. The assignment of VHF Channel 3 to Santa Barbara as proposed, because of resulting interference, would prevent reception of VHF Channels 2 and 4 in the Santa Barbara area. It was also urged, in addition, that the assignment of VHF Channel 3 in Santa Barbara would create an intermixture problem since the licensee of the station on Channel 3 would operate the only VHF station in that community competing against two UHF stations.

(f) In its opposition to the KIST counterproposal, California Inland Broadcasting Company urged that while Fresno and Santa Barbara are only 160 miles apart, transmitter sites could be obtained in the Fresno area to maintain a 170 mile spacing. On this basis, California Inland Broadcasting Company interposed no objection to a finding by the Commission that both counterproposals of Radio KIST, Inc., and California Inland Broadcasting Company requesting the assignment of VHF Channel 3 to Santa Barbara and Fresno could be granted and are not in conflict. However, California Inland urged that if a determination must be made between the two proposals, the California Inland proposal should be preferred.

Conclusions: Additional VHF Channels in Sacramento

943. We are of the view that the record supports the basis for assigning an additional VHF channel to Sacramento. Counterproposals have been filed requesting both VHF Channels 8 and 3 for Sacramento: Harmco-KCRA has suggested that VHF Channel 8 be assigned to Sacramento by substituting a UHF channel for VHF Channel 8 in Monterey and VHF Channel 11 for VHF Channel 8 in Reno. However, VHF Channel 11 in Reno being only 188 miles from the co-channel assignment in San Jose would not meet the 190 mile minimum assignment separation for Zone II. VHF Channel 8, therefore, cannot be assigned to Sacramento as proposed by Harmco-KCRA. McClatchy Broadcasting Company and Harmco-KCRA have requested that VHF Channel 3 be assigned to Sacramento by substituting VHF Channel 4 for VHF Channel 3 in Reno. Both Channel 3 in Sacramento and Channel 4 in Reno would meet the minimum mileage separation requirements for assignments in Zone II. We can see no merit, therefore, in the opposition to these counterproposals by The Chronicle Publishing Company, which operates Station KRON-TV on VHF Channel 4 at San Francisco. The assignment of VHF Channel 3 in Sacramento conflicts with counterproposals seeking the assignment of additional VHF channels in San Francisco-Oakland and Fresno. We believe that the assignment of a third VHF channel to Sacramento is to be preferred to the assignment of a sixth VHF channel to San Francisco-Oakland. As noted in our discussion of the San Francisco counterproposals, we are of the view that the assignment of five VHF and five UHF channels to San Francisco-Oakland constitute a fair and equitable assignment to those communities in view of the needs of other areas for television service. With respect to the conflicting Fresno counterproposal which requests the assignment of VHF Channel 3 in Fresno as a second VHF channel, it should be pointed out that the California Inland Broadcasting Company counterproposal for Fresno also conflicts with the counterproposal of Radio KIST, Inc., seeking the assignment of a first VHF channel for Santa Barbara. VHF Channel 3 can be utilized in both Sacramento and Santa Barbara; but, on the other hand, the assigment of Channel 3 in Fresno would preclude the assigment of this frequency in both Sacramento and Santa Barbara. We believe, therefore, that the assignment of VHF Channel 3 in Fresno would effect the more efficient and equitable distribution of VHF assignments. Accordingly, VHF Channel 3 is assigned to Sacramento and VHF Channel 4 is substituted in Reno for Channel 3.

Conclusions: Educational Reservation in Sacramento

944. In the Third Notice the Commission pointed out that a VHF channel was reserved for non-commercial educational use in all communities having three or more VHF channels where all VHF channels were not in operation. Since only two VHF channels were proposed for Sacramento in the Third Notice, UHF Channel 40 was reserved in that city for non-commercial educational use. Grant Union High School and Technical College requested that VHF Channel 6 in Sacramento be reserved for non-commercial educational use. No oppositions to this request were filed. We have above assigned Channel 3 as a third VHF channel to Sacramento. We are of the view, therefore, that the reservation should be shifted in Sacramento from UHF Channel 40 to VHF Channel 6. We believe that such action is necessary and proper in light of the principle in the Third Notice set out above and the unopposed request for the VHF reservation. Accordingly, VHF Channel 6 will be reserved in Sacramento for non-commercial educational use, and UHF Channel 40 will be available for commercial purposes.

Conclusions: Educational Reservation in Fresno

945. On the basis of the record, the reservation of Channel 18 in Fresno for non-commercial educational use is finalized.

Conclusions: VHF Channels 5, 7 and 9 in Fresno

946. McClatchy Broadcasting Company and KARM, The George Harm Station, have requested the additional assignment of VHF Channels 5, 7 and 9 to Fresno. However, such assignments would result in substantial deviations from the required 190 mile minimum co-channel assignment separation for Zone II: Channel 5 would be 161 miles from KPIX on Channel 5 in San Francisco; Channel 7 would be 162.5 miles from KGO-TV on Channel 7 in San Francisco; and Channel 9 would be 161 miles from San Francisco and 155 miles from Oakland where this channel is assigned. It was urged that in light of the mountainous terrain that would separate the stations involved, the distances would be adequate safeguards to prevent interference. Measurements were submitted to substantiate this contention. We are of the view, however, that we cannot,

upon the basis of the data submitted, deviate from our required minimum. The Commission will not permit assignment separations below the minimum between stations cut off by mountain ranges until a sufficient body of pertinent propagation information on this point can be assembled and analyzed. It was also contended that station separation could be met by locating a site outside of Fresno. We do not believe that there is any basis for making assignments deviating from the required minimum assignment spacings on the basis of this contention. Nor, as we have noted elsewhere in this Report, do we believe that assignments can be made in cases such as this on the basis of operation with less than maximum power. We also see no adequate basis in the record upon which we may grant the request that all commercial assignments in Fresno be relegated to the UHF portion of the spectrum. Accordingly, the counterproposals of McClatchy Broadcasting Company and KARM, The George Harm Station, are denied.

Conclusions: Channel 3 in Fresno

947. California Inland Broadcasting Company requested the assignment of Channel 3 as a second VHF channels, to Fresno, to be accomplished by substituting a UHF channel for Channel 3 in Visalia. This request conflicts with the counterproposals of Radio KIST, Inc., seeking a first VHF channel for Santa Barbara and McClatchy Broadcasting Company and Harmco-KCRA seeking a third VHF channel for Sacramento. The assignment of Channel 3 in Fresno would preclude the assignment of this frequency in both Santa Barbara and Sacramento, while Channel 3 can be employed in Santa Barbara and Sacramento at the same time. As we have noted above, we are of the view that the granting of the Santa Barbara and Sacramento assignments is to be preferred since such action would effect the more equitable and efficient assignments in this area. Accordingly, the counterproposal of California Inland Broadcasting Company is denied.

Conclusions: Additional Channels for Fresno

948. We believe that the record supports the basis for assigning additional channels to Fresno, a city of 92,000 in a metropolitan area of 277,000. Accordingly, two additional UHF channels, Channels 47 and 53, are assigned to Fresno.

Conclusions: Additional VHF Channel in Santa Barbara

949. Radio KIST, Inc., has requested the assignment of VHF Channel 3 or 8 as a first VHF channel for Santa Barbara. Channel 8 in Santa Barbara, however, would be only 188 miles from the co-channel assignment in San Diego and thus would not meet the 190 mile minimum co-channel assignment spacing for Zone II. Channel 3 in Santa Barbara, on the other hand, would meet all minimum spacing requirements. In order to assign Channel 3 to Santa Barbara, Radio KIST, Inc., suggests that UHF Channels 43 and 49 be substituted in Visalia for Channel 3. Santa Barbara has a population of 45,000 as compared to Visalia with a population of 12,000. We believe, therefore, that a first VHF channel in Santa Barbara is to be preferred to a first VHF channel in Visalia. The assignment of Channel 3 in Santa Barbara conflicts with the California Inland Broadcasting Company counterproposal for Fresno. We believe that in view of the population of Santa Barbara, that city is entitled to a first VHF assignment before a second VHF assignment is made in Fresno. Moreover, as we have noted above, we believe that the assignment of Channel 3 in both Santa Barbara and Sacramento is to be frequency in Fresno alone. CBS prequency in Fresno alone. CBS and NBC who operate adjacent channel stations in Los Angeles on Mount Wilson (Channels 2 and 4) have opposed the assignment of Channel 3 in Santa Barbara. However, since the assignment of Channel 3 in Santa Barbara meets the minimum mileage spacing requirement, we see no merit in these oppositions. Accordingly, Channel 3 is assigned to Santa Barbara and UHF Channels 43 and 49 are substituted for Channel 3 in Visalia. As noted in connection with our discussion of international considerations, this assignment has been reflected in the Mexican-United States Television Agreement, as modified.

Final Assignments and Reservations

950. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Sacramento	3, *6, 10	40, 46
Fresno	12	*18, 24, 47, 53
Santa Barbara	3	20, 26
Visalia		43, 49

SAN FRANCISCO — OAKLAND, CALIFORNIA

951. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment of 10 channels for San Francisco-Oakland: VHF Channels 2, 4, 5, 7 and 9 and UHF Channels 20, 26, 32, 38, and 44, with Channel 9 reserved for non-commercial use.

(b) **Census Data.** The population of San Francisco is 775,000; and the population of Oakland is 385,000. The population of the San Francisco-Oakland standard metropolitan area is 2,241,000.

(c) **Existing Stations.** Chronicle Publishing Company is licensed for the operation of Station KRON-TV on Channel 4; KPIX, Inc. is licensed for the operation of Station KPIX on Channel 5; and American Broadcasting Company, Inc. is licensed for the operation of Station KGO-TV on Channel 7, all in San Francisco.

(d) **Counterproposal of Columbia Broadcasting System, Inc.** Columbia Broadcasting System, Inc. filed a counterproposal containing four alternate plans requesting the assignment of additional VHF channel for San Francisco-Oakland: Plan 1 would add Channel 11 to San Francisco Oakland by substituting Channel 30 in Stockton, California for Channel 42; Channel 43 in Madera, California for Channel 30; Channel 51 in Salinas, California for Channel 28; and UHF Channel 42 in San Jose, California for VHF Channel 11. Plan 2 would add VHF Channel 13 to San Francisco-Oakland by substituting UHF Channel 64 for VHF Channel 13 in Stockton. Plan 3 would add VHF Channels 11 and 13 to San Francisco-Oakland by substituting UHF Channels 30 and 64 for VHF Channel 13 and UHF Channel 42 in Stockton; UHF Channel 42 for VHF Channel 11 in San Jose; Channel 51 for Channel 28 in Salinas; and Channel 43 for Channel 30 in Madera. Plan 4 would add VHF Channel 13 to San Francisco-Oakland by substituting Channel 6 in Stockton for Channel 13; Channel 3 in Sacramento for Channel 6; and Channel 5 for Channel 3 in Reno. The four plans are set out below:[185]

(e) **Statement in Support of Columbia Broadcasting System, Inc. Counterproposal.** In requesting additional VHF channels for San Francisco, Oakland, CBS advanced the same reasons offered in support of its requests for additional VHF channels in Boston and Chicago. CBS urged that additional commercial VHF channels were needed in San Francisco-Oakland as in Boston and Chicago to assure a nationwide competitive television service. CBS also argued that a network must own facilities in markets such as Boston, Chicago and San Francisco to enable it to compete with other networks and submitted that it is essential that such facilities be VHF.

(f) The CBS plans 1, 2 and 3 would delete VHF channels from San Jose and Stockton. In the Third Notice the Commission proposed four channels for San Jose: VHF Channel 11 and UHF Channels 48, 54 and 60, with Channel 54 reserved for non-commercial educational use. The San Jose standard metropolitan area has a population of 291,000 and the City of San Jose has a population of 95,000. In the Third Notice the Commission proposed three channels for Stockton, VHF Channel 13 and UHF Channels 36 and 42, with Channel 42 reserved for non-commercial educational use. The Stockton standard metropolitan area has a population of 201,000 and the City of Stockton a population of 71,000.

(g) CBS Plan 4 would assign Channel 6 to Stockton in place of Channel 13 at a distance of 188 miles from the co-channel assignsituated in Zone II; and, accordingly, this separation would not meet the 190 mile minimum for co-channel assignments in this zone. This plan would also assign Channel 5 at Reno at a distance of 185 miles from KPIX operating on Channel 5 in San Francisco.

Plan 1

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Madera		30		43†
Salinas		28		51†
San Francisco-Oakland	2, 4, 5, 7, *9	20, 26, 32, 38, 44	2, 4, 5, 7, *9 11†	20, 26, 32, 38, 44
San Jose	11	48, *54, 60	†	42†, 48, *54, 60
Stockton	13	36, *42	13	*30†, 36

Plan 2

City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
San Francisco-Oakland	2, 4, 5, 7, *9	20, 26, 32, 38, 44	2, 4, 5, 7, *9, 13†	20, 26, 32, 38, 44
Stockton	13	36, *42	†	36, *42, 64†

Plan 3

City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Madera		30		43†
Salinas		28		51†
San Francisco-Oakland	2, 4, 5, 7, *9	20, 26, 32, 38, 44	2, 4, 5, 7, *9 11†, 13†	20, 26, 32, 38, 44
San Jose	11	48, *54, 60	†	42†, 48, *54, 60
Stockton	13	36, *42	†	*30†, 36, 64†

Plan 4

City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
San Francisco Oakland	2, 4, 5, 7, *9	20, 26, 32, 38, 44	2, 4, 5, 7, *9, 13†	20, 26, 32, 38, 44
Sacramento	6, 10	*40, 46	3†, 10	*40, 46
Stockton	13	36, *42	6	36, *42
Reno	3, 8	*21, 27	5†, 8	*21, 27

(h) **Conflicting Counterproposals and Oppositions to the CBS Counterproposals.** CBS Plan 1, which would substitute a UHF channel in San Jose for VHF Channel 11, was opposed by the San Jose Television Broadcasting Company of San Jose. CBS Plan 2, which would substitute a UHF channel for VHF Channel 13 in Stockton, was opposed by E. F. Peffer, Radio Diablo, Inc., and McClatchy Broadcasting Company, Stockton. CBS Plan 3, which would substitute UHF channels for VHF Channels 11 and 13 in San Jose and Stockton, was opposed by San Jose Television Broadcasting Company, San Jose, and E. F. Peffer, Radio Diablo, Inc. and McClatchy Broadcasting Company, Stockton. CBS Plan 4 was opposed by KPIX, Inc., San Francisco and E. F. Peffer, Radio Diablo, Inc., and McClatchy Broadcasting Company. This plan conflicts with the counterproposals of McClatchy Broadcasting Company and Harmco, Inc. and KCRA, Inc. seeking an additional VHF channel for Sacramento.

(i) **Counterproposal of Television California.** Television California, San Francisco, requested the assignment of an additional VHF channel to San Francisco-Oakland to be accomplished by substituting Channel 4 for Channel 3 in Reno; Channel 3 for Channel 6 in Sacramento; and Channel 6 for Channel 13 in Stockton, as indicated below:[188]

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Sacramento	6, 10	*40, 46	3†, 10	*40, 46
San Francisco-Oakland	2, 4, 5, 7, *9	20, 26, 32, 38, 44	2, 4, 5, 7, *9, 13†	20, 26, 32, 38, 44
Stockton	13	36, *42	6†	36, *42
Reno	3, 8	*21, 27	4†, 8	*21, 27

[185] CBS also requested, in the alternative, that the educational reservation be shifted from VHF Channel 9 to a UHF channel.

(j) **Statement in Support of Television California Counterproposal.** Television California urged that the assignment of Channel 13 in San Francisco-Oakland can be accomplished without depriving any community of a television facility. Television California noted that its counterproposal conflicted with that of McClatchy Broadcasting Company and Harmco, Inc., and KCRA, Inc., requesting the addition of a VHF channel to Sacramento. However, it was argued that Sacramento is assigned almost half as many channels as San Francisco while the population of Sacramento is scarcely 1/10th that of San Francisco. It was contended, also, that the San Francisco metropolitan area is more extensively in area than is the Sacramento metropolitan area, which is relatively compact. Television California submitted that, with these factors considered, together with the nature of the rugged terrain surrounding San Francisco, the assignment of an additional VHF channel to San Francisco would comply more fully with the mandate of Sections 1 and 307(b) of the Communications Act and of the Commission's priorities, than would the assignment of an additional VHF channel to Sacramento. Television California also urged that the assignment of an additional channel to San Francisco-Oakland is justified in light of those applicants who have participated in a hearing for television stations in San Francisco.[187]

(k) **Conflicting Counterproposals and Oppositions to Television California Counterproposal.** The Television California counterproposal conflicts with the counterproposals of McClatchy Broadcasting Company and Harmco, Inc., and KCRA, Inc. for Sacramento. Oppositions to the Television California counterproposal have been filed by E. F. Peffer; McClatchy Broadcasting Company; KPIX, Inc., San Francisco; Radio Diablo, Inc., and Harmco, Inc. and KCRA, Inc.

(l) The Television California counterproposal would assign Channel 6 to Stockton at a distance of 188 miles from the co-channel assignment at San Luis Obispo. Both Stockton and San Luis Obispo are situated in Zone II; and, therefore, this separation would not meet the 190 miles minimum for co-channel assignments in this zone.

(m) **Counterproposal of Tribune Building Company.** Tribune Building Company, Oakland, requested the assignment of an additional VHF channel in San Francisco-Oakland to be accomplished by substituting Channel 3 for Channel 13 in Stockton; Channel 2 for Channel 3 in Visalia; and Channel 4 for Channel 3 in Reno, as indicated below:

	Third Notice		Counterproposal	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
San Francisco-Oakland	2, 4, 5, 7, *9	20, 26, 32, 38, 44	2, 4, 5, 7, *9, 13†	20, 26, 32, 38, 44
Stockton	13	36, *42	3†	36, *42
Reno	3, 8	*21, 27	4†, 8	*21, 27
Visalia	3		2†	

(n) **Statement of Support of Tribune Building Company Counterproposal.** The Tribune Building Company contended that the need for television service in the Oakland-East Bay area can be met only by the assignment of an additional VHF channel exclusively for use by a licensee located in Oakland. It was urged that the Oakland-East Bay area has a greater population than that of San Francisco-West Bay area and is politically, economically and culturally a separate area. With respect to the use of UHF channels, the Tribune Building Company argued that during the period of initial development of UHF service, the existing VHF stations in San Francisco would become stronger, and the Oakland-East Bay area, during this period, would have no television outlet. It was noted that the three stations now operating in the San Francisco-Oakland metropolitan area are licensed to operate in the San Francisco-West Bay area. The Tribune Building Company argued that the Third Notice did not provide for a fair, efficient, and equitable distribution of television facilities insofar as the Oakland-East Bay area is concerned, contending that the Oakland-East Bay area should be considered as one community, and as such, is the only population center of over one million that is not assigned a VHF channel in the Third Notice. However, the Tribune Building Company stated that it does not advocate the creation of "a new metropolitan area" but seeks the assignment of Channel 13 to the San Francisco - Oakland metropolitan area. The Tribune Building Company stated that if such an assignment is made, it proposed to file an application for a construction permit to be utilized in the Oakland-East Bay area. The Tribune Building Company also argued that the hearing that has been held in the San Francisco-Oakland area gives the participants in such hearing no "vested" or other rights.[188]

The Tribune Building Company stated that its proposal would not require the deletion of channels from any community. However, it was noted that the distance between the center of Los Angeles and Visalia where co-channel operation is proposed on Channel 2, is only 168 miles. Further, the distance from Visalia to station KNXT operating in Los Angeles on Channel 2 from a Mount Wilson site is only 160 miles. Since both Los Angeles and Visalia are situated in Zone II, the assignment of Channel 2 in Visalia would not meet the 190-mile minimum spacing for co-channel assignments in this zone. The Tribune Building Company urged, however, that the terrain between Visalia and Los Angeles is very rugged, with three intervening mountain ranges, and that these mountains would produce a triple defraction of signals attenuating them greatly in the path between the two cities thereby making it technically possible to employ closer separations than would be necessary over flat terrain.

(o) **Conflicting Counterproposals and Oppositions to Tribune Building Company Counterproposal.** Oppositions to the Tribune Building Company counterproposal have been filed by E. F. Peffer; McClatchy Broadcasting Company; Radio Diablo, Inc.; The Chronicle Publishing Company; and Harmco, Inc. and KCRA, Inc. This counterproposal conflicts with the counterproposals of Harmco, Inc. and KCRA, Inc., and McClatchy Broadcasting Company of Sacramento.

(p) **Counterproposal of KROW, Inc.** KROW, Inc., Oakland, filed a counterproposal containing four alternate plans for adding VHF Channel 13 to San Francisco-Oakland. Plan 1 would add VHF Channel 13 to San Francisco-Oakland by substituting Channel 6 for Channel 13 in Stockton; Channel 3 for Channel 6 in Sacramento; and Channel 11 or Channel 13 for Channel 3 in Reno. Plan 2 would add VHF Channel 13 to San Francisco-Oakland by substituting Channel 8 for Channel 13 at Stockton; Channel 11 or Channel 13 for Channel 8 at Reno; and UHF Channel 19 for VHF Channel 8 at Monterey. Plan 3 would add VHF Channel 13 to San Francisco-Oakland by substituting UHF Channel 58 for VHF Channel 13 at Stockton. Plan 4 would assign VHF Channel 13 to San Francisco-Oakland by substituting Channel 8 for Channel 6 at Sacramento; Channel 6 for Channel 13 at Stockton; Channel 11 or Channel 13 for Channel 3 at Reno, and UHF Channel 19 for VHF Channel 8 at Monterey, California. The four plans are set forth below.[189]

(q) **Statement in Support of KROW, Inc. Counterproposal.** KROW, Inc. urged that the assignment of six commercial VHF channels should be maintained in the San Francisco-Oakland metropolitan area.[190] KROW asserted that no city in Central California compares in size or importance with the San Francisco-Oakland metropolitan area, and contended that only 4 VHF commercial channels in this area, as proposed in the Third Notice, would encourage monopoly and lack of competitive programming. It was urged that if the Commission did not assign an additional VHF channel to San Francisco-Oakland, the City of Oakland might be deprived of a VHF assignment, and that Section 307(b) of the Communications Act requires such as assignment.

(r) **Conflicting Counterproposals and Oppositions to KROW, Inc. Counterproposal.** Oppositions to KROW'S Plan 1 have been filed by McClatchy Broadcasting Company; E. F. Peffer; Radio Diablo, Inc.; and Harmco, Inc. and KCRA, Inc. This plan conflicts with the McClatchy and Harmco - KCRA counterproposals for Sacramento. Plan 2 has been opposed by Radio Diablo, Inc.; E. F. Peffer; Mc-

	Third Notice		Counterproposal

Stockton	13	36, *42	6†	36, *42

[187] Television California requested that the Commission in its "final order" make it clear that Channel 2 is not "reserved" in San Francisco-Oakland for any particular applicant. Television California noted that it has pending before the Commission a petition that Don Lee's application for Channel 2 be dismissed because it was no longer being prosecuted by Thomas S. Lee. We are here concerned with the assignments for the various communities. We do not believe that this is the appropriate proceeding in which to determine which applicant in a particular community will receive a television assignment. Accordingly, the Commission is not ruling here concerning the status of Channel 2 in San Francisco-Oakland so far as it affects any specific applicant. Television California has also requested that the procedural rights of the parties whose applications have been heard should be fully preserved. Television California argued that those applicants who were heard are in a special category. The question of the status of those applicants whose applications have been heard has been disposed of elsewhere.

[188] Television California raised the question of the Commission's authority to reduce the number of VHF channels in San Francisco in view of the fact that hearings were held on applications for channels in that community. The Commission, however, is of the view that its opinion issued on December 12, 1951, in connection with the request for oral hearing of Daily News Television Company, *et al.*, makes clear that the Commission, in a proceeding such as this, may change the assignment of VHF channels for San Francisco-Oakland under the circumstances presented.

[189] The Tribune Building Company requested oral argument if the Commission ruled that the applicants who participated in the hearing in San Francisco in Docket No. 7283, el al had any "vested" rights. In light of our action in connection with those applicants who have participated in the hearing in San Francisco, the request for oral argument by the Tribune Building Company is moot.

[189] KROW, Inc. also opposed the reservation of VHF Channel 9 in San Francisco-Oakland for non-commercial educational use and suggested that a UHF channel be reserved instead.

[190] KROW, Inc. argued that since it has gone through a hearing in San Francisco on its application for a television station in that community, the Commission cannot change the assignments that were assigned to San Francisco Oakland at the time of the hearing. We believe, however, that the opinion of the Commission issued on December 12, 1951, in connection with the request for oral hearing of Daily News Television Co., et al., makes clear that the Commission, in a proceeding such as this, may change the assignment of VHF channels for San Francisco-Oakland under the circumstances presented.

Clatchy Broadcasting Company; Monterey Radio-Television Company; and American Broadcasting Company, Inc., San Francisco. Plan 3 has been opposed by E. F. Peffer; McClatchy Broadcasting Company; and Radio Diablo, Inc. KROW'S Plan 4 has been opposed by Monterey Radio-Television Company; American Broadcasting Company; McClatchy Broadcasting Company; E. F. Peffer; and Radio Diablo, Inc. This plan conflicts with the counterproposals of McClatchy Broadcasting Company and Harmco-KCRA for Sacramento.

(s) KROW's Plan 1 would assign Channel 6 in Stockton at a distance of 188 miles from the co-channel assignment at San Luis Obispo. KROW's Plan 2 would assign Channel 11 at Reno 188 miles from the co-channel assignment at San Jose, or Channel 13 at Reno, 185 miles from San Francisco and 178 miles from Oakland, where Channel 13 is also proposed by KROW. KROW's Plan 3 would similarly assign Channel 11 or 13 to Reno and Channel 6 to Stockton. Since all of the above communities are situated in Zone II, the proposed assignments would not meet the 190-mile minimum for co-channel assignments in this zone.

(t) **Educational Reservation.** The Superintendent of Schools of Alameda County at Oakland, filed a statement supporting the reservation of Channel 9 for non-commercial educational use in San Francisco-Oakland. The statement was filed on behalf of the Bay Area Public Schools Television Council, composed of the public school districts in the counties of Alameda, Contra Costa, Marin, San Francisco, San Joaquin, San Mateo, Santa Clara, Solano, and Sonoma; and in behalf of the San Francisco Bay Area Educational Television Committee, composed of the University of California at Berkeley, Stanford University, Mills College, San Francisco State College, San Jose State College, and the junior colleges in the area. It was represented that the reservation would be used jointly and cooperatively by the various educational organizations in the area, which have an enrollment of 350,000 with an additional 200,000 adults participating in various educational programs. It was explained that the group proposed to utilize educational television by a joint effort through the organization of a non-profit corporation or other representative body. It was stated that the organizations could finance the capital outlay believed necessary to construct and operate a television station. The JCET and California Congress of Parents and Teachers also supported the reservation. The Superintendent of Schools of Alameda opposed the CBS and KROW, Inc. suggestions that the reservation be shifted to a UHF channel arguing that the educators should not be required to carry the burden of developing UHF.

(u) **Opposition to the Educational Reservation.** Columbia Broadcasting System, Inc. and KROW, Inc. opposed the reservation of VHF Channel 9 in San Francisco-Oakland. CBS requested that a UHF channel be reserved rather than a VHF channel advancing the same reasons as those urged in connection with its opposition to VHF reservations in Boston and Chicago. KROW, Inc. contended that the reservation should be shifted to a UHF channel because the commercial operators can not afford to operate in the UHF in view of the hundreds of thousands of VHF receivers already in the area. Educators, on the other hand, it was urged were not dependent on circulation and could pioneer in the popular acceptance of UHF. Further, KROW submitted that commercial interests should have the VHF channel because they would provide a multi-purpose program service whereas an educational station would be limited to a single purpose use. KROW contended, also, that the reservation of Channel 9 deprived the San Francisco-Oakland hearing applicants of prior rights to such channel under the Commission's Rules. KROW argued that the reservation of this channel on behalf of prospective non-hearing applicants was in direct violation of established rules and policies of the Commission. Since no educational applicants appeared in the San Francisco-Oakland hearing case, and since no application was filed by any educational group requesting any of the VHF channels which had been designated for hearing, KROW contended that the applicants who had completed their hearing were entitled to priority with respect to Channel 9.

Conclusions: Educational Reservation

952. We are of the view that the record supports the basis for reserving VHF Channel 9 in San Francisco-Oakland for non-commercial educational use. We believe that the educational interests in the San Francisco-Oakland area have demonstrated on the record a strong interest in and a firm intention to proceed with the task of instituting a non-commercial educational service in this area. We are impressed with the fact that steps have been taken to coordinate the interests of a large number of educational interests. This area is one of the great cultural centers of the country, and the Commission believes it should lend every encouragement to the early establishment of an educational television service in this area. With four other VHF stations and five UHF channels available to the commercial interests, we believe that the reservation of one VHF channel for educational use is an equitable distribution of the channels available for assignment in this area.[191] Accordingly, the reservation of Channel 9 in San Francisco-Oakland for non-commercial educational use is finalized.[192]

Conclusions: Additional Commercial VHF Channels

953. Four parties: CBS, Television California, The Tribune Building Company, and KROW, Inc., have requested the assignment of additional VHF channels to San Francisco-Oakland. We are of the view, however, that the record does not support the basis for assigning additional VHF channels to this community. CBS has submitted four alternate requests: CBS Plan 1 would assign an additional VHF channel by substituting a UHF channel for the only VHF channel in San Jose, a city with a population of 95,000 in a metropolitan area of 291,000. CBS Plan 2 would assign an additional VHF channel by substituting a UHF channel for the only VHF channel in Stockton, a city with a population of 71,000 in a metropolitan area of 201,000. CBS Plan 3 would assign two additional VHF channels by substituting UHF channels for the only VHF channels in both San Jose and Stockton. CBS Plan 4 would assign an additional VHF channel by substituting VHF Channel 3 for VHF Channel 6 in Sacramento, thereby precluding the assignment of an additional VHF channel to Sacramento as requested by several parties. Further, this plan would make the assignment of Channel 6 in Stockton at a distance of only 188 miles from the co-channel assignment in San Luis Obispo and would thus violate the 190-mile minimum spacing for co-channel assignments in Zone II. Television California would similarly assign an additional VHF channel to San Francisco-Oakland by substituting Channel 3 for Channel 6 in Sacramento. The Television California counterproposal would also preclude the assignment of an additional VHF channel in Sacramento. The Television California request would also assign Channel 6 in Stockton in violation of the 190-mile minimum spacing for co-channel assignments in Zone II. The Tribune Building Company would assign an additional VHF channel to San Francisco-Oakland by substituting Channel 3 for Channel 6 in Sacramento, thereby precluding the assignment of an additional VHF channel to Sacramento. In addition, the Tribune Building Company counterproposal would assign Channel 2 in Visalia at a distance of only 160 miles from Station KNXT operating on Channel 2 in Los Angeles. This separation, also, does not meet the 190-mile minimum for co-channel assignments in Zone II. Finally, KROW, Inc. has submitted four alternate plans seeking an additional VHF assignment for San Francisco-Oakland: KROW Plan 1 would assign an additional VHF channel by substituting Channel 3 for Channel 6 in Sacramento, thereby precluding the assignment of an additional VHF channel to Sacramento. In addition, this plan would assign Channel 6 in Stockton, only 188 miles from the co-channel assignment in San Luis Obispo, and Channel 11 or 13 in Reno. Channel 11 at Reno would be only 188 miles from San Jose, and Channel 13 at Reno would be only 185 miles from San Francisco and 178 miles from Oakland, where Channel 13 is proposed to be assigned by KROW. These co-channel separations, therefore, would not meet the 190-mile minimum for Zone II. KROW Plan 2 would assign an additional VHF channel to San Francisco-Oakland by substituting a UHF channel for VHF Channel 8, the only channel assigned to Monterey-Salinas, a community with a population of 30,000.[193] This plan would also assign Channel 11 or 13 to Reno in violation of the 190-mile minimum for co-channel assignments in Zone II. KROW Plan 3 would assign an additional VHF channel to San Francisco-Oakland by substituting a UHF channel for the only VHF channel in Stockton. Finally, KROW Plan 4 would assign an additional VHF channel to San Francisco-Oakland by substituting a UHF channel for a VHF channel in Monterey. This plan would also assign Channel 6 in Stockton, and Channel 11 or 13 in Reno, in violation of the 190-mile minimum for co-channel assignment separations in Zone II.

954. As will be noted from the foregoing, the requests for additional VHF channels in San Francisco-Oakland consist of (1) those substituting UHF channels for VHF channels in San Jose, Stockton, or Monterey-Salinas; and (2) those making changes in assignments without deleting a VHF channel from any community. With respect to the first group, we do not believe that the record supports the basis for assigning an additional VHF channel in San Francisco-Oakland at the expense of deleting the only VHF channel from cities as large and as important as San Jose, Stockton or Monterey-Salinas. We are of the view that the only VHF channel should not be deleted from those communities in order to afford a sixth VHF channel to San Francisco-Oakland. In addition, the KROW Plans 2 and 4, which would delete VHF Channel 8 from Monterey, would assign Channel 11 or 13 in Reno in violation of the 190-mile minimum for co-channel assignments; and KROW Plan 4 would similarly assign Channel 6 in Stockton. With respect to the second group of requests, those which do not delete VHF channels from other communities, it will be noted that all such requests conflict with the counterproposals of McClatchy Broadcasting Company and Harmco, Inc. and KCRA, Inc. seeking the addition of a third VHF channel for Sacramento. In the Third Notice four channels were proposed for Sacramento; VHF Channels 6 and 10 and UHF Channels 40 and 46, with Channel 40 reserved for non-commercial educational use. Sacramento has a population of 138,000 and the Sacramento standard metropolitan area has a population of 277,000. We are of the view that the assignment of a third VHF channel to Sacramento is to be preferred to the assignment of a sixth VHF channel, and eleventh channel for San Francisco-Oakland. We believe that the assignment of ten channels, five VHF and five UHF with one VHF channel reserved for non-commercial educational use, is a fair and equitable distribution for San Francisco-Oakland in light of the need for facilities in other communities. Furthermore, every request seeking an additional VHF assignment for San Francisco-Oakland without deleting a VHF channel from another community would violate the 190-mile minimum for co-channel assignments in Zone II. In view of the foregoing, the counterproposals of CBS, Television California, The Tribune Building Company, and KROW, Inc. are denied. With respect to the Tribune Building Company and KROW, Inc. contentions that an additional assignment is needed in Oakland, it should be pointed out that the a

[191] See also our decision with respect to the educational reservation in Boston, Mass.

[192] With respect to the contention of KROW concerning its legal rights as a participant in a hearing prior to the "freeze" raised in connection with the reservation of Channel 9, the Commission pointed out above that its opinion issued on December 12, 1951, in connection with the requests for oral hearing of Daily News Television Co., et al. makes clear that the Commission, in a proceeding such as this, may change the assignments of VHF channels for San Francisco-Oakland.

[193] As a result of our decision herein Channel 8 will be assigned to Monterey-Salinas.

signment of 10 channels have been made to San Francisco-Oakland and that the question of the standing of parties from Oakland is properly to be determined in a licensing proceeding. In view of the assignments that have been made, we do not believe it appropriate in this proceeding to determine which channel should be granted to Oakland or to an Oakland applicant.

Final Assignments

955. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
San Francisco-Oakland	2, 4, 5, 7, *9	20, 26, 32, 38, 44

PORT CHICAGO, CALIFORNIA

956. **(a) Proposed Assignments.** In the Third Notice, no assignments were proposed for Port Chicago.

(b) Census Data. The population of Port Chicago is estimated at 3,290. It is an unincorporated town lying within the San Francisco-Oakland urbanized district.

(c) Counterproposal of KECC, Inc., Pittsburg, California. KECC, Inc. requested that Channel 15 be assigned to Port Chicago, California without any other changes in the assignments proposed by the Commission in the Third Notice.

(d) Statement in Support of KECC, Inc. Counterproposal. KECC pointed out that Port Chicago was located in Contra Costa and that no assignments were proposed by the Third Notice for this entire county. It was alleged that the assignment of Channel 15 to Port Chicago would meet the Commission's required mileage separations and would effectuate priorities 1 and 3 in providing a first television service to certain communities in the County, and a first and only local service to Port Chicago and the entire County. It was alleged that Contra Costa County ranks fifth in California in population and is "the fastest growing County in the State." It was argued that Section 307(b) of the Communications Act and the Commission's priorities require the assignment of a channel to Contra Costa County. It was submitted that the great bulk of population of Contra Costa County lies northeast of San Francisco, 20-30 miles distant, behind a large range of hills east of San Francisco Bay, and that these areas form an entirely separate and largely isolated community from the metropolitan centers of San Francisco and Oakland. Because of these terrain features, it was argued, television service would not be adequate for most of the County if it would have to rely on San Francisco stations for service.

(e) Conflicting Counterproposal and Oppositions. The assignment of Channel 15 to Port Chicago would preclude the assignment of Channel 30 to Stockton as requested by CBS in its counterproposals 1 and 3 for San Francisco. The CBS counterproposals for San Francisco have been denied elsewhere in this Report and will, therefore, not be considered further in this connection.

Conclusions

957. The assignment of Channel 15 to Port Chicago would meet our standards for minimum separations and it is our view that the record warrants the assignment of Channel 15 to that community. Accordingly, the counterproposal of KECC, Inc. is granted.

Final Assignments

958. The following assignment is adopted:

City	VHF Channel No.	UHF Channel No.
Port Chicago, Calif.		15

BAKERSFIELD, CALIFORNIA

959. **(a) Proposed Assignment.** In the Third Notice the Commission proposed the assignment of two channels to Bakersfield: VHF Channel 10 and UHF Channel 29.

(b) Census Data. Bakersfield has a population of 35,000.

(c) Counterproposal of Paul R. Bartlett and Gene DeYoung. Paul R. Bartlett and Gene DeYoung, Bakersfield, California requested the additional assignment of VHF Channel 8 to Bakersfield. No other changes are suggested to accomplish this assignment.

(d) Statement in Support of Counterproposal of Paul R. Bartlett and Gene DeYoung. Paul R. Bartlett and Gene DeYoung urged that the assignment of Channel 8 to Bakersfield can be effected without modifying or adversely affecting any assignment proposed in the Third Notice. It was alleged that such assignment would be in full accordance with the standards and would meet the priorities as specified in the Third Notice, in that it would make available an additional service to Bakersfield and the surrounding area without limiting or depriving any other community or area of television service.

(e) Counterproposal of McClatchy Broadcasting Company. McClatchy Broadcasting Company also requested the additional assignment of VHF Channel 8 at Bakersfield, to be accomplished without changing any other assignments.

(f) Statement in Support of McClatchy Broadcasting Company Counterproposal. McClatchy Broadcasting Company alleged that the assignment of Channel 8 in Bakersfield would meet the channel spacing requirements as set out in the Third Notice. It was noted that the distance between Bakersfield and the closest co-channel assignment at Monterey, California would be 182 miles. It was argued that the assignment of Channel 8 to Bakersfield would further the objectives of Sections 1 and 307(b) of the Communications Act, and that such assignment would conform to the principles expressed in the priorities. It was noted that the Bakersfield 1950 population increased 18.1% over that of 1940, and that Kern County, in which Bakersfield is located, has a 1950 population 68.1% greater than that of 1940.

(g) Channel 8 in Bakersfield would be 182 miles from the co-channel assignment at Monterey, California. Both Bakersfield and Monterey are situated in Zone II; and accordingly, the assignment of Channel 8 in Bakersfield would not meet the 190 mile minimum required assignment separation for this Zone.

(h) Conflicting Counterproposals and Oppositions to the Bakersfield Counterproposals. Radio KIST, Inc., Santa Barbara, California, originally filed a counterproposal seeking the assignment of Channel 8 to Santa Barbara. This counterproposal conflicts with the Bakersfield counterproposals, since Bakersfield and Santa Barbara are only 76 miles apart. KIST, however, later filed an alternate counterproposal seeking the assignment of Channel 3 to Santa Barbara, which has been granted elsewhere in this Report. KIST filed oppositions to the Bakersfield counterproposals since it conflicted with its original counterproposal requesting Channel 8 in Santa Barbara. The Salinas Broadcasting Company filed a counterproposal seeking the assignment of VHF Channel 8 in Salinas, California, at a distance of 172 miles from Bakersfield and in conflict with the Bakersfield counterproposals. This counterproposal is denied elsewhere in this Report.

Conclusions

960. Paul R. Bartlett and Gene DeYoung and the McClatchy Broadcasting Company requested the assignment of VHF Channel 8 to Bakersfield to be accomplished without changing any other assignments. As noted above, however, Channel 8 at Bakersfield would be only 182 miles from the co-channel assignment at Monterey. Since both these communities lie in Zone II, the assignment of Channel 8 in Bakersfield would violate the 190 mile minimum spacing for co-channel assignments. The counterproposals of Paul R. Bartlett, Gene DeYoung and McClatchy Broadcasting Company are, therefore, denied.

Final Assignments

961. The following assignments are adopted:

City	VHF Channel No.	UHF Channel No.
Bakersfield, Calif.	10	29

SALINAS AND MONTEREY, CALIFORNIA

962. **(a) Proposed Assignments.** In the Third Notice the Commission proposed the following assignments for Salinas and Monterey:

City	VHF Channel No.	UHF Channel No.
Monterey, Calif.	8	
Salinas, Calif.		28

(b) Census Data. The population of Monterey is 16,000 and the population of Salinas is 14,000.

(c) Support for Proposed Monterey Assignment. Steven A. Cisler and Monterey Radio-Television Company supported the assignment of VHF Channel 8 to Monterey. It was stated that the closest co-channel assignment would be at Reno, Nevada at a distance of 232 miles, and the closest adjacent channel assignment would be Channels 7 and 9 at San Francisco-Oakland, a distance of 86 miles. It was asserted that Monterey's population of 16,000 represented a 59.9% increase over its 1940 population.

(d) Counterproposal of Salinas Broadcasting Company. Salinas Broadcasting Company, Salinas, requested the assignment of a VHF channel to Salinas, to be accomplished by deleting Channel 8 from Monterey and substituting therefor Channel 28, as follows:

	Third Notice		Counterproposal	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Monterey, Calif.	8		†	28†
Salinas, Calif.		28	8†	†

(e) Statement in Support of Salinas Broadcasting Company Counterproposal. Salinas Broadcasting Company pointed out that Salinas is the county seat of Monterey County, which has a population of 130,498, and that of this figure, 48,755 persons reside in Monterey and "towns located on the Monterey Peninsula and unincorporated areas on the Peninsula," and that, on the other hand, 81,743 persons reside in Salinas and the eastern portion of Monterey County of which Salinas is the hub. It was noted that Salinas has a Class III regional AM station while Monterey has only a Class IV local AM station. It was noted that Salinas lies on the main line of the Southern Pacific Railroad while Monterey is only on a branch spur. It was stated that the California Department of Employment reported that the "Salinas city area" had a population of 38,200, while the "Monterey city area" had a population of only 17,000, and that, accordingly, Salinas has a 2-1 advantage over Monterey in population. The Salinas Broadcasting Company urged that, in view of the relative standing and comparative statistics of Salinas and Monterey, the proposed assignments should be shifted, assigning VHF Channel 8 to Salinas and UHF Channel 28 to Monterey. The distance between the two communities is 15 miles. It was urged that where a VHF channel can be assigned to a larger community without "serious dislocation" of the overall assignment plan, the larger community should be assigned the VHF channel.

(f) Oppositions and Conflicting Counterproposals to the Salinas Broadcasting Company Counterproposal. The Salinas Broadcasting Company counterproposal conflicts with the counterproposals of Harmco, Inc., and KCRA, Inc., Sacramento, California; Columbia Broadcasting System, Inc., San Francisco, California (proposals 1 and 3); McClatchy Broadcasting Company, Bakersfield, California; and KROW, Inc., San Francisco, California. Oppositions to the Salinas Broadcasting Company counterproposal were filed by McClatchy Broadcasting Company; CBS; and the Monterey Radio-Television Company. All of the conflicting counterproposals have been denied elsewhere in this Report for the reasons there stated. In its opposition the Monterey Radio-Television Company urged that Salinas has a population of 14,000 representing an increase of only 19.9% over the 1940 census figures, while Monterey has a population of over 16,000 representing a 59.9% increase. It was contended, therefore, that not only is Monterey the larger community, but it is growing more rapidly.

Conclusions

963. The distance between Salinas and Monterey is approximately 15 miles. Stations in either community would provide Grade A service to the other on both Channels 8 and 28. The population of Monterey is only slightly greater than that of Salinas. In view of the foregoing, we are of the view that Channel 8 and 28 should be

assigned to Monterey and Salinas jointly rather than Channel 8 to Monterey and Channel 28 to Salinas separately. Channels 8 and 28 in both Salinas and Monterey will meet the required mileage spacings for assignments in this zone. Accordingly, Channels 8 and 28 will be assigned to Monterey-Salinas.

Final Assignments

964. In view of the foregoing, the following assignments are adopted:

City	VHF Channel No.	UHF Channel No.
Monterey-Salinas	8	28

RENO, NEVADA

965. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment of four channels to Reno, Nevada: VHF Channels 3 and 8 and UHF Channels 21 and 27, with Channel 21 reserved for non-commercial educational use.[104]

(b) **Census Data.** The population of Reno is 32,000.

(c) **Counterproposals of Kenyon Brown.** Kenyon Brown, Reno, requested the assignment of VHF Channel 11 as an additional assignment to Reno. No other changes in assignments are suggested in order to accomplish this assignment.

(d) **Statement in Support of Kenyon Brown Counterproposal.** Kenyon Brown urged that Reno is the largest city in Nevada, with approximately 31% of the state's population. It was noted that Reno is located in Washoe County, the largest county in Nevada, with a population of 50,205. Kenyon Brown argued that an equitable distribution of television facilities requires that Reno be assigned an additional VHF channel and that the assignment of Channel 11 in Reno could be achieved without involving priorities 1 through 4, and would meet priority 5 in providing an additional facility for the largest city in Nevada. It was stated that under its counterproposal the closest co-channel assignment would be Channel 11 at San Jose, California, 188 miles from Reno.

(e) **Oppositions and Conflicting Counterproposals to the Kenyon Brown Counterproposal.** The Kenyon Brown counterproposal conflicts with the counterproposal of Harmco, Inc. and KCRA, Inc., for Sacramento, California and an opposition has been filed by Harmco and KCRA.

(f) **Educational Reservation.** The Reno School District No. 10 filed a statement supporting the reservation of Channel 21 in Reno for non-commercial educational use. No oppositions to the proposed reservation were filed.

Conclusions: Educational Reservation

966. In view of the foregoing, the reservation of Channel 21 in Reno for non-commercial educational use is finalized.

Conclusions: Additional VHF Assignment

967. Kenyon Brown has requested the additional assignment of VHF Channel 11 to Reno. However, Channel 11 in Reno would be only 188 miles from the co-channel assignment at San Jose, California. Both Reno and San Jose are situated in Zone II. Accordingly, the Kenyon Brown counterproposal would not meet the required 190 miles minimum co-channel assignment separation for this Zone and is therefore denied. It should also be noted that in light of the required separations, no VHF channel can be assigned as an additional assignment to Reno.

Final Assignments and Reservation

968. In connection with our discussion of Sacramento, California, VHF Channel 4 has been substituted for VHF Channel 3 in Reno in order to make possible the assignment of an additional VHF channel in Sacramento. In view of the foregoing, the following assignments are adopted:

City	VHF Channel No.	UHF Channel No.
Reno, Nevada	4, 8	*21, 27

LAS VEGAS, NEVADA: EDUCATIONAL RESERVATION

969. In the Third Notice, the Commission proposed the reservation of VHF Channel 10 for non-commercial educational use in Las Vegas, Nevada. The JCET filed a statement supporting the reservation. No oppositions to the proposed reservation were filed.

Conclusions

970. In view of the foregoing, the reservation of Channel 10 for non-commercial educational use in Las Vegas, Nevada is finalized.

SAN DIEGO, CALIFORNIA

971. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment of six channels to San Diego, California: VHF Channels 3, 8 and 10 and UHF Channels 21, 27, and 33, with Channel 3 reserved for non-commercial educational use. However, as noted in connection with our discussion of international considerations above, the Mexican-United States Television Agreement assigns Channel 3 to Mexicali, Baja California, Mexico rather than San Diego,[105]

(b) **Census Data.** San Diego has a population of 334,000. The San Diego standard metropolitan area has a population of 557,000.

(c) **Existing Stations.** Kennedy Broadcasting Company is licensed for the operation of Station KFMB-TV in San Diego on Channel 8.

(d) **Counterproposal of Charles E. Salik.** Charles E. Salik, San Diego, requested the assignment of an additional VHF channel to San Diego, to be accomplished by deleting VHF Channel 6 or 12 from Tijuana, Mexico as indicated below:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposed Changes VHF Channel No.	Proposed Changes UHF Channel No.
San Diego, Calif.	(*3), 8, 10	21, 27, 33	6† or 12†, 8, 10	21, 27, 33
Tijuana, Mexico	6, 12		12† or 6†	

(e) **Statement in Support of Counterproposal of Charles E. Salik.** Charles E. Salik pointed out that the assignment of Channels 6 and 12 in Tijuana precludes the assignment of these channels in San Diego. It was noted, that of the VHF channels proposed for San Diego, Channel 8 is already in operation and that only one other VHF channel remains unassigned. Charles E. Salik stated that there would be other applicants in addition to himself for this assignment and urged that additional VHF channels be assigned to San Diego for commercial purposes to afford a sound assignment of channels in the public interest and in conformity with Section 307(b) of the Communications Act. It was suggested that UHF channels could be utilized in Tijuana in place of VHF Channel 12 or VHF Channel 6. Charles E. Salik argued that the assignment of both VHF Channels 6 and 12 in Tijuana is "contrary to principles of sound assignment within the United States and contrary to any just obligations or principles of international accord with Mexico; and therefore contrary to the public interest."

(f) **Counterproposal of Airfan Radio Corporation, Ltd.** Airfan Radio Corporation, Ltd., San Diego, California, requested the additional assignment of a VHF channel to San Diego by deleting VHF Channel 6 or 12 from Tijuana, Mexico as indicated below:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposed Change VHF Channel No.	Proposed Change UHF Channel No.
San Diego, Calif.	(*3), 8, 10	21, 27, 33	6† or 12†, 8, 10	21, 27, 33
Tijuana, Mexico	6, 12		12† or 6†	39, 45, 51, 57, 63

(g) **Statement in Support of Counterproposal of Airfan Radio Corporation, Ltd.** Airfan Radio Corporation, Ltd., submitted that the assignment of two VHF channels to Tijuana, Mexico would not be an equitable distribution of television facilities corresponding to the legitimate needs of the area to be served. It was suggested that UHF Channels 39, 45, 51, 57 and 63 could be assigned to Tijuana to replace VHF Channel 6 or 12.

(h) **Conflicting Counterproposals and Oppositions to the Counterproposals of Charles E. Salik and Airfan Radio Corporation, Ltd.** The American Broadcasting Company, Inc., Los Angeles, California, filed an opposition to the Charles E. Salik and Airfan Radio Corporation, Ltd. counterproposals.[106]

(i) **Educational Reservation.** The Superintendent of Schools supported an educational reservation in San Diego on behalf of the San Diego City Schools, the San Diego County Schools, and the San Diego State College. It was asserted that the $32 million budget for the above organizations would make possible the financing of an educational television station. A resolution of the San Diego City Council supporting the reservation was also submitted.

The JCET and California Congress of Parents and Teachers also supported the reservation. No oppositions to a reservation in San Diego were filed.

Conclusions: Additional Commercial Channels

972. Both Charles E. Salik and Airfan Radio Corporation, Ltd. seek additional VHF channels for San Diego to be accomplished by deleting VHF channel from Tijuana, Mexico. These counterproposals conflict with the Mexican-United States Television Agreement. Accordingly, for the reasons stated above in connection with our discussion of the Mexican-United States Television Agreement, the counterproposals of Charles E. Salik and Airfan Radio Corporation, Ltd., must be denied. However, we are of the view that the record does support the basis for assigning an additional commercial channel to San Diego. A VHF channel is not available for assignment in San Diego in accordance with the Table of Assignments adopted herein, and the Mexican-United States Television Agreement.[107] However, Channel 39 will meet all required mileage spacings for Zone II in which San Diego is situated. Accordingly, we are assigning UHF Channel 39 to that community.

Conclusions: Educational Reservation

973. We are of the view that the record supports the basis for reserving a channel in San Diego for non-commercial educational use. However as noted above, Channel 3 which was proposed in the Third Notice to be so reserved cannot be assigned to San Diego in light of the Mexican-United States Television Agreement. Accordingly, we are assigning UHF Channel 15 to San Diego and are reserving this channel for non-commercial educational use. Channel 15 meets all required mileage spacings for Zone II.

Final Assignments and Reservation

974. The following assignments are adopted:

City	VHF Channel No.	UHF Channel No.
San Diego, Calif.	8, 10	*15, 21, 27, 33, 39

LOS ANGELES, SAN BERNARDINO, SAN JOSE AND STOCKTON, CALIFORNIA: EDUCATIONAL RESERVATIONS

975. (a) **Proposed Reservations.** In the Third Notice the Commission proposed the following reservations for non-commercial educational use:

City	UHF Channel No.
Los Angeles, Calif.	*28
San Bernardino, Calif.	*24
San Jose, Calif.	*54
Stockton, Calif.	*42

(b) **Los Angeles.** The reservation of Channel 28 at Los Angeles was supported by the Superintendent of the Los Angeles City Schools, Occidental College, Chapman College, and the College of Medical Evangelists at Los Angeles. In addition, the JCET filed a statement supporting the reservation and submitted a statement supporting the reservation by the Long Beach Public Schools. No oppositions to the proposed reservation were filed.

(c) **San Bernardino.** The President and Superintendent of San Bernardino Valley College filed a statement supporting the reservation of Channel 24 for non-commercial educational television use at San Bernardino. The Statement was filed on behalf of the Riverside and San Bernardino Counties Educational Television Council.

[104] In connection with our discussion of Sacramento, California, Channel 4 is substituted for Channel 3 in Reno.

[105] Television Broadcasting Company, San Diego, California, filed a counterproposal seeking the assignment of VHF Channel 12 and UHF Channel 15 to San Diego and assigning VHF Channel 6 and UHF Channels 27 and 33 to Tijuana. However, Television Broadcasting Company has filed no sworn evidence in support of its counterproposal and it will not be considered further in this Report.

[106] Earle C. Anthony, Los Angeles, California, also filed oppositions to the Airfan Radio Corporation, Ltd. and Charles E. Salik counterproposals. However, evidence in support of its oppositions was not filed and will not be considered in this Report.

[107] In this connection see our discussion in paragraph 239 above concerning VHF assignments in the San Diego-Tijuana-Mexicali area.

which represents all of the public school districts in the counties of Riverside and San Bernardino, as well as the University of California, Riverside Campus; Redlands University; San Bernardino Valley College; Chaffey College; Riverside College; and other various colleges and public schools in the counties. It was stated that the channel will be used jointly and cooperatively by the members of the Committee. No oppositions to the reservation were filed.

(d) **San Jose.** San Jose State College filed a statement supporting the reservation of Channel 54 for non-commercial educational use in San Jose. Statements supporting the reservation were also filed by the University of Santa Clara located in the same county, and the Santa Clara County Television Council. In addition, the JCET filed a statement to which was attached evidence of support for the reservation by the Santa Clara County Schools. No oppositions to the reservation were filed.

(e) **Stockton.** The JCET filed a statement supporting the reservation of Channel 42 in Stockton for non-commercial educational use. The JCET submitted a statement of the City Manager of Stockton indicating support of the reservation by the Stockton City Council, College of the Pacific, Modesto Junior College and the Superintendent of Schools of the Stockton Unified School District. No oppositions to the proposed reservation were filed.

Conclusions

976. In view of the foregoing the following reservations for non-commercial use are finalized:

City	UHF Channel No.
Los Angeles, Calif.	*28
San Bernardino	*24
San Jose, Calif.	*54
Stockton, Calif.	*42

THE TERRITORIES

977. In the Third Notice the Commission stated that it would determine whether any issue had been raised which would prevent the early lifting of the "freeze" with respect to channel assignments in Alaska, the Hawaiian Islands, Puerto Rico and the Virgin Islands. In the absence of any such issue, the Commission proposed to lift the "freeze" without awaiting to reach a final determination with respect to all the assignments proposed in Appendix C. Further consideration of this matter has, however, led to the conclusion that the "freeze" in the Territories could not be lifted until final Rules and standards had been adopted for the television broadcast service. The Commission has not, however, until this time been in a position to issue its new and revised television Rules and standards. In the absence of such a final decision with respect to these Rules and standards, it has, therefore, not been able to lift the "freeze" in the Territories before this date.

Educational Reservations in The Territories

978. (a) **Proposed Reservations.** In the Third Notice the Commission proposed the following reservations for non-commercial educational use:

City	VHF Channel No.
Anchorage, Alaska	*7
Fairbanks, Alaska	*9
Juneau, Alaska	*3
Ketchikan, Alaska	*9
Lihui, Hawaiian Islands	*8
Honolulu, Hawaiian Islands	*2
Wailuku, Hawaiian Islands	*10
Hilo, Hawaiian Islands	*4
San Juan, Puerto Rico	*6

(b) **Counterproposal of Pacific Frontier Broadcasting Co., Ltd.** Pacific Frontier Broadcasting Company, Ltd., urged that "the reservation of Channel 2 for a non-commercial educational station at Honolulu, T.H., be eliminated and that such reservations be made instead of any one of Channels 7, 9, 11 or 13. [We suggest Channel 7]." It was argued by Pacific Frontier that, due to rugged terrain, Channel 2 would provide optimum coverage on the Island of Oahu from the transmitter site contemplated on the Loolaun Range and that in view of the propagation characteristics of this frequency over rough terrain such operation would provide optimum coverage of the Island of Oahu and would therefore make a most efficient use of that television facility. Pacific Frontier stated that it desired to use a channel in the lower half of the VHF spectrum and that "in order to save expenses by joint use of the antenna structure, from both Channels 2 and 4, petitioner requests that the asterisk be removed from Channel 2, and transferred to one of the channels in the high band portion of the VHF spectrum." In response to the Pacific Frontier counterproposal the JCET stated that it "has no objection to the granting of the request of the Pacific Frontier Broadcasting Company to shift the channel at Honolulu reserved for non-commercial educational television station from VHF Channel 2 to VHF Channel 7."

(c) **The Remaining Reservations in the Territories.** The JCET supported the reservation of Channel 7 in Honolulu and Channel 6 in San Juan for non-commercial educational use. No objections were filed to the proposed reservations.

Conclusions: Honolulu Educational Reservation

979. In light of the stipulation of the JCET concerning the reservation of Channel 7 in Honolulu in place of Channel 2, the educational reservation in Honolulu is shifted to Channel 7 and Channel 2 will be available for commercial use.

Conclusions: Anchorage, Fairbanks, Juneau, Ketchikan, Lihui, Waluku, Hilo, San Juan Educational Reservations

980. On the basis of the record, and in view of the fact that no oppositions were filed, the proposed reservations of channels for non-commercial educational use in Fairbanks, Alaska; Anchorage, Alaska; Juneau, Alaska; Ketchikan, Alaska; Lihui, Hawaii; Wailuku, Hawaii; Hilo, Hawaii, and San Juan, Puerto Rico are finalized.

Final Reservations

981. The following reservations in the Territories for non-commercial educational use are finalized:

City	VHF Channel No.
Anchorage, Alaska	*7
Fairbanks, Alaska	*9
Juneau, Alaska	*3
Ketchikan, Alaska	*9
Lihui, Hawaiian Islands	*8
Honolulu, Hawaiian Islands	*7
Wailuku Hawaiian Islands	*10
Hilo, Hawaiian Islands	*4
San Juan, Puerto Rico	*6

REMAINING COMMERCIAL ASSIGNMENTS PROPOSED IN THE THIRD NOTICE

982. As indicated above (paragraph 248) no comments have been received in this proceeding with respect to the large majority of assignments proposed in the Third Notice. It is our view that the proposed assignments for which no comments have been filed and which we have not considered elsewhere in this Report constitute a fair and equitable distribution of the available channels. Accordingly, these assignments are included in the Table of Assignments (Section 3.606(b) of the Rules) and are adopted herewith.

TEMPORARY PROCESSING PROCEDURE

983. At the conclusion of this proceeding the Commission expects to receive, within a relatively short period of time, an unprecedented number of applications for new television broadcast stations. The filing and processing of these applications will be the first step toward the development of the nationwide television broadcast service provided for in the new Table of Assignments and the new rules and regulations. The Commission is, therefore, amending Section 1.371 of its Rules and Regulations by deleting footnote 10 as it presently reads and substituting a new footnote 10. The new footnote 10 to Section 1.371, designated as Appendix C-1, sets forth the procedure to be followed, until further order of the Commission, in the processing of television broadcast applications.

984. Footnote 10 sets forth in detail the manner in which the Commission will process applications for permits to construct new television broadcast stations, applications for permits and modifications thereof relating to presently operating television stations and stations authorized after April 14, 1952, applications for licenses and modifications thereof, and petitions relating to television authorizations.

985. Supplementing the underlying principles of the Table of Assignments, the processing procedure adopted today is designed to make television service available to the greatest number of people in the shortest period of time[108] consistent with the provisions of the Communications Act and the public interest. Separate processing lines are being provided for different categories of applications. With the exception of applications for channels designated for use by non-commercial educational stations, applications will be grouped within these categories and given a processing priority by category. The categories are set up on the basis of the present lack of television service in the communities for which they are filed. Applications for non-commercial educational television stations, which are expected to be relatively few in number during the period for which the temporary processing procedure is being set up, will be processed separately in the order in which they are filed, beginning July 1, 1952, except that the priorities set up for applications for other new television stations will be effective with respect to non-commercial educational stations where there is a conflict of transmitter sites cutting across the category lines. The same procedure will be followed for applications for Puerto Rico, Alaska, Hawaiian Islands, and Virgin Islands.

986. The first applications to be processed, however, will be those arising out of final determinations made by the Commission with respect to presently operating television stations whose channel assignments will be changed as a result of the orders to show cause set forth in the Commission's Third Notice, since the implementation of these changes will affect the orderly implementation of the Table of Assignments. These applications will be processed beginning with the effective date of the new rules.

987. Upon the completion of processing the applications flowing from the orders to show cause, two processing lines will be established to operate concurrently. The operation of these lines will not begin before July 1, 1952, in order to allow a reasonable period for filing new applications and amending those now on file. One line will process applications for new television stations in all cities not presently receiving television service.[109] The other line will process applications for new television stations in cities presently receiving service. Within the group in the first processing line, the cities for which applications are filed will be taken in the order of their populations, so that the largest concentrations of population now receiving no service will be handled first.

988. On the second processing line, five separate groupings are being made, each group to be handled upon completion of the preceding group. The first two of these groups give precedence to the UHF service, where either no VHF channels (excluding non-commercial educational channels) are assigned or all VHF channels (excluding non-commercial educa-

[108] Although the Commission has previously processed applications for new television broadcast stations upon the basis of the date of filing, that procedure cannot appropriately be applied to the present situation. In its order of September 30, 1948 adopting footnote 10 to Section 1.371, the Commission stated that pending applications and those thereafter filed would not be acted upon, but would be placed in the pending file. In its Notice of Further Proposed Rule Making of July 11, 1949, and its Third Notice of March 22, 1951, the Commission requested new applicants to refrain from filing applications because of the amendments which would be required when the "freeze" would be lifted. Implicit in these requests was the assurance that persons complying therewith would not be placed in a disadvantageous position vis-a-vis persons who might file new applications in disregard of the Commission's requests. Processing by date of filing would therefore be inequitable under these circumstances.

[109] A standard of 40 miles from the nearest main transmitter in operation has been adopted as the test of whether a city is receiving service. This is a reasonable standard for processing purposes based upon the record herein. The method for computing distances for this purpose is also specifically set forth in footnote 10.

tional channels) are already occupied. Since all existing stations are in the VHF band, and all present receivers require at least some modification to receive stations in the UHF band, this precedence will help enable the younger service to make a firm start, a matter of great importance to the development of the assignment pattern provided for in the Table of Assignments. The three remaining groups provide, in order, for cities with one service but no local station, for cities with one local station but no other service, and for cities receiving service from two or more stations, thus carrying out the principle of making service available first to cities now receiving none, and then making available a local service before other cities are provided with multiple services. Further priorities are provided within the categories in the second processing line, depending upon the number of operating television stations in the city, where the nature of the category permits a distinction on that basis, and otherwise upon a population basis, except for the group of cities presently receiving service but to which only UHF channels are assigned, which will be processed upon the basis of the number of services presently being received.

989. A separate processing line will be set up to handle applications to modify construction permits granted on and after July 1, 1952, petitions for reconsideration of actions taken with respect to applications for new television stations, and petitions for waiver of hearing of these applications, all to be processed as filed. The new processing procedure also provides that applications for changes in existing facilities (other than those required under the orders to show cause), and license applications, which clearly are not as urgent as applications for construction permits for new television stations, will be processed at a later date, and that priority will depend upon the number of operating stations in the city, with population a secondary standard of priority.

990. The Commission will publish, from time to time, lists of cities for which application for new television stations falling within the above-mentioned categories are filed, so that the general public and all applicants and other interested parties may be kept informed of the progress of the processing procedure. These lists will be revised periodically to reflect the insertion in the processing lines of new applications, and will show the order on the appropriate processing line of each city for which one or more applications are filed.

991. In order to expedite the procedure with respect to the licensing of new television broadcast stations, applications will be considered for grant only on the specific channel designated therein. Hearings held because of conflicts in channel requests within any city or hyphenated community will be limited to the applicants seeking the same channel. Where two or more applications for new stations in different cities, or applications for changes in existing facilities, are in conflict because the distance between their respective proposed transmitter sites is less than that provided in the rules, they will, of necessity, also be designated for hearing on a competitive basis. It should be particularly noted, because of the fact that some applications will normally be reached for processing before others, that applications whose transmitter sites may conflict with other applications in communities which would be reached for processing at an earlier stage will, in order to receive comparative consideration with such other applications, have to be filed at least one day before Commission action on the other application, or, in the event that the other application has been designated for hearing, 20 days before the designated hearing date. This procedure is identical with that which has been in force heretofore, but is mentioned because the provisions made herein for the staggered order of processing might otherwise give potential applicants an erroneous impression of their rights.

992. The new rules and regulations herein adopted will require substantial amendments in existing applications before they may be considered, and the new footnote to Section 1.371 contains instructions with respect to filing such amendments, as well as with respect to amendments which may be made by new applicants prior to the completion of Commission processing of applications for the city or community involved.

AMENDMENT AND RECODIFICATION OF THE RULES

993. Subpart E of Part 3 of the Commission's Rules governing Television Broadcast Stations has been amended and recodified. The new rules which have been added to the Subpart and the rules which have been revised implement the decisions reached by the Commission in these proceedings. Rules which were inconsistent with the new rules and obsolete rules have been deleted. In addition, the Standards of Good Engineering Practice Concerning Television Broadcast Stations have been amended to reflect the Commission's decisions in these proceedings and have been recodified and made a part of Subpart E. Finally, new Subpart E also contains editorial changes and improvements in and clarification of certain of the language of the existing Rules which make no changes in their substantive requirements.

994. In view of the foregoing, it is ordered that Section 1.371 of Part 1 of the Commission's Rules and Regulations relating to the processing of applications for television broadcast stations is amended as set forth in Appendix C(1) below.

995. In view of the foregoing, it is ordered that FCC Form 301, "Application for Authority to Construct a New Broadcast Station or Make Changes in an Existing Station," is amended as set forth in Appendix C(2) below.

996. In view of the foregoing, it is ordered that the "Standards of Good Engineering Practice Concerning Television Broadcast Stations" are deleted and Subpart E of Part 3 of the Commission's Rules and Regulations, "Rules Governing Television Broadcast Station," is amended as set forth in Appendix D below.

997. The amended Rules and amended FCC Form 301, as set forth in Appendices C and D below, are promulgated pursuant to Sections 1, 4(i) and (j), 301, 303(a), (b), (c), (d), (e), (f), (g), (h) and (r), and 307(b) of the Communications Act of 1934, as amended, and pursuant to the provisions of Section 4 of the Administrative Procedure Act.

998. It is ordered that the above amendments as set forth in Appendices C and D will become effective 30 days from the date of publication in the Federal Register.

FEDERAL COMMUNICATIONS COMMISSION

T. J. Slowie
Secretary

WATCH YOUR STEP AFTER THE THAW!

Danger of management errors unknowingly made after the thaw is so great as to threaten reduced TV earnings for years to come.

For low cost, thoroughly adequate TV operation for insurance against costly errors uncovered too late depend on a tried and proven management counsel.

Talk things over with the pioneer TV management counsel.

Demonstrated ability and reputation are dependable yardsticks in selecting your TV Management Counsel.

Our background—seven continuous years of pioneering in the consulting field, twenty other fruitful years of professional service in the industry and a reputation earned by service to clients in all parts of the country.

Our activities include complete guidance for entering TV, capital structure, profit projection, complete operational planning and expert testimony before FCC. This work is coordinated with consulting engineers and attorneys without overlap.

CAPABLE EXECUTIVE PERSONNEL

Our Broadcasters Executive Placement Service establishes confidential contact between available qualified TV broadcast executives and career opportunities.

APPENDIX C(1)

Section 1.371 of the Commission's Rules is amended by deleting footnote 10 from the heading thereto and substituting new footnote 10 reading as follows:

[10]Temporary Processing Procedure for Television Broadcast Applications

Until further order of the Commission, the following temporary procedures shall apply with respect to applications for permits to construct new television broadcast stations, applications for permits and modifications thereof relating to operating television stations and to stations authorized after April 14, 1952, applications for licenses and modifications thereof, and to petitions specified below. The term "operating television station" means a television broadcast station for which a construction permit or license was issued prior to April 14, 1952.

(a) Applications accepted for filing which request the television authorizations described above will be separated into the following groups:

Group A—(1) applications filed pursuant to final determinations reached by the Commission on its proposals to change channel assignments of 31 operating television stations as set forth in paragraphs "8" and "9" of the Commission's "Third Notice of Further Proposed Rule Making" issued on March 22, 1951, (FCC 51-244) in Docket Nos. 8736 et al.; and (2) applications for new television stations on channels in cities located 40 or more miles from the main transmitter in use of the nearest operating television station.

Group B—(1) applications for new television stations on channels in cities which are located less than 40 miles from the main transmitter in use of one or more operating television stations and to which cities only UHF channels are assigned in the Commission's Table of Assignments (excluding non - commercial educational VHF channels); (2) applications for new television stations on channels in cities in which there are one or more operating television stations and in which cities all the VHF channels (excluding non-commercial educational channels) have been authorized and only UHF channels are available for authorization; (3) applications for new television stations on channels in cities in which there are no operating television stations and which are located less than 40 miles from the main transmitter in use of not more than one operating television station; (4) applications for new television stations or channels in cities in which there is only one operating television station and which are located 40 or more miles from the main transmitter in use of any other operating television station; and (5) applications for new television stations on channels in cities which are located less than 40 miles from the main transmitters in use of two or more operating television stations.

Group C—(1) applications to modify construction permits granted on and after July 1, 1952; (2) petitions for reconsideration of actions taken by the Commission with respect to Group A(2) and Group B applications; and (3) petitions for waiver of hearings on such applications under Section 1.391 of the Commission's Rules.

Group D—(1) applications for changes in existing facilities filed prior to April 14, 1952, by licensees and permittees of operating television stations, which applications were placed in the Commission's pending file pursuant to the provisions of the Commission's "freeze" order of September 30, 1948; (2) all other applications for changes in existing facilities filed on and after April 14, 1952, by licensees and permittees of operating television stations; and (3) all applications for television broadcast station licenses filed on and after April 14, 1952. Applications, and requests for Special Temporary Authority and extensions thereof submitted pursuant to the provisions of the Commission's Fifth Report and Order (FCC 51-752) in Dockets 8736 et al., are excluded from Group D.

(b) In computing the distances specified in Group A(2) and Group B, the geographical coordinates listed in Special Publication No. 238 of the U.S. Department of Commerce (entitled "Airline Distances Between Cities in the United States") shall be used as the reference point for the city under consideration, and the geographical coordinates on file with the Commission of the nearest operating television station shall be used as the other reference point. The computation of distance shall be made in accordance with the method set forth in Section 3.611 of the Commission's Rules. Where the city under consideration is not listed in the above Publication, the geographical coordinates of the main post office of that city (determined to the nearest second) shall be used as the reference point. Where an application requests a station in a city not listed in the Table of Assignments but said city is within 15 miles of a city so listed (Section 3.607(b) of the Rules), the point of measurement shall be the listed city. Where an application requests a station in a city which is one of two or more cities listed in combination in the Table of Assignments, i.e., "San Francisco-Oakland", the point of measurement shall be the geographical coordinates of the city farthest removed from the nearest operating television station(s). Where one combination city receives less service than the other, the lesser served city shall determine the group in which they fall.

(c) Group A(1) applications filed prior to July 1, 1952, and which are in a position to be acted on by the Commission will be processed promptly after the effective date of Subpart E of Part 3 of the Commission's Rules. On July 1, 1952, the Commission will commence processing pending Group A(1) applications not theretofore processed. When processing of these applications has been completed, the Commission will establish two processing lines, one for Group A(2) applications and the other for the Group B applications, and will commence processing both Groups simultaneously. Group C applications and petitions will be acted upon as filed and a separate processing line will be established for such requests. Processing of Group D applications will not be commenced before November 1, 1952. At the earliest practicable date, the Commission will issue an announcement concerning the processing of Group D applications.

(d) Applications for new television stations which are filed on and after July 1, 1952, will be placed in their respective Groups and will be processed in accordance with the priorities set forth in subparagraph "(e)" below. Group A(1) applications containing requests which fall in Group D will be considered in their entirety as Group A(1) applications.

(e) Within each Group, priority in processing will follow the order in which the Group is subdivided, as follows:

(1) Priority in processing applications in Group A (1) will be determined on the basis of the factual situation existing in each case, taking into consideration such factors as the particular problems presented by such applications and the dependence of certain applications on prior action to be taken by the Commission with respect to other applications in the same group.

(2) Priority in processing Group A (2) applications will be based on the population (1950 Census) of the city for which an application has been filed, i.e., applications in the city having the largest population will be processed first; applications in the next largest city will be processed second, and so on until all cities have been completed.

(3) Priority in processing Group B (1) applications will be based on the number of services (stations less than 40 miles away) being received in the city for which an application has been filed and the population (1950 Census) of that city. Thus, cities receiving one service will be processed first; cities receiving two services will be processed second, and so on. The cities will be arranged so that in each priority group the city with the largest population will be processed first, and so on. Priority in processing Group B (2) applications will be based on the number of operating television stations in the city for which an application has been filed and the population (1950 Census) of that city. Thus, cities with one television station will be processed first; cities with two television stations will be processed second, and so on. The cities will be arranged so that in each priority group the city with the largest population will be processed first, and so on. Priority in processing Group B (3) and Group B (4) applications will be based on the population (1950 Census) of the city for which an application has been filed, i.e., applications in the city having the largest population will be processed first; applications in the next largest city will be processed second, and so on until all cities in each group have been completed. Priority in processing applications in Group B (5) will be based on the number of operating television stations in the applicant's city. Thus, applications in a city which receives two or more television services but has no local operating television station will be processed first; if it has one local station, it will be processed second, and so on. The cities will be arranged so that in each priority group the city with the largest population (1950 Census) will be processed first, and so on.

(4) Where cities in Group A (2) and Group B are listed in the Table of Assignments in combination, the total population of both cities shall be considered for the purposes of this subparagraph. Where an application requests a station in a city not listed in the Table but said city is within 15 miles of a city so listed, priority will be based on the population of the listed city only.

(5) Group C applications and petitions will be processed in the order in which they are accepted for filing. Where the number of such requests requires a determination as to which shall be processed first, priority in processing will parallel the priorities provided for above for the respective cities for which applications have been filed.

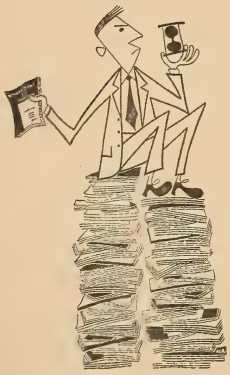
(6) Priority in processing applications in Group D will be based on the number of operating television stations in the applicant's city and the population of each city. Thus, applications in cities in which the respective applicants operate the only television stations in those cities will be processed first; two station cities will be processed second, and so on. The cities will be arranged so that in the first priority group, the city with the largest population (1950 Census) will be processed first, and so on.

(7) Where applications in Groups A, B and D are mutually exclusive because the distance between their respective proposed transmitter sites is contrary to the station separation requirements set forth in Section 3.610 of the Commission's Rules, said applications will be designated for hearing at the time the application with the higher priority is processed. If the question concerning transmitter sites is resolved before a decision is rendered in the matter, the application with the lower priority will be returned to its appropriate place on the processing line. In order to be considered mutually exclusive with a higher priority application, the lower priority application must have been accepted for filing and must be in compliance with the provisions of paragraph (j) herein at least one day before the higher priority application has been acted upon by the Commission. If the higher priorities application is in hearing status at the time the lower priority application is accepted for filing, the 20-day cut-off date specified in Section 1.387(b)(3) will be applicable.

(f) As soon after July 1, 1952, as is practicable, the Commission will make public the list of cities

for which applications have been filed falling in Group A (2) and Group B based on the priorities set forth above. From time to time, the Commission will issue revisions of these lists so that interested parties may be fully informed of the progress of the Group A (2) and Group B processing lines. Provision for the publication of the Group D list will be announced at a later date.

(g) The foregoing priority procedures shall not be applicable to non-commercial educational television stations, except where an application for such a station is mutually exclusive with a Group A, B or D application. Applications for non-commercial educational television stations will be separately processed, beginning July 1, 1952, in the order in which they are accepted for filing.



(h) On and after July 1, 1952, applications for television stations in Puerto Rico, Alaska, Hawaiian Island and Virgin Islands will be separately processed in the order in which they are accepted for filing.

(i) An application for a new television broadcast station must request a specific channel provided for in the Commission's Table of Assignments for the city in which the applicant proposes to construct his station. Regardless of the number of applications filed for channels in a city or the number of assignments available in that city, those applications which are mutually exclusive, i.e., which request the same channel, will be designated for hearing. All other applications for channels will, if the applicants are duly qualified, receive grants. For example, if Channels 6, 13, 47 and 53 have been assigned to City X and there are pending two applications for Channel 6, and one application for each of the remaining channels, the latter three applications will be considered for grants without hearing and the two mutually exclusive applications requesting Channel 6 will be designated for hearing. If there are two pending applications for Channel 6 and two applications for Channel 13, separate hearings will be held.

(j) Applications for new television stations which were designated for hearing prior to April 14, 1952, and on which final action has not been taken by the Commission are, by order in each docket, being removed from hearing status. Said applications and all other applications for construction permits for television broadcast stations which were filed prior to April 14, 1952, shall be amended by the filing of a new and complete FCC Form 301 as revised April 14, 1952. In preparing such forms, applicants shall set forth complete answers to all questions contained therein and shall submit new and complete exhibits, data and other attachments. Applicants may not answer questions or submit exhibits, data and attachments by cross-reference to other applications or documents on file with the Commission except where proposed exhibits, data and attachments are not obtainable without undergoing undue hardship. In such instances, cross-reference must be specific and shall include the file number, page and paragraph of the application and amendment referred to, the number of the exhibit, and a description thereof. Applicants shall not cross-reference by using such phrasing as "on file," "previously filed" or similar phraseology. Applications which have not been amended by the filing of a completed FCC Form 301, or which fail to comply with the above requirements by the time they are reached for processing, will be dismissed.

(k) Except with respect to Group A (1) applications, an application by a licensee or permittee of a television broadcast station which seeks to modify an outstanding license or permit to specify a channel other than that authorized in said license or permit will not be accepted for filing by the Commission.

The following pages of FCC Form 301 (Revised 3-21-52) supersede page 1 of Section I, pages 1, 2 and 3 of Section V-C, and Section V-G (Antenna) of FCC Form-301 (revised 6-16-48), and are to be substituted for the superseded pages in all applications filed with the Commission in April, May and June, 1952. The new pages are identified in the lower right hand corner by the date 6-30-52. A complete reprinting of the Form 301 incorporating these pages is in progress. After it becomes available the pages identified by the date 6-30-52 will no longer be used.

there isn't time to read them all

Let's not kid ourselves. No advertiser, no account executive, no agency time buyer has either the hours or the physical stamina to read all the trade publications that stream across his desk.

BROADCASTING • TELECASTING is the **only** journal that gives everybody concerned with radio and television the fullest coverage of everything new, everything significant, everything affecting radio-TV and the allied arts. And BROADCASTING • TELECASTING is covering this beat now for more than 21 years.

This double-duty newsweekly is easy to scan, easier to read. You select the news you want. A separate section for RADIO, a TV section all its own.

Annual subscription rate for 52 weekly issues—$7.00.

Annual subscription rate including either BROADCASTING Yearbook (53rd issue)—$9.00 or TELECASTING Yearbook (54th issue)—$9.00.

Annual subscription to BROADCASTING • TELECASTING including 54 issues—$11.00.

Yearbook issues $5.00 each.

Form Approved
Budget Bureau No. 52-R014.10

United States of America
Federal Communications Commission

APPLICATION FOR AUTHORITY TO CONSTRUCT A NEW BROADCAST STATION OR MAKE CHANGES IN AN EXISTING BROADCAST STATION
(Revised 3-21-52)

INSTRUCTIONS

A. This form is to be used in applying for authority to construct a new AM (standard), commercial FM (frequency modulation), or commercial television broadcast station, or to make changes in existing commercial broadcast stations. This form consists of this part, Section I, and the following sections:

Section II, Legal Qualifications of Broadcast Applicant

Section III, Financial Qualifications of Broadcast Applicant

Section IV, Statement of Program Service of Broadcast Applicant

Section V-A, Standard Broadcast Engineering Data

Section V-B, FM Broadcast Engineering Data

Section V-C, Television Broadcast Engineering Data

Section V-G, Antenna and Site Information

B. Prepare three copies of this form and all exhibits. Swear to one copy of Section I. Prepare two additional copies (a total of five) of Section V-G and associated exhibits. File all the above with Federal Communications Commission, Washington 25, D. C.

C. Number exhibits serially in the space provided in the body of the form and list each exhibit in the space provided on the back of this sheet. Show date of preparation of each exhibit, antenna pattern, and map, and show date when each photograph was taken.

D. The name of the applicant stated in Section I hereof shall be the exact corporate name, if a corporation; if a partnership, the names of all partners and the name under which the partnership does business; if an unincorporated association, the name of an executive officer, his office; and the name of the association. In other Sections of the form the name need be only sufficient for identification of the applicant.

E. Information called for by this application which is already on file with the Commission (except that called for in Section V-G) need not be refiled in this application provided (1) the information is now on file in another application or FCC form filed by or on behalf of this applicant; (2) the information is identified fully by reference to the file number (if any), the FCC form number, and the filing date of the application or other form containing the information and the page of paragraph referred to, and (3) after making the reference, the applicant states: "No change since date of filing." Any such reference will be considered to incorporate into this application all information, confidential or otherwise, contained in the application or other form referred to. The incorporated application or other form will thereafter, in its entirety, be open to the public.

F. This application must be executed by applicant, if an individual; by a partner of applicant, if a partnership; by an officer of applicant, if a corporation or association; or by attorney of applicant only under conditions shown in Section 1.303, Rules Relating to Organization and Practice and Procedure, in which event satisfactory evidence of disability of applicant or his absence from the Continental United States and authority of attorney to act must be submitted with application.

G. Before filling out this application, the applicant should familiarize himself with the Communications Act of 1934, as amended, Parts 1, 2, 3 and 17 of the Commission's Rules and Regulations and the Standards of Good Engineering Practice.

H. BE SURE ALL NECESSARY INFORMATION IS FURNISHED AND ALL PARAGRAPHS ARE FULLY ANSWERED. IF ANY PORTIONS OF THE APPLICATION ARE NOT APPLICABLE, SPECIFICALLY SO STATE. DEFECTIVE OR INCOMPLETE APPLICATIONS MAY BE RETURNED WITHOUT CONSIDERATION.

File No.

Name and post office address of applicant (See Instruction D)

Send notices and communications to the following-named person at the post office address indicated

1. Requested facilities

Frequency	Channel No.	Power in kilowatts: Night	Power in kilowatts: Day	Minimum hours operation daily

Hours of operation

Unlimited ☐	Sharing with (Specify Stations)	Other (Specify)
Daytime only ☐		
Limited ☐		

Type of station (as Standard, FM, Television)

Location of main studio

City	State

2. If authority to make changes in an existing station is requested

a. Present facilities

Frequency	Call	Channel No.	Power in kilowatts: Night	Power in kilowatts: Day	Minimum hours operation daily

Hours of operation

Unlimited ☐	Sharing with (Specify Stations)	Other (Specify)
Daytime only ☐		
Limited ☐		

Location of main studio

City	State

b. If this application is for changes in an existing authorization, complete Section I and any other sections necessary to show all substantial changes in information filed with the Commission in prior applications or reports. In the spaces below check Sections submitted herewith and as to Sections not submitted herewith refer to the prior application or report containing the requested information in accordance with Instruction E. (If contemplated expenditures are less than $1,000, do not complete Section III. Section IV not required for applications for minor changes not involving change in power, change in frequency, change in hours of operation, or moving from city to city.)

Section No.	Para. No.	Reference (File or Form No. and Date)
☐ Section II		
☐ Section III		
☐ Section IV		
☐ Section V		

Have there been any substantial changes in the information incorporated in this application by reference in this paragraph? Yes ☐ No ☐

3. If this application is contingent on the grant of another pending application, state name of other applicant and file number of other application.

Broadcast Application	FEDERAL COMMUNICATIONS COMMISSION	Section V-C
TELEVISION BROADCAST ENGINEERING DATA	Name of applicant	

1. Purpose of authorization applied for: (Indicate by check mark)

(If application is for a new station or for any of the changes numbered B through E, complete all paragraphs of this form; if change F is of a character which will change coverage or increase the overall height of the antenna structure more than 20 feet, answer all paragraphs, otherwise complete only paragraphs 2 and 3 and the appropriate other paragraphs; for changes G through I, complete only paragraph 2 and the appropriate other paragraphs; for change J, complete only paragraphs 2 and 16)

A. ☐ Construct a new station
B. ☐ Change effective radiated power or antenna height above average terrain
C. ☐ Change transmitter location
D. ☐ Change frequency
E. ☐ Approval of site and antenna
F. ☐ Change antenna system
G. ☐ Change transmitter
H. ☐ Install auxiliary or alternate main transmitter
I. ☐ Other changes (specify)
J. ☐ Change studio location

2. Facilities requested

Frequency	Channel number
_____ — _____ Mc.	

Effective Radiated Power (visual)	Antenna height above average terrain in feet. (Must agree with height given in Para. 12 of this Section)
In dbk:	
In kw:	

3. (a) Antenna structure

Is the proposed construction in the immediate vicinity or does it serve to modify the construction of any standard broadcast station, FM broadcast station, television broadcast station, or other class of radio station? If "Yes", attach as Exhibit No. complete engineering data thereon. Yes ☐ No ☐

Will proposed structure be constructed on the top of an existing structure? If "Yes", describe and give height above ground of existing structure. Yes ☐ No ☐

Overall height in feet above ground. (Do not include the height of any obstruction lighting which may be required.)	Overall height in feet above mean sea level. (Do not include the height of any obstruction lighting which may be required.)

Height of antenna radiation center in feet above mean sea level.

(b) Antenna data

Visual

Make	Type No.

Number of sections	Power gain in db

Aural (if separate)

Make	Type No.

Number of sections	Power gain in db

Is directional antenna proposed? Yes ☐ No ☐

If "Yes", attach as Exhibit No. complete engineering data thereon.

4. Transmitters

(a) Visual

Make	Type No.	Rated power In dbk: In kw:

(b) Aural

Make	Type No.	Rated power In dbk: In kw:

If the above transmitters are composite or of types for which data have not been filed with the F.C.C., attach as Exhibit No. a complete showing of transmitter details in accordance with the Commission's Rules. The showing should include schematic diagrams, makes and types of tubes, operating constants of the last radio stages, full details of frequency control, vestigial sideband filter (if used), multiplex networks and isolation networks. If changes are to be made in a licensed transmitter, include a schematic diagram and give full details of the changes.

(c) Describe in Exhibit No. means which will be used for determining and maintaining power output of the transmitters to the values specified in this application.

5. Modulation monitors

(a) Visual monitor or monitoring equipment

Make	Type No.

(b) Aural monitor

Make	Type No.

6. Frequency monitors

(a) Visual monitor

Make	Type No.	Accuracy

(b) Aural monitor

Make	Type No.	Accuracy

7. If the above monitors or monitoring equipment have not been approved by the F.C.C., include as Exhibit No. a brief technical description of each.

8. Transmission line proposed to supply power to the antenna from the transmitter

(a) Visual

Make	Type No.	Description

Size (nominal inside transverse dimensions) in inches	Length in feet	Power loss in db for this length

6-30-52

8. Transmission line (Continued)

(b) Aural (if separate)

Make	Type No.	Description

Size (nominal inside transverse dimension) in inches	Length in feet	Power loss in db for this length

9. Proposed operation

(a) Visual

Transmitter power output (after vestigial sideband filter, if used) In dbk: In kw:	Multiplexer loss in db:	Input to transmission line in dbk:

Transmission line power loss in db:	Antenna input power in dbk:	Antenna power gain in db:	Effective radiated power In dbk: In kw:

(b) Aural

Transmitter power output In dbk: In kw:	Multiplexer loss in db:	Input to transmission line in dbk:

Transmission line power loss in db:	Antenna input power in dbk:	Antenna power gain in db:	Effective radiated power In dbk: In kw:

10. Will the studios, cameras, microphones, and other equipment proposed for transmission of programs be designed for compliance with the Commission's Rules? Yes ☐ No ☐

11. (a) Attach as Exhibit No. a map(s) (topographic where obtainable, such as U. S. Geological Survey quadrangles) for the area within 15 miles of the proposed transmitter location and show drawn thereon the following data:

1. Proposed transmitter location--accurately plotted;
2. Transmitter location and call letters of all known radio stations (except amateur) and the location of known commercial and government receiving stations within 2 miles of the proposed transmitter location;
3. Proposed location of main studio;
4. Character of the area within 2 miles of proposed transmitter location, suitably designated as to residential, business, industrial, and rural nature;
5. At least eight radials each extending to a distance of ten or more miles from the proposed transmitter location, one or more of which must extend through the principal city or cities to be served.

(b) Attach as Exhibit No. profile graphs with reasonably large scales for the radials in (a)(5) above. Each graph shall show the elevation of the antenna radiation center. Identify each graph by its bearing from the proposed transmitter location. Direction of true north shall be zero azimuth, with angles measured clockwise. Show source of topographical data on each.

12. From the profile graphs in 11(b), for the eight mile distance between two and ten miles from the proposed transmitter location, and in accordance with the procedure prescribed in the Commission's Rules, supply the following tabulation of data: (Grade A and Grade B contours are those in the absence of interference.)

Radial bearing (degrees true)	Average elevation of radial (2-10 mi.) in feet above mean sea level	Height in feet of antenna radiation center above average elevation of radial (2-10 mi.)	Effective radiated power in radial direction	Predicted distance in miles to the Grade A contour	Predicted distance in miles to the Grade B contour
____ °	____ feet	____ feet	____ dbk	____ mi.	____ mi.

Antenna height above average terrain _____ feet (Must be identical with Paragraph 2)

13. Attach as Exhibit No. map(s) (Sectional Aeronautical charts where obtainable, preferably without aeronautical overlay) of the area proposed to be served and shown drawn thereon:

(a) Proposed transmitter location and the radials along which the profile graphs have been prepared;

(b) The predicted Grade A and Grade B contours from 12 above;

(c) Scale of miles.

14. Attach as Exhibit No. a sufficient number of aerial photographs taken in clear weather at appropriate altitudes and angles to show the nature of the surrounding terrain in the vicinity of the proposed transmitter site. The photographs must be marked so as to show compass directions. Photographs taken in eight different directions from an elevated position on the ground will be acceptable in lieu of the aerial photographs if the area can be clearly shown. Give date photographs were taken.

6-30-52

Broadcast Application	TELEVISION BROADCAST ENGINEERING DATA	Section V-C, Page 3

15. Proposed location of transmitter

State	County	Geographical coordinates (to be determined to nearest second) of the proposed TV antenna structure.	
City or town	Street address	North latitude ° ' "	West longitude ° ' "
How were coordinates determined?			

16. Proposed location of main studio

State	County	Other studios proposed
City or town	Street address	

17. State the minimum value of field strength in dbu, predicted in accordance with the method prescribed in the Commission's Rules, that will be provided over the entire city in which the main studio is located.

18. (a) Does the proposed transmitter location comply with the minimum separation requirements of the Commission's Rules? Yes ☐ No ☐

(b) If any co-channel separations are proposed that are less than the applicable minimum separation requirement plus 20 miles, or if other channel separations are proposed that are less than the applicable minimum separations plus 10 miles, list such separations below. (Include existing stations, proposed stations and assignments; the location and geographical coordinates of each antenna; the distance to each from the proposed transmitter location; and the method used in each instance to measure the distance.) If none, so state.

I certify that I am the Technical Director, Chief Engineer, or Consulting Engineer of the radio station for which this application is submitted and that I have examined the foregoing statement of technical information and that it is true to the best of my knowledge and belief. (This signature may be omitted provided the engineer's original signed report of the data from which the information contained herein has been obtained is attached hereto.)

Broadcast Application | FEDERAL COMMUNICATIONS COMMISSION | Section V-G (Antenna)

ANTENNA AND SITE INFORMATION
(see instruction B Section I)

Name of applicant

Address where applicant can be reached in person

Since this Section is submitted to the Regional Airspace Subcommittee of the Air Coordinating Committee for clearance in connection with obstructions to air navigation, it is necessary that all the data called for be supplied. Previously and separately filed data must not be incorporated by reference.

Legal Counsel

Address

Consulting Engineer

Address

Class of station | Facilities requested

Purpose of application (Check appropriate box)

a. New antenna construction ☐
b. Alteration of existing antenna structures ☐
c. Change in location ☐

1. Location of antenna

State | County | City or Town

Exact antenna location (street address) (If outside city limits, give distance and direction from, and name of nearest town)

Geographic coordinates (to be determined to nearest second. For directional antenna give coordinates of center of array.) For single vertical radiator give tower location.

North latitude 0 ' "

West longitude 0 ' "

2. Features of surrounding terrain

List any natural formations or existing man-made structures (hills, trees, water tanks, towers, etc.) which, in the opinion of the applicant, would tend to shield the antenna from aircraft and thereby minimize the aeronautical hazard of the antenna.

Submit as Exhibit No. a chart on which is plotted the exact location of the antenna site, and also the relative location of the natural formations and/or the existing man-made structures listed above.

The chart used shall be an Instrument Approach Chart (or the landing chart on reverse side thereof), or a Sectional Aeronautical Chart, choice depending upon proximity of the antenna site to landing areas. 1/ In general, the Sectional Aeronautical Chart should be used only when the antenna site is more than 10 miles from a landing area or when an Instrument Approach Chart is unobtainable. 1/ These charts may be purchased from the U. S. Coast and Geodetic Survey, Washington 25, D. C.

1/ Exception - Where the proposed antenna site is within the boundary of a landing area for which no Instrument Approach Chart is available, submit a self-made, large scale map showing antenna site, runway(s) and existing man-made structures listed above.

3. Designation, distance, and bearing to center line of nearest established airway within 5 miles

4. List all landing areas within 10 miles of antenna site. Give distance and direction to the nearest boundary of each landing area from the antenna site.

	Landing Area	Distance	Direction
(a)			
(b)			
(c)			

5. Description of antenna system (If directional, give spacing and orientation of towers).

Type

Description of tower(s)

Self-supporting	Guyed			Tubular (Pole)		
Tower (height figures should not include obstruction lighting)	#1	#2	#3	#4	#5	#6
Height of radiating elements						
Overall height above ground						
Overall height above mean sea level						

If a combination of Standard, FM, or TV operation is proposed on the same multi-element array (either existing or proposed) submit as Exhibit No. a horizontal plan for the proposed antenna system, giving heights of the elements above ground and showing their orientation and spacing in feet. Clearly indicate if any towers are existing.

Submit as Exhibit No. a vertical plan sketch for the proposed total structure (including supporting building if any) giving heights above ground in feet for all significant features. Clearly indicate existing portions, noting painting and lighting.

Is the proposed antenna system designed so that obstruction lights may be installed and maintained at the uppermost point(s)? Yes ☐ No ☐

6. Is the proposed site the same or immediately adjoining the transmitter-antenna site of other stations authorized by the Commission or specified in another application pending before the Commission? Yes ☐ No ☐

If the answer is "Yes", give

Broadcast Application | FEDERAL COMMUNICATIONS COMMISSION | Section V-G (Antenna)

ANTENNA AND SITE INFORMATION
(see instruction B Section I)

Name of applicant

Address where applicant can be reached in person

Since this Section is submitted to the Regional Airspace Subcommittee of the Air Coordinating Committee for clearance in connection with obstructions to air navigation, it is necessary that all the data called for be supplied. Previously and separately filed data must not be incorporated by reference.

Address

Consulting Engineer

Address

Class of station | Facilities requested

Purpose of application (Check appropriate box)

a. New antenna construction ☐
b. Alteration of existing antenna structures ☐
c. Change in location ☐

1. Location of antenna

State | County | City or Town

Exact antenna location (street address) (If outside city limits, give distance and direction from, and name of nearest town)

Geographic coordinates (to be determined to nearest second. For directional antenna give coordinates of center of array.) For single vertical radiator give tower location.

North latitude 0 ' "

West longitude 0 ' "

2. Features of surrounding terrain

List any natural formations or existing man-made structures (hills, trees, water tanks, towers, etc.) which, in the opinion of the applicant, would tend to shield the antenna from aircraft and thereby minimize the aeronautical hazard of the antenna.

Submit as Exhibit No. a chart on which is plotted the exact location of the antenna site, and also the relative location of the natural formations and/or the existing man-made structures listed above.
The chart used shall be an Instrument Approach Chart (or the landing chart on reverse side thereof), or a Sectional Aeronautical Chart, choice depending upon proximity of the antenna site to landing areas. 1/ In general, the Sectional Aeronautical Chart should be used only when the antenna site is more than 10 miles from a landing area or when an Instrument Approach Chart is unobtainable. 1/ These charts may be purchased from the U. S. Coast and Geodetic Survey, Washington 25, D. C.
1/ Exception - Where the proposed antenna site is within the boundary of a landing area for which no Instrument Approach Chart is available, submit a self-made, large scale map showing antenna site, runway(s) and existing man-made structures listed above.

3. Designation, distance, and bearing to center line of nearest established airway within 5 miles

4. List all landing areas within 10 miles of antenna site. Give distance and direction to the nearest boundary of each landing area from the antenna site.

	Landing Area	Distance	Direction
(a)			
(b)			
(c)			

5. Description of antenna system (If directional, give spacing and orientation of towers).

Type

Description of tower(s)

Part 3—Radio Broadcast Services

Subpart E—Rules Governing Television Broadcasting Stations

Section	Heading
	General
3.601	Scope of rules.
3.602	Other pertinent rules.
3.603	Numerical designation of television channels.
	Channel Utilization
3.606	Table of Assignments.
3.607	Availability of channels.
3.608	International agreements.
3.609	Changes in Table of Assignments.
3.610	Separations.
3.611	Reference points and distance computations.
3.612	Protection from interference.
3.613	Main studio location.
3.614	Power and antenna height requirements.
	Applications and Authorizations
3.621	Noncommercial educational stations.
3.622	Application for television stations.
3.623	Full disclosures.
3.624	Repetitious applications.
3.625	Installation of apparatus.
3.626	Period of construction.
3.627	Forfeiture of construction permits; extension of time.
3.628	Equipment tests.
3.629	Program tests.
3.630	Normal license period.
3.631	Renewal of license.
3.632	Temporary extension of station licenses.
3.633	License, simultaneous modification and renewal.
3.634	Assignment or transfer of control.
3.635	Use of common antenna site.
3.636	Multiple ownership.
3.637	Alternate main transmitters.
3.638	Auxiliary transmitter.
3.639	Changes in equipment and antenna system.
3.640	Administrative changes in authorizations.
	General Operating Requirements
3.651	Time of operation.
3.652	Station identification.
3.653	Mechanical reproductions.
3.654	Sponsored programs, announcement.
3.655	Rebroadcast.
3.656	Lotteries and give-away programs.
3.657	Broadcasts by candidates for public office.
3.658	Affiliation agreements.
3.659	Special rules relating to contracts providing for reservation of time upon sale of a station.
3.660	Station license, posting of.
3.661	Operator requirements.
3.662	Inspection of tower lights and associated control equipment.
3.663	Logs, maintenance of.
3.664	Logs, retention of, etc.
3.665	Station inspection.
3.666	Experimental operation.
3.667	Discontinuance of operation.
	Technical Standards
3.681	Definitions.
3.682	Transmission standards and changes.
3.683	Field intensity contours.
3.684	Prediction of coverage.
3.685	Transmitter location and antenna system.
3.686	Measurements for rule making purposes and upon request of the Commission.
3.687	Transmitters and associated equipment.
3.688	Indicating instruments.
3.689	Operating power.

Subpart E — Rules Governing Television Broadcast Stations.

General

3.601. **Scope of rules.** This Subpart contains the rules and regulations (including engineering standards) governing television broadcast stations, including non-commercial educational television broadcast stations, in the United States, its Territories and Possessions.

3.602. **Other pertinent rules.** Other pertinent provisions of the Commission's rules and regulations relating to the television broadcast service are included in the following Parts:

Part 1 — Rules Relating to Practice and Procedure

Part 2—Rules Governing Frequency Allocation and Radio Treaty Matters; General Rules and Regulations

Part 4 — Experimental and Auxiliary Broadcast Services

Part 17—Rules Concerning the Construction, Marking, and Lighting of Antenna Structures

3.603. **Numerical designation of television channels.**

Channel No.	Frequency band (Megacycles)
2	54-60
3	60-66
4	66-72
5	76-82
6	82-88
7	174-180
8	180-186
9	186-192
10	192-198
11	198-204
12	204-210
13	210-216
14	470-476
15	476-482
16	482-488
17	488-494
18	494-500
19	500-506

80	866-872
81	872-878
82	878-884
83	884-890

CHANNEL UTILIZATION

3.606. **Table of Assignments.** (a) The following Table of Assignments contains the channels assigned to the listed communities in the United States, its Territories, and Possessions. Channels designated with an asterisk are assigned for use by non-commercial educational broadcast stations only. A station on a channel identified by a plus or minus mark is required to operate with its carrier frequencies offset 10 kc above or below, respectively, the normal carrier frequencies.[1]

[1]These identifications are now being prepared and will be included in the Table as soon as it is practicable to do so. New television stations authorized to operate subsequent to the issuance of these Rules will be required to operate with their carrier frequencies offset where it is so specified in the Table. Offset carrier frequencies of existing television broadcast stations operating on channels so affected will be listed in all construction permits, licenses, or renewal of licenses, upon issuance thereof. Permittees and licensees who wish to so operate prior to the time offset carrier frequencies are specified in their authorizations may request authority for such operation by filing informal requests therefor.

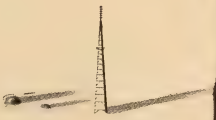
3 Slim-Trim DYNAMICS

proved in TV...Broadcasting...Recording...P.A.

Available for Immediate Delivery



You see . . . and hear . . . the E-V Slim-Trim on network and local telecasts and broadcasts. You find it in the studios and on remote hook-ups. You find it on important P.A. jobs, too. And you know it's there *because* it has met the most exacting tests . . . *because* it serves so superbly in every way for voice and music. First in dynamic . . . it has features only *Electro-Voice* can provide . . . features that enable you to meet every need.

FOR TELECASTING-BROADCASTING

"654"—Response 50-14,000 c.p.s., substantially flat. Power rating –55. Omnidirectional. 50-250 ohm impedance selector. Swivel head. List **$90**

"655"—Response 40-15,000 c.p.s., ±2.5 db. Power rating –53. Omnidirectional. Changeable low impedance. Removable swivel. List **$200**

. . . for wide range high fidelity response . . . for fixed position or man-in-motion . . . for ruggedness and versatility . . . for exclusive Acoustalloy diaphragm . . . for pop-proof pick-up indoors and outdoors

FOR PUBLIC ADDRESS

"636"—Response 60-13,000 c.p.s., substantially flat. Power rating –55. Omnidirectional. High or low impedance. Swivel head. List **$70**

3.607. **Availability of channels.** (a) Subject to the provisions of subparagraph (b) herein, applications may be filed to construct television broadcast stations only on the channels assigned in the Table of Assignments and only in the communities listed therein. Applications which fail to comply with this requirement, whether or not accompanied by a petition to amend the Table, will not be accepted for filing.

(b) A channel assigned to a community listed in the Table of Assignments is available upon application in any unlisted community which is located within 15 miles of the listed community. Where channels are assigned to two or more communities listed in combination in the Table, such channels are also available to any unlisted communities which are located within 15 miles of any of such listed communities. The distance between such listed and unlisted communities shall be determined by the distance between the respective coordinates thereof as set forth in the publication of the United States Department of Commerce entitled "Air Line Distances Between Cities in the United States."[2] If said publication does note contain the coordinates of either or both communities, the coordinates of the main post office in either or both of such communities shall be used. The method to be followed in making the measurements is set forth in Section 3.611 of this Subpart.

3.608. **International agreements.** Authorizations issued by the Commission for television broadcast facilities will be subject to the provisions of any agreements entered into by the United States with Canada and Mexico concerning television assignments and authorizations.[3] Where, pursuant to such an agreement, timely objection is received from the foreign country involved to an authorization granted by the Commission, the Commission may, on its own motion, set aside such authorization pending consideration of such objection. Upon receipt of such objection, the Commission will notify the person to whom such authorization has been issued.

3.609. **Changes in Table of Assignments.** Except as provided below, the Table of Assignments (Section 3.606) and the rules relating to separations as set forth in Section 3.610 of this Subpart, shall not be subject to amendment on petition within the one year period following the effective date of these Rules. Petitions to amend the Table of Assignments will be eligible for consideration during said period under the following circumstances, provided that the requests therein comply with the minimum assignment separations set forth in Section 3.610 of this Subpart and that the petitions do not request any deletions or substitutes of channels in any community listed in the Table:

(a) Where the petitioner seeks the assignment of a channel to a community which is not listed in the Table and which is not located within 15 miles of a listed community.

(b) Where the petitioner seeks the assignment of a noncommercial educational channel to a community listed in the Table and to which such a channel has not been assigned.

(c) Where the petitioner seeks the assignment of a channel other than a noncommercial educational channel to a community listed in the Table and to which such a channel has not been assigned.

3.610. **Separations.** The following provisions relate to assignment separations and station separations. Petitions to amend the Table of Assignments (other than those also expressly requesting amendment of this subparagraph) will be dismissed and all applications for new television broadcast stations or for changes in the transmitter sites of existing stations will not be accepted for filing if they fail to comply with the requirements specified in the following subparagraphs.[4]

(a) Minimum co-channel assignment and station separations:

(1) Zone	Channels 2-13	Channels 14-83
I	170 miles	155 miles
II	190 miles	175 miles
III	220 miles	205 miles

(i) Zone I consists of that portion of the United States located within the confines of the following lines drawn on the United States Albers Equal Area Projection Map (based on standard parallels 29½° and 45½°; North American datum): Beginning at the most easterly point on the state boundary line between North Carolina and Virginia; thence in a straight line to a point at the junction of the Ohio, Kentucky and West Virginia State boundary line; thence westerly along the the southern boundary lines of the States of Ohio, Indiana and Illinois to a point at the junction of the Illinois, Kentucky and Missouri State boundary lines; thence northerly along the western boundary line of the State of Illinois to a point at the junction of the Illinois, Iowa, and Wisconsin State boundary lines; thence easterly along the northern state boundary line of Illinois to the 90th meridian; thence north along this meridian to the 43.5° parallel; thence east along this parallel to the 71st meridian; thence in a straight line to the intersection of the 69th meridian and the 45th parallel; thence east along the 45th parallel to the Atlantic Ocean. When any of the above lines pass through a city, the city shall be considered to be located in Zone I. (See Appendix A, Figure 1.)

(ii) Zone II consists of that portion of the United States which is not located in either Zone I or Zone III, and Puerto Rico, Alaska, Hawaiian Islands and the Virgin Islands.

(iii) Zone III consists of that portion of the United States located south of a line, drawn on the United States Albers Equal Area Projection Map, (based on standard parallels 29½° and 45½°; North American datum), beginning at a point on the east coast of Georgia and the 31st parallel and ending at the United States-Mexican border, consisting of arcs drawn with a 150 mile radius to the north from the following specified points.

	North Latitude	West Longitude
a)	29°40′	83°24′
b)	30°07′	84°12′
c)	30°31′	86°30′
d)	30°48′	87°58′30″
e)	30°23′	90°12′
f)	30°04′30″	93°19′
g)	29°46′	95°05′
h)	28°43′	96°39′30″
i)	27°52′30″	97°32′

When any of the above arcs pass through a city, the city shall be considered to be located in Zone II. (See Appendix A, Figure 2.)

(2) The minimum co-channel mileage separation between a station in one zone and a station in another zone shall be that of the zone requiring the lower separation.

(b) Minimum assignment and station adjacent channel[5] separations applicable to all Zones:

(1) Channels 2-13	Channels 14-83
60 miles	55 miles

(2) Due to the frequency sapcing which exists between Channels 4 and 5, between Channels 6 and 7, and between Channels 13 and 14, the minimum adjacent channel separations specified above shall not be applicable to these pairs of channels. (See Section 3.603.)

(c) In addition to the foregoing, the following minimum assignment and station separations between stations on Channels 14-83, inclusive, must be met in either rulemaking proceedings looking toward the amendment of the Table of Assignments or in licensing proceedings. No channel listed in column (1) will be assigned to any city, and no application for an authorization to operate on such a channel will be granted unless the mileage separations indicated at the top of columns (2)-(7), inclusive, are met with respect to each of the channels listed in these columns and parallel with the channel in column (1).[5]

[2] This publication may be purchased from the Government Printing Office, Washington, D. C.

[3] These agreements when formalized, will be published as part of these rules.

[4] Licensees and permittees of television broadcast stations which were operating on April 14,1952 pursuant to one or more separations below those set forth in Section 3.610 may continue to so operate, but in no event may they further reduce the separations below the minimum. As the existing separations of such stations are increased, the new separations will become the required minimum separations until separations are reached which comply with the requirements of Section 3.610. Thereafter, the provisions of said Section shall be applicable.

[5] The parenthetical reference beneath the mileage figures in columns 2 to 7, inclusive, indicate, in abbreviated form, the bases for the required mileage separations. For a discussion of these bases, see the "Sixth Report and Order" of the Commission (FCC 52-294). The hyphenated numbers listed in column (3) are both inclusive.

(1) Channel	(2) 20 miles (I.F. beat)	(3) 20 miles (Intermod-ulation)	(4) 55 miles (Adjacent channel)	(5) 60 miles (Oscil-lator)	(6) 60 miles (Sound image)	(7) 75 miles (Picture image)

3.611 **Reference points and distance computations.** (a) In considering petitions to amend the Table of Assignments, the following reference points shall be used by the commission in determining assignment separations between communities:

(1) Where transmitter sites for the pertinent channels have been authorized in communities involved in a petition to amend the Table of Assignments, separations between such communities shall be determined by the distance between the coordinates of the authorized transmitter sites in the respective communities as set forth in the Commission's authorizations therefor.

(2) Where an authorized transmitter site is available for use as a reference point in one community but not in the other for the pertinent channels, separations shall be determined by the distance between the coordinates of the transmitter site as set forth in the Commission's authorization therefor and the coordinates of the other community as set forth in the publication of the United States Department of Commerce entitled "Air Line Distances Between Cities in the United States." If said publication does not contain the coordinates for said other community, the coordinates of the main post office thereof shall be used.

(3) Where no authorized transmitter sites are available for use as reference points in both communities for the pertinent channels, the distance between the two communities listed in the above publication shall be used. If said publication does not contain such distance, the separation between the two communities shall be determined by the distance between the coordinates thereof as set forth in said publication. Where such coordinates are not contained in said publication, the coordinates of the main post offices of said communities shall be used.

(b) Station separations in licensing proceedings shall be determined by the distance between the coordinates of the proposed transmitter site in one community and

(1) The coordinates of an authorized transmitter site for the pertinent channel in the other community; or, where such transmitter site is not available for use as a reference point,

(2) The coordinates of the other community as set forth in the above-described publication of the United States Department of Commerce; or, if not contained therein,

(3) The coordinates of the main post office of such other community.

(4) In addition, where there are pending applications in other communities which, if granted, would have to be considered in determining station separations, the coordinates of the transmitter sites proposed in such applications must be used to determine whether the requirements with respect to minimum separations between the proposed stations in the respective cities have been met.

(c) In measuring assignment and station separations involving cities listed in the Table, in combination, where there is no authorized transmitter site in any of the combination cities on the channel involved, separation measurements shall be made from the reference point which will result in the lowest separation.

(d) The distance between reference points is considered to be the length of the hypotenuse of a right triangle, one side of which is the difference in latitude of the reference points and the other side the difference in longitude of the two reference points, and shall be computed as follows:[6]

(1) Determine the difference in latitude and the difference in longitude between the two reference points. Convert these two differences into degrees and decimal parts of a degree in accordance with Appendix B, Table I.

(2) Determine the middle latitude of the two reference points to the nearest second of latitude (average the latitudes of the two points).

(3) Multiply the difference in latitude by the number of miles per degree of latitude difference obtained from Table II of Appendix B for the appropriate middle latitude (interpolate linearly).[7] [8] This determines the North-South distance in statute miles.

(4) Multiply the difference in longitude by the number of miles per degree of longitude difference obtained from Table III of Appendix B, for the appropriate middle latitude (interpolate linearly). This determines the East-West distance in statute miles.

(5) Determine the distance between the two reference points by the square root of the sum of the squares of the distances obtained in (3) and (4) above, i.e.

$$D = (L_n^2 + L_o^2)^{\frac{1}{2}}$$

Where: D = Distance in statute miles

L_n = North-South distance in miles from (3) above

L_o = East-West distance in miles from (4) above

In computing the above, sufficient decimal figures shall be used to determine the distance to the nearest mile.

3.612. **Protection from interference.** Permittees and licensees of television broadcast stations are not protected from any interference which may be caused by the grant of a new station or of authority to modify the facilities of an existing station in accordance with the provisions of the Subpart. The nature and extent of the protection from interference accorded to television broadcast stations is limited solely to the protection which results from the minimum assignment and station separation requirements and the rules with respect to maximum powers and antenna heights set forth in this Subpart.[9]

3.613. **Main studio location.** (a) The main studio of a television broadcast station shall be located in the principal community to be served.

(b) In cases where a showing is made that, due to the existence of unusual circumstances, compliance with the provisions of the above subparagraph will result in severe and undue hardship, the Commission will give consideration to the use of a main studio location other than that specified above. The licensee or permittee of a television broadcast station shall not move his main studio outside the borders of the community in which it is located without first securing a modification of construction permit or license. Such licensee or permittee shall notify the Commission promptly of any change in the location of the main studio within the community.

3.614 **Power and antenna height requirements.** (a) **Minimum requirements**—Applications filed for television broadcast stations in cities in the population groupings set forth below will not be accepted for filing if they fail to comply with the following requirements as to power at the specified antenna heights above average terrain:

Population of City
(Excludes adjacent areas)
(1950 Census)
1,000,000 and above
250,000-1,000,000
50,000- 250,000
Under 50,000
Minimum effective radiated

[6] This method is appropriate for determining distances up to 220 miles, and for such distances will normally be more accurate than by using spherical trigonometry without correction for the spheroidal shape of the earth. However, its accuracy deteriorates rapidly at distances beyond 300 miles and this method should not be used to compute greater distances.

[7] Tables II and III of Appendix B were computed from Clarke's Reference Spheroid of 1866. In the interest of clarity, the first two digits in the mileage tabulation in Table III have been omitted. The approriate numbers before the decimal point are obtained in the tabulation at the point where the second digit changes by one unit.

[8] In determining necessary distance computations for the Territories, the appropriate mileage per degree may be obtained by linear interpolation of the data given on pages 122 and 123 of the tables in publication H.O. No. 9 (Bowditch-American Practical Navigator—1943 Edition) of the U.S. Navy Dept., Hydrographic Office. This publication may be purchased from the Government Printing Office, Washington, D. C.

[9] The nature and extent of the protection from interference accorded to television broadcast stations which were authorized prior to April 14, 1952, and which were operating on said date is limited not only as specified above but is further limited by any smaller separations existing between such stations on said date. Where, as a result of the adoption of the Table of Assignments, or of changes in transmitter sites made by such stations after said date, separations smaller than the required minimum are increased but still remain lower than the required minimum, protection accorded such stations will be limited to the new separations.

power in db above one kilowatt (dbk) for the antenna height shown

17 dbk (50 kw)/500 ft. antenna
10 dbk (10 kw)/500 ft. antenna
3 dbk (2 kw)/500 ft. antenna
0 dbk (1 kw)/300 ft. antenna

No minimum antenna height is specified. Where antenna heights differ from those listed above, the Grade A field intensity coverage shall not be less than that resulting from the use of the minimum powers with the antenna heights shown above. Equivalent coverage shall be based on the chart designated as Appendix C, Figure 1; however, the effective radiated power may not exceed the figures specified in subparagraph (b) below. In no event shall less than 0 dbk effective radiated power be authorized for any station.

(b) **Maximum power**—Except as provided in subparagraph (1) below, the maximum effective radiated powers of television broadcast stations operating on the channels set forth below with antenna heights not in excess of 2,000 feet above average terrain shall be as follows:

Channel Nos.	Maximum Effective Radiated Power in db above one kilowatt (dbk)
2-6	20 dbk (100 kw)
7-13	25 dbk (316 kw)
14-83	30 dbk (1000 kw)

(1) In Zone I, on Channels 2-13 inclusive, the maximum powers specified above for these channels may be used only with antenna heights not in excess of 1000 feet above average terrain. Where antenna heights exceeding 1000 feet above average terrain are used on Channels 2-13, or antenna heights exceeding 2000 feet above average terrain are used on Channels 14-83, the maximum power shall be based on the chart designated as Appendix C, Figure 2a.

(2) In Zones II and III, the maximum powers which may be used by television broadcast stations operating on the respective channels set forth in the above table with antenna heights exceeding 2000 feet above average terrain shall be based on the chart designated as Appendix C, Figure 2b.

Applications and Authorizations

3.621. **Noncommercial educational stations.** In addition to the other provisions of this Subpart, the following shall be applicable to noncommercial educational television broadcast stations:

(a) Except as provided in subparagraph (c) below, noncommercial educational broadcast stations will be licensed only to nonprofit educational organizations upon a showing that the proposed stations will be used primarily to serve the educational needs of the community; for the advancement of educational programs, and to furnish a nonprofit and noncommercial television broadcast service.

(1) In determining the eligibility of publicly supported educational organizations, the accreditation of their respective state departments of education shall be taken into consideration.

(2) In determining the eligibility of privately controlled educational organizations, the accreditation of state departments of education or recognized regional and national educational accrediting organizations shall be taken into consideration.

(b) Where a municipality or other political subdivision has no independently constituted educational organization such as, for example, a board of education having autonomy with respect to carrying out the municipality's educational program, such municipality shall be eligible for a noncommercial educational television broadcast station. In such circumstances, a full and detailed showing must be made that a grant of the application will be consistent with the intent and purpose of the Commission's Rules relating to such stations.

(c) Noncommercial educational television broadcast stations may transmit educational, cultural and entertainment programs, and programs designed for use by schools and school systems in connection with regular school courses, as well as routine and administrative material pertaining thereto.

(d) An educational station may not broadcast programs for which a consideration is received, except programs produced by or at the expense of or furnished by others than the licensee for which no other consideration than the furnishing of the program is received by the licensee. The payment of line charges by another station or network shall not be considered as being prohibited by this subparagraph.

(e) To the extent applicable to programs broadcast by a noncommercial educational station produced by or at the expense of or furnished by others than the licensee of said station, the provisions of Section 3.654 relating to announcements regarding sponsored programs shall be applicable, except that no announcements (visual or aural) promoting the sale of a product or service shall be transmitted in connection with any program; provided, however, that where a sponsor's name or product appears on the visual image during the course of a simultaneous or rebroadcast program either on the backdrop or in similar form, the portions of the program showing such information need not be deleted.

3.622. **Applications for television stations.** Applications for new stations or for modification of existing authorizations shall be filed on FCC Form 301; for licenses, on FCC Form 302; for renewal of licenses, on FCC Form 303. Separate applications shall be filed by each applicant for the voluntary sharing of television channels. Such applications shall be accompanied by copies of the time-sharing agreements under which the applicants propose to operate.

3.623. **Full disclosures.** Applications shall contain full and complete disclosures with regard to the real party or parties in interest, and their legal, technical, financial, and other qualifications, and as to all matters and things required to be disclosed thereby.

3.624. **Repetitious applications.** (a) Where an applicant has been afforded an opportunity to be heard with respect to a particular application for a new television broadcast station, or for change of existing service or facilities, and the Commission has, after hearing or default, denied the application or dismissed it with prejudice, the Commission will not consider another application for a station of the same class to serve in whole or in part the same area, by the same applicant or by his successor or assignee, or on behalf of or for the benefit of the original parties in interest, until after the lapse of 12 months from the effective date of the Commission's order.

(b) Where an appeal has been taken from the action of the Commission in denying a particular application, another application for the same class of broadcast station and for the same area, in whole or in part, filed by the same applicant or by his successor or assignee, or on behalf or for the benefit of the original parties in interest, will not be considered until the final disposition of such appeal.

3.625. **Installation of apparatus.** Applications for construction permits or modification thereof involving the installation of new transmitting apparatus should be filed at least 60 days prior to the contemplated installation.

3.626. **Period of construction.** Each construction permit will specify a maximum of 60 days from the date of granting thereof as the time within which construction of the station shall begin, and a maximum of 6 months thereafter as the time within which construction shall be completed and the station ready for operation, unless otherwise determined by the Commission upon proper showing in any particular case.

3.627. **Forfeiture of construction permits; extension of time.** (a) A construction permit shall be automatically forfeited if the station is not ready for operation within the time specified or within such further time as the Commission may have allowed for completion, and a notation of the forfeiture of any construction permit under this provision will be placed in the records of the Commission as of the expiration date.

(b) An application (FCC Form No. 701) for extension of time within which to construct a station shall be filed at least 30 days prior to the expiration date of such permit if the facts supporting such application for extension are known to the applicant in time to permit such filing. In other cases, such applications will be accepted upon a showing satisfactory to the Commission of sufficient reasons for filing within less than 30 days prior to the expiration date. Such applications will be granted upon a specific and detailed showing that the failure to complete was due to causes not under control of the grantee, or upon a specific and detailed showing of other matters sufficient to justify the extension.

(c) If a construction permit has been allowed to expire for any reason, application may be made for a new permit on FCC Form 321, "Application for Construction Permit to Replace Expired Permit."

3.628. **Equipment tests.** (a) During the process of construction of a television broadcast station, the permittee, after notifying the Commission and Engineer in Charge of the radio district in which the station is located may, without further authority of the Commission, conduct equipment tests for the purpose of such adjustments and measurements as may be necessary to assure compliance with the terms of the construction permit, the technical provisions of the application therefor, and the rules and regulations.

(b) The Commission may notify the permittee to conduct no tests or may cancel, suspend, or change the date for the beginning of equipment tests as and when such action may appear to be in the public interest, convenience, and necessity.

(c) Equipment tests may be continued so long as the construction permit shall remain valid.

(d) Inspection of a station will ordinarily be required during the equipment test period and before the commencement of program tests. After construction and after adjustments and measurements have been completed to show compliance with the terms of the construction permit, the technical provisions of the application therefor, and the rules and regulations, the permittee should notify the Engineer in Charge of the radio district in which the station is located that it is ready for inspection.

(e) The authorization for tests embodied in this section shall not be construed as constituting a license to operate but as a necessary part of the construction.

3.629. **Program tests.** (a) Upon completion of construction of a television broadcast station in accordance with the terms of the construction permit, the technical provisions of the application therefor, and the rules and regulations, and when an application for station license has been filed showing the station to be in satisfactory operating condition,[10] the permittee may request authority to conduct program tests: **Provided,** That such request shall be filed with the Commission at least ten (10) days prior to the date on which it is desired to begin such operation and that the Engineer in Charge of the radio district in which the station is located is notified.

(b) Program tests shall not commence until specific Commission authority is received. The Commission reserves the right to change the date of the beginning of such tests or to suspend or revoke the authority for program tests as and when such action may appear to be in the public interest, convenience, and necessity.

(c) Unless sooner suspended or revoked, the program test authority continues valid during Commission consideration of the application for license and during this period further extension of the construction permit is not required. Program test authority shall be automatically terminated by final determination upon the application for station license.

(d) All operation under program test authority shall be in strict compliance with the rules governing television broadcast stations and in strict accordance with representations made in the application for license pursuant to which the tests were authorized.

(e) The granting of program test authority shall not be con-

[10] All data necessary to show compliance with the terms and conditions of the construction permit must be filed with the license application.

strued as approval by the Commission of the application for station license.

3.630. **Normal license period.** (a) All television broadcast station licenses will be issued for a normal license period of one year. Licenses will be issued to expire at the hour of 3:00 a.m., eastern standard time, in accordance with the following schedule and at one year intervals thereafter.[11]

(1) For stations located in Delaware, Pennsylvania, Tennessee, Kentucky, Indiana and Texas, August 1, 1951.

(2) For stations located in Maryland, District of Columbia, Virginia, West Virginia, Ohio, Michigan, Wyoming, Nevada, Arizona, Utah, New Mexico and Idaho, October 1, 1951.

(3) For stations located in North Carolina, South Carolina, Illinois, Wisconsin and California, December 1, 1951.

(4) For stations located in Florida, Puerto Rico, Virgin Islands, Iowa, Missouri, Washington, Oregon, Alaska and Hawaii, February 1, 1952.

(5) For stations located in Alabama, Georgia, Minnesota, North Dakota, South Dakota, Montana, Colorado, Connecticut, Maine, Massachusets, New Hampshire, Rhode Island and Vermont, April 1, 1952.

(6) For stations located in Arkansas, Louisiana, Mississippi, Kansas, Oklahoma, Nebraska, New Jersey and New York, June 1, 1952.

3.631. **Renewal of license.** (a) Unless otherwise directed by the Commission, each application for renewal of a television station license shall be filed at least 90 days prior to the expiration date of the license sought to be renewed (FCC Form No. 303). No application for renewal of a television broadcast station will be considered unless there is on file with the Commission the information currently required by SS 1.341-1.344, reference to which by date and file number shall be included in the application.

(b) Whenever the Commission regards an application for a renewal of a television station license as essential to the proper conduct of a hearing or investigation, and specifically directs that it be filed by a certain date, such application shall be filed within the time thus specified. If the licensee fails to file such application within the prescribed time, the hearing or investigation shall proceed as if such renewal application had been received.

[11] Renewals of licenses will be granted for the period specified in the rule: **Provided, however,** That if as a result of the transition from the present schedule to the proposed schedule the period for which a license is renewed is 4 months or less, the licensee may within 30 days of the expiration date of such renewed license file, in lieu of renewal application (FCC Form 303), a written application under oath for the next renewal of license which shall consist of (1) a request that its license be renewed and (2) a statement that no substantial changes have been made in its operations or in its plans for future operations since its last renewal application; or if changes have been made or proposed, a statement specifying such changes. Upon review of such statement, the Commission may grant a renewal of license for the full period provided for in the rule; or, if the Commission requires additional information, it may require the filing of renewal application (FCC Form 303).

3.632. **Temporary extension of station licenses.** Where there is pending before the Commission any application, investigation, or proceeding which, after hearing, might lead to or make necessary the modification of, revocation of, or the refusal to renew an existing television license, the Commission may, in its discretion, grant a temporary extension of such license: **Provided, however,** That no such temporary extension shall be construed as a finding by the Commission that the operation of any television station thereunder will serve public interest, convenience, and necessity beyond the express terms of such temporary extension of license: **And provided further,** That such temporary extension of license will in nowise affect or limit the action of the Commission with respect to any pending application or proceeding.

3.633. **License, simultaneous modification and renewal.** When an application is granted by the Commission necessitating the issuance of a modified license less than 60 days prior to the expiration date of the license sought to be modified, and an application for renewal of said license is granted subsequent or prior thereto (but within 30 days of expiration of the present license), the modified license as well as the renewal license shall be issued to conform to the combined action of the Commission.

3.634. **Assignment or transfer of control**—(a) **Voluntary.** Application for consent to voluntary assignment of a television station construction permit or license or for consent to voluntary transfer of control of a corporation holding a television station construction permit or license shall be filed with the Commission on FCC Form No. 314 (Assignment of License), FCC Form No. 315 (Transfer of Control) or FCC Form No. 316 (Short Form) at least 60 days prior to the contemplated effective date of assignment or transfer of control.

(b) **Pro forma.** Assignment or transfer application shall be filed on FCC Form 316 where:

(1) There is an assignment from an individual or individuals (including partnerships) to a corporation owned and controlled by such individuals or partnerships without any substantial change in their relative interests;

(2) There is an assignment from a corporation to its individual stock-holders without effecting any substantial change in the disposition of their interests.

(3) There is an assignment or transfer by which certain partners or stockholders retire but no new ones are brought in, provided that the interest transferred is not a controlling one;

(4) There is a corporate reorganization which involves no substantial change in the beneficial ownership of the corporation;

(5) There is an involuntary transfer to an Executive, Administrator or other court appointed officer caused by death or legal disability, except that this form does not cover assignments (or transfers) from the Executor, Administrator or other court appointed officers to the ultimate beneficiary;

(6) There is an assignment or transfer from a corporation to a wholly owned subsidiary thereof or vice versa, or where there is an assignment from a corporation to a corporation owned or controlled by the assignor stockholders without substantial change in their interests;

(7) There is an assignment of less than a controlling interest in a partnership.

(c) **Involuntary.** In the event of the death or legal disability of a permittee or licensee, or a member of a partnership, or a person directly or indirectly in control of a corporation, which is a permittee or licensee:

(1) The Commission shall be notified in writing promptly of the occurrence of such death or legal disability, and

(2) Within thirty days after the occurrence of such death or legal disability, application on FCC Form No. 316 shall be filed for consent to involuntary transfer of control of such corporation to a person or entity qualified to succeed to the foregoing interests under the laws of the place having jurisdiction over the estate involved.

3.635. **Use of common antenna site.** No television license or renewal of a television license will be granted to any person who owns, leases, or controls a particular site which is peculiarly suitable for television broadcasting in a particular area and (a) which is not available for use by other television licensees; and (b) no other comparable site is available in the area; and (c) where the exclusive use of such site by the applicant or licensee would unduly limit the number of television stations that can be authorized in a particular area or would unduly restrict competition among television stations.

3.636. **Multiple ownership.** (a) No person (including all persons under common control) [12] shall, directly or indirectly, own, operate, or control more than one television broadcast station that would serve substantially the same area as another television broadcast station owned, operated, or controlled by such person.

(b) No person (including all persons under common control) shall, directly or indirectly, own, operate, or control more than one television broadcast station, except upon a showing (1) that such ownership, operation, or control would foster competition among television broadcast stations or provide a television broadcasting service distinct and separate from existing services, and (2) that such ownership, operation, or control would not result in the concentration of control of television broadcasting facilities in a manner inconsistent with public interest, convenience, or necessity; **Provided however,** That the Commission will consider the ownership, operation, or control of more than five television broadcast stations to constitute the concentration of control of television broadcasting facilities in a manner inconsistent with public interest, convenience, or necessity.

(c) Subparagraphs (a) and (b) are not applicable to noncommercial educational stations.

[12] The word "control" as used herein is not limited to majority stock ownership but includes actual working control in whatever manner exercised.

3.637. **Alternate main transmitters.** The licensee of a television broadcast station may be licensed for alternate main transmitters provided that a technical need for such alternate transmitters is shown and that the following conditions are met:

(a) Both transmitters are located at the same place.

(b) Both transmitters shall have the same power rating.

(c) Both transmitters shall meet the construction, installation, operation and performance requirements of this Subpart.

3.638. **Auxiliary transmitter.** Upon showing that a need exists for the use of auxiliary transmitters in addition to the regular transmitters of a television station, a license therefor may be issued: **Provided, That:**

(a) Auxiliary transmitters may be installed either at the same location as the main transmitters or at another location.

(b) A licensed operator shall be in control whenever auxiliary transmitters are placed in operation.

(c) The auxiliary transmitters shall be maintained so that they may be put into immediate operation at any time for the following purposes:

(1) The transmission of the regular programs upon the failure of the main transmitters.

(2) The transmission of regular programs during maintenance or modification [13] work on the main transmitters necessitating discontinuance of their operation for a period not to exceed five days.

(3) Upon request by a duly authorized representative of the Commission.

(d) The auxiliary transmitters shall be tested at least once each week to determine that they are in proper operating condition and that they are adjusted to the proper frequency, except that in case of operation in accordance with paragraph (c) of this section during any week, the test in that week may be omitted provided the operation under paragraph (c) is satisfactory. A record shall be kept of the time and result of each test operation under paragraph (c).

(e) The auxiliary transmitters shall be equipped with satisfactory control equipment which will enable the maintenance of the frequency emitted by the station within the limits prescribed by the regulations in this Subpart.

(f) The operating power of an auxiliary transmitter may be less than the authorized power of the main transmitters, but in no event shall it be greater than such power.

3.639. **Changes in equipment and antenna system.** Licensees of television broadcast stations shall observe the following provisions with regard to changes in equipment and antenna system:

(a) No changes in equipment shall be made:

[13] This includes the equipment changes which may be made without authority as set forth elsewhere in the rules and regulations or as authorized by the Commission by letter or by construction permit. Where such operation is required for periods in excess of 5 days, request therefor shall be in accordance with Section 1.324 of the Commission's Rules.

(1) That would result in the emission of signals outside of the authorized channel.

(2) That would result in the external performance of the transmitter being in disagreement with that prescribed in this Subpart.

(b) Specific authority upon filing formal application therefor (FCC Form No. 301 or such other form as is provided therefor), is required for any of the following changes:

(1) Changes involving an increase or decrease in the power rating of the transmitters.

(2) A replacement of the transmitters as a whole.

(3) Change in the location of the transmitting antenna.

(4) Change in antenna system, including transmission line.

(5) Change in the power delivered to the antenna.

(6) Change in frequency control and/or modulation system.

(c) Other changes, except as above provided for in this section or in the provisions of this Subpart, may be made at any time without the authority of the Commission, provided that the Commission shall be promptly notified thereof and such changes shall be shown in the next application for renewal of license.

3.640. **Administrative changes in authorizations.** In the issuance of television broadcast station authorizations, the Commission will specify the transmitter power output and effective radiated power, when calculated to the figures in the ranges shown in Column (1) below, to the accuracy indicated by the corresponding figure in Column (2) below. Power in decibels will be specified to the nearest 0.1 dbk and antenna heights above average terrain will be specified to the nearest 10 feet. Midway figures will be authorized in the lower alternative.

Column 1	Column 2
0.1— 0.3 kw	0.005 kw
0.3— 1.0 kw	0.01 kw
1.0— 3.0 kw	0.05 kw
3 — 10.0 kw	0.1 kw
10 — 30.0 kw	0.5 kw
30 — 100.0 kw	1.0 kw
100 — 300.0 kw	5.0 kw
300 —1000.0 kw	10.0 kw

General Operating Requirements

3.651. Time of operation. (a) All television broadcast stations will be licensed for unlimited time operation. Each such station shall maintain a regular program operating schedule as follows: not less than two hours daily in any five broadcast days per week and not less than a total of twelve hours per week during the first eighteen months of the station's operation; not less than two hours daily in any five broadcast days per week and not less than a total of sixteen hours, twenty hours and twenty-four hours per week for each successive six month period of operation, respectively; and not less than two hours in each of the seven days of the week and not less than a total of twenty-eight hours per week thereafter. "Operation" includes the period during which a station is operated pursuant to special temporary authority or during program tests, as well as during the license period. Time devoted to test patterns, or to aural presentations accompanied by the incidental use of fixed visual images which have no substantial relationship to the subject matter of such aural presentations, shall not be considered in computing periods of program service. If, in the event of an emergency due to causes beyond the control of a licensee, it becomes impossible to continue operation, the Commission and the Engineer in Charge of the radio district in which the station is located shall be notified in writing immediately after the emergency develops and immediately after the emergency ceass and operation is resumed.

(b) Noncommercial educational television broadcast stations are not required to operate on a regular schedule and no minimum number of hours of operation is specified; but the hours of actual operation during a license period shall be taken into consideration in considering the renewal of non-commercial educational television broadcast licenses.

(c)(1) The aural transmitter of a television station shall not be operated separately from the visual transmitter except for the following purposes:

(i) For actual tests of station equipment or actual experimentation in accordance with Section 3.666; and

(ii) For emergency "fills" in case of visual equipment failure or unscheduled and unavoidable delays in presenting visual programs. In such situations the aural transmitter may be used to advise the audience of difficulties and to transmit for a short period program material of such nature that the audience will be enabled to remain tuned to the station; for example, music or news accompanying a test pattern or other visual presentation.

(2) During periods of transmission of a test pattern on the visual transmitter of a television station, aural transmission shall consist only of a single tone or series of variable tones. During periods when still pictures or slides are employed to produce visual transmissions which are accompanied by aural transmissions, the aural and visual transmissions shall be integral parts of a program or announcement and shall have a substantial relationship to each other: **Provided,** That nothing herein shall preclude the transmission of a test pattern, still pictures or slides for the following purposes and periods:

(i) To accompany aural announcements of the station's program schedule and aural news broadcasts or news commentaries, for a total period not to exceed one hour in any broadcast day.

(ii) To accompany aural transmissions for a period of time not to exceed fifteen minutes immediately prior to the commencement of a programming schedule.

Examples: (1) Duplication of AM or FM programs on the aural transmitter of a television station while the same program is broadcast on the visual transmitter (i.e., a "simulcast") is consistent with this paragraph.

(2) Duplication of AM or FM programs on the aural transmitter of a television station while a test pattern is broadcast on the visual transmitter is not consistent with this paragraph, except for the specific purposes and periods specified in paragraph (b)(2).

(3) A travel lecture in which the words of the lecturer are broadcast simultaneously with still pictures or slides of scenes illustrating the lecture, and a newscast in which the words of the newscaster are broadcast simultaneously with still pictures or slides of the news events, are examples of programs in which the aural and visual transmissions are integral parts of the same program having a substantial relationship to each other, within the meaning of paragraph (b) (2). Mood music unrelated to the visual transmission is not consistent with this paragraph.

(4) The broadcast of a test pattern accompanied by a musical composition for the purpose of demonstration, sale, installation or orientation of television receivers, or receiving antennas is not consistent with this paragraph.

(5) Music accompanying the transmission of a test pattern upon which is visually imposed a moving text consisting of continuous program material, such as a running newscast or news commentary, is consistent with this paragraph.

(6) Music accompanying the transmission of a test pattern upon which is visually imposed a clock indicating the time of day, or a text that is changed at spaced intervals, is not consistent with this paragraph.

3.652. **Station identification.** (a) A licensee of a television broadcast station shall make station identification announcement (call letters and location) at the beginning and ending of each time of operation and during the operation on the hour. The announcement at the beginning and ending of each time of operation shall be by both aural and visual means. Other announcements may be by either aural or visual means.

(b) Identification announcements during operation need not be made when to make such announcement would interrupt a single consecutive speech, play, religious service, symphony concert, or any type of production. In such cases, the identification announcement shall be made at the first interruption of the entertainment continuity and at the conclusion thereof.

3.653. **Mechanical reproductions.** (a) Each program which consists in whole or in part of one or more mechanical reproductions, either visual or aural, shall be accompanied by an appropriate announcement to that effect either at the beginning or end of such reproduction or at the beginning or end of the program in which such reproduction is used. No such announcement shall be required where a mechanical reproduction is used for background music, sound effects, station identification, program identification (theme music of short duration) or identification of sponsorship of the program proper.

(b) The exact form of identifying announcement is not prescribed but the language shall be clear and in terms commonly used and understood. The licensee shall not attempt affirmatively to create the impression that any program being broadcast by mechanical reproduction consists of live talent.

3.654. **Sponsored programs, announcement.** (a) In the case of each program for the broadcasting of which money, services, or other valuable consideration is either directly or indirectly paid or promised to, or charged or received by, any television broadcast station, the station broadcasting such program shall make, or cause to be made, an appropriate announcement that the program is sponsored, paid for, or furnished, either in whole or in part.

(b) In the case of any political program or any program involving the discussion of public controversial issues for which any films, records, transcriptions, talent, scripts, or other material or services of any kind are furnished, either directly or indirectly, to a station as an inducement to the broadcasting of such program, an announcement shall be made both at the beginning and conclusion of such program on which such material or services are used that such films, records, transcriptions, talent, scripts, or other material or services have been furnished to such station in connection with the broadcasting of such program: **Provided, however,** That only one such announcement need be made in the case of any such program of 5 minutes' duration or less, which announcement may be made either at the beginning or conclusion of the program.

(c) The announcement required by this section shall fully and fairly disclose the true identity of the person or persons by whom or in whose behalf such payment is made or promised, or from whom or in whose behalf such services or other valuable consideration is received, or by whom the material or services referred to in paragraph (b) of this section are furnished. Where an agent or other person contracts or otherwise makes arrangements with a station on behalf of another, and such fact is known to the station, the announcement shall disclose the identity of the person or persons in whose behalf such agent is acting instead of the name of such agent.

(d) In the case of any program, other than a program advertising commercial products or services, which is sponsored, paid for or furnished, either in whole or in part, or for which material or services referred to in paragraph (b) of this section are furnished, by a corporation, committee, association or other unincorporated group, the announcement required by this section shall disclose the name of such corporation, committee, association or other unincorporated group. In each such case the station shall require that a list of the chief executive officers or members of the executive committee or of the board of directors of the corporation, committee, association or other unincorporated group shall be made available for public inspection at one of the television broadcast stations carrying the program.

(e) In the case of programs advertising commercial products or services, an announcement stating the sponsor's corporate or trade name or the name of the sponsor's product shall be deemed sufficient for the purposes of this section

and only one such announcement need be made at any time during the course of the program.

3.655. **Rebroadcast.** (a) The term "rebroadcast" as used below means reception by radio of the program [14] of a television broadcast station, and the simultaneous or subsequent retransmission of such programs by a broadcast station. The broadcasting of a program relayed by an auxiliary broadcast station licensed to the television broadcast station is not considered a rebroadcast.

(b) The licensee of a television broadcast station may, without further authority of the Commission, rebroadcast the program of a United States television broadcast station, provided the Commission is notified of the call letters of each station rebroadcast and the licensee certifies that express authority has been received from the licensee of the station originating the program.[15]

(c) No licensee of a television broadcast station shall rebroadcast the program of any United States radio station not designated in paragraph (b) of this section without written authority having first been obtained from the Commission upon application (informal) accompanied by written consent or certification of consent of the licensee of the station originating the program.[16]

3.656. **Lotteries and give-away programs.**[17] (a) An application for construction permit, license, renewal of license, or any other authorization for the operation of a television broadcast station, will not be granted where the applicant proposes to follow or continue to follow policy or practice of broadcasting or permitting "the broadcasting of any advertisement of or information concerning any lottery, gift enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance, or any list of the prizes drawn or awarded by means of any such lottery, gift enterprise, or scheme, whether said list contains any part or all of such prizes." (See 18 U.S.C. sec. 1304.)

(b) The determination whether a particular program comes within the provisions of paragraph (a) of this section depends on the facts of each case. However, the Commission will in any event consider that a program comes within the provisions of paragraph (a) of this section if in connection with such program a prize consisting of money or thing of value is awarded to any person whose selection is dependent in whole or in part upon lot or chance, if as a condition of winning or competing for such prize:

(1) Such winner or winners are required to furnish any money or thing of value or are required to have in their possession any product sold, manufactured, furnished or distributed by a sponsor of a program broadcast on the station in question; or

(2) Such winner or winners are required to be listening to or viewing the program in question on a radio or television receiver; or

(3) Such winner or winners are required to answer correctly a question, the answer to which is given on a program broadcast over the station in question or where aid to answering the question correctly is given on a program broadcast over the station in question. For the purposes of this provision the broadcasting of the question to be answered over the television station on a previous program will be considered as an aid in answering the question correctly; or

(4) Such winner or winners are required to answer the phone in a prescribed manner or with a prescribed phrase, or are required to write a letter in a prescribed manner or containing a prescribed phrase, if the prescribed manner of answering the phone or writing the letter or the prescribed phrase to be used over the phone or in the letter (or an aid in ascertaining the prescribed phrase or the prescribed manner of answering the phone or writing the letter) is, or has been, broadcast over the station in question.

3.657. **Broadcasts by candidates for public office**—(a) **Legally qualified candidate.** A "legally qualified candidate" means any person who has publicly announced that he is a candidate for nomination by a convention of a political party or for nomination or election in a primary, special, or general election, municipal, county, state or national, and who meets the qualifications prescribed by the applicable laws to hold the office for which he is a candidate, so that he may be voted for by the electorate directly or by means of delegates or electors, and who:

(1) Has qualified for a place on the ballot, or

(2) Is eligible under the applicable law to be voted for by sticker, by writing in his name on the ballot, or other method, and (i) has been duly nominated by a political party which is commonly known and regarded as such, or (ii) makes a substantial showing that he is a bona fide candidate for nomination or office, as the case may be.

(b) **General requirements.** No station licensee is required to permit the use of its facilities by any legally qualified candidate for public office, but if any licensee shall permit any such candidate to use its facilities, it shall afford equal opportunities to all other such candidates for that office to use such facilities: **Provided,** That such licensee shall have no power of censorship over the material broadcast by any such candidate.

(c) **Rates and practices.** The rates, if any, charged all such candidates for the same office shall be uniform and shall not be rebated by any means, directly or indirectly; no licensee shall make any discrimination in charges, practices, regulations, facilities, or services for or in connection with the service rendered pursuant to the regulations in this part, or make or give any preference to any candidate for public office or subject any such candidate to any prejudice or disadvantage; nor shall any licensee make any contract or other agreement which shall have the effect of permitting any legally qualified candidate for any public office to broadcast to the exclusion of other legally qualified candidates for the same public office.

(d) **Inspection of records.** Every licensee shall keep and permit public inspection of a complete record of all requests for broadcast time made by or on behalf of candidates for public office, together with an appropriate notation showing the disposition made by the licensee of such requests, and the charges made, if any, if request is granted.

3.658. **Affiliation agreements.**—(a) **Exclusive affiliation of station.** No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization [18] under which the station is prevented or hindered from, or penalized for, broadcasting the programs of any other network organization.

(b) **Territorial exclusivity.** No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which prevents or hinders another broadcast station serving substantially the same area from broadcasting the network's programs not taken by the former station, or which prevents or hinders another broadcast station serving a substantially different area from broadcasting any program of the network organization. This regulation shall not be construed to prohibit any contract, arrangement, or understanding between a station and a network organization pursuant to which the station is granted the first call in its area upon the programs of the network organization.

(c) **Term of affiliation.** No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which provides, by original terms, provisions for renewal, or otherwise for the affiliation of the station with the network organization for a period longer than 2 years: **Provided,** That a contract, arrangement, or understanding for a period up to 2 years may be entered into within 6 months prior to the commencement of such period.

(d) **Option time.** No license shall be granted to a television broadcast station which options [19] for network programs any time subject to call on less than 56 days' notice, or more time than a total of 3 hours [20] within each of four segments of the broadcast day, as herein described. The broadcast day is divided into four segments, as follows: 8 a.m. to 1 p.m.; 1 p.m. to 6 p.m.; 6 p.m. to 11 p.m.; 11 p.m. to 8 a.m.[21] Such options may not be exclusive as against other network organizations and may not prevent or hinder the station from optioning or selling any or all of the time covered by the option, or other time, to other network organizations.

(e) **Right to reject programs.** No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which (a), with respect to programs offered pursuant to an affiliation contract, prevents or hinders the station from rejecting or refusing network programs which the station reasonably believes to be unsatisfactory or unsuitable; or which (b) with respect to network programs so offered or already contracted for, prevents the station from rejecting or refusing any program which, in its opinion, is contrary to the public interest, or from substituting a program of outstanding local or national importance.

(f) **Network ownership of stations.** No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common control [22] of a network organization, for a television broadcast station in any locality where the existing television broadcast stations are so few or of such unequal desirability (in terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing.

---

[14] As used in this section, program includes any complete program or part thereof.

[15] The notice and certification of consent shall be given within 3 days of any single rebroadcast, but in case of the regular practice of rebroadcasting certain programs of a television broadcast station several times during a license period, notice and certification of consent shall be given for the ensuing license period with the application for renewal of license, or at the beginning of such rebroadcast practice if begun during a license period.

[16] By Order No. 82, dated and effective June 24, 1941, until further order of the Commission, Section 3.655(c) is suspended only insofar as it requires prior written authority of the Commission for the rebroadcasting of programs originated for that express purpose by U.S. Government radio stations.

[17] The Commission on September 21, 1949, adopted an order which read in part as follows:

It is ordered, That, effective immediately, the effective date of Sections 3.192, 3.292 and 3.692 [now Section 3.656] of the Commission's rules is hereby postponed until a date to be fixed by further order, which shall be at least thirty days after a final decision by the Supreme Court of the United States, or thirty days after the time within which an appeal to the Supreme Court may be taken has expired without such an appeal being taken, in pending litigation with respect to these rules.

[18] The term "network organization" as used herein includes national and regional network organizations. See ch. VII, J. of Report on Chain Broadcasting.

[19] As used in this section, an option is any contract, arrangement, or understanding, express or implied, between a station and a network organization which prevents or hinders the station from scheduling programs before the network agrees to utilize the time during which such programs are scheduled, or which requires the station to clear time already scheduled when the network organization seeks to utilize the time.

[20] All time options permitted under this section must be specified clock hours, expressed in terms of any time system set forth in the contract agreed upon by the station and network organization. Shifts from daylight saving to standard time or vice versa may or may not shift the specified hours correspondingly as agreed by the station and network organization.

[21] These segments are to be determined for each station in terms of local time at the location of the station but may remain constant throughout the year regardless of shifts from standard to daylight saving time or vice versa.

[22] The word "control" as used in this section, is not limited to full control but includes such a measure of control as would substantially affect the availability of the station to other networks.

(g) **Dual network operation.** No license shall be issued to a television broadcast station affiliated with a network organization which maintains more than one network of television broadcast stations: **Provided,** That this section shall not be applicable if such networks are not operated simultaneously, or if there is no substantial overlap in the territory served by the group of stations comprising each such network.

(h) **Control by networks of station rates.** No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, fixing or altering its rates for the sale of broadcast time for other than the network's programs.

3.659. **Special rules relating to contracts providing for reservation of time upon sale of a station.** (a) No license, renewal of license, assignment of license, or transfer of control of a corporate licensee shall be granted or authorized to a television broadcast station which has a contract, arrangement or understanding, express or implied, pursuant to which, as consideration or partial consideration for the assignment of license or transfer of control, the assignor of a station license or the transferor of stock, where transfer of a corporate licensee is involved, or the nominee of such assignor or transferor retains any right of reversion of the license or any right to the reassignment of the license in the future, or reserves the right to use the facilities of the station for any period whatsoever.

(b) In the case of assignment of license or transfer of control of a corporate licensee approved by the Commission before the effective date of this section, February 15, 1949, involving a contract, arrangement or understanding of the type covered by paragraph (a) of this section and the existence and terms of which were fully disclosed to the Commission at the time of execution, the Commission will give consideration to the issuance of a license despite the existence of such contract, arrangement or understanding, if the parties thereto modify such contract within 6 months from the effective date of this section. Such modifications will be considered on the facts of each case but no such modification will be approved unless the modified contract contains at least the following provisions:

(1) A maximum limitation of the time subject to reservation so that no more than 12 hours per week shall be subject to reservation, of which no more than 4 hours shall be on any given day.

(2) A clause providing that the licensee reserves the right to reject or refuse programs which he reasonably believes to be unsatisfactory or unsuitable or for which, in his opinion, a program of outstanding local or national importance should be substituted, but provision may be made for the substitution of other television time for programs so rejected or for the payment at the station card rate for the time made unavailable.

(3) A prohibition against the resale or reassignment of any of the broadcast time reserved by such modified contract.

(4) An express negation of any right with respect to reversion or reassignment of license.

(5) An express provision setting forth a definite expiration date of the contract, arrangement or understanding. Such expiration date shall not extend beyond February 15, 1964, and shall in no event extend beyond the expiration date originally provided for in any such contract, agreement or understanding, in the event that such expiration date is a date prior to February 15, 1964.

(6) An express provision giving to the licensee the right to terminate the contract, arrangement or understanding for substantial cause, including, but not limited to the assignment of license or the transfer of control of a corporate licensee, consistent disagreement over programs between the parties, or the acquisition of a network affiliation by the licensee, upon the payment of a lump sum or periodic payments, and providing that the amount initially fixed shall thereafter decrease as the amount of time reserved is decreased by performance of the contract. Any such payment should not be so unduly large as to constitute in practice an effective deterrent to the licensee exercising the right. In determining whether the amount is unduly large, the Commission will consider the amount by which consideration in return for the transfer of the station was decreased by reason of the reservation of time or the present value of the television time still reserved and unused as of the date of the exercise of the right of termination.

3.660. **Station license, posting of.** The original of each station license shall be posted in the transmitter room.

3.661. **Operator requirements.** One or more licensed radio-telephone first class operators shall be on duty at the place where the transmitting apparatus of each station is located and in actual charge thereof whenever it is being operated. The original license (or FCC Form No. 759) of each station operator shall be posted at the place where he is on duty. The licensed operator on duty and in charge of a television broadcast transmitter may, at the discretion of the licensee, be employed for other duties or for the operation of another station or stations in accordance with the class of operator's license which he holds and by the rules and regulations governing such stations. However, such duties shall in nowise interfere with the operation ofthe broadcast transmitter.

3.662. **Inspection of tower, lights and associated control equipment.** The licensee or permittee of any television broadcast station which has an antenna structure requiring illumination pursuant to the provisions of Section 303(q) of the Communications Act of 1934, as amended:

(a) (1) Shall make an observation of the tower lights at least once each 24 hours either visually or by observing an automatic and properly maintained indicator designed to register any failure of such lights, to insure that all such lights are functioning properly as required; or alternatively,

(2) Shall provide and properly maintain an automatic alarm system designed to detect any failure of such lights and to provide indication of such failure to the licensee.

(b) Shall report immediately by telephone or telegraph to the nearest Airways Communication Station or office of Civil Aeronautics Administration any observed or otherwise known failure of a code or rotating beacon light or top light not corrected within thirty minutes, regardless of the cause of such failure. Further notification by telephone or telegraph shall be given immediately upon resumption of the required illumination.

(c) Shall inspect at intervals not to exceed three months all automatic or mechanical control devices, indicators and alarm systems associated with the tower lighting to insure that such apparatus is functioning properly.

3.663 **Logs; Maintenance of.** The licensee or permittee of each television station shall maintain program and operating logs and shall require entries to be made as follows:

(a) In the program log:

(1) An entry of the time each station identification announcement (call letters and location) is made.

(2) An entry briefly describing each program broadcast, such as "music," "drama," "speech," etc., together with the name or title thereof and the sponsor's name, with the time of the beginning and ending of the complete program. If a mechanical reproduction, either visual or aural, is used, the entry shall show the exact nature thereof and the time it is announced as a mechanical reproduction. If a speech is made by a political candidate, the name and political affiliations of such speaker shall be entered.

(3) An entry showing that each sponsored program broadcast has been announced as sponsored, paid for, or furnished by the sponsor; or that the broadcast is under the auspices of a non-profit educational organization other than the licensee or permittee.

(4) An entry showing, for each program of network origin, the name of the network originating the program.

(b) In the operating log:

(1) An entry of the time the station begins to supply power to the antenna, and the time it stops.

(2) An entry of the time the program begins and ends.

(3) An entry of each interruption to the carrier wave, its cause, and duration.

(4) An entry of the following each 30 minutes:

(i) Operating constants of last radio stage of the aural transmitter (total plate current and plate voltage).

(ii) Transmission line meter readings for both transmitters.

(iii) Frequency monitor readings.

(5) Log of experimental operation during experimental period (if regular operation is maintained during this period, the above logs shall be kept).

(i) A log must be kept of all operation during the experimental period. If the entries required above are not applicable thereto, then the entries shall be made so as to describe the operation fully.

(c) Where an antenna and antenna supporting structure(s) is required to be illuminated, the licensee or permittee shall make entries in the radio log as follows:

(1) The time the tower lights are turned on and off each day if manually controlled.

(2) The time the daily check of proper operation of the tower lights was made.

(3) In the event of any observed or otherwise known failure of a tower light:

(i) Nature of such failure.

(ii) Date and time the failure was observed, or otherwise noted.

(iii) Date, time and nature of the adjustments, repairs, or replacements that were made.

(iv) Identification of Airways Communication Station (Civil Aeronautics Administration) notified of the failure of any code or rotating beacon light not corrected within thirty minutes, and the date and time such notice was given.

(v) Date and time notice was given to the Airways Communication Station (Civil Aeronautics Administration) that the required illumination was resumed.

(4) Upon completion of the periodic inspection required at least once each three months:

(i) The date of the inspection and the condition of all tower lights and associated tower lighting control devices, indicators and alarm systems.

(ii) Any adjustments, replacements, or repairs made to insure compliance with the lighting requirements and the date such adjustments, replacements, or repairs were made.

3.664. (a) **Logs, retention of.** Logs of television broadcast stations shall be retained by the licensee or permittee for a period of two years; **Provided, however,** That logs involving communications incident to a disaster or which include communications incident to or involved in an investigation by the Commission and concerning which the licensee or permittee has been notified, shall be retained by the licensee or permittee until he is specifically authorized in writing by the Commission to destroy them; **Provided Further,** That logs incident to or involved in any claim or complaint of which the licensee or permittee has notice shall be retained by the licensee or permittee until such claim or complaint has been fully satisfied or until the same has been barred by statute limiting the time for the filing of suits upon such claims.

(b) **Logs, by whom kept.** Each log shall be kept by the person or persons competent to do so, having actual knowledge of the facts required, who shall sign the log when starting duty and again when

going off duty. The logs shall be made available upon request by an authorized representative of the Commission.

(c) **Log form.** The log shall be kept in an orderly manner, in suitable form, and in such detail that the data required for the particular class of station concerned are readily available. Key letters or abbreviations may be used if proper meaning or explanation is contained elsewhere in the log.

(d) **Correction of logs.** No log or portion thereof shall be erased, obliterated, or wilfully destroyed within the period of retention provided by the rules. Any necessary correction may be made only by the person originating the entry who shall strike out the erroneous portion, initial the correction made, and indicate the date of correction.

(e) **Rough logs.** Rough logs may be transcribed into condensed form, but in such case, the original log or memoranda and all portions thereof shall be preserved and made a part of the complete log.

3.665. **Station inspection.** The licensee of a television broadcast station shall make the station available for inspection by representatives of the Commission at any reasonable hour.

3.666. **Experimental operation.** Television broadcast stations may (upon informal application) conduct technical experimentation directed to the improvement of technical phases of operation and for such purposes may utilize a signal other than the standard television signal subject to the following conditions:

(a) That the licensee complies with the provisions of Section 3.651 with regard to the minimum number of hours of transmission with a standard television signal.

(b) That no transmissions are radiated outside of the authorized channel and subject to the condition that no interference is caused to the transmissions of a standard television signal by other television broadcast stations.

(c) No charges either direct or indirect shall be made by the licensee of a television broadcast station for the production or transmission of programs when conducting technical experimentation.

3.667. **Discontinuance of operation.** The licensee of each station shall notify the Commission in Washington, D. C., and the Engineer in Charge of the radio district where such station is located of permanent discontinuance of operation at least two days before operation is discontinued. The licensee shall, in addition, immediately forward the station license and other instruments of authorization to the Washington, D. C., office of the Commission for cancellation.

Technical Standards

3.681. **Definitions—**

(a) **Amplitude modulation (AM).** A system of modulation in which the envelope of the transmitted wave contains a component similar to the wave form of the signal to be transmitted.

(b) **Antenna height above average terrain.** The average of the antenna heights above the terrain from two to ten miles from the antenna. (In general, a different antenna height will be determined in each direction from the antenna. The average of these various heights is considered as the antenna height above average terrain.)

(c) **Antenna power gain.** The square of the ratio of the root-mean-square free space field intensity produced at one mile in the horizontal plane, in millivolts per meter for one kilowatt antenna input power to 137.6 mv/m. This ratio should be expressed in decibels (db). (If specified for a particular direction, antenna power gain is based on the field strength in that direction only.)

(d) **Aspect ratio.** The numerical ratio of the frame width to frame height, as transmitted.

(e) **Aural transmitter.** The radio equipment for the transmission of the aural signal only.

(f) **Black level.** The amplitude of the modulating signal corresponding to the scanning of a black area in the transmitted picture.

(g) **Center frequency (aural).**

(1) The average frequency of the emitted wave when modulated by a sinusoidal signal.

(2) The frequency of the emitted wave without modulation.

(h) **Color field.** Scanning through the picture area once in the chosen scanning pattern and in each of the primary colors. In the line interlaced scanning pattern of two to one, the scanning of the alternate lines of the picture area once in each of the primary colors.

(i) **Color frame.** Scanning all of the picture area once in each of the primary colors. In the line interlaced scanning pattern of two to one, a color frame consists of two color fields.

(j) **Color transmission.** The transmission of color television signals which can be reproduced with different values of hue, saturation, and luminance.

(k) **Effective radiated power.** The product of the antennae peak input power and the antenna power gain. This product should be expressed in kilowatts and in decibels above one kilowatt (dbk). (If specified for a particular direction, effective radiated power is based on the antenna power gain in that direction only. The licensed effective radiated power is based on the average antenna power gain for each horizontal plane direction.)

(l) **Field.** Scanning through the picture area once in the chosen scanning pattern and in a single color. In the line interlaced scanning pattern of two to one, the scanning of the alternate lines of the picture area once in a single color.

(m) **Frame.** Scanning all of the picture area once in a single color. In the line interlaced scanning pattern of two to one, a frame consists of two fields.

(n) **Free space field intensity.** The field intensity that would exist at a point in the absence of waves reflected from the earth or other reflecting objects.

(o) **Frequency modulation (FM).** A system of modulation where the instantaneous radio frequency varies in proportion to the instantaneous amplitude of the modulating signal (amplitude of modulating signal to be measured after pre-emphasis, if used) and the instantaneous radio frequency is independent of the frequency of the modulating signal.

(p) **Frequency swing.** The instantaneous departure of the frequency of the emitted wave from the center frequency resulting from modulation.

(q) **Interlaced scanning.** A scanning process in which successively scanned lines are spaced an integral number of line widths, and in which the adjacent lines are scanned during successive cycles of the field frequency.

(r) **Monochrome transmission.** The transmission of television signals which can be reproduced in gradations of a single color only.

(s) **Negative transmission.** Where a decrease in initial light intensity causes an increase in the transmitted power.

(t) **Peak power.** The power over a radio frequency cycle corresponding in amplitude to synchronizing peaks.

(u) **Percentage modulation.** As applied to frequency modulation, the ratio of the actual frequency swing to the frequency swing defined as 100 percent modulation, expressed in percentage. For the aural transmitter of television broadcast stations, a frequency swing of ±25 kilocycles is defined as 100 percent modulation.

(v) **Polarization.** The direction of the electric field as radiated from the transmitting antenna.

(w) **Positive transmission.** Where an increase in initial light intensity causes an increase in the transmitted power.

(x) **Progressive scanning.** A scanning process in which scanning lines trace one dimension substantially parallel to a side of the picture area and in which successively traced lines are adjacent.

(y) **Scanning.** The process of analyzing successively, according to a predetermined method, the light values of picture elements constituting the total picture area.

(z) **Scanning line.** A single continuous narrow strip of the picture area containing highlights, shadows, and halftones, determined by the process of scanning.

(aa) **Standard television signal.** A signal which conforms to the television transmission standards.

(bb) **Synchronization.** The maintenance of one operation in step with another.

(cc) **Television broadcast band.** The frequencies in the band extending from 54 to 890 megacycles which are assignable to television broadcast stations. These frequencies are 54 to 72 megacycles (channels 2 through 4), 76 to 88 megacycles (channels 5 and 6), 174 to 216 megacycles (channels 7 through 13), and 470 to 890 megacycles (channels 14 through 83).

(dd) **Television broadcast station.** A station in the television broadcast band transmitting simultaneous visual and aural signals intended to be received by the general public.

(ee) **Television channel.** A band of frequencies 6 megacycles wide in the television broadcast band and designated either by number or by the extreme lower and upper frequencies.

(ff) **Television transmission standards.** The standards which determine the characteristics of a television signal as radiated by a television broadcast station.

(gg) **Television transmitter.** The radio transmitter or transmitters for the transmission of both visual and aural signals.

(hh) **Vestigial sideband transmission.** A system of transmission wherein one of the generated sidebands is partially attenuated at the transmitter and radiated only in part.

(ii) **Visual frequency.** The frequency of the signal resulting from television scanning.

(jj) **Visual transmitter.** The radio equipment for the transmission of the visual signal only.

(kk) **Visual transmitter power.** The peak power output when transmitting a standard television signal.

3.682 **Transmission standards and changes**

(a) **Transmission standards**

(1) The width of the television broadcast channel shall be six megacycles per second.

(2) The visual carrier shall be located 4.5 megacycles lower in frequency than the aural center frequency.

(3) The aural center frequency shall be located 0.25 megacycles lower than the upper frequency limit of the channel.

(4) The visual transmission amplitude characteristic shall be in accordance with the chart designated as Appendix C, Figure 3.

(5) For monochrome transmission the number of scanning lines per frame shall be 525, interlaced two to one in successive fields. The frame frequency shall be 30, the field frequency 60, and the line frequency 15,750 per second.

(6) For color transmissions the number of scanning lines per frame shall be 405, interlaced two to one in successive fields of the same color. The frame frequency shall be 72, the field frequency 144, the color frame frequency 48, and the line frequency 29,160 per second.

(7) The aspect ratio of the transmitted television picture shall be 4 units horizontally to 3 units vertically.

(8) During active scanning intervals, the scene shall be scanned from left to right horizontally and from top to bottom vertically, at uniform velocities.

(9) A carrier shall be modulated within a single television channel for both picture and synchronizing signals, the two signals comprising different modulation ranges in amplitude, in accordance with the charts designated as Appendix C, Figures 3 and 4.

(10) A decrease in initial light intensity shall cause an increase in radiated power (negative transmission).

(11) The black level shall be represented by a definite carrier level, independent of light and shade in the picture.

(12) The pedestal level (normal black level) shall be transmitted at 75 percent (with a tolerance of plus or minus 2.5

percent) of the peak carrier amplitude.

(13) The level at maximum luminance shall be 15% or less of the peak carrier level.

(14) The signals radiated shall have horizontal polarization.

(15) A radiated power of the aural transmitter not less than 50 percent nor more than 150 percent of the peak radiated power of the video transmitter shall be employed.

(16) Variation of output. The peak-to-peak variation of transmitter output within one frame of video signal due to all causes, including hum, noise, and low-frequency response, measured at both synchronizing peak and pedestal level, shall not exceed 5 percent of the average synchronizing peak signal amplitude.[23]

(17) Black level. The black level should be made as nearly equal to the pedestal as the state of the art will permit. If they are made essentially equal, satisfactory operation will result and improved techniques will later lead to the establishment of the tolerance if necessary.[23]

(18) Brightness characteristics. The transmitter output shall vary in substantially inverse logarithmic relation to the brightness of the subject. No tolerances are set at this time.[23]

(19) The color sequence for color transmission shall be repeated in the order red, blue, green, in successive fields.

(20) The transmitter color characteristics for color transmission shall be such as to reproduce the transmitted colors as correctly as the state of the art will permit on a receiver having the following trichromatic co-efficients, based on the standardized color triangle of the International Commission on Illuminations:

Red	Blue	Green
$x = 0.674$	$x = 0.122$	$x = 0.227$
$y = 0.326$	$y = 0.142$	$y = 0.694$

When equal amplitudes of red blue, and green are transmitted, such a receiver will furnish a white corresponding to illuminant C with the trichromatic co-efficients $x = .310$ and $y = .316$.

(b) **Changes in transmission standards.** The Commission will consider the question whether a proposed change or modification of transmission standards adopted for television would be in the public interest, convenience and necessity, upon petition being filed by the person proposing such change or modification, setting forth the following:

(1) The exact character of the change or modification proposed;

(2) The effect of the proposed change or modification upon all other transmission standards that have been adopted by the Commission for television broadcast stations;

(3) The experimentation and field tests that have been made to show that the proposed change or modification accomplishes an improvement and is technically feasible;

(4) The effect of the proposed change or modification in the adopted standards upon operation and obsolescence of receivers;

(5) The change in equipment required in existing television broadcast station for incorporating the proposed change or modification in the adopted standards; and

(6) The facts and reasons upon which the petitioner bases his conclusion that the proposed change or modification would be in the public interest, convenience, and necessity.

Should a change or modification in the transmission standards be adopted by the Commission, the effective date thereof will be determined in the light of the considerations mentioned in subparagraph (4) above.

3.683 **Field intensity contours.** (a) In the authorization of television broadcast stations, two field intensity contours are considered. These are specified as Grade A and Grade B and indicate the approximate extent of coverage over average terrain in the absence of interference from other television stations. Under actual conditions, the true coverage may vary greatly from these estimates because the terrain over any specific path is expected to be different from the average terrain on which the field strength charts were based. The required field intensities, F(50, 50), in decibels above one microvolt per meter (dbu) for the Grade A and Grade B contours are as follows:[24]

	Grade A	Grade B
Channels 2- 6	68 dbu	47 dbu
Channels 7-13	71 dbu	56 dbu
Channels 14-83	74 dbu	64 dbu

(b) The field intensity contours provided for herein shall be considered for the following purposes only:

(1) In the estimation of coverage resulting from the selection of a particular transmitter site by an applicant for a television station.

(2) In connection with problems of coverage arising out of application of Section 3.636 of the Rules.

(3) In connection with problems of coverage arising out of application of Section 3.658(b) of the Rules.

(4) In determining compliance with Section 3.658(a) of the Rules concerning the minimum field intensity to be provided over the principal community to be served.

3.684 **Prediction of coverage**

(a) All predictions of coverage made pursuant to this paragraph shall be made without regard to interference and shall be made only on the basis of estimated field intensities. The peak power of the visual signal is used in making predictions of coverage.

(b) Predictions of coverage shall be made only for the same purposes as relate to the use of field intensity contours as specified in Section 3.683(b).

(c) In predicting the distance to the field intensity contours, the F (50,50) field intensity charts (Appendix C, Figures 5 and 6) shall be used. If the 50% field intensity is defined as that value exceeded for 50% of the time, these F(50,50) charts give the estimated 50% field intensities exceeded at 50% of the locations in decibels above one microvolt per meter. The charts are based on an effective power of one kilowatt radiated from a half-wave dipole in free space, which produces an unattenuated field strength at one mile of about 103 db above one microvolt per meter (137.6 millivolts per meter). To use the charts for other powers, the sliding scale associated with the charts should be trimmed and used as the ordinate scale. This sliding scale is placed on the charts with the appropriate gradation for power in line with the horizontal 40 db line on the charts. The right edge of the scale is placed in line with the appropriate antenna height gradations, and the charts then become direct reading (in uv/m and in db above 1 uv/m) for this power and antenna height. Where the antenna height is not one of those for which a scale is provided, the signal strength or distance is determined by interpolation between the curves connecting the equidistant points. Dividers may be used in lieu of the sliding scale. In predicting the distance to the Grade A and Grade B field intensity contours, the effective radiated power to be used is that in the horizontal plane in the pertinent direction. In predicting other field intensities over areas not in the horizontal plane, the effective radiated power to be used is the power in the direction of such areas; the appropriate vertical plane radiation pattern must, of course, be considered in determining this power.

(d) The antenna height to be used with these charts is the height of the radiation center of the antenna above the average terrain along the radial in question. In determining the average elevation of the terrain, the elevations between 2 and 10 miles from the antenna site are employed. Profile graphs must be drawn for at least eight radials from the proposed antenna site. These profiles should be prepared for each radial beginning at the antenna site and extending to 10 miles therefrom. Normally, the radials are drawn for each 45° of azimuth; however, where feasible, the radials should be drawn for angles along which roads tend to follow. (The latter method may be helpful in obtaining topographical data where otherwise unavailable, and is particularly useful in connection with mobile field intensity measurements of the station and the correlation of such measurements with predicted field intensities.) In each case, one or more radials must include the principal city or cities to be served, particularly in cases of rugged terrain, even though the city may be more than 10 miles from the antenna site. The profile graph for each radial should be plotted by contour intervals of from 40 to 100 feet and, where the data permits, at least 50 points of elevation (generally uniformly spaced) should be used for each radial. In instances of very rugged terrain where the use of contour intervals of 100 feet would result in several points in a short distance, 200- or 400-foot contour intervals may be used for such distances. On the other hand, where the terrain is uniform or gently sloping the smallest contour interval indicated on the topographic map (see below) should be used, although only relatively few points may be available. The profile graphs should indicate the topography accurately for each radial, and the graphs should be plotted with the distance in miles as the abscissa and the elevation in feet above mean sea level as the ordinate. The profile graphs should indicate the source of the topographical data employed. The graph should also show the elevation of the center of the radiating system. The graph may be plotted either on rectangular coordinate paper on or special paper which shows the curvature of the earth. It is not necessary to take the curvature of the earth into consideration in this procedure, as this factor is taken care of in the charts showing signal intensities. The average elevation of the 8-mile distance between 2 and 10 miles from the antenna site should then be determined from the profile graph for each radial. This may be obtained by averaging a large number of equally spaced points, by using a planimeter, or by obtaining the median elevation (that exceeded for 50 percent of the distance) in sectors and averaging these values.

(e) In instances where it is desired to determine the area in square miles within the Grade A and Grade B field intensity contours, the area may be determined from the coverage map by planimeter or other approximate means; in computing such areas, exclude (i) areas beyond the borders of the United States, and (ii) large bodies of water, such as ocean areas, gulfs, sounds, bays, large lakes, etc., but not rivers.

(f) In cases where the terrain in one or more directions from the antenna site departs widely from the average elevation of the 2 to 10 mile sector, the prediction method may indicate contour distances that are different from what may be expected in practice. For example, a mountain ridge may indicate the practical limit of service although the prediction method may indicate otherwise. In such cases the prediction method should be followed, but a supplemental showing may be made concerning the contour distances as determined by other means. Such supplemental showing should describe the procedure employed and should include sample calculations. Maps of predicted coverage should include both the coverage as predicted by the regular method and as predicted by a supplemental method. When measurements of area are required, these should include the area obtained by the regular prediction method and the area obtained by the supplemental

[23] These items are subject to change but are considered best practice under the present state of the art. They will not be enforced pending a further determination thereof.

[24] It should be realized that the F(50, 50) curves when used for Channels 14-83 are not based on measured data at distances beyond about 30 miles. Theory would indicate that the field intensities for Channels 14-83 should decrease more rapidly with distance beyond the horizon than for Channels 2-6, and modification of the curves for Channels 14-83 may be expected as a result of measurements to be made at a later date. For these reasons, the curves should be used with appreciation of their limitations in estimating levels of field intensity. Further, the actual extent of service will usually be less than indicated by these estimates due to interference from other stations. Because of these factors, the predicted field intensity contours give no assurance of service to any specific percentage of receiver locations within the distances indicated. In licensing proceedings these variations will not be considered.

method. In directions where the terrain is such that special problems may arise, a supplemental showing of expected coverage must be included together with a description of the method used in predicting such coverage. In special cases, the Commission may require additional information as to terrain and coverage.

(g) In the preparation of the profile graphs previously described, the elevations or contour intervals shall be taken from the United States Geological Survey Topographic Quadrangle Maps for all areas for which such maps are available. If such maps are not published for the area in question, the next best topographic information should be used. Topographic data may sometimes be obtained from State and municipal agencies. Data from Sectional Aeronautical Charts (including bench marks) or railroad depot elevations and highway elevations from road maps may be used where no better information is available. In cases where limited topographic data is available, use may be made of an altimeter in a car driven along roads extending generally radially from the transmitter site.

Ordinarily the Commission will not require the submission of topographical maps for areas beyond 15 miles from the antenna site, but the maps must include the principal city or cities to be served. If it appears necessary, additional data may be requested. United States Geological Survey Topographic Quadrangle Maps may be obtained from the Department of the Interior, Geological Survey, Washington, D. C. Sectional Aeronautical Charts are available from the Department of Commerce, Coast and Geodetic Survey, Washington, D. C.

3.685 **Transmitter location and antenna system.** (a) The transmitter location shall be chosen so that, on the basis of the effective radiated power and antenna height above average terrain employed, the following minimum field intensity in decibels above one microvolt per meter (dbu) will be provided over the entire principal community to be served:

Channels 2-6	Channels 7-13	Channels 14-83
74 dbu	77 dbu	80 dbu

(b) Location of the antenna at a point of high elevation is necessary to reduce to a minimum the shadow effect on propagation due to hills and buildings which may reduce materially the intensity of the station's signals. In general, the transmitting antenna of a station should be located at the most central point at the highest elevation available. To provide the best degree of service to an area, it is usually preferable to use a high antenna rather than a low antenna with increased transmitter power. The location should be so chosen that line-of-sight can be obtained from the antenna over the principal city or cities to be served; in no event should there be a major obstruction in this path. The antenna must be constructed so that it is as clear as possible of surrounding buildings or objects that would cause shadow problems. It is recognized that topography, shape of the desired service area, and population distribution may make the choice of a transmitter location difficult. In such cases, consideration may be given to the use of a directional antenna system, although it is generally preferable to choose a site where a nondirectional antenna may be employed.

(c) In cases of questionable antenna locations it is desirable to conduct propagation tests to indicate the field intensity expected in the principal city or cities to be served and in other areas, particularly where severe shadow problems may be expected. In considering applications proposing the use of such locations, the Commission may require site tests to be made. Such tests should be made in accordance with the measurement procedure hereafter described, and full data thereon must be supplied to the Commission. Test transmitters should employ an antenna having a height as close as possible to the proposed antenna height, using a balloon or other support if necessary and feasible. Information concerning the authorization of site tests may be obtained from the Commission upon request.

(d) Present information is not sufficiently complete to establish "blanket areas" of television broadcast stations. A "blanket area" is that area adjacent to a transmitter in which the reception of other stations is subject to interference due to the strong signal from this station. The authorization of station construction in areas where blanketing is found to be excessive will be on the basis that the applicant will assume full responsibility for the adjustment of reasonable complaints arising from excessively strong signals of the applicant's station or take other corrective action.

(e) A directional antenna is considered to be an antenna that is designed or altered for the purpose of obtaining a noncircular radiation pattern. Directional antennas may not be used for the purpose of reducing minimum mileage separation requirements but may be employed for the purpose of improving service or for the purpose of using a particular site; the provisions under which they may be authorized are as follows:

(1) Directional antennas with a ratio of minimum to maximum radiation in the horizontal plane of more than 10 decibels will not be permitted.

(2) The minimum effective radiated power in any horizontal direction shall meet the minimum power requirements of Section 3.614 and Appendix C, Figure 1.

(3) The effective radiated power in any horizontal or vertical direction may not exceed the maximum values permitted by Section 3.614 and Appendix C, Figures 2(a) and 2(b).

(4) The maximum effective radiated power in any direction above the horizon shall be as low as the state of the art permits and may not exceed the effective radiated power in the horizontal direction in the same vertical plane.

(f) Applications proposing the use of directional antenna systems must be accompanied by the following:

(1) Complete description of the proposed antenna system.

(2) Orientation of array with respect to true north; time phasing of fields from elements (degrees leading or lagging); space phasing of elements (in feet and degrees); and ratio of fields from elements.

(3) Horizontal and vertical plane radiation patterns showing the free space field intensity in millivolts per meter at one mile and the effective radiated power, in dbk, for each direction. The method by which the radiation patterns were computed or measured shall be fully described, including formulas used, equipment employed, sample calculations and tabulations of data. Sufficient vertical plane patterns shall be included to indicate clearly the radiation characteristics of the antenna above and below the the horizontal plane. The horizontal plane pattern shall be plotted on polar coordinate paper with reference to true north. The vertical plane patterns shall be plotted on rectangular coordinate paper with reference to the horizontal plane.

(4) Name, address, and qualifications of the engineer making the calculations.

(g) Applications proposing the use of television broadcast antennas within 200 feet of other television broadcast antennas operating on a channel within 20 percent in frequency of the proposed channel, or proposing the use of television broadcast antennas on channels 5 or 6 within 200 feet of FM broadcast antennas, must include a showing as to the expected effect, if any, of such proximate operation.

(h) Where simultaneous use of antennas or antenna structures is proposed, the following provisions shall apply:

(1) In cases where it is proposed to use a tower of a standard broadcast station as a supporting structure for a television broadcast antenna, an appropriate application for changes in the radiating system of the standard broadcast station must be filed by the licensee thereof. A formal application (FCC Form 301) will be required if the proposal involves substantial change in the physical height or radiation characteristics of the standard broadcast antennas; otherwise an informal application will be acceptable.[25] An application may be required for other classes of stations when the tower is to be used in connection with a television station.

(2) When the proposed television antenna is to be mounted on a tower in the vicinity of a standard broadcast directional array and it appears that the operation of the directional antenna system may be affected, an engineering study must be filed with the television application concerning the effect of the television antenna on the directional pattern. Readjustment and field intensity measurements of the standard broadcast station may be required following construction of the television antenna.

(i) The provisions of Part 17 of the Commission's Rules shall govern the construction, marking and lighting requirements of antenna structures used by television broadcast stations. In the event a common tower is used by two or more licensees or permittees for antenna and/or antenna supporting purposes, the licensee or permittee who is owner of the tower shall assume full responsibility for the installation and maintenance of any painting and/or lighting requirements. In the event of shared ownership, one licensee or permittee shall assume such responsibility and advise the Commission accordingly.

3.686. **Measurements for rule making purposes and upon request of the Commission.** (a) Except as provided for in Section 3.612 above, television broadcast stations shall not be protected against any type of interference or propagation effect. Persons desiring to submit testimony, evidence, or data to the Commission for the purpose of showing that the technical standards contained in this Subpart do not properly reflect any given types of interference or propagation effects may do so only in appropriate rule making proceedings to amend such technical standards. Persons making field intensity measurements for formal submission to the Commission in rule making proceedings, or making such measurements upon the request of the Commission, should comply with the procedure for making such measurements as outlined below:

(b) Measurements made to determine field intensities of television broadcast stations should be made with mobile equipment along roads which are as close and similar as possible to the radials showing topography which were submitted with the application for construction permit.[26] Suitable measuring equipment and a continuous recording device must be employed, the chart of which is either directly driven from the speedometer of the automobile in which the equipment is mounted or so arranged that distances and identifying landmarks can be readily noted. The measuring equipment must be calibrated against recognized standards of field intensity and so constructed that it will maintain an acceptable accuracy of measurement while in motion or when stationary. The equipment should be so operated that the recorder chart can be calibrated directly in field intensity in order to facilitate analysis of the chart. The receiving antenna must be horizontally polarized and should be nondirectional.

(c) Mobile measurements should be made with a minimum chart speed of 3 inches per mile and preferably 5 or 6 inches per mile. Locations shall be noted on the recorder chart as frequently as necessary to fix definitely the relation

[25] In case of doubt, an informal application (letter) together with complete engineering data should be submitted.

[26] Cluster and spot measurements may also be submitted, if accompanied by a complete showing of the procedures employed.

between the measured field intensity and the location. The time constant of the equipment should be such as to permit adequate analysis of the charts, and the time constant employed shall be shown. Measurements should be made to a point on each radial well beyond the particular contour under investigation.

(d) While making field intensity measurements either the visual or the aural transmitter may be used. If the visual transmitter is used, it is recommended that a black picture be transmitted or that the transmitter be operated at black level without synchronization peaks. Operation at a power somewhat less than black level is permissible but too great a reduction in power is not recommended due to the difficulty of recording weak signals. In any event, an appropriate factor shall be used to convert the readings obtained to the field strength that would exist on synchronization peaks while operating at the authorized power.

(e) After the measurements are completed, the recorder chart should be divided into not less than 15 sections on each equivalent radial from the station. The field intensity in each section of the chart should be analyzed to determine the field intensity received 50 percent of the distance (median field) throughout the section, and this median field intensity associated with the corresponding sector of the radial. The field intensity figures must be corrected for a receiving antenna elevation of 30 feet and for any directional effects of the automobile and receiving antenna not otherwise compensated. This data should be plotted for each radial, using log-log coordinate paper with distance as the abscissa and field intensity as the ordinate. A smooth curve should be drawn through these points (of median fields for all sectors) and this curve used to determine the distance of the desired contour. The distances obtained for each radial may then be plotted on the map of predicted coverage or on polar coordinate paper (excluding water areas, etc.) to determine the service and interference areas of a station.

(f) In certain cases the Commission may desire more information or recordings and in these instances special instructions will be issued.

(g) Data obtained in conjunction with field intensity measurements shall be submitted to the Commission in affidavit form in triplicate, including the following:

(1) Map or maps showing the roads or points where measurements were made, the service and/or interference areas determined by the prediction method and by the measurements, and any unusual terrain characteristics existing in these areas. The maps, preferably of a type showing topography in the area, should show the Grade A and Grade B field intensity contours.

(2) If a directional transmitting antenna is employed, a diagram on polar coordinate paper showing the predicted free space field intensity in millivolts per meter at one mile in all directions.

(3) A full description of the procedures and methods employed, including the type of equipment, the method of installation and operation, and calibration procedures.

(4) Complete data obtained during the survey, including calibration. (Only the original or one photostatic copy of the recording tapes, or representative samples, need be submitted.)

(5) Antenna system and power employed during the survey.

(6) Name, address, and qualifications of the engineer or engineers making the measurements.

3.687 Transmitters and associated equipment.

(a) **Visual transmitter.**

(1) The overall attenuation characteristics of the transmitter, measured in the antenna transmission line after the vestigial sideband filter (if used), shall not be greater than the following amounts below the ideal demodulated curve. (See Appendix C, Figure 7.)

2 db at 0.5 Mc
2 db at 1.25 Mc
3 db at 2.0 Mc
6 db at 3.0 Mc
12 db at 3.5 Mc

The curve shall be substantially smooth between these specified points, exclusive of the region from 0.75 Mc to 1.25 Mc.[27]

(2) The field strength or voltage of the lower sideband, as radiated or dissipated and measured as described in (3) below, shall not be greater than —20 db for a modulating frequency of 1.25 Mc or greater.[28]

(3) The attenuation characteristics of a visual transmitter shall be measured by application of a modulating signal to the transmitter input terminals in place of the normal composite television video signal. The signal applied shall be a composite signal composed of a synchronizing signal to establish peak output voltage plus a variable frequency sine wave voltage occupying the interval between synchronizing pulses. The axis of the sine wave in the composite signal observed in the output monitor shall be maintained at an amplitude 0.5 of the voltage at synchronizing peaks. The amplitude of the sine wave input shall be held at a constant value. This constant value should be such that at no modulating frequency does the maximum excursion of the sine wave, observed in the composite output signal monitor, exceed the value 0.75 of peak output voltage. The amplitude of the 100-kilocycle sideband shall be measured and designated zero db as a basis for comparison. The modulation signal frequency shall then be varied over the desired range and the field strength or signal voltage of the corresponding sidebands measured. As an alternate method of measuring, in those cases in which the automatic d-c insertion can be replaced by manual control, the above characteristic may be taken by the use of a video sweep generator and without the use of pedestal synchronizing pulses. The d-c level shall be set for midcharacteristic operation.[28]

(4) The radio frequency signal, as radiated, shall have an envelope as would be produced by a modulating signal in conformity with Appendix C, Figure 4, as modified by vestigial sideband operation specified by Appendix C, Figure 3.

(5) The time interval between the leading edges of successive horizontal pulses shall vary less than one half of one percent of the average interval.

(6) The rate of change of the frequency of recurrence of the leading edges of the horizontal synchronizing signals shall not be greater than 0.15 percent per second, the frequency to be determined by an averaging process carried out over a period of not less than 20, nor more than 100 lines, such lines not to include any portion of the vertical blanking signal.

(7) Sufficient monitoring equipment shall be employed to determine whether the visual signal complies with the requirements of this Subpart.

(b) **Aural transmitter.**

(1) The transmitter shall operate satisfactorily with a frequency swing of ±25 kilocycles, which is considered 100 percent modulation. It is recommended, however, that the transmitter be designed to operate satisfactorily with a frequency swing of at least ±40 kilocycles.

(2) The transmitting system (from input terminals of microphone pre-amplifier, through audio facilities at the studio, through telephone lines or other circuits between studio and transmitter, through audio facilities at the transmitter, and through the transmitter, but excluding equalizers for the the correction of deficiencies in microphone response) shall be capable of transmitting a band of frequencies from 50 to 15,000 cycles. Pre-emphasis shall be employed in accordance with the impedance-frequency characteristic of a series inductance-resistance network having a time constant of 75 microseconds. (See Appendix C, Figure 8.) The deviation of the system response from the standard pre-emphasis curve shall lie between two limits as shown by Appendix C, Figure 8. The upper of these limits shall be uniform (no deviation) from 50 to 15,000 cycles. The lower limit shall be uniform from 100 to 7,500 cycles, and three db below the upper limit; from 100 to 50 cycles the lower limit shall fall from three db limit at a uniform rate of one db per octave (4 db at 50 cycles); From 7,500 to 15,000 cycles the lower limit shall fall from 3 db limit at a uniform rate of two db per octave (5 db at 15,000 cycles).

(3) At any modulating frequency between 50 and 15,000 cycles and at modulation percentages of 25 percent, 50 percent, and 100 percent, the combined audio frequency harmonics measured in the output of the system shall not exceed the root-mean-square values given in the following table:

Modulation frequency	Distortion (Percent)
50 to 100 cycles	3.5
100 to 7,500 cycles	2.5
7,500 to 15,000 cycles	3.0

(i) Measurement shall be made employing 75 microsecond de-emphasis in the measuring equipment and 75 microsecond pre-emphasis in the transmitting equipment, and without compression if a compression amplifier is employed. Harmonics shall be included to 30 kc.[29]

(ii) It is recommended that none of the three main divisions of the system (transmitter, studio to transmitter circuit, and audio facilities) contribute over one-half of these percentages, since at some frequencies the total distortion may become the arithmetic sum of the distortions of the divisions.

(4) The transmitting system output noise level (frequency modulation) in the band of 50 to 15,000 cycles shall be at least 55 db below the audio frequency level representing a frequency swing of ±25 kc.[30]

(5) The transmitting system output noise level (amplitude modulation) in the band of 50 to 15,000 cycles shall be at least 50 db below the level representing 100 percent amplitude modulation.[30]

(6) If a limiting or compression amplifier is employed, pre-

[27] Output measurement shall be made with the transmitter operating into a dummy load of pure resistance and the demodulated voltage measured across this load. The ideal demodulated curve is that shown in Appendix C, Figure 7.

[28] Field strength measurements are desired. It is anticipated that these may not yield data which are consistent enough to prove compliance with the attenuation standards prescribed above. In that case, measurements with a dummy load of pure resistance, together with data on the antenna characteristics, shall be taken in place of overall field measurements. The "synchronizing signal" referred to in these paragraphs means either a standard synchronizing wave form or any pulse that will properly set the peak.

[29] Measurements of distortion using de-emphasis in the measuring equipment are not practical at the present time for the range 7,500 to 15,000 cycles for 25 and 50 percent modulation. Therefore, measurements should be made at 100 percent modulation and on at least the following modulating frequencies: 50, 100, 400, 1,000, 5,000, 10,000 and 15,000 cycles. At 25 and 50 percent modulation, measurements should be made on at least the following modulating frequencies: 50, 100, 400, 1,000 and 5,000 cycles.

[30] For the purpose of these measurements, the visual transmitter should be inoperative since the exact amount of noise permissible from that source is not known at this time.

caution should be maintained in its connection in the circuit due to the use of pre-emphasis in the transmitting system.

(7) A modulation monitor shall be in operation at the aural transmitter. The percentage of modulation of the aural transmissions shall be maintained as high as possible consisstent with good quality of transmission and good broadcast practice and in no case less than 85 percent nor more than 100 percent on peaks of frequent recurrence during any selection which normally is transmitted at the highest level of the program under consideration.

(c) **Requirements applicable to both visual and aural transmitters.**

(1) Automatic means shall be provided in the visual transmitter to maintain the carrier frequency within one kilocycle of the authorized frequency; automatic means shall be provided in the aural transmitter to maintain the carrier frequency within four kilocycles of the assigned aural carrier frequency or, alternatively, 4.5 megacycles above the actual visual carrier frequency within five kilocycles. When required by Section 3.606, the visual and aural carrier frequencies are to be offset in frequency by 10 kilocycles (plus or minus, as indicated) from the normal carrier frequencies.[31]

(2) The transmitters shall be equipped with suitable indicating instruments for the determination of operating power and with other instruments necessary for proper adjustment, operation, and maintenance of the equipment.

(3) Adequate provision shall be made for varying the output power of the transmitters to compensate for excessive variations in line voltage or for other factors affecting the output power.

(4) Adequate provisions shall be provided in all component parts to avoid overheating at the rated maximum output powers.

(5) Frequency monitors for the visual and aural transmitters, independent of the frequency control of the transmitters, shall be in operation at the transmitters.

(6) In the event the visual monitoring equipment, the aural modulation monitor, or the visual or aural frequency monitor becomes defective, the station may be operated without such equipment pending its repair or replacement for a period not in excess of 60 days without further authority of the Commission, Provided, That—

(i) Appropriate entries shall be made in the operating log of the station to show the date and time the equipment was removed from and restored to service.

(ii) The Engineer in Charge of the radio district in which the station is located shall be notified both immediately after the equipment is found to be defective and immediately after the repaired or replacement equipment has been installed and is functioning properly.

(iii) During the period when the station is operated without the aural modulation monitor or the visual monitoring equipment, the licensee shall provide other suitable means for insuring that the aural modulation is maintained within the tolerance prescribed in subparagraph b(7) above and that the visual signal is maintained in accordance with the requirements of this Subpart.

(iv) During the period when the station is operated without the visual or aural frequency monitor, the respective carrier frequency shall be compared with an external frequency source of known accuracy at sufficiently frequent intervals to insure that the frequency is maintained within the tolerance prescribed in (1) above. An entry shall be made in the station log as to the method used and the results thereof.

(v) If the conditions beyond the control of the licensee or permittee prevent the restoration of the monitor or monitoring equipment to service within the above allowed period, an informal request in accordance with Section 1.332(d) may be filed with the Engineer in Charge of the radio district in which the station is located for such additional time as may be required to complete repairs of the defective instrument or equipment.

(d) **Construction.** In general, the transmitters shall be mounted either on racks and panels or in totally enclosed frames protected as required by article 810 of the National Electrical Code,[32] and as set forth below:

(1) Means shall be provided for making all tuning adjustments, requiring voltages in excess of 350 volts to be applied to the circuit, from the front of the panels with all access doors closed.

(2) Proper bleeder resistors or other automatic means shall be installed across all the capacitor banks to lower any voltage which may remain accessible with access door open to less than 350 volts within two seconds after the access door is opened.

(3) All plate supply and other high voltage equipment, including transformers, filters, rectifiers and motor generators, shall be protected so as to prevent injury to operating personnel.

(i) Commutator guards shall be provided on all high voltage rotating machinery. Coupling guards should be provided on motor generators.

(ii) Power equipment and control panels of the transmitters shall meet the above requirements (exposed 220-volt A. C. switching equipment on the front of the power control panels is not recommended but is not prohibited).

(iii) Power equipment located at a television broadcast station not directly associated with the transmitters (not purchased as part of same), such as power distribution panels, are not subject to the provisions of this Subpart.

(4) The following provisions shall be applicable to metering equipment:

(i) All instruments having more than 1,000 volts potential to ground on the movement shall be protected by a cage or cover in addition to the regular case. (Some instruments are designed by the manufacturers to operate safely with voltages in excess of 1,000 volts on the movement. If it can be shown by the manufacturer's rating that the instrument will operate safely at the applied potential, additional protection is not necessary.)

(ii) In case the plate voltmeters are located on the low potential side of the multiplier resistors with the high potential terminal of the instruments at or less than 1,000 volts above ground, no protective case is required. However, it is good practice to protect voltmeters subject to more than 5,000 volts with suitable over-voltage protective devices across the instrument terminals in case the winding opens.

(iii) Transmission line meters and any other radio frequency instrument which may be necessary for the operator to read shall be so installed as to be read easily and accurately without the operator having to risk contact with circuits carrying high potential radio frequency energy.

(e) **Wiring and Shielding.**

(1) The transmitter panels or units shall be wired in accordance with standard practice, such as insulated leads properly cabled and supported, coaxial cables, or rigid bus bar properly insulated and protected.

(2) Wiring between units of the transmitters, with the exception of circuits carrying radio frequency energy or video energy, shall be installed in conduits or approved fiber or metal raceways to protect it from mechanical injury.

(3) Circuits carrying radio frequency or video energy between units shall be coaxial cables, two wire balanced lines, or properly shielded lines.

(4) All stages or units shall be adequately shielded and filtered to prevent interaction and radiation.

(5) The frequency and modulation monitors and associated radio frequency lines to the transmitter shall be thoroughly shielded.

(f) **Auxiliary transmitters.** Auxiliary transmitters may not exceed the power rating of the main transmitters. As a general guide, specifications for auxiliary transmitters should conform as much as possible to those of the main transmitters. No requirements are set forth at this time.

(g) **Installation.**

(1) The installation of transmitting equipment shall be made in suitable quarters.

(2) Suitable facilities shall be provided for the welfare and comfort of the operator.

[31] Television broadcast stations authorized as of April 1, 1952, are permitted a frequency tolerance of 0.002% from the assigned visual and aural carrier frequencies until April 1, 1953.

[32] The pertinent sections of article 810 of the National Electrical Code read as follows: "8191. General—Transmitters shall comply with the following:

"a. Enclosing. — The transmitter shall be enclosed in a metal frame or grille, or separated from the operating space by a barrier or other equivalent means, all metallic parts of which are effectually connected to ground.

"b. Grounding of controls.—All external metallic handles and controls accessible to the operating personnel shall be effectually grounded. No circuit in excess of 150 volts shall have any parts exposed to direct contact. A complete dead-front type of switchboard is preferred.

"c. Interlocks on doors.—All access doors shall be provided with interlocks which will disconnect all voltages in excess of 350 volts when any access door is opened."

(h) **Spare tubes.**

(1) A spare tube of every type employed in the transmitters and the frequency and modulation monitors shall be kept on hand at the equipment location. When more than one tube of any type is employed, the following table determines the number of spares of that type required:

Number of each type employed:	Spares required
1 or 2	1
3 to 5	2
6 to 8	3
9 or more	4

(2) An accurate circuit diagram and list of required spare tubes, as furnished by the manufacturer of the equipment, shall be supplied and retained at the transmitter location.

(i) **Operation.**

(1) Spurious emissions, including radio frequency harmonics, shall be maintained at as low a level as the state of the art permits.

(2) If a limiting or compression amplifier is used in conjunction with the aural transmitter, due operating precautions should be maintained because of pre-emphasis in the transmitting system.

(j) **Studio equipment.** Studio equipment shall be subject to all the above requirements where applicable, except as follows:

(1) If properly covered by an underwriters' certificate, it will be considered as satisfying safety requirements.

(2) Section 8191 of article 810 of the National Electrical Code shall apply for voltages only in excess of 500 volts.

(3) No specific requirements are made relative to the design and acoustical treatment of studios. However, the design of studios, particularly the main studio, shall be compatible with the required performance characteristics of television broadcast stations.

3.688. **Indicating instruments.** (a) Each television broadcast station shall be equipped with indicating instruments for measuring the direct plate voltage and current of the last radio stage of the visual and aural transmitters and the transmission line radio frequency current, voltage, or power of both transmitters; such instruments shall conform to the specifications therefor set forth in this Subpart.

(b) The following requirements and specifications shall apply to indicating instruments used by television broadcast stations in compliance with (a) above:

(1) Length of scale shall be not less than 2 3/10 inches.

(2) Accuracy shall be at least 2 percent of the full scale reading.

(3) Scale shall have at least 40 divisions.

(4) Full scale reading shall be not greater than five times the minimum normal indication.

(5) No specifications are prescribed at this time regarding the peak indicating device required by Section 3.689(b).

(c) Any required instrument, the accuracy of which is questionable, shall not be employed. Repairs and calibration of instruments shall be made by the manufacturer, or by an authorized instrument repair service of the manufacturer, or by some other properly qualified or equipped instrument repair service. In any case, the repaired instrument must be supplied with a certificate of calibration.

(d) Recording instruments may be employed in addition to the indicating instruments to record the direct plate current and/or voltage to the last radio stage provided that they do not affect the operation of the circuits or accuracy of the indicating instruments. If the records are to be used in any proceeding before the Commission, as representative of operation, the accuracy must be the equivalent of the indicating instruments and the calibration shall be checked at such intervals as to insure the retention of such accuracy.

(e) The function of each instrument used in the equipment shall be clearly and permanently shown on the instrument itself or on the panel immediately adjacent thereto.

(f) In the event that any one of the indicating instruments required by subparagraph (a) of this Section becomes defective when no substitute which conforms with the required specifications is available, the station may be operated without the defective instrument pending its repair or replacement for a period not in excess of 60 days; Provided, That—

(1) Appropriate entries shall be made in the operating log of the station, showing the date and time the meter was removed from and restored to service.

(2) The Engineer in Charge of the radio district in which the station is located shall be notified both immediately after the instrument is found to be defective and immediately after the repaired or replacement instrument has been installed and is functioning properly.

(3) If the defective instrument is a plate voltmeter or plate ammeter in the last radio stage, the operating power shall be maintained by means of the radio frequency transmission line meter.

(4) If conditions beyond the control of the licenses prevent the restoration of the meter to service within the above allowed period, informal request may be filed in accordance with Section 1.332(d) with the Engineer in charge of the radio district in which the station is located for such additional time as may be required to complete repairs of the defective instrument.

3.689 **Operating power.**

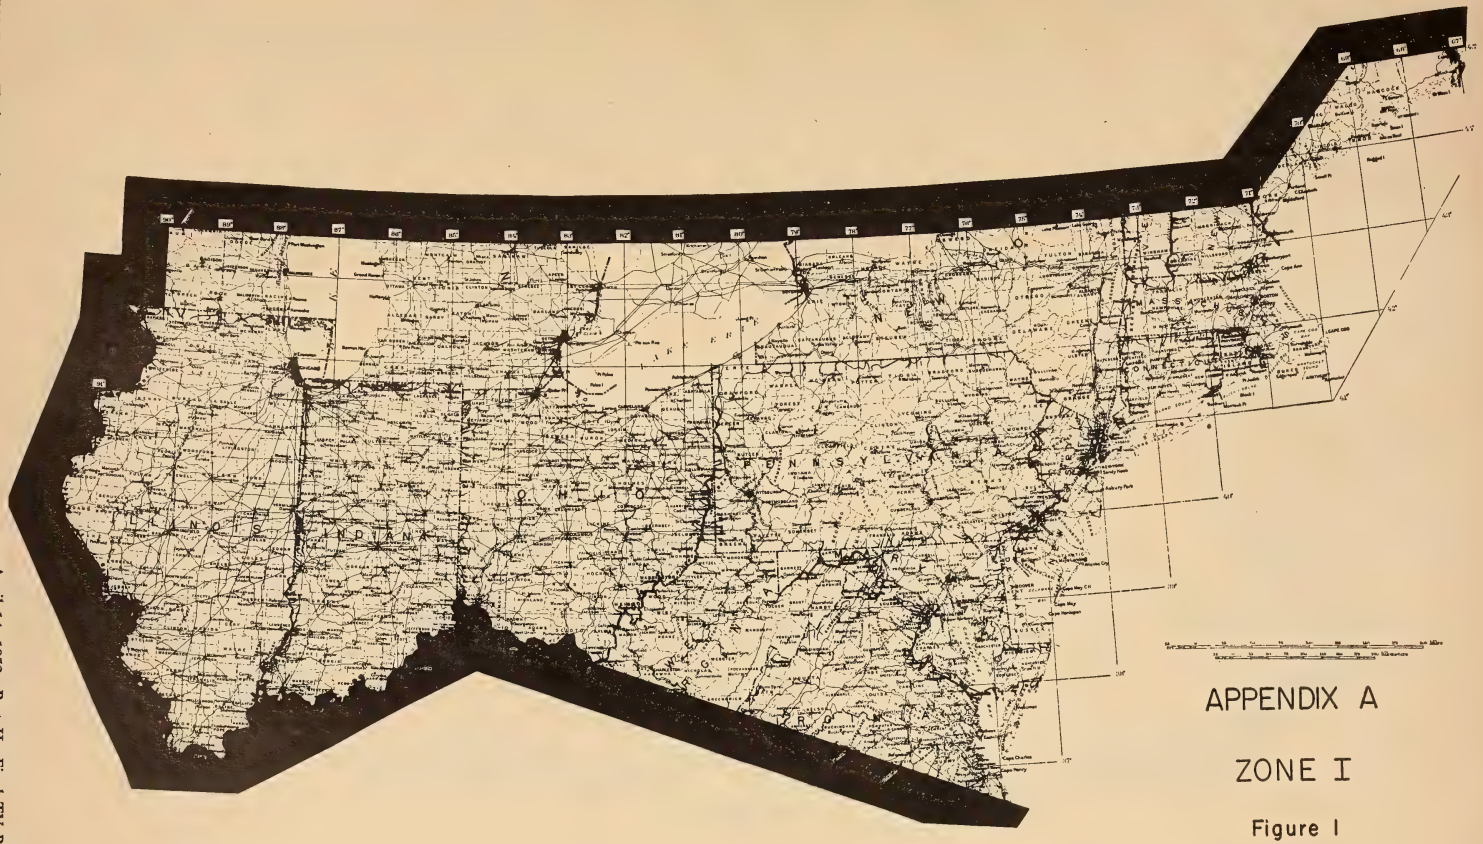
(a) Determination:

(1) Visual transmitter.—The operating power of the visual transmitter shall be determined at the output terminal of the vestigial sideband filter, if such filter is used; otherwise, at the transmitter output terminal. The average power shall be measured while operating into a dummy load of substantially zero reactance and a resistance equal to the transmission line surge impedance, while transmitting a standard black television picture. The peak power shall be the power obtained by this method, multiplified by the factor 1.68. During this measurement the direct plate voltage and current of the last radio stage and the peak output voltage or current shall be read for use below.

(2) Aural transmitter.—The operating power of the aural transmitter shall be determined by the indirect method. This is the product of the plate voltage (Ep) and the plate current (Ip) of the last radio stage, and an efficiency factor, F; that is:

Operating power = EpxIpxF

(i) The efficiency factor, F, shall be established by the transmitter manufacturer for each type transmitter for which he submits data to the Commission, and shall be shown in the instruction books supplied to the customer with each transmitter. In the case of composite equipment the factor F shall be furnished to the Commission by the applicant along with a statement of the basis used in determining such factor.

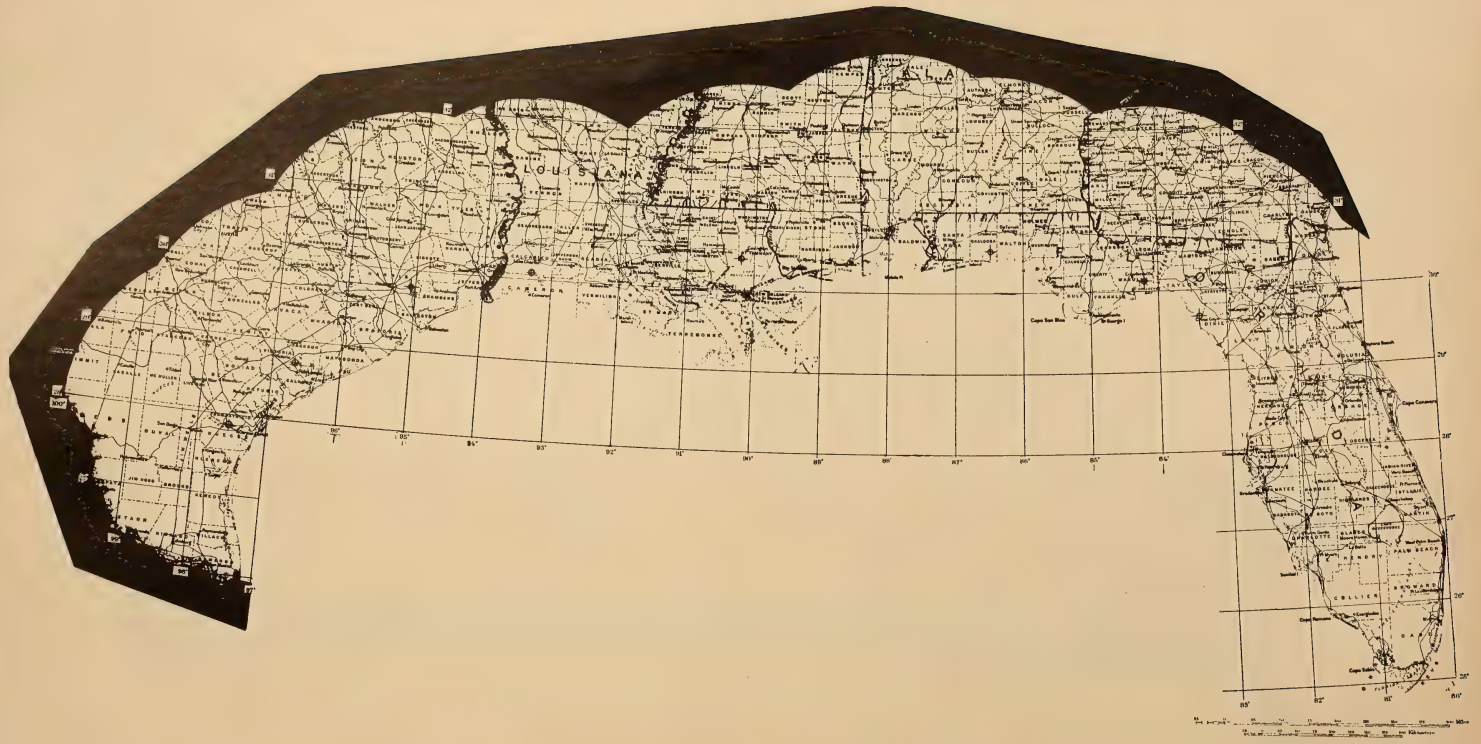


(b) Maintenance:

(1) Visual transmitter. — The peak power shall be monitored by a peak reading device which reads proportionally to voltage, current, or power in the radio frequency line, the meter to be calibrated during the measurement described in subparagraph (a)(1) of this Section. The operating power as so monitored shall be maintained as near as practicable to the authorized operating power and shall not exceed the limits of 10 percent above and 20 percent below the authorized power except in emergencies. As a further check, both the plate voltage and plate current of the output stage shall be measured with a standard black television picture with the transmitter operating into the antenna. These values must agree substantially with corresponding readings taken under paragraph (a)(1) of this Section.

(2) Aural transmitter.—The operating power of the aural transmitter shall be maintained as near as practicable to the authorized operating power, and shall not exceed the limits of 10 percent above and 20 percent below the authorized power except in emergencies.

(3) Reduced power. — In the event it becomes impossible to operate with the authorized power, the station may be operated with reduced power for a period of 10 days or less provided the Commission and the Engineer in Charge of the radio district in which the station is located shall be notified in writing immediately thereafter and also upon the resumption of the normal operating power.[33]



[33] See Part 0 of the Commission's Rules for addresses of the Commission's Engineering Field Offices.

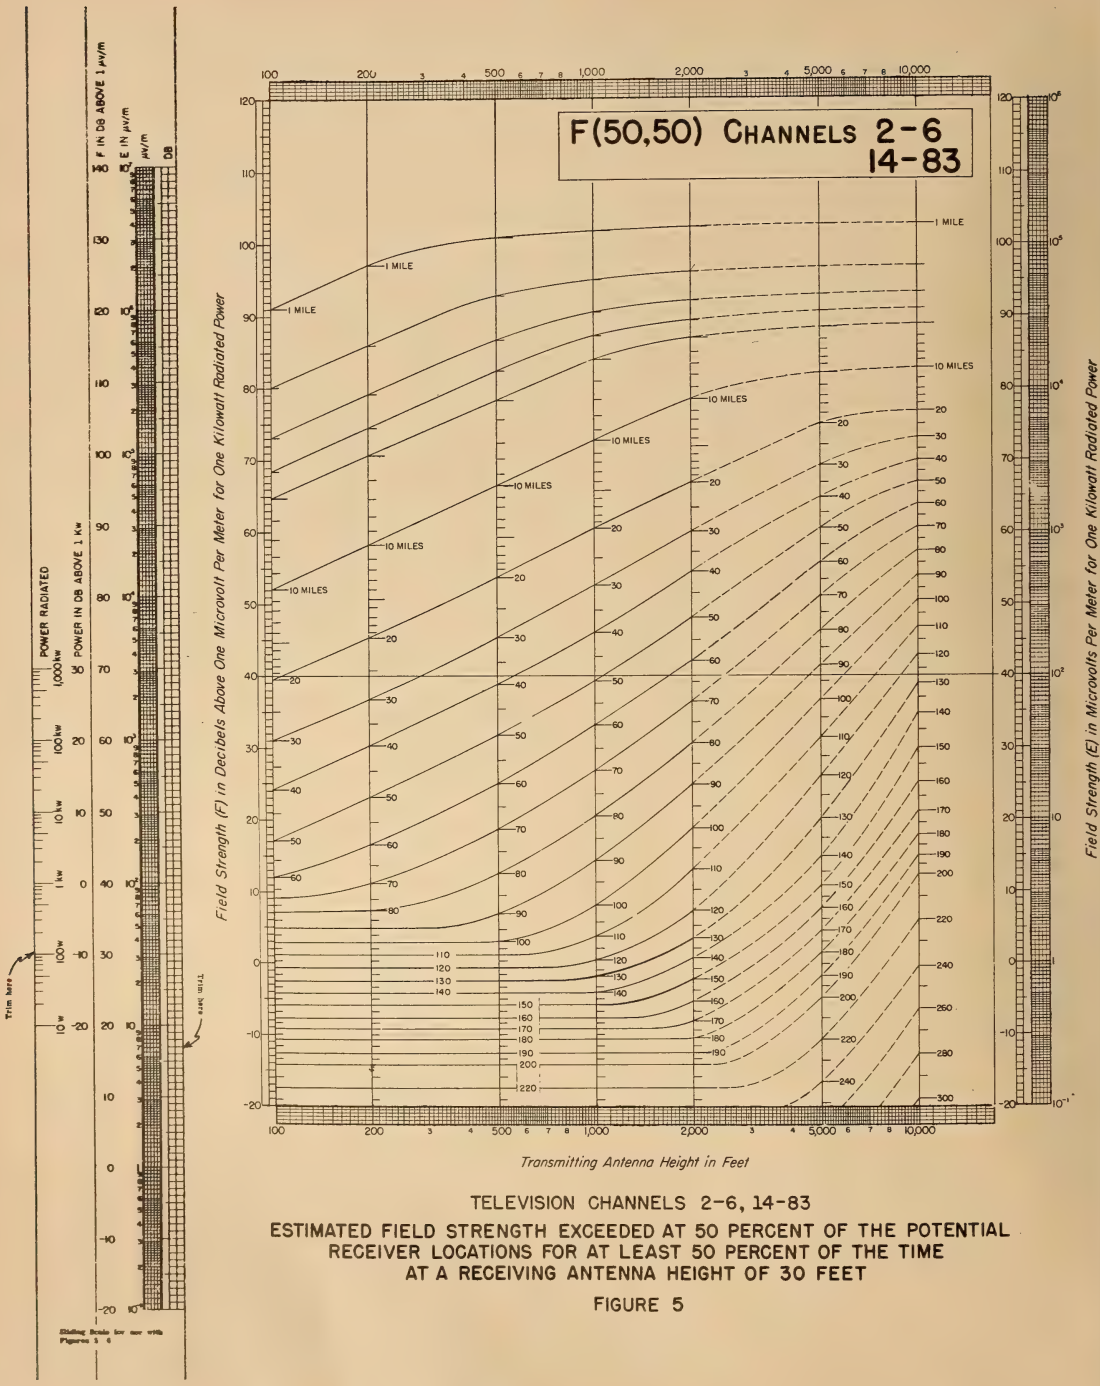
IDEALIZED PICTURE TRANSMISSION AMPLITUDE CHARACTERISTIC

Note: Not drawn to scale

Figure 3

TELEVISION SYNCHRONIZING WAVEFORM



NOTE

1 H = Time from start of one line to start of next line
2 V = Time from start of one field to start of next field
3 Leading and trailing edges of vertical blanking should be complete in less than 0.1H
4 Leading and trailing slopes of horizontal blanking must be steep enough to preserve minimum and maximum values of (x+y) and (i) under all conditions of picture content
* 5 Dimensions marked with asterisk indicate that tolerances given are permitted only for long time variations and not for successive cycles
6 Equalizing pulse area shall b between 0.45 and 0.5 of area of a horizontal sync pulse
7 Color pulse area shall be between 0.45 and 0.5 of the area of a horizontal sync pulse
8 Refer to text for further explanations and tolerances

CONCURRING OPINION OF COMMISSIONER E. M. WEBSTER

The importance of television in the field of education has already been firmly established in the minds of all thinking people. Accordingly, it is not a question as to whether programs of this nature should be televised, but, rather, whether the Commission should reserve, for future use by educational groups, certain television channels for non-commercial educational purposes only, or leave the production of such programs to the discretion of the commercial interests, including those educational groups desiring to operate commercially.

When the Third Notice of Further Proposed Rule Making was issued March 22, 1951, I stated in a separate opinion that I believed the reservation of channels for non-commercial educational television stations was warranted only upon a showing that there is a reasonable probability that, if such reservation were made, the channels would be utilized in the reasonably near future. It was my opinion that a vast majority of the representatives of educational institutions had little concept of the costs and practical problems involved in the construction and operation of a television station, and that when brought face to face with practicalities they might find the economic hurdle difficult if not impossible to surmount. I was unable to overcome the feeling that the proponents of non-commercial educational channel reservations, knowing the importance of education to the well-being of our nation, and having been alerted to the mass appeal of television, were carried away by the glowing potentialities thereof in the field of education and failed to approach this new venture from a practical point of view. It appears that, of those educational organizations not privately endowed, few, if any, have the active backing and cooperation of their state or local governments which will be called upon to appropriate the funds for such non-profit operations. Nevertheless, with virtually no reasonable assurance that funds would be available for the construction and continued operation of non-commercial educational television stations, the Commission was requested to indefinitely reserve channels therefor. In other words, in the face of claims by commercial interests that, with the cooperation of educators, they could produce educational television programs in a manner which would be in the best interest of the public, we were asked to permit a scarce and valuable part of the public domain to lie fallow, possibly for a period of years, if the educational groups found it infeasible to put these channels to reasonably prompt use.

I felt, as I am sure all of the Commissioners did, that I could not permit the understandable burst of enthusiasm displayed by the educational group to sway my thinking as to whether the public interest would best be served by indefinitely reserving a certain number of channels for future use by the non-commercial groups, or by making all television channels immediately available for use by commercial stations and looking to this group to furnish the public with educational programs. In my opinion neither interest presented a strong case up to the time the Third Notice of Further Proposed Rule Making was issued, and, on the basis of the record then made, I was not satisfied that we would be justified in making the requested reservations.

Neither the Commission's notice nor my separate opinion directed either group to show, in the proceedings scheduled to follow the Third Notice, what it contemplated doing by way of televising educational programs. However, it appears to me that the logical course for the commercial group to have taken, if it was serious in its contention that reservations of television channels should not be made for non-commercial educational stations, would have been to show what commercial stations are capable of doing in this connection both as to quality and quantity. By the same token, I expected the educational group to take steps to support the proposed reservations on a city-by-city basis. It cannot be said that the opportunity to make such a showing was not given, since comments with respect to the table of assignments in the city-by-city portion of the proceedings were specifically provided for in footnote 12 of the Third Notice.

It was my hope that by buttressing their respective positions the conflicting interests would give the Commission more affirmative data on which to base a decision, and I so indicated in my separate opinion. It does not appear to me that this was effectively done by either group. The failure of the commercial interest to make a strong, positive showing with respect to educational productions leaves me with the impression that that group is not as prepared to voluntarily go forward with this type of television programming as originally indicated. As for the educational group, in a relatively few instances a showing was made that there were definite plans for constructing and operating non-commercial educational television stations in the near future. But with respect to an overwhelming majority of the 209 communities tentatively assigned educational channels by the Third Notice, support therefor by local educational organizations took, for the most part, the form of affidavits stating that reservations of such channels were desired. In the case of 18[1] communities receiving tentative assignments of educational channels, no testimony at all was given by local institutions that the use of such channels is contemplated even in the distant future. While the Joint Committee on Educational Television did file a sworn statement which endorsed the Commission's proposal to reserve channels in these 18 communities and requested that the assignments be made final, its affidavit made no effort to justify these specific reservations.

In my opinion the proposals of both groups, having been weighed in the balance, leave much to be desired. On the one hand we have the non-commercial educational group, imbued with lofty motives and high hopes, but, generally speaking, without funds or reasonably firm plans for televising educational programs in the near future. On the other hand we have the commercial interest, apparently possessed of means for televising educational programs in the reasonably near future, but likewise without plans as to what, if anything, would be done in this connection. However, since the future, if not the present, status of educational programming in the field of television depends on the provision made therefor at this time, the Commission, as I see it, finds itself in the unenviable position of having to make a choice between the inadequate proposals of these interests, or promulgate rules requiring commercial stations to provide adequate educational programs. I am not ready at this point to recommend that this latter step be taken.

Having made little or no showing as to what it is willing to do in this connection, obviously, we cannot depend on the commercial interest to give this vitally important type of programming the attention it merits. Therefore, we are left with no alternative. Despite the inadequate showing made by the non-commercial educational group, circumstances dictate that the requested reservations be made. There is this much to be said in favor of such assignments. Regardless of the obstacles which must be overcome, in general, educational institutions, in order to further the purpose for which they exist, undoubtedly will be conscientiously concerned with the construction and operation of non-commercial educational stations at the earliest possible date. We can only hope that their state and local governments share their interest and foresight.

One of the considerations which enables me to accept the reservation of channels is the fact that, in the event the educators fail in their efforts, the Commission, at any time it considers it in the public interest to do so, can reconsider its decision in this connection and, through rule making proceedings, assign idle educational channels for commercial purposes, and possibly promulgate rules requiring other than non-commercial educational stations to provide adequate educational programs. Moreover, after a period of one year from the date on which this table of assignments is made final, any interested party is at liberty to petition the Commission for rule making proceedings looking toward the commercialization of any or all educational channels lying fallow at that time. Accordingly, in view of the observations set out above, and on the basis of the entire record, I believe it is in the public interest to reserve the channels for non-commercial educational television stations specified in this Report and Order.

SEPARATE VIEWS OF COMMISSIONER HENNOCK CONCURRING IN PART AND DISSENTING IN PART

1. For the reasons set forth hereinafter, I find it necessary to dissent from the Commission's decision in its Sixth Report and Order concerning:

A. *The Increases in Station Power and Antenna Height;*

B. *The Use of Channels #66-83;*

C. *The Procedure for Processing and Hearing Applications;*

2. With reference to the *Educational Reservations,* and the *Table of Assignments,* I am Concurring in the decision insofar as it adopts the principle of reserving channels for educational purposes and insofar as it assigns specific channels for such purposes, and Dissenting from the decision insofar as it fails to make a more adequate and proper provision for education herein.

* * *

A. THE INCREASES IN STATION POWER AND ANTENNA HEIGHT—(Pars. 143-165 of the Sixth Report)

The question of power and antenna height concerns in essence the relationship between the VHF and the UHF portions of the spectrum, as well as the development of television in the smaller communities of the country. By granting increases in power and antenna height the Commission, in my opinion, has unduly and unnecessarily enhanced the VHF at the expense of the UHF. As the UHF is the new and heretofore experimental portion of the spectrum containing 85% of all TV channels, and its use is so clearly necessary to a national system, the Commission should not

hinder its development by adding to the advantage held by the already highly developed VHF. Rather, the UHF should now be encouraged in every way possible so as to aid its development, establishment and eventual growth into an integral part of a truly nation-wide television system.

I believe therefore that the Commission in general should retain the provisions now in its Rules regarding power and antenna height for the lower VHF and finalize a maximum power of 50 kw for these channels (2-6) at a maximum antenna height of 500 feet, or their equivalent.[1] Retaining the maximum height of 500 feet, maximum power for the upper VHF (channels 7-13) should be raised to 150 kw to keep the 3 to 1 ratio adopted by the Commission tending to equalize potential coverage, and a maximum power of 1000 kw authorized for the UHF, to assist the early development of its high power operations. Even 50 kw (or 150 kw) at 500 feet, it should be noted, would permit increases in power and height for nearly all stations now operating which, despite already extensive coverage, are presently below these maxima.

The primary aim of this allocations proceeding must be the *maximum utilization of all television channels.* Certainly a system comprising only a few hundred VHF stations, each with the greatest possible coverage, would be most efficient from the point of view of these individual stations. This would not, however, even approximate a nation-wide system and it would be most unfortunate if the medium were to develop in such a manner, depriving scores of cities of their sole opportunity for local self-expression in television.

There are serious economic problems facing the development of the UHF against presently existing or future VHF service, basic to a determination of this question of powers and heights, which the Commission apparently has minimized or disregarded. Even the briefest consideration makes clear the difficulties confronting a potential UHF operator in a community now receiving no VHF service or only marginal VHF service, which community is subsequently flooded by reliable, multiple VHF signals from far-off, larger cities. First, the VHF sets purchased in the area, which may number in the tens of thousands and even approach "saturation," will not be able to receive local telecasts over UHF, without being converted.[1a] Furthermore, the VHF operations in the larger cities in all likelihood will, if established practices are continued, obtain exclusive rights to network affiliations and operations in the area, thus securing for themselves a large body of highly popular TV programming. In addition, the major national and regional advertisers who provide much of the necessary economic base for television operations will tend, for practical business reasons, to gravitate toward those existing VHF stations with extensive coverage. Thus, the potential UHF operation will predominantly be forced back upon new UHF and converted sets and upon local programming resources and local advertisers, which alone may not provide sufficient support for a television station.

Similar economic difficulties, with the exception of the set conversion problem, will also confront the establishment of a local, small city VHF station. Thus, provisions for height and power intimately affect assignments to smaller cities. The Commission has recognized that some delay is certain before television, more costly and complicated than radio, develops in these smaller cities. This very allocations plan has been expressly formulated to give these cities additional time to take advantage of their assignments, thus preserving their future opportunity for local television outlets. Mere assignments, however, are not enough; the Commission must also establish rules and conditions which make these assignments reasonably capable of being translated into actual operations.

There will be, irrespective of the power and height authorized, some degree of VHF overlap. This decision, however, substantially aggravates the amount of this overlap and to that extent may deter full development of the whole TV spectrum. To illustrate: Commission propagation data shows that operations at maxima of 50 kw and 500 feet in the lower VHF will, when limited by noise only, have a Grade B service radius of 52 miles. Operations at 100 kw and 2000 feet on these channels limited by noise only will, however, result in a Grade B service radius of 86 miles, an increase of 34 miles.[2] Expressed in terms of land coverage, this results in an increase of the station's Grade B service area from 8,500 square miles to 23,300 square miles.

While co-channel interference lessens the extension of coverage brought about by increased power and height, such extension will in all events be considerable. Thus at a separation of 220 miles, with both co-channel stations going to the maximum of 100 kw at 2000 feet, each station's Grade B service radius in the other's direction will increase from 50 miles to 67 miles. If only one station goes to the new maxima, its radius will increase from 50 miles to 76 miles in the direction of its co-channel station; although the latter, remaining at 50 kw and 500 feet, will suffer a 5 mile decrease in its service radius in the former's direction, the higher maxima will still effect a *substantial net increase* in overall coverage.[3] These increases, in my opinion, should not be permitted, particularly in view of the fact that the wider mileage separations and the use of offset carrier established in this Report have, by diminishing co-channel interference, already resulted in service areas greater than those provided prior to the "freeze."

The Commission's experience with FM, where the set problem was so crucial, should make it clear beyond question that practical economic considerations cannot be left largely to chance in the establishment of a new service. Moreover, the "safety factor," often referred to in this Report, would seem to require that there be no further major extension of the coverage of individual VHF stations throughout the country, at least until UHF clears its initial hurdles in getting started and more definite knowledge is gained concerning UHF and its interrelationships with the VHF. Nor should the application of this "safety factor" be limited to Zone 1, for the ultimate health of the UHF will have a vital bearing upon television development in all zones.[4]

To increase power and height now is irrevocably to cast the die in favor of the VHF and to take an unnecessary gamble with the future of our entire television system. Particularly in view of the Commission's statutory duty to "generally encourage the larger and more effective use of radio in the public interest," I believe that no further increases in power and antenna heights, beyond those minor ones hereinbefore indicated, should be permitted.

B. THE USE OF CHANNELS #66-83—(Pars. 26-32 of the Sixth Report)

The Commission, in my opinion, should have adopted and finalized the proposal in its Third Notice to give a substantial preference in these unassigned "flexibility" channels to cities without television assignments.[5] Under this proposal, a party in a city without television assignments (and not within 15 miles of an assignment) could have applied in a licensing proceeding for a "flexibility" channel. In contrast, a party in a city to which one or more assignments had been provided would have been ineligible to make such an application and would have been required to institute rule making proceedings to secure a "flexibility" assignment. Such a rule of "limited eligibility" protected the future interest of smaller cities without assignments in these "flexibility" channels, and thereby preserved what generally will be their sole opportunity to obtain local television outlets.

I believe that the Commission has erred in deleting this Third Notice proposal and in making unassigned channels available to all on practically an equal basis. The Commission's statements in this Report to the effect that these channels will "primarily" be used for communities w i t h o u t assignments (commercial and educational) are insufficient in the absence of specific safeguards and standards to accomplish such a needed result. The privilege given cities without assignments to petition for "flexibility" channels *even during* the general one-year ban on amendments to the Table does not offer anything near the substantial protection required. In view of the anticipated heavy demand for frequencies, the equal right of all parties (after one year) to petition by rule making for these channels and particularly the lack of any definitive criteria under which the Commission could withhold them against such demand, it is likely that most unassigned channels will be preempted by larger cities which already have multiple television assignments. I do not believe that we should so encourage the early appropriation of these channels at the expense of smaller communities which may, in time, be able and eager to support a local television station.

C. THE PROCEDURE FOR PROCESSING AND HEARING APPLICATIONS

By far the best system for processing television applications would be the so-called "two-lump" procedure; using it the Commission would separately process all VHF applications and all UHF applications for a given community and would order consolidated hearings when either the total number of VHF or UHF applications exceeded the number of available VHF or UHF channels. The "channel by channel" procedure and the requirement that applications specify transmitter sites will, in my opinion, cause unnecessary legal and administrative difficulties without obtaining any substantial gain in the number of grants without hearing issued by the Commission, and thus should not have been adopted.

Strong reasons exist for preferring the "two-lump" procedure even if it may be assumed (to my mind, incorrectly) that the other would be more expeditious. The "two-lump" method would enable the Commission more closely to meet its primary duty in licensing proceedings to choose the best qualified applicants in a community. For example, its use would obtain the three most worthy applicants (perhaps out of seven or eight) for three VHF channels that may be available in a given city.[6] "Channel by channel," however, will at best obtain the most highly qualified applicant for *each* of the three channels; in so doing it may bypass one or two more worthy applicants who have been lost in the contest over a particular channel.

---

[1] Thus, antenna heights of over 500 feet would be permitted for all channels when proportionate decreases in power were utilized to provide an equivalent ratio which would keep a station's particular contour constant. Such a practice has heretofore been followed and will be in the future with respect to heights over 1000 feet in Zone 1. (See Sec. 3.614 (b) (1) of the TV Rules).

[1a] It should be noted that the efficiency and convenience of UHF converters has not yet been proved. In view of the difficulties previously had with other converters, in FM and television, this remains a serious problem for existing TV sets.

[2] Statistics for the upper VHF show a comparable extension of Grade B service radius limited by noise only of from 44 to 80 miles as the result of equivalent increases but, for purposes of simplicity, only lower VHF figures have been used.

[3] In other directions, it should be noted, both operations would tend to approach the noise limitation figure of 86 miles referred to above, for the stations will not necessarily be limited in every direction by co-channel separations of this order.

[4] The temporary loss of some service to outlying areas if power and height are not increased is more than compensated for by the substantial enlargement of the opportunity for development of local TV outlets. Subsequently, if it should appear that some local outlets will not be forthcoming, the increases in power and height could then (in accordance with the "safety factor") be granted to extend coverage to these outlying areas.

[5] See Part II, Assignment Principles, of the Third Notice. These unassigned channels, known in the Third Notice as "flexibility" channels, in addition to channels 66 to 83 include those additional assignments which could, consistent with the standards established herein, be made on channels 2 through 65.

[6] This applies with equal force to UHF channels and applications, although for purposes of simplicity only the VHF is referred to. It should be noted that were it not for the desirability of getting UHF started against the advantage already held by the highly developed VHF, a "one-lump" procedure, including all the multiple applicants for available channels, would for the reasons stated herein be best and should have been adopted.

That all VHF channels are identical has been a basic principle of the allocations plan and the Commission has denied several counter-proposals in these proceedings which sought to distinguish between VHF frequencies as such. By permitting applicants to pick and seek particular VHF frequencies, the "channel by channel" procedure is inconsistent with this basic allocations principle.[7] Unfortunately, it also offers greater opportunity for and thus encourages maneuvering, pressuring and trading among applicants within available VHF channels. No one can believe that these competitive practices will be intended to or will produce applicants best qualified to serve the public interest and most dedicated to it. Clearly, the Commission should not abdicate to individual applicants its critical role in licensing proceedings; it should not select a procedure that puts a premium on their wiles and stratagems.

The contention that "channel by channel" offers greater speed is without substantial foundation in my opinion. Most likely, the number of early grants will be very much the same no matter which procedure is adopted. At best there will be a limited number of instances in which "channel by channel" will free for grant an application otherwise caught in hearing. It is unreasonable to anticipate many islands in the rough seas of VHF competition, instances where there will not be multiple applications requiring hearings for every choice VHF channel. In the case of UHF, the lesser competition will probably bring, in general, fewer immediate applications and should permit a quantity of uncontested grants, regardless of the method adopted.

In view of the anticipated heavy contest for VHF frequencies, it is probable that "channel by channel" will in many instances require multiple VHF hearings in the same community. This increase in the total number of hearings will, in view of the limited hearing staff, cause a serious delay in overall processing. It also raises the possibility of inconsistent results in these several VHF hearings in a city, due in part to the use of different Examiners and also to the varied and inconsistent decisional factors controlling licensing that may be present in each hearing.[8] Although a single Examiner for all of these VHF hearings reduces the dangers of inconsistent results, there remains the probability of varied and inconsistent decisional factors in them. Such an arrangement, in any event, would waste whatever time advantage "channel by channel" might otherwise have held, for the Examiner, in order to avoid giving an unfair "head start" to any applicant, would undoubtedly have to hold up his earlier decisions until all VHF decisions in that city were ready for simultaneous issuance.

The requirement for applicants' specification of transmitter sites, apparently one of the prime reasons for Commission adoption of the "channel by channel" procedure, is actually a cardinal weakness of it. Not only will it make more difficult and seriously slow up routine processing but it will require a heavy, and in most cases an unnecessary, expense for all applicants. It opens, moreover, an unfortunately wide avenue for those "backstage" competitive manipulations already referred to.

Since transmitter sites will be specified in more than 1000 applications, it is not unlikely that a good number of them will not meet the established mileage separations to other specified sites. Not only will co-channel separations have to be taken into account here, and adjacent channel separations as well, but, insofar as the UHF applications are concerned, also those many other separations established by the so-called "Taboo Table."[9] Particularly accentuating this difficulty will be the fact that in preparing an application for filing, there is no way for an applicant to know of the specified sites in other applications to be filed which will cause him to violate the minimum separations.

Every time specified sites violate the separations, a conflict requiring a hearing will be created involving applicants from different cities (as well as between other competing applicants in their respective cities).[10] These conflicts, closely resembling those arising in standard broadcasting, *are precisely those which the television allocations plan and Table of Assignments were designed to resolve and avoid.*

Only a relatively few such conflicts would be able to begin a chain reaction which would tie up extensive regions of the country and large numbers of channels in extremely complicated hearings. Even should the conflict and hearing be limited to applicants in two cities, it is indeed difficult to see what criteria the Commission would use to prefer an applicant from one city over his competitor in another (not to mention the other competitors in each city), for the Table of Assignments has already established that the operations of the several channels which may be involved are, in their respective cities, technically feasible and proper in every respect.

The transmitter problem could best be handled on a "site-to-be-determined" basis under the "two-lump" procedure. The transmitter site and its related issues would then play no part in a comparative hearing. Only the successful applicant (or applicants) holding a construction permit would be required to secure a site meeting minimum mileage separations. Any difficulties in so doing could more easily be ironed out within the greater flexibility of informal, administrative processes. Given the result in either case of sites within the minimum separations, the procedure which reduces difficulties to a minimum should be preferred.

In view of the foregoing contrast of its assured benefits against the probable minimal gains and the serious difficulties entailed in the other procedure, there is every reason to adopt the "two-lump" method for the processing and the hearing of applications.

D. **THE EDUCATIONAL RESERVATIONS, AND THE TABLE OF ASSIGNMENTS,** to which I Concur insofar as the decision adopts the principle of reserving channels for educational purposes and assigns specific channels for such purposes, and to which I Dissent insofar as the decision fails to make a more adequate and proper provision for education herein.

I

I am in complete agreement with the Commission's action in finally adopting the principle of indefinitely reserving television channels for non-commercial educational purposes. I concur, therefore, in the Commission's decision insofar as it has finally reserved specific channels in cities throughout the United State. Both Commission recognition of the principle and the specific reservations mark a significant step forward for educational-TV. I believe, however, that the Commission's provision for education herein is deficient in many vital respects, both general and specific. By failing to provide education with its rightful share of the television spectrum, the Commission, in my opinion, runs the risk of stunting the growth of educational-TV in the formative days of its infancy and of forever retarding the future of our entire educational system.

My Separate Views to the Commission's Third Notice, issued March 21, 1951, pointed out certain defects in the proposals therein respecting educational television in the hope that they would be remedied before final action was taken. Our decision today, however, in large measure finalizes these proposals and thus freezes into permanency most of the flaws and shortcomings contained in them. Furthermore, their adoption has resulted in numerous errors in the specific allocations of the Commission's Table of Assignments. In view of the finality of this action, the additional evidence adduced by educators in the city-by-city hearings and the constantly increasing advancements in educational-TV, I now feel even more certain that the Commission has grievously erred in not providing education with the reservations it needs and deserves and that, in so doing, it has worked an injustice to the public interest.

II

In order to give a proper perspective to the Commission's action, certain background facts should first be stated in summary form. It is fundamental that the Commission is herein shaping the nature and course of television operations for generations to come. In this decision, the Commission allocates and opens up for licensing almost all of the frequencies that now remain available for television service. Education in general will not immediately be able to claim and use these television channels; it will need, as the Commission recognizes, additional time in which to secure funds, evolve organizational structures and, just as important, investigate and develop the new, expanded role which it can, through television, play in the community.

In view of the pent-up commercial demand for television facilities and the certainty of their early preemption for regular commercial operations, only the reservation now of a substantial number of channels will insure their availability for future, full-scale educational use. Provision for education in television must literally be made now or never. Since education cannot in the immediate future compete for the remaining channels, the absence of a reservation in any city is almost a death blow to its opportunity for an educational-television service.

III

There has been no question as to the tremendous potential inherent in large-scale use of television by educators. TV, as the "electronic blackboard," is a teaching tool of rare power and persuasion. Combining sight and sound, blessed with an immediacy of transmission and impact, welcomed by and available to almost everyone, television offers an unprecedented opportunity for education, both formal and informal. It is uniquely capable of serving all of our people in our schools, homes and factories on a constant and intimate basis. It can do so, moreover, at a cost which is extraordinarily low when full account is taken of its effectiveness and extensive coverage.

To refer to educational-TV, however, is no longer to speak merely of a potential, however basic such considerations might be. The steadily expanding volume of educational telecasting and the many successful experiments in teaching through TV are already realizing the potential of this new medium in every day life.[11] These activities show only a sample of what education could do with its own full-time stations; they provide increasing proof that television, in the hands of educators, could revitalize and expand our entire educational system and do so at a minimum cost.

IV

The phenomenon of television has had an unprecedentedly rapid growth; it has become in only six years an integral part of the lives and habits of millions of people. Already possessing major standing among the mass media, its power and influence will without question soon be second to none. It is particularly irresistible to children, tens of thousands of whom already spend more time before their TV

[7] The "two-lump" procedure on the other hand is not only consistent with the fundamental principles of the allocations plan but is the procedure which in essence has been used by the Commission in FM and heretofore in television. It represents too a sound departure from the method used in AM, where a "channel by channel" procedure was permissible for licensing proceedings brought in the absence of an engineered allocations plan and Table of Assignments.

[8] Thus, for example, depending upon the lineup of applicants for particular VHF channels, the basic factor of local residence may be without substantial significance in one hearing where both applicants possess it, substantially overlooked in another hearing where neither applicant is local to the community, and determinative in a third hearing where one applicant is a local resident and the other is not. Under the "two-lump" procedure, however, all decisional factors would play a consistently equal role in the results for all VHF channels.

[9] See Sec. 3.610 (b) (3) of the Rules. Briefly to list them, these "Taboo Table" separations, *all involving different channels,* include I. F. beat (20 miles), Intermodulation (20 miles), Oscillator (60 miles), Sound Image (60 miles) and Picture Image (75 miles). *Every one of these separations will have to be taken into account in every direction in measuring and determining the interrelationships of all transmitter sites specified.*

[10] Since educators will also be required to specify transmitter sites, they may similarly be forced into conflict with commercial interests in other cities, a situation inconsistent with the basic non-competitive principle of a reservation. Moreover, in such conflicts there are no established criteria under which the Commission could choose between an educator in one city and a commercial applicant in another.

[11] [See Column 1, page 168]

receivers than they do in school.

Television, like other technical innovations, is neutral in character; its use (or rather, our use of it) will ultimately determine its value. In view of television's extraordinary influence, which must grow rather than abate in future years, the Commission has an especial responsibility to the public—adults as well as children—to insure that this great natural resource to a substantial degree is devoted to cultural interests, to education as well as entertainment. The Commission's lawful task is not merely to establish the technical framework for television service. The public must not only be reached, it must (in the truly beneficial sense of that word) be "served." The Commission's goal, within the ambit of its statutory powers, should therefore be to bring about the best possible television service for the American people. The participation of educators on a full-scale basis is indispensable to its achievement.

V

It is clear from the record in these proceedings, as it is from the entire history of broadcasting, that educational stations can and will make a distinctive and valuable contribution to television. Although there are commercial stations which, as part of their public service responsibilities, have granted time and facilities for educational telecasting, these programs at best do not even begin to satisfy education's need in television. Commercial stations in general cannot provide, nor in all fairness could they be expected to provide, a complete educational service. Only a system of independently licensed educational stations operating full-time on a non-commercial basis can accomplish such a service.[12]

Educational-TV stations, when established, will do more than furnish a uniquely valuable teaching aid for in-school and home use. They will supply a beneficial complement to commercial telecasting. Providing for a greater diversity in TV programming, they will be particularly attractive to the many specialized and minority interests in the community, cultural as well as educational, which tend to be bypassed by commercial broadcasters thinking in terms of mass audiences. They will permit the entire viewing public an unaccustomed freedom of choice in programming. Educationally licensed and operated stations will, in addition, result in a substantial and beneficial diversification in the ownership and control of broadcast facilities. This would be closely in line with established Commission policy which has sought to achieve such diversification through the exercise of its licensing authority. Finally, educational stations will provide the highest standards of public service. Introducing non-commercial objectives and activities, they will be a leavening agent raising the aim and operations of our entire broadcasting system.

VI

The Commission's mandate, in these circumstances, requires it to provide a thoroughgoing opportunity for education in television, to grant educators an *adequate* "home in the spectrum." It can do so only by maximizing the number of reservations for education and realistically implementing its action here and in its Rules and Regulations so as to encourage and enable educators to take full advantage of these reservations. By "maximizing the number of reservations," I mean the necessity of giving education one of the *paramount* priorities in the allocation of channels and of reserving as many assignments as possible, consistent with the other *major* needs in the spectrum. Certainly the Commission has not adopted or applied such a policy here.[13]

There can be no doubt that the television spectrum in the main should be devoted to commercial operations in accordance with the traditional concepts of our broadcasting system. Commercial broadcasting plays a vital function in the development and operation of this system, one which the noncommercial cannot fulfill. Educational television has, however, its own uniquely valuable contribution of public service to make to this system. Thus, only by establishing a high ranking educational priority could the Commission meet its obligation, inherent in the Communications Act and expressly recognized in its 1935 Report to Congress respecting Section 307 (c) of that Act, to "actively assist in the determination of the rightful place of broadcasting in education and to see that it is used in that place."

In establishing a scale of relative values, upon which its allocations and assignments are based, the Commission has sorely undervalued education and placed it in a grossly subordinate position. As a result of the Commission's failure to strike a proper balance of the various interests here involved, education has not been provided with the proportionate share of the channels it deserves. Certainly commercial broadcasting should get the "lion's" share of these TV frequencies; it should not, however, get the "lamb's" share as well.

VII

The evidence of educator's deep interest in television and the steps they have already taken or contemplate as to the building and operation of TV stations is detailed, voluminous and persuasive. Educators' affidavits have, in scores of instances, gone far beyond expressions of mere willingness or hope. They have set forth concrete facts and figures; they have particularized in minute degree the why's and how's of their plans for educational television. Merely to glance through them—to mention only the affidavits of the New York State Board of Regents, the New Jersey Board of Education, the Wisconsin State Radio Council, the Universities of Kansas, Houston, Ohio State and Southern Illinois, of educators in the cities of Milwaukee, Houston, Pittsburgh, Chicago, San Francisco, Boston, etc.—establishes conclusively that education, given a proper reservation, will make excellent use of the facilities set aside for it.

The Commission holds herein that the entire record in the general portion of the proceedings overcomes objections to the basic principle of reservations.[14] In the same way, the entire record in these proceedings, particularly the evidence in the city-by-city hearings, should be held to overcome any and all objections to finalizing specific reservations herein. Cumulatively, this entire record supports a maximum number of reservations sufficient for a nationwide service, which would allow almost everyone in this country to enjoy the benefits of an educational "school of the air." At the very least, this record requires that the Commission finalize all of the reservations proposed in the Third Notice and grant, in the absence of more basic considerations to the contrary, those other reservations specifically requested by educators herein.[15]

VIII

With the foregoing remarks to serve as background, we may now turn to an examination of the Table of Assignments itself. In my opinion, the Commission's provision for educational-TV is *generally* inadequate in that:

> a. *It fails to reserve sufficient channels for a nationwide educational service.*

Since reservations for all practical purposes are indispensable to the establishment of educational television stations, it is axiomatic that only a policy of setting aside channels on a nationwide basis will accomplish the development of a truly national educational service. Yet, the 233 reservations finalized by the Commission, representing approximately 11.6% of the total number of assignments, fall woefully short of providing the requisite number of channels for such a service. They allow at best for haphazard and inequitable educational development of the medium.[16]

There is no allocation for educational-TV in approximately *one-fourth of all of the metropolitan communities* in this country. This includes cities as large as Youngstown (Ohio) with a metropolitan area population of 525,000; Allentown-Bethlehem (Pennsylvania) with a population of 430,000; and Springfield-Holyoke (Massachusetts) with a population of 400,000. The people in these many large cities, therefore, will probably be deprived for all time of a valuable educational service which their more fortunate neighbors in comparable or smaller communities may soon enjoy.

Similarly, there is only a single reservation provided for each of the following states: Massachusetts, Maryland, Kentucky, Wyoming, Delaware, Rhode Island and Vermont, out of a combined total of 114 channels assigned to them. Only two reservations have been provided for the entire states of Minnesota, Nebraska, Arizona, Idaho, Nevada and New Hampshire. In New York City where scores of educational and cultural institutions serve more than 11,000,000 people in the area, only one channel has been reserved despite the forcefully documented request of the New York State Board of Regents for a second channel to meet the combined needs of the Regents, the City itself, the Board of Education and the many private schools and institutions of higher learning located there. This is done despite the fact that New York City is today the primary production center for commercial television and its many writers, artists and technicians would likewise be

---

[11] The dynamic aspects of the growth of educational television have been dramatically illustrated, not only on but off the record where they must be common knowledge to the Commission. Each month brings a larger number of schools into this field, sponsoring and producing telecasts, initiating classes and workshops (both technical and creative) and securing and operating their own television equipment, including studios and closed circuit operations. (See *inter alia* JCET Exhibit 647). Regular educationally sponsored telecasts of several years standing have proved most successful and have continually been expanding. An outstanding example is found in Philadelphia where the TV "School of the Air", used as part of the regular curriculum in the classroom, has been in operation since 1949 and where, last year, the TV "University of the Air" commenced operations to provide adult education in the home under the joint sponsorship of the area's 19 schools of higher learning. Together, these two programs now telecast a total of nine half-hour programs per week over the three stations in that city. Regular educational telecasts on a more modest scale have been seen also in other cities, including Detroit, New York, Newark, Miami, Chicago, etc. These programs cannot, however, as indicated above, provide anything near an adequate substitute for education's own TV stations.

In the past year, several educational organizations have developed plans for state-wide TV neworks. The exhaustive proposal of the New York State Board of Regents is the most highly developed of these, but initial steps toward such networks have also been taken in Wisconsin (now operating a state-wide radio network of eight stations), New Jersey, Connecticut and Washington.

And only a short time ago, a conference in St. Louis of leading educators, citizens and organizations in this field laid the groundwork for a national educational-TV network to facilitate the building and operation of non-commercial stations. This conference underscores the swiftness of developments here, for the possibility of cooperative endeavor within a particular city is herein marked as a significant step forward. (See Par. 44 of the Sixth Report).

[12] This record and history of broadcasting further establish that commercial radio and television over the years have in general failed to give even a barely minimal opportunity for educational broadcasting. The need for educational stations, however, would as shown stated, exist even if this were not the fact.

[13] The sole allocation principle respecting education adopted by the Commission is that which assigns a channel to those cities which are primarily educational centers. *Beyond this, education has played no part in the allocations of channels;* the Commission has merely reserved one channel in a city when, by applying allocation principles, three or more have been assigned to it. For these reasons, the Joint Committee on Educational Television has requested that the Commission adopt an educational priority to serve as a basic principle in the allocation of channels. (See Pars. 83-4 of the Sixth Report). Despite the Commission's glossing over of this request, it should be noted that many more reservations would have been provided herein if such a high-ranking priority had been adopted before the issuance of the Third Notice or this Final Decision.

[14] Par. 44 of the Sixth Report.

[15] It should be noted that educators have unfairly been required to participate in both the general and city-by-city portions of these proceedings. To my mind, the Commission in the public interest could and should have provided a substantial number of reservations in its final decision without requiring any showing from educators in either portion and certainly without requiring one in both.

[16] Thus, for example, by providing a reservation in every city in which two assignments were proposed by the Third Notice (rather than the three assignments used as the basis for reservations in that Notice), the Commission could have set aside an additional 146 assignments for education. These would, of course, allow for a closer approximation of a nationwide system. (See my Separate Views to the Third Notice for a discussion of cultural monopoly as contrasted to the economic variety, Section II). It has also been my constant position that the Commission had the responsibility to make or initiate a study of educational needs throughout the country to serve as the basis for television allocations to education.

of great value to educational television.

b. *The reservations have predominantly been confined to the ultra-high (UHF) portion of the spectrum and an insufficient number of VHF reservations provided:*

By limiting education to UHF frequencies in cities in which commercial television over VHF has already made substantial inroads, or will soon do so, the Commission has placed the educators there at a fundamental disadvantage. This situation exists in a large number of cities, including such major communities as Detroit, Philadelphia, Cincinnati, Cleveland, Washington, etc. While it may be true that some educators in these circumstances will find UHF operations only a "temporary handicap," for others it may prove to be a permanent disability. The public's stake in educational-TV is too great to be forced to rest on such speculation.

The past year since issuance of the Third Notice has further aggravated this problem, and made even clearer the inadvisability of forcing education into the UHF in these cities. More than 16 million TV receivers are now in the hands of the public and, in many communities set ownership nears or stands at the "saturation point." Educators undertaking the task, considerable in itself, of raising funds for non-commercial operations will be faced with the difficult obstacle that their UHF operations in these cities would not be capable of being received by a single one of the millions of outstanding sets, unless these sets are first converted.

No one can be unmindful of the fact that commercial operators attempting UHF telecasting in cities with established VHF service will themselves be handicapped by an initial competitive disadvantage.[17] But, however great this problem of integrating UHF into existing VHF operations may be, it can best be handled by commercial operators who are spurred on by competitive motives and possible monetary profits and it properly should be entrusted to them. For the Commission to force education to carry what is essentially a substantial commercial burden is unrealistic and unwise, for it appreciably limits the opportunity a reservation offers to educators.[18]

Education's share of the VHF is clearly inadequate. Not a single VHF reservation has been provided for the states of New York, Michigan, Ohio, Indiana, Connecticut, New Jersey, Virginia, West Virginia, Nebraska, Kentucky, Rhode Island, Delaware, Vermont, and Maryland, out of a combined total of 97 VHF channels assigned to them. Only a single VHF has been reserved in each of the following states: Massachusetts, Pennsylvania, Wisconsin, Missouri, North Carolina, New Hampshire, Maine, Mississippi, Nevada, South Carolina, Utah, Idaho, Wyoming and Louisiana, out of a combined total of 136 VHF assigned to them. Thus, *in 28 states*, including many of the leaders in population and resources which have particular need for educational television, *educators have received fourteen VHF out of a total of 233 assigned.*

In order to correct this inequitable distribution of channels to education, the Commission should have, whenever possible, placed in the VHF the additional reservations allocated herein and should have made particular effort to provide a VHF reservation in the "closed" and predominantly VHF cities.

c. *The Commission has improperly bound its policy of reservations too closely to a showing of present demand by educators.*

A study of the specific assignments herein clearly establishes that the Commission has refused to extend its reservations to the cities necessary for a nationwide educational service *solely for the reason that no showing of demand for such reservations has been made by local educators* in these cities. On this same basis the Commission in several cities has deleted proposed VHF reservations. Only in cases where a proposed reservation has not been opposed by commercial interests has the Commission finalized reservations, whether VHF or UHF, without requiring evidence of educational demand. In all other instances educators have supported the proposed reservations in their respective cities.

Reservations are too critically needed, however, to be made to depend on showings of present demand. That local educators in each and every city affected have not, at this premature date in the early history of TV, given formal assurances of their intention and ability to make use of the medium, should not be material here. In this crucial area of public welfare, the Commission must not rely solely upon the self-interest and awareness of present-day educators to delineate and prescribe future educational needs in television. The public interest, in my opinion, would have required the Commission to make substantial reservations in this allocations proceeding, *even if* educators had made no formal showing of any kind on this record.

As amply shown on the record and spelled out by the Commission herein,[19] the fact that many local educators in specific localities are not now ready to claim frequencies is a basic reason for the very principle of reservations and precisely because of it have channels now been set aside for future educational use. It is therefore grossly inconsistent and incongruous to hold present educational demand to be unnecessary in determining the general principle requiring reservations, and then to make it an essential in the city-by-city hearing concerning specific reservations.

If the Commission is, however, to require a showing of educational demand, despite the above objections to such a policy, it would be much more valid for it here to point to and rely on the great quantum of evidence from educational institutions and communities that are now ready, willing and, in some cases, even able to begin full-time television operations as the basis for a more liberal policy towards education. It is to those eminent educators who have taken the lead in TV that we should look, if we must, to determine what in general may be expected from education in years to come.[20] Uniformity of opinion and action from every community in the nation is simply too much to expect. That it has not been manifested is in no way proof of any permanent lack of interest by less advanced or smaller schools or any fixed inability on their part to undertake singly or cooperatively, the operation of their own non-commercial stations. It is solely and simply due to the fact that in educational television, as elsewhere, some must lead so that others may follow.[21]

The very purpose of an allocations plan and the Table of Assignments is to erect a bulwark to protect TV's development against the inroads of present demand. This purpose should apply consistently to both educational and commercial allocations, and neither the reservations nor commercial assignments to the smaller cities should be limited by the fact that identifiable persons or groups have failed to articulate formally a determination and ability to use the facility. The future rights of the commercial and educational interests that are not yet sufficiently vocal to appear in these proceedings are precisely those which the Commission has the primary duty to protect.

An overall national allocations plan for the distribution of all television channels in the public interest must not be grounded predominantly upon considerations of immediate demand. This is true even where, as here, such demand may be expressed in the form of affidavits rather than as applications for construction permits. In establishing the structure and nature of our future television system, the Commission must look beyond contemporary opinions and attitudes that patently are underdeveloped and which assuredly will change with time and circumstance. To do otherwise is to tie the future with the bonds of the past.

d. *The Commission in its allocations improperly fails to distinguish between educational and commercial assignments.*

The Commission in acting upon the assignments for specific cities has considered education merely as one of the television services to be provided for a given community. It has failed in every case to recognize the essential distinction between the educational and commercial television service, which calls for their different treatment. The function, scope and mode of operation of educational television differ markedly from those of commercial telecasting. An assignment for education is not designed solely to bring another TV station to a community, but to provide a separate and unique service to it, permitting fuller expression of its educational and cultural interests. In keeping with this distinction a city already served by commercial stations may be entitled to an assignment for education even though, on comparative factors, no additional assignment for commercial purposes could be permitted to it. This is vital in specific assignments for such cities as Detroit and Columbus, hereinafter discussed.

The Commission has heretofore recognized the difference between the educational and commercial services. In FM it has set aside a separate block of channels exclusively and entirely for non-commercial educational stations. The only reason for not utilizing this method of "block reservations" in television, as expressly stated in the Commission's Third Notice, was in order to achieve greater efficiency of allocations throughout the entire Table of Assignments.[22] That the Commission now chooses in TV to proceed by reserving specific channels in individual cities should not, however, cause it to lose sight of the essential fact that education is a completely separate and distinct service and should be so treated.

e. *This decision will in general exclude education from the unassigned portion of the TV spectrum, the "flexibility" channels.*

The Commission has, as hereinbefore stated, established channels 66 to 83 as a pool of unassigned channels, known in the Third Notice as the "flexibility" band. Although these unassigned channels represent more than 20% of the entire television spectrum, the Commission has provided a total of only *fourteen* assignments for education in them. Even this small number has been set aside solely upon specific demand by educators in the cities affected.

By making these unassigned channels available (after one year) on a demand basis to any party instituting proper rule making proceedings, the Commission has severely limited educators' opportunity to secure any further assignments in them. The Commission's statement herein that these unassigned channels will "primarily" be used for communities without educational (and commercial) assignments does not afford an adequate protection to educators, since no specific standards have been provided to effectuate this intention.[23] In light of the Commission's own acknowledgments that educators need a longer time to enter television, it is impossible to attach substantial significance to the provision herein permitting educators to file for an unassigned channel *even during* the coming year when most proposed amendments to the Table will not be accepted.[24] A one-year preference to these unassigned channels is as illusory as would be a one-year reservation.

The Commission's provision for

As expressly stated in Par. 200 of this report. See also my Dissenting Opinion dealing with Powers and Antenna Heights, Part A, herein.

[17] An extreme instance of such unrealistic allocations is found in ten cities, in each of which the Commission has made two VHF assignments and then as reserved for education *the only* VHF channel assigned there. These cities are: *Bangor* (Maine), *Great Falls* (Montana), *Dickinson* and *Williston* (North Dakota), *Pierre* (South Dakota), *Walla Walla* (Washington), *Laredo* (Texas), *Huntington* (West Virginia), *Toledo* (Ohio), and *Syracuse* (New York). Moreover, in every one of these cities, except Syracuse, there was at least one of the assigned VHF channels available for reservation.

[18] See Pars. 37-44 of the Sixth Report.

[19] See Section VII, herein.

[20] So, for example, America's unique system of free public schools did not have an instantaneous and simultaneous development in all parts of the United States, but rather developed first in the larger cities, such as New York and Philadelphia, and thereafter spread in time throughout the country. Educational-TV is presently, in a much more critical situation than was the public school system in its initial phases, for assignments are necessary now in order to preserve even the opportunity for future growth and development.

[22] Par. 6 of Appendix A of the Third Notice.

[23] Set forth in Footnote 11, Page 13, of the Sixth Report.

[24] Set forth in Footnote 11, Page 13, of the Sixth Report.

"flexibility" channels, particularly insofar as education is concerned, is therefore completely inconsistent with the fundamental principles followed by it with respect to channels 2 through 65. *To be consistent and equitable, the Commission must establish a firm principle under which education would have a preference in "flexibility" channels equivalent to its reservations in the other channels.* This preference could be accomplished by a rule of "limited eligibility," such as spelled out hereinbefore for smaller communities without television assignments. (Part B of this Opinion). In other words, I would retain the proposal concerning "flexibility" channels contained in the Third Notice and extend it to include cities without educational assignments, instead of almost completely deleting that proposal as the Commission has done in this Report.

f. Eligibility for the licensing of non-commercial stations has been unduly limited.

I believe that municipalities should be made eligible in every instance to operate stations on reserved non-commercial channels. To limit eligibility in general to educational institutions is, in my opinion, unnecessarily strict, for in many instances it may prevent the most efficient administration of the licensed channel and may even result in the complete loss of an otherwise ready and valuable licensee.

In providing for this new and unique educational service, the Commission should not be unduly restrictive of its future development. Television is so much more costly than aural broadcasting and involves such substantial differences in organization and operation, that practices followed in FM should not necessarily be binding here. As the city usually holds authority over the public school system, it is not only incongruous but it contradicts the basic principle of licensee responsibility to provide that its subordinate entity is eligible for license while the city itself is not. Moreover, in many instances the municipality could more efficiently operate the station, particularly so when it has jurisdiction over the many and varied educational and cultural institutions in the city.

It is clear that every licensee of a reserved channel will be required to broadcast exclusively on a non-commercial basis, featuring specialized educational and cultural programming, and will be bound by the general requirements for co-operative arrangements among all educational institutions in the area. In view of these careful limitations as to the nature and scope of educational-TV operations, I can see no reason why the Commission's Rules should in any case prevent a municipality which is ready, able and otherwise qualified to build and operate a station, while the area's educators are not, from bringing this vitally needed service to the public.[25]

IX

Had the Commission adopted and applied the general principles set forth above, adequate provision for education would have been achieved. Since it did not, however, and for the further reasons enumerated below in particular cases, I find it necessary in several instances to dissent from the Commission's final Table of Assignments. My objections to specific assignments may be grouped in the following categories:

a. *Proposed VHF reservations have been deleted.* (Pars. 431, 588, 611 and 586)

In *Indianapolis* (Indiana), *Kansas City* (Missouri) and *Omaha* (Nebraska), the Commission has improperly deleted proposed VHF reservations and substituted UHF reservations in their place. In *Columbia* (Missouri), a proposed VHF reservation for a "primarily educational center" has been deleted without any substitute reservation provided.[26] I believe, however, that the VHF reservation should have been retained and finalized in every one of these cities.

These deletions have been based upon the lack of local educational demand for VHF reservations and commercial opposition to them. The basic fallacy of a policy predicated upon demand has already been pointed out and is fully applicable here. Reservations, it should be remembered, are primarily set aside for the benefit of the people who will be served by these non-commercial stations. A reserved channel therefore confers no interest which local educators can refuse, barter or sell. The only right an educator has in a reserved channel is one of use and service, subject to Commission approval and its Rules and Regulations. If he is unwilling to exercise this right, no matter his position or influence, the VHF channel should remain reserved in that community for the use of its more enlightened and public spirited citizens and educators.

The public interest should not here be neglected solely because educators now in office refuse to accept or recognize television's opportunity and challenge. Not only may changes in administration bring about a change in the thinking of their institutions, but the passage of time and the example set by other educators using TV, may bring about radical revision even in their own attitudes. They may then be quick, if the channel is gone, to demand its return and cry that the Commission should have guarded them against their own error. We have seen such a cycle in radio and must insure against its repetition in television. The Commission must not adopt the shortsightedness of a few as its own basic policy.

It should be noted here with regard to all allocations that the contest for assignments is now largely confined to the VHF frequencies, and particularly to those cities in which VHF stations are already on the air. Thus, of the 73 cities in the United States in which the Commission had proposed VHF educational assignments, commercial interests in 22 of these cities have objected to the reservations and requested that they be deleted. In fully half of the 26 instances in which a VHF reservation was proposed for cities with presently operating stations, commercial objections were received to such reservations. Yet, at the same time, there was not a single commercial objection seeking to delete specifically proposed UHF reservations, although a total of 127 had been proposed by the Commission.[27]

Without doubt, however, a tight situation such as exists where VHF is now operating is only being delayed in the remainder of the VHF and in the entire UHF, and will develop there with increasing intensity as available TV assignments are taken up. To insure the full and unrestricted opportunity in television that education needs and deserves, the Commission must now stand firm against the immediate claims of commercial expediency seeking deletions from those few VHF channels which have been reserved.

b. *Additional VHF and UHF assignments have been provided without being reserved for educational purposes.*

1. In its Third Notice the Commission set forth the principles for determining allocations to education, which provided in part for a reservation in every city with three or more assignments and a VHF reservation in cities with at least three VHF assignments of which one was still available. The Third Notice scrupulously followed these principles in proposing its assignments and reservations. Yet, in several instances herein the Commission has provided a number of additional assignments which these principles would require to be reserved for education, but in every instance save one the Commission has deviated from the principle, failed to make such reservation and, instead, has assigned the channel for commercial use.[28] It has done so solely on the basis that no educational demand has been manifested for such reservation. This is the case in *Youngstown* (Ohio); *Scranton, Altoona* and *Harrisburg* (Pennsylvania); *Santa Barbara* (California), and *Bellingham* (Washington) where third assignments have been provided, and in *Lubbock* (Texas) and *Buffalo-Niagara Falls* (New York) where third VHF's have been assigned, the latter by virtue of the combination for assignment purposes of those two cities into one metropolitan area.

The Commission has failed to give any reason why the general pre-established rules respecting educational allocations should not be applied to these additional assignments. How can the Commission consistently distinguish those instances where a city received its assignments under the Third Notice from those where that third assignment, or that third VHF, came to it as the result of the city-by-city hearings? Furthermore, in only a single one of these instances (Buffalo) did the commercial interests requesting the additional assignment refer to or deal with the question of whether this assignment, if made, should be reserved for education as required by the principles of the Third Notice or should be made available to commercial interests. Therefore, in order to achieve a consistent application of these aforementioned principles, the Commission should reserve every third assignment and third VHF, above specified, for educational purposes.

2. Similarly the Commission has allocated a first or second VHF channel to several cities, but in no case has this VHF been assigned for educational purposes, although there was clear need for such action and the educators affected have strongly articulated their support of educational assignments. Thus, in Hartford (Connecticut), the added VHF assignment, if reserved, could immediately serve as the hub of a contemplated state-wide educational network. In Bay City (Michigan) *where local educators made a strong showing for a VHF channel,* the Commission disregarded it despite the fact that an additional VHF was assigned to that city. Although that VHF was not the exact one requested by Bay City's educators, it should be noted that the Commission did not find such circumstance to be an obstacle, when, *on its own motion,* it allocated VHF 10 to Altoona (Pennsylvania) although commercial interests there had demanded the assignment of a completely different VHF channel.[29] This example illustrates the pattern of Commission inconsistency; it deviates (in Youngstown, Lubbock, etc.) from principles requiring reservations on the basis that no educational demand has been manifested, and yet in Bay City it adheres to principles restricting reservations even in the face of clear demand for such assignments.

While it is true that the general principles of the Third Notice do not require these additional VHF's to be reserved, I believe that ordinary fairness at least requires consistent Commission action in like situations, whether commercial or educational. In these above-mentioned instances, the entire record so well supports education's need for the VHF channels involved that they should be set aside in every one of these cities.

c. *VHF reservations requested for early educational operations have not been provided.*

The Commission must not only reserve channels for education but

[25] The Commission has recognized this need to some extent by providing for municipality eligibility in certain limited instances. (See Pars. 50-3 of the Sixth Report and Section 3.621 (c) of the TV Rules).

[26] Another deletion of a VHF reservation, in effect, was made in *San Diego* (California) where the Commission's Third Notice had proposed to reserve VHF channel 3, and strong support for such a reservation had been received from local educators. Subsequently, due to an agreement with Mexico respecting border allocations, the Commission deleted one VHF of the three assigned to San Diego, that one being VHF channel 3 reserved for education. Since no other VHF has been reserved in San Diego, it is clear that education there has been forced to bear a disproportionate cost of this international agreement. *Storrs* (Connecticut) is a substantially different matter, for there the proposed UHF reservation was shifted to another Connecticut city in order to provide a more efficient system of reservations for a state-wide educational service. (Par. 283 of the Sixth Report).

[27] In Madison (Wisconsin), it should be noted, a commercial request to move the proposed reservation from the UHF to VHF was denied expressly on the basis that no educational demand for the VHF supported this request. (See Par. 581 of the Sixth Report.)

[28] Only in Sacramento (California), where the Commission has reserved the third VHF assigned to that city have the principles of the Third Notice been followed; even here such assignment was not due alone to those principles, but as much, if not more, to the local educators' demand for the VHF reservations.

[29] Par. 370 of the Sixth Report.

it must implement its reservation in a realistically effective manner, reasonably calculated to bring about the actual operation of these channels. In order to achieve large-scale educational use of television, it is clearly imperative that there first be pioneers into the field whose stations will provide a strong stimulus for the entire movement and serve as "pilot plants" for similar operations. The Commission, however, has made practically no allowance for this need and in almost every instance has refused to provide the additional VHF reservations which have been requested for immediate or early educational operations. In so doing it has rejected forceful showings of the public interest requiring such assignment.[30]

The particular facts in each of the following cases further demonstrate the validity of these requests for VHF reservations:

1. *Columbus* (Ohio) Par. 417 of the Sixth Report)

Ohio State University in Columbus is now ready, willing and able to make immediate use of VHF 12 in Columbus and it already has on file an application for a construction permit to build on that channel. Ohio State is without question among the leading and most influential institutions in the field of educational broadcasting. Its activities began in 1922 and have continued on a constantly increasing scale to the present time over its own Stations WOSU and WOSU-FM. Its annual broadcasting budget presently exceeds $150,000.

With a VHF channel, Ohio State could immediately carry its leadership into television and give a needed impetus to the development of this new, specialized medium. The existence of three operating VHF stations in Columbus, however, and the high percentage of VHF set ownership there, near a saturation point of 55%, requires Ohio State, as a practical matter, to secure a VHF channel for its operations. Without a VHF, its operations will be delayed and it becomes a matter of speculation when the school will enter television on a full-time basis.

Undeniably, the shifts in assignments which would be required in order to bring VHF 12 to Columbus present certain difficulties. The Commission, however, should not merely "count the noses" of comparative populations nor make the bare number of channels involved the determinative factor.[31] In this situation, I believe that the proper application of allocations principles and the public interest require the Commission to make this requested assignment of VHF 12 to Columbus for educational purposes.

2. *Detroit, (Michigan)* (Par. 479 of the Sixth Report)

The Board of Education of the City of Detroit has requested, by a series of channel shifts, the assignment of a fourth VHF (11) in that city in place of UHF Channel 56 proposed to be reserved there.[32] I believe that the three existing VHF television stations in Detroit, as well as the 600,000 TV sets in the hands of its public, makes a VHF reservation necessary if education is not to be placed at an initial handicap in its operations in Detroit. Furthermore, education there has already had extensive and successful experience in actual television programming and is, therefore, uniquely capable of quick expansion into full-time educational operations over its own independent station.

The Commission's actions here and in Columbus reveal striking inconsistency. Rejection of the Ohio State request for a VHF assignment was predicated upon a comparison of the relative populations of Indianapolis, Clarksburg and Huntington as against Columbus and, in addition, the net loss of one VHF channel caused by that counterproposal. While disapproving the use of such a numerical yardstick in this proceeding, I firmly believe that its consistent application would have resulted in a grant of the educational counterproposal for Detroit. The gain of a fourth VHF in Detroit, the fifth largest city in the country with a metropolitan population of 3 million, together with a first VHF for Bay-City-Saginaw with its 240,000 population, as requested, would more than compensate in my opinion for the loss of the second VHF proposed in Toledo with its 400,000 population and the first VHF proposed in Flint with its 270,000 population. There would be no net loss in the total number of VHF channels and a substitute UHF channel could be provided for Toledo, which would help the educators there, who otherwise face the unhappy prospect of having the only UHF assignment in that city.

On any basis, therefore, the assignment of a VHF to Detroit for educational purposes is warranted and clearly in the public interest.

3. *Fort Wayne (Indiana) and Carbondale (Illinois)* (Pars. 438 and 518 of the Sixth Report)

Indiana Technical College has requested the assignment and reservation of VHF 5 in Fort Wayne for immediate educational operation. Southern Illinois University has requested the assignment and reservation of VHF 10 in Carbondale to permit its early initiation of educational-TV operations. Both require a VHF channel for additional, substantial reasons: Indiana Technical College, in order to make use of TV equipment (valued at more than $100,000) donated to it, some of which is usable only in the lower portion of the VHF; Southern Illinois University, in order to bring a needed first VHF service to more than 370,000 people in the southern one-third of the state, a number considerably greater than that which could be reached by a UHF operation. The Commission has denied both requests on the basis that each violated minimum mileage separations established herein and, in addition, has denied the further request of Indiana Technical College for an assignment to be limited to low-power operations in order to prevent objectionable interference.[33]

The Commission's denial of these requested VHF assignments has resulted in the loss, for the time being, of particularly valuable educational licensees who could otherwise have begun early operations. Here, too, a UHF assignment may cause substantial delay and make speculative the time when these schools will enter the medium on a full-scale basis. Here then are particularly glaring examples of what has resulted from the Commission's mistake in not recognizing education as a separate and distinct service, its omission of a high-ranking educational priority in the allocations, and its failure to construct an allocations plan and a Table of Assignments reasonably designed to meet these major needs in educational television. These faults are responsible for the absence of educational VHF assignments in Fort Wayne and Carbondale and I believe the Table of Assignments to be in error in not providing them. Had proper principles been established in this proceeding, these assignments would have been granted as being in strict conformity with them, rather than, as they have been forced to appear here, counterproposals seeking operations in violation of these general principles provided herein.

X

The Commission, in making an allocations plan, is forced to act in an area filled with imponderables and unknowns. It ventures into the future without assurance or expectation of absolute certainty. It is only reasonable to assume, therefore, that some misjudgments and errors will be made in the balancing and the determination of the many conflicting factors involved, all of which are subject to future change. If the Commission must err, however, it should take care to do so on the side of the public interest.

Elsewhere in this Report the Commission refers often to the "safety factor" requiring particular attention on its part not to unduly circumscribe future developments. Nowhere is such margin for error more necessary than here in the case of educational reservations where a denial is, for all practical purposes, permanent and irremediable. It would be far better therefore, since it must choose an alternative, for the Commission to reserve too many channels than for it to reserve too few. It is the latter alternative which involves the cost too great to hazard.

XI

Education in a democracy is not a luxury; it is an imperative. The strengthening and expansion of our educational system is a most urgent requirement of our national policy. Nothing that could be done to improve that educational system, however, can approach the force and impact of television.

Educational use of television on an extensive scale is not an impractical dream or a noble hope; rather it stands on the threshold of realization. Given sufficient recognition and encouragement, its substantial fulfillment could be achieved in the relatively near future. For those reasons, and in order to keep faith with its statutory responsibilities, the Commission should provide maximum reservations to preserve in full this once-in-a-lifetime chance for both television and education. I deeply regret that this has not been done in these proceedings.

The channels for education provided herein, however incomplete, do offer an opportunity which the American people should seize upon as soon as possible and which they cannot afford to let slip away by default. They offer, too, a challenge that must be accepted and met by every school, every teacher, parent, public official, technician and public-spirited person and organization in each community or concerned with each community herein affected. This priceless opportunity for public welfare is one that must carefully be guided and guarded by all in order to achieve the maximum benefits of which it is capable. Without doubt, there are sizeable obstacles, not the least of which is the opposition of selfish interests, that must be overcome before educational stations in large numbers are built and put into operation. In view, however, of the enormous public benefits offered by educational-TV, and its steadily growing support, I firmly believe that with earnest efforts on all our parts these obstacles will be overcome and that educational television will prevail and grow and, in time, exceeding our greatest expectations, will flourish as an integral part of our educational and broadcasting systems.

DISSENTING OPINION OF COMMISSIONER JONES

I

Even the detail in the Commission's decision released today cannot conceal those faults which compel my dissent.

I dissent because this firm, fixed and final allocation plan pretends to keep the large city broadcasters from squatting on the best television channels to the exclusion of the small city. Actually if you attribute all the selfishness charged against them in the Commission's decision, broadcasters could have done little more *on an application basis*, without an *allocation plan.* to carve out an advantage to the detriment of the smaller cities.

The general rules and standards and to a greater extent the city-to-city allocation plan actually exclude VHF channels from the smaller cities unless there happens to be no larger city within artillery range to put them in. This is justified on the basis that VHF covers wider areas than UHF and that the larger cities can serve the rural population. So the general standards are drafted to the advantage of the largest cities to accomplish this basic purpose with VHF channels.

This policy literally shrinks the 12 VHF channels of the spectrum (all of the VHF channels) to the equivalent of 4 in the northeastern part of the United States and other areas like it. This occurs because the bigger you make any single

[30] In every instance herein the educators have filed complete and lengthy affidavits, including the engineering data necessary to accomplish the requested shifts.

[31] It should be noted that under the principles established in the Third Notice, a VHF reservation would have been provided for Columbus had its three VHF assignments not already been in actual operation. This is also true in the case of Detroit; hereinafter discussed.

[32] These requests, it should be noted, would also bring first VHF reservations to Ohio and Michigan, and would correct to some extent the inequitable situation that now finds these States among those without any reservation in the VHF.

[33] There is substantial merit, in my opinion, to Indiana Technical College's assertion that the Commission should permit such educational low-power operations on the basis that non-commercial stations, unlike commercial stations, will not produce or respond to economic pressures constantly seeking higher power to expand service areas and acquire greater audiences. There are, however, as above shown, more fundamental grounds upon which the Commission should have granted the requested VHF assignments to these cities.

station's coverage the wider you have to space stations. The wider you space stations the lesser number of times you can use the channel in the entire country.

The Commission has pretended that these high powers, antenna heights and wider VHF spacings actually give more service to the rural areas. In fact, the contrary is true. In northeastern United States and other areas like it *148% more rural and city* area could get a Grade A service and 59% more could get Grade B service if the 250 mile median spacing (between stations operating on the same channel) is cut in half when 500' antennas are used, and cut one-third when 1000' antennas are used.

The Commission has made 100 kw maximum power for VHF channels 2 to 6 and 316 kw for VHF channels 7 to 13 (roughly 3 times the low band VHF power) and 1000 kw (10 times low band VHF power) for UHF channels 14 to 83. It has made 2000' antenna heights the maximum except in Zone I (northeastern United States) where 1000' is maximum. These are the values which have to be used by broadcasters everywhere (from New York City to Goldfield, Nevada—population 336) to make the Commission's plan *even approach degraded efficiency. This means that there is a million dollar entry fee* for every broadcaster to guarantee the Commission plan's efficiency. If broadcasters from small towns (VHF was given to the largest cities and UHF generally to the smaller cities to fill in the gaps not covered by VHF) are to contribute to efficency they had better study astronomy to figure up their balance sheets and buy lots of red ink.

This plan throws the heaviest financial burden upon those least able to pay. UHF transmitters cost more to construct and operate. UHF receivers cost more. Initially they will not be as good as VHF receivers and more complicated and more expensive receiving antennas are needed to pick up a useable UHF signal on every farmer's house top or wind mill. In addition, the higher the farmer and small urban resident has to construct his UHF receiving antenna, the longer the line is to his receiving set and the greater is the line loss by the time the available UHF signal reaches the terminals of his receiver.

If a UHF station doesn't happen to be built in a small city which is supposed to fill in the area not covered by the large city VHF station, the rural and small urban resident has to buy an expensive VHF antenna array to get the distant VHF signal or buy a hunting license.

The Commission's plan will make the television broadcasting business a million dollar blue chip game as a result of the powers and antenna heights chosen for *its level of efficiency*. The corollary of this philosophy is that those powers and antenna heights require abnormally, if not unreasonably wide separations. The wider the VHF separations are the less channels there are in any given city. In short, it is creating an artificial *scarcity* of VHF channels. The Commission thinks that it has eliminated 307(b) contest between cities (it has not eliminated all) by incorporating this firm, fixed and final allocation plan into its Rules. But it has created a bigger Frankenstein with this artificial scarcity of channels than it is trying to avoid. Where the prospect of million dollar returns are at stake in major markets *more applicants* will be seeking a scarce number of channels. When *many* applicants compete for an unconscionably few VHF channels with the lucrative return on investment provided by this plan (inordinately VHF service areas) it will take years before the Commission can judge the merits on the kind of contests that will surely ensue.

The Commission has had the paralysis of analysis for one year, not consumed in drafting the general Rules and Standards, but consumed in a search for a city-to-city allocation plan which it can freeze on the country by rule-making proceedings. During this period people have been denied all television service in many parts of the United States and have been limited to one service in others. In addition, the Commission has created or continued television broadcast *monopolies* in one-station cities and *limited monopolies* in some two- and three-station major cities of the nation. The mischievous damage that has been done by delaying the commercialization of UHF (83% of the channels to be used for television broadcasting) is hard to contemplate. 90% of the contests in the city-to-city proceedings involved only VHF channels.

Even now the UHF portion of the allocation Table is incomplete. Its introduction has been delayed because the Commission apparently anticipated, until lately, that it would *lump* UHF and VHF channels in the same *application* proceedings for any city and thus could not release UHF channels for television broadcasting until it perfected the VHF assignments.

Now, sound UHF station commercialization is handicapped economically and technically by 17,000,000 VHF-only receiving sets. Any prospective UHF broadcaster is not only handicapped where UHF and VHF are intermixed but also in areas where UHF is not used to supplement the inefficient assignment of VHF channels.

Especially is this true because the UHF broadcaster cannot produce a better picture than a VHF broadcaster—the standards (lines, frames and fields) are identical. In addition a UHF broadcaster in the large intermixed (UHF-VHF) cities would have to be assured of 170 mile spacings *(and they are not in this plan)* for VHF stations operating at 100 kw power for low band VHF (channels 2 to 6) and 316 kw for high band VHF (channels 7 to 13) at 500' antenna height to serve the same area with a UHF station at 1,000 and 600 kw more power for high band VHF and *1500 ft. higher* antenna heights for both, he still has to buy an audience of VHF-only receivers.

The Communications Act gives the Commission the duty of fostering the fullest development of the art. It is not the function of the Commission to construct and operate stations. Its function is to promulgate Rules and Regulations that will make it possible for citizens of the United States to become licensees and operate broadcast and television stations in the public interest, convenience and necessity. The *purpose* of the allocation plan now being adopted by the Commission is to create a nation-wide, competitive television system, but the *effect* of the plan is to deny local television to cities not included in the Table. Once the Table is established and construction permits are granted, followed by licenses and operation on the channels assigned in this Table, the Commission will not be able to dislocate such licenses to make another plan more efficient without litigation ensuing between such licensees and the Commission.

II

I dissent because the firm, fixed and final allocation plan constitutes an inefficient use of our valuable spectrum space. Therefore it is fundamentally a plan to deny local television channels to cities and communities in the United States. Only 1274 of such cities are given the privilege to build one or more television stations. Of these 889 are each given the privilege to build *only* one local station, notwithstanding the fact that the touchstone of the Communications Act is competition. *Federal Communications Commission* v. *Sanders Bros. Radio Station*, 309 U.S. 470.

The city-to-city allocation plan is confined to 1,274 cities because the Commission has established a standard service area which will meet the demands of the largest city in the nation and has applied it for allocation purposes to the smallest city included in the table.[1] In addition, for assignment purposes the Commission has assumed that every station occupying any channel assigned in the Table will employ the maximum power and antenna height regardless of the relative populations of the cities or the sizes of their respective trading areas and the areas of their cultural influence.

An examination of the various cities in the Table shows that it is unreasonable to expect that maximum power and antenna heights will be utilized in the smallest communities included in the Table. For example, New York City has a population of 7,891,957 and its trading area is 3924 square miles. Goldfield, Nevada, the smallest city included in the Table, has a population of 336, which is .0043% that of New York. Esmeralda, the county in which it is located, has a population of 614. The broadcast industry, of course, is based upon the advertising sponsorship of programs, and the advertiser selects the stations he wishes to use according to the potential number of people to be served, and the rate paid is based upon the number of people in the service area of each station. For instance, one New York station covers a population of 14,332,829 under the present Rules and Standards of the Commission. Using the same standard for Goldfield, a 50 mile radius normalized to the county lines contains a population of 3715. The rate for the Class A hour of this New York station is $3750, making the cost to the advertiser twenty-six cents per thousand. If we apply this cost per thousand to the Goldfield area, its Class A hour rate would come to ninety-seven cents. Obviously, the rate of a Goldfield station would not be figured precisely on these population percentages, but any hourly rate they could negotiate would not be enough more to change the situation materially. Therefore, it seems very clear from an examination of the largest and the smallest communities where VHF channels are assigned in the Commission's allocation plan that the chance for a financially sound broadcast station at maximum powers and antenna heights cannot be based upon a gross income of ninety-seven cents an hour for Class A service. The probability that any such station would ever be operated at maximum power is very remote. It is more logical and consonant with practical business facts to assume that if the Goldfield channel is ever occupied it will be operated at the minimum powers and antenna heights provided in the allocation plan. It cannot be argued that the comparison between the city with the largest population and the one with the smallest population included in the Table is unfair because that is the very basis upon which the Commission has constructed the allocation Table. The same factors are ignored by the Commission in constructing its Table of assignments in all the varying sizes of cities included and excluded from the Table. It provided itself with no flexibility from an allocation standpoint to change separations, powers and antenna heights which would meet the reasonable needs—give service to the natural trading areas or the areas of their cultural influence—of any given city in the United States.

The entire philosophy of providing the standard service area for all cities based upon a service area satisfactory to the largest city in the Table exposes some absurd results. For example, the Commission concluded that "the geographical distribution of people and cities of the United States does not lend itself to a simple rule for spacing of stations" which will protect the interference free service area of each channel. Yet the Commission has adopted just such a simple rule that it condemns as the sole criteria for assignment of channels and refusal to assign channels to cities throughout the nation.

Zone I is described as "one large contiguous area where there is a substantially higher density of population and concentration of cities." Zone II is described as an area which has a low population density "or where large cities are more widely separated." The Commission says that 180 mile VHF co-channel separations were not intended to be minimum co-channel spacings throughout the country and that 190 miles is the appropriate minimum spacing for Zone II because "if we were to permit stations at close separations in such areas, we would deprive persons residing in the interference areas between such stations of television service." The Commission says that a different situation exists in Zone I "where there is a substantially higher density of population and concentration of cities" and that *"lower minimum spacings in such an area will not have the tendency of depriving* residents of the area

[1] Minimum separations of 170 miles and 1000 foot antenna heights in Zone I make this standard service area slightly smaller than the standard service area for cities and communities in Zone II.

of television service, since there would be no overlapping of service contours and a multiplicity of alternative services." The simple rule that the Commission applies to these two zones makes the enormous difference of 4 to 6 miles in Grade B service radius between the two zones. Four to 6 miles increase in Grade B service radii doesn't make much sense in serving the outlying areas from a relatively few large cities in Zone II. Neither does a contraction of 4 to 6 miles in service radii with 20 mile closer co-channel spacing make much sense in Zone I. Since the results of the 20 mile differential in minimum co-channel spacings between Zones I and II have no effective or practical relationship to the objectives which the Commission espouses, it seems clear that *they* are only a convenient "simple rule" to limit local television facilities to the 1,274 cities included in the Table.

This is true unless the Commission has another basis to defend these minimum co-channel spacings. The major contention might be that engineering factors dictate the national policy of minimum spacings selected by the Commission for each zone in order to get efficient use of the spectrum assigned to television, even though the Commission has never said that this firm, fixed and final allocation plan does make efficient use of the spectrum.

In its Memorandum Opinion of July 13, 1951 (FCC 51-709) it avoided any defense of *this* plan. Likewise, in this Report it avoids a forthright avowal that *this* plan makes optimum use of the channels. Instead, it couches all its discussion of "A Table of Assignments" in the abstract, that "an engineered table * * * permits a substantially more efficient use of the available spectrum" or that "an Assignment Table drawn up upon an examination of the country as a whole *can confidently be expected* to more closely approximate the mathematical optimum * * *." The Commission even biases its recognition that "the maximum number of stations which can be accommodated on any given channel" can be calculated mathematically with the hedge "once a fixed station separation has been agreed upon." As a matter of fact, this dodge of mileage separations is the Achilles heel to this allocation plan's efficiency. The arbitrary mileage separations of 155 miles and 170 miles for co-channel UHF and VHF stations, respectively, in Zone I, and 175 and 190 miles, respectively, in Zone II, are not based upon engineering principles at all. These separations are based upon a policy decision of the Commission for specific size service areas for television stations. All of the engineering for this plan is subordinate to and complementary to this *non-engineering policy decision.* Therefore the arbitrary minimum co-channel separations of 170, 190 and 220 miles for VHF and 155, 175, 205 miles for UHF, respectively, have no sacrosanct engineering basis related *either* to optimum use of a single channel *or* efficient use of the spectrum—all of the channels.

Fortunately, there is a mathematical and engineering basis for selecting co-channel mileage separations for any given channel in each group, i.e., VHF channels 2 to 6 (low VHF), VHF channels 7 to 13 (high VHF) and UHF channels 14 to 83. To visualize the problem of achieving maximum use of a given channel so we can calculate its maximum use, it is necessary to think of a series of dots spaced an equal distance from each other on a map of the United States. If we draw lines between the dots we will have a series of equilateral triangles overlaying the entire United States. The dots will represent assignments of a single channel. The length of the sides of each equilateral triangle will be the mileage separation between stations. Such a scheme of assigning channels will be referred to hereinafter as a "full triangular lattice." Appendices 1 through 6 are a series of charts based upon a "full triangular lattice" of a single channel in each portion of the spectrum. Appendices 1 and 2 for 63 megacycles are valid for channels 2 to 6 (low VHF) utilizing 10 kilowatts, 100 kilowatts and infinite kilowatts of power at antenna heights of 500 feet and 1000 feet, respectively. Appendices 3 and 4 for 195 megacycles are valid for channels 7 to 13 (high VHF) utilizing 31.6 kilowatts, 316 kilowatts and infinite kilowatts of power at 500 feet and 1000 feet, respectively. Appendices 5 and 6 for 500 megacycles are valid for UHF channels 14 to 83 utilizing 100 kilowatts, 1000 kilowatts and infinite kilowatts of power at 500 feet and 1000 feet, respectively.[2] These appendices, all based on the record in this proceeding, show that the minimum spacing proposed in the Third Notice, as amended and finalized in this Sixth Report and Order, is too great to produce the maximum service on any given channel in any group: low VHF, high VHF or UHF.

Appendix 1 shows that any one of the low VHF channels, 2 to 6, utilizing 100 kilowatts of power at 500 feet antenna height obtains maximum efficiency of area coverage at 140 miles co-channel separation instead of the 170 miles minimum separation finalized in this Report.[3] It is significant that any one of this group of channels is as efficient in area coverage utilizing 10 kilowatts of power at 500 feet antenna height when co-channel spacing is 100 miles as it is utilizing 100 kilowatts of power at the same antenna height when minimum co-channel spacing is 170 miles.

This appendix further shows that *at all co-channel spacings between 100 and 140 miles,* every one of these channels is more efficient in channel coverage utilizing 10 kilowatts of power at 500 feet than it is utilizing 100 kilowatts at the minimum spacing of 170 miles.[3] Appendix 1 also shows that if we utilized powers of infinity [4] at 500 feet antenna heights the maximum coverage for any one of this group of channels would still be at 140 miles co-channel separation instead of the minimum finalized in the Sixth Report.

Appendix 2 shows that the maximum coverage for any one of this group of channels is obtained at co-channel spacings of 155 miles when 100 kilowatts of power is utilized at 1000 foot antenna heights. It also shows that the efficiency is as great at 145 miles co-channel spacing as at the 170 miles[3] minimum finalized in the Sixth Report and Order. It further shows that if *powers of infinity* were utilized at 1000 feet antenna heights the maximum coverage would be as efficient at 137 mile co-channel spacing as it is at 155 miles utilizing the *maximum power authorized in the Sixth Report and Order.* It is significant that if 10 kilowatts of power is utilized at the same antenna height, the maximum coverage would be obtained at 145 miles and is equally as efficient at 140 miles as at 150 miles.

Appendix 3 shows that any one of the group of VHF channels 7 to 13 utilizing 316 kilowatts of power at 500 foot antenna height obtains maximum efficiency of area coverage at 135 miles co-channel separation instead of 170 miles minimum separation finalized in this Report. It shows that any one of this group of channels is as efficient in area coverage utilizing 31.6 kilowatts of power at 500 foot antenna heights when co-channel spacing is 110 miles as it is when 316 kilowatts of power at the same height is utilized with the minimum co-channel spacing of 170 miles.[3] If the maximum power is utilized at the same height for any one of this group of channels they are equally efficient at 90 and 170 miles co-channel spacing.

Appendix 4 shows the efficiency of any channel in the same group utilizing the same designated powers at 1000 foot antenna heights. The maximum channel efficiency at this height utilizing maximum power of 316 kw occurs at 155 miles co-channel spacing; and it is equally as efficient at 130 miles as at the minimum of 170 miles[3] co-channel spacing provided for in the Sixth Report and Order. The maximum efficiency of one of this group of channels utilizing 31.6 kilowatts occurs equally from 140 to 150 miles spacing. If infinite power is utilized the maximum efficiency is at the co-channel spacing of 155 miles.

Appendices 5 and 6 show that the channel efficiency of each of the UHF channels is less sensitive to station spacing than either VHF channels 2 to 6 or 7 to 13. Appendix 5 shows that using 1000 kilowatts of power the maximum efficiency of a UHF channel occurs at 115 miles instead of 155 miles as finalized in the Sixth Report. This is the only group whose channels each increase in efficiency from 100 to 265 miles co-channel spacing utilizing antenna heights of 500 feet and infinite power. When 100 kilowatts at 500 feet are used the maximum efficiency of a UHF channel occurs at 100 miles co-channel spacing.

Appendix 6 shows that a UHF channel utilizing 1000 kilowatts at 1000 feet antenna height reaches its maximum efficiency at 130 miles co-channel spacing; utilizing infinite power at the same height it approaches a flat curve of maximum efficiency at around 250 miles co-channel spacing. When 100 kilowatts is used at the same height the maximum efficiency decreases at all distances beyond 100 miles co-channel spacing.

These appendices show that the Commission has not selected minimum co-channel spacings in its general rules and standards that obtain maximum coverage efficiency of Zone I if *any power* is utilized at 500 feet and 1000 feet antenna heights. This inefficient minimum spacing holds true for large areas in Zone II which have the same population and concentration of city characteristics as Zone I as will be more fully discussed in connection with the actual assignments employed in the Table of Assignments hereafter. While the Commission represents that it *can be confidently expected* that an assignment Table drawn upon the examination of the country as a whole will more closely approximate the mathematical optimum, the minimum spacings in the general rules and standards certainly ignore principles involved in obtaining that mathematical optimum. The VHF assignments actually employed in the Table of Assignments are even less efficient mathematically in Zone I particularly and in the parts of Zone II indicated. The UHF assignments are admittedly incomplete and a sample statistical analysis cannot be made; but such a complete analysis can be made of the VHF assignments. Appendices 7 through 18 are maps of all VHF assignments in the Table of Assignments. They are revealing, if not shocking, in their lack of adherence to the minimum spacings proposed in any zone. They are offensive, if not arbitrary and capricious, because the Commission will not permit a change in the Table until enough construction permits are granted to freeze this inefficient firm, fixed and final allocation plan forever.

Now let us examine the actual co-channel spacings employed in this firm, fixed and final allocation plan for VHF channels.

Appendices 19 and 20 are analyses of VHF assignments, as shown on the assignment maps, (Appendices 7 through 18). Appendix 19 shows that the median co-channel separation is 280 miles for all VHF channels assigned to cities throughout the nation. Appendix 20 shows that in Zone I the median co-channel separation is 250 miles for channels 2 through 6. There is no reason to believe that the separations employed in channels 2 through 6 are different than channels 7 through 13 in Zone I. If any section of the country is picked other than Zone I it is likely that the median co-channel separation will be within 20 miles of the 280 mile median for the entire nation.

Approximately ¾ of 1% of all VHF assignments are less than 175 miles. In Zone I only 4% of station separations are 170 miles or less and only 8% are 180 miles or less. In the entire country only 7% of all the co-channel separations are 195 miles or less.

It is apparent that the Commission has constructed this Table of Assignments without regard to the minimum co-channel spacings of 170 miles in Zone I, 190 miles in Zone II and 220 miles in Zone III for all VHF channels. It is also quite apparent that in selecting these minimum co-channel spacings the Commission has not had

[2] Each of these appendices is based upon the record in those proceedings.

[3] The minimum spacings for Zone I are are used because the minimum of 190 and 220 for Zones II and III respectively are less efficient yet for feasible antenna heights over most of these Zones.

[4] Infinite power cannot be achieved. For the purpose of this dissent the term means powers elevated as high as are practically obtaintable.

the efficient use of each of the VHF channels or the efficient use of the VHF portion of the spectrum devoted to television as its major objective. For example, appendices 1 to 4, inclusive, show the appropriate co-channel spacings to obtain the maximum efficiency of all VHF channels when maximum powers are utilized at all feasible antenna heights. Appendices 1 and 4, of course, are based upon an assignment of channels on a full triangular lattice basis. These appendices are the efficiency charts for optimum use of the VHF portion of the spectrum. It is fair to use these efficiency charts as a basis for comparison of efficiency employed in constructing the actual Table of Assignments for each of the channels because the separations actually used form a lattice work of co-channel stations at the distances indicated in the maps for each one of the VHF channels. Appendices 7 through 18 have had lines drawn through each co-channel assignment of each single VHF channel and the figures associated with each line show the distances to all co-channel stations in every direction. An examination of these maps shows that they form triangular lattices reaching all the way from 550 to 165 miles. Insofar as any one of these separations is expanded from the most efficient co-channel spacings, they are a degradation of the efficient use of the VHF spectrum. This is true because the geometric triangles formed by the actual assignments employed in the Table are just a variation from the theoretical equilateral triangles in the full lattice. Appendices 1 to 4 show the percentages of channel efficiency which will be obtained with optimum co-channel spacing on the low VHF (channels 2 to 6) and the high VHF (channels 7 to 13). Since the maps (appendices 7 to 18) and co-channel distribution curve (appendices 19 and 20) show that the median co-channel spacing is much greater than the optimum for channel efficiency (250 for Zone I; 280 for the entire country), it must be concluded that the channel efficiency is materially degraded. The following table shows the amount of this degradation:

	ZONE I					
	63 mc	500′	100 kw	63 mc	1000′	100 kw
Separation in Miles	140	170	250	155	170	250
Efficiency of Coverage	23%	21%	14%	28%	28%	22%
	195 mc	500′	316 kw	195 mc	1000′	316 kw
Separation in miles	135	170	250	153	170	250
Efficiency of Coverage	28%	27%	14%	35%	28%	21%
	ZONE II					
	63 mc	500′	100 kw	63 mc	1000′	100 kw
Separation in miles	140	190	280	155	190	280
Efficiency of Coverage	23%	18%	13%	28%	28%	18%
	195 mc	500′	316 kw	195 mc	1000′	316 kw
Separation in Miles	135	190	280	153	190	280
Efficiency of Coverage	28%	22.5%	13%	35%	31%	15%

This Table and Appendices 1 to 4 show that the minimum co-channel spacing of 170 miles for VHF channels in Zone I does not permit maximum efficiency for any VHF channel when maximum power is utilized at any feasible antenna height, that co-channel spacings should be a little larger for higher antenna heights when higher powers are utilized in order to gain maximum efficiency on any VHF channel, and that more channel efficiency is gained by increasing antenna heights from 500 to 1000 feet than by increasing transmitter power by tenfold.

They show further that channel efficiency is cut about one-half with 500 feet antennas and one-third with 1000 foot antennas when the spacings are increased from 135 or 140 miles to 250 miles.

This table further shows for the median spacing for Zone I of 250 miles on 63 mc at 1000 feet and 100 kw, the channel efficiency is reduced from 28% to 22%, a reduction of 25%. For 195 mc, at 1000 feet, 316 kw, channel efficiency is reduced from 35% to 21%, a reduction of 40%. For those parts of Zone II which have a median co-channel spacing of 280 miles, the channel efficiency for 63 mc at 1000 feet and 100 kw is reduced from 28% to 18%, a reducation of 36%. For 195 mc at 1000 feet and 316 kw, from 35% to 15%, a reduction of 72%. This is significant because there are substantial areas in Zone II in which the high density population and concentrated city characteristics are the same as in Zone I.

On the other hand, if the maximum station efficiency—*the largest coverage* for any single station given a VHF assignment—is the goal of this allocation Table, the minimum co-channel spacings chosen (and these are too large for optimum co-channel efficiency) are at war with this goal because *maximum channel efficiency will not permit maximum station efficiency.* The spacings which give maximum single station coverage are approximately twice as great as are necessary to give maximum channel efficiency.

The Commission pretends to follow a different policy in Zone I and in Zone II. It says Zone II is an area which has a "relatively lower population density or where large cities are more widely separated" and therefore wider separations are justified. In Zone I it says that the concentration of cities in wide areas of contiguous high density population justifies lower co-channel spacings. In fact, the spacings actually employed in the Table tend to protect the Grade B contour without any interference in both Zones I and II. The Commission said that in Zone I it was not concerned with interference to the Grade B contour because "there would be an overlapping of service contours of stations on different channels located in the interference areas." They have, however, protected the B contour in this zone to the same degree substantially that they did in Zone II, notwithstanding this statement of policy.

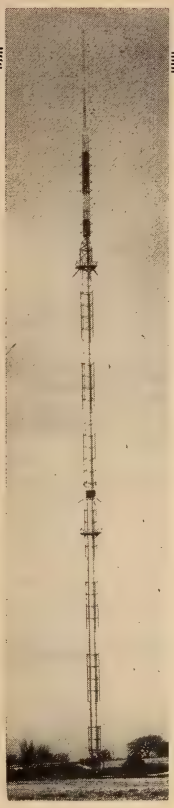
The spacings actually employed in constructing the Table for Zone I are large and incomplete lattices which result in less rural area coverage than if smaller and more complete lattices (more nearly a full lattice at optimum spacing) had been used. The smaller lattices would result in optimum city and rural coverage on any individual channel or on all channels collectively.

The engineering evidence in the record or that which can be computed by the Commission upon the basis of such evidence in the record, shows that more coverage is obtained on any channel by closer spacing than wide spacing. Specifically, it shows that for each VHF channel in each group the coverage efficiency is higher with 1000′ antennas and 10 kw power for low VHF, and at 31.6 kw power for high VHF, at spacings of 145 miles and 153 miles, respectively, rather than at 250 miles spacing, the median spacing actually used in Zone I. And even if maximum powers of 100 kw on low VHF and 316 kw on high VHF at 1000′ are used, the optimum co-channel spacing only increases approximately 10 miles for 63 mc (from 145 to 155 miles) and for 195 mc (from 153 to 155 miles). Therefore, the above enumerated engineering principles still apply for these powers. So when the Commission says that it is using wide spacings to take advantage of the wide coverage capabilities of the VHF to cover rural areas, it is not based upon engineering fact, unless they mean single station coverage, when applied to Zone I and sections of Zone II where the geographic, population and city characteristics are like Zone I.

The Commission may contend that the efficiency charts (Appendices 1 to 4) are based upon total service of each channel assigned and that therefore they do not apply to the assignment policy of the Commission which recognizes only Grade A and B contours. It is true that the efficiency charts are based upon the total service of a station. Let us examine what that means. The total service is defined as the sum of all locations, no matter how distant from the transmitter, which receive a signal from the desired station *for at least 90% of the time* which is at least 28 db above the 10% interfering signal from each co-channel station, not more than 6 db below the adjacent channel interfering signal, and 30 db above random noise. The standard measurement of these signals uses the F 50-50 and F 50-10 curves.

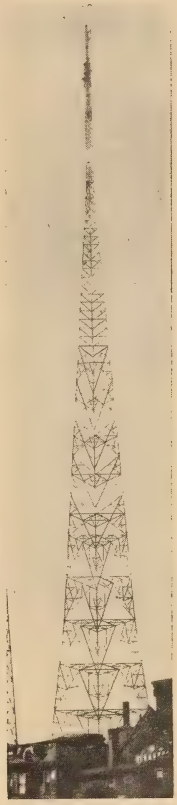
The Ad Hoc Report indicated and the Commission tacitly admits that total service of a station as hereinafter described is the most meaningful definition of television service, either for a station or a channel, because it counts every possible location that gets an acceptable signal, regardless of how far removed it is from the transmitter. But the Commission for allocation purposes does not recognize this total service—to the sum of all locations for at least 90% of the time. It just recognizes a portion of such total service provided by the F 50-50 curve. These two segments are designated Grade A and Grade B service. The Commission specifies that Grade A service has that quality acceptable to the median observer expected to be available for at least 90% of the time for the best 70% or more of the receiver locations. Grade B service is defined as service where acceptable signals are available for at least 90% of the time to 50% or better of the locations.

Appendices 2 and 4 show that with the median spacings of 280 miles used in constructing the Table only 15% of the United States would get service from one channel (316 kw-1000′-195 mc). If optimum channel spacing of 155 miles were used, 35% of that portion of Zone II which is like Zone I would get service from one channel. This is 2⅓ times as much area as would be covered by the single channel with 280 mile spacing. This means that at 280 mile spacing it takes more than 6 high VHF (channels 7 to 13) to cover the country once and at optimum spacing of 155 miles it only takes 3 of such channels if we assume in both cases that maximum power is utilized at 1000′ antenna heights. Even if we did not have an allocation plan, it is doubtful that applicants filing for the channels as they saw fit could destroy 4 of the 7 channels the way the Commission has in this allocation plan.



If it is contended by the Commission that Appendices 2 and 4 based upon the total service of a station are not indicative of what happens to Grades A and B service, used by the Commission as the criteria for allocation purposes, even from this standpoint closer spacings are more efficient. Appendices 21 and 22 show that high VHF (channels 7 to 13) utilizing 316 kw power at 1000′ at the median co-channel spacings of 250 miles in Zone I achieve only 12.3% channel efficiency of area within the Grade A type contour and 23.6% within the B type contour. They show further that under the same conditions but at 155 mile optimum co-channel spacing the area within the Grade A contour is 30.5% and the area within the B contour is 37.4%. This is a 148% increase of coverage within the Grade A contour and a 59% increase of coverage within the B contour. However, it must be remembered in the total coverage of the channel at 155 miles, efficiency of total coverage is 72% greater than at 250 miles. Of course, if you are comparing the coverage of a *single* station separated at 250 miles with a *single* station at a co-channel spacing of 155 miles, the area covered by each is 1922 square miles and 1072 miles, respectively. But it must be remembered that if you are going to make such a comparison for the 155 mile spacing you can get 2.6 as many station assignments on an area basis as you can with 250 mile spacing. The total area covered by the 2.6 stations is 2787 square miles. This is 860 square miles *more area coverage* by the closer spaced station on any high VHF channel. From any standpoint more complete area coverage can be had with high band VHF channels at the optimum co-channel spacing of 155 miles rather than 250 miles which the Commission has actually used in constructing the Table in Zone I.

III



It now becomes important to compare the minimum co-channel

IDECO
ONE OF THE DRESSER INDUSTRIES

TALL TOWERS "TOPS" in TELECASTING

780′ Guyed Tower recently completed for Station WHO in Des Moines, Ia.

709′ Free-Standing Tower erected on building for Station KRNT in Des Moines, Ia.

Guyed or Free-Standing Types!

"CUSTOM-ENGINEERED" for ground or building installation . . .

In perfect stride with the magical growth of Television, IDECO, America's pioneer manufacturer of TALL TOWERS, has established high standards of comparison in the industry for SAFETY — SERVICE and SAVINGS!

From coast to coast and from border to border, sturdy, symmetrical, "CUSTOM-ENGINEERED" Ideco towers dominate the horizons of hundreds of American communities today.

SAFETY

Of prime importance to the station owner is the factor of SAFETY which is a "Must" for Antenna Supports which are installed in downtown or congested areas.

The fact that every Ideco Tower—either guyed or self-supporting—is designed and fabricated for the specific location in which it is to be erected, insures the ultimate in structural safety from every standpoint.

SERVICE

The rigid, triangular design of all Ideco towers minimizes distortion and is added assurance that the tower will retain its original shape through the most severe storms. Added years of trouble-free service are also assured by the fact that all structural members are hot-dip galvanized to prevent corrosion.

SAVINGS

Substantial savings in first cost and in maintenance costs result from the erection of IDECO towers. The triangular design requires less structural material—Erection time and costs are considerably reduced—Less material and labor time is required for foundation installation and maintenance costs are reduced.

A COMPLETE SERVICE—From Plan to Program

Ideco engineering handles the entire job for you! From foundation specifications to antenna array and including erection and inspection after erection, Ideco handles every detail and there are no obnoxious "Hidden Costs".

spacings as they affect the total single station service between the three bands—low band VHF, high band VHF and UHF. This is very important from a competitive standpoint, especially in cities where UHF and VHF are intermixed. The *minimum co-channel spacings* adopted by the Commission are such that they tend to restrict the service on any given UHF channel due to co-channel interference. It will now be shown that the *minimum co-channel spacings* adopted for the several bands unnecessarily reduce coverage of a single station on a UHF channel compared with single station coverage of a VHF channel and therefore make the UHF station non-competitive with VHF. It will also be shown that it is necessary to modify the minimum co-channel spacing for the UHF stations to equalize the coverage efficiency with respect to the VHF stations. This is particularly compelling because the UHF is just now being introduced for commercial broadcasting and the competitive value of these channels is 17,000,000 receivers behind the VHF channels. In addition, the higher cost of original construction and operation and the unavailability of equipment for UHF stations as compared with VHF stations are handicap enough already without the minimum spacings for UHF further threatening its competitive position with a VHF station in an intermixed market. In addition, the UHF receivers actually will be more expensive and for a time less reliable than VHF from the standpoint of the prospective viewer. At the minimum spacings of 155 miles for UHF and 170 for VHF, the UHF could never become competitive from the standpoint of single station coverage efficiency using maximum powers with antenna heights from 500′ to 2000′, assuming that both groups of stations have the same antenna height. However, if a 2000′ antenna is used on UHF with a maximum power of 1000 kw and a 500′ antenna is used on low band VHF with 100 kw, UHF coverage is approximately equal to the low band VHF. Appendices 23, 24 and 25 are charts showing the distribution of locations receiving acceptable service on each of the bands utilizing maximum power and antenna heights of 500′, 1000′ and 2000′, respectively, with spacings of 170 miles for VHF and 155 for UHF. They further show that in order to have the UHF cover the same total station service based upon minimum VHF spacing, the UHF licensee would be compelled to operate with maximum power of 1000 kw at 2000′, while the low band VHF station could operate with 100 kw at 500′. Obviously when a UHF station has to spend money for a 2000′ tower utilizing 1000 kw in order to compete with a low band VHF licensee with 500′ tower at 100 kw, he has a very serious financial handicap. From an economic standpoint no encouragement is given the prospective UHF licensee to use the UHF band in an intermixed city.

Especially is this true since the UHF broadcaster does not produce any better picture than the VHF broadcaster. The UHF standards—lines, frames and fields—are identical with the VHF. It would seem incontrovertible that from an economic standpoint the Commission ought not to adopt a policy of minimum spacings which require heavy expenditure for 1500 feet additional tower height and 900 kw more power in comparison with the low band VHF to cover substantially the same number of locations in the VHF service area. As a matter of fact, in comparing the relative number of locations served by UHF stations at minimum co-channel spacings with VHF stations at spacings actually employed in constructing the Table of Assignments, UHF stations operating in the same community would cover substantially less locations (approximately 50%) than VHF stations. This is significant because the Commission has adopted a policy of minimum co-channel spacing of 170 miles for VHF channels, but the actual VHF assignments tend toward a service which is limited by noise only. It has been said that the UHF Table is incomplete; nevertheless the minimum co-channel spacing for UHF is still 155 miles. Therefore this minimum spacing for UHF is an economic threat to anyone who might invest in a 2000′ tower and equipment to generate 1000 kw radiated power in order to compete with a VHF licensee unless the minimum station spacing is at least 200 miles. What the applicant for a UHF license needs in order to be assured of competitive equality with the low band VHF, with VHF spacings actually employed in the Table (Appendices 7 to 13) would be a Table of co-channel spacings for UHF greater than 250 miles and powers considerably above 1000 kw.

Inasmuch as the Commission has assigned UHF more extensively to small communities, obviously all of our experience in broadcasting would certainly show us that licensees in such areas never will be able to make economic use of the UHF stations at maximum powers and antenna heights. In addition, insofar as UHF has been assigned as a local service to smaller communities generally, we have placed the heaviest burden upon both the broadcaster (the original construction cost and operating costs are higher for UHF than for VHF) and upon the viewer (VHF-only receiving sets will require adapters and sets capable of receiving UHF will be more expensive than for VHF). Even if a prospective UHF licensee would weigh the cost of the purchase of an existing VHF station in any one of the large multi-station markets with its high coverage efficiency assured by the actual spacings employed in the Table, versus capitalization of the cost of converting all VHF-only receivers presently in such markets, there still would be a large portion of the VHF service area he could not cover if both UHF and VHF stations operated at the same antenna heights and at the respective maximum powers. The prospective applicant for UHF facilities in a major market where VHF is already operating has two costs to capitalize: (1) the costs of his station and (2) the cost of buying an audience, i.e., UHF converters for VHF-only receivers. Even if these converters were available to him at manufacturer's cost, this expenditure for just the opportunity to get listeners in such a mixed market would probably be more than his entire UHF station. And after capitalizing this additional cost, which the VHF licensee does not have, the minimum spacings and the spacings actually employed in the Table of Assignments for VHF channels will give him only half a VHF audience.

Obviously, the Commission can relieve the situation without throwing this tremendous burden upon the prospective UHF licensee insofar as equalization of service area is concerned by widening the UHF co-channel spacings and narrowing the VHF co-channel spacings to equalize the distribution of locations receiving acceptable service from all groups of channels. This certainly should be the main objective of any allocation plan where a new band of frequencies is being introduced for commercial operation.

The Commission blows hot and cold on two sides of the same proposition. On the one hand it says that maximum rural coverage is obtained with wide spacings, and on the other hand it says if you have a large number of cities close together you can get large rural coverage by the use of many stations on different channels because "there would be an overlapping of service contours and a multiplicity of alternative services." The question unanswered by the Commission is: why did it persist in wide spacings in constructing the Zone I portion of this Table? As a matter of fact, from the standpoint of efficient channel coverage there is no answer because the actual assignments have moved toward *maximum single station efficiency* instead of *total maximum channel efficiency*. Therefore, this firm, fixed and final allocation plan *shrinks* the available 7 high band VHF channels used at the median spacings of 280 miles actually employed in constructing the Table and gives no more coverage than three of the same group of channels if 155 miles optimum spacing were employed.

If co-channel spacings of 170 miles were actually used for VHF assignments in the Table and 200 miles for UHF at maximum powers (100 kw and 316 kw for low VHF and high VHF respectively and 1000 kw for UHF) and all operate at antenna heights of 500 feet, UHF can be competitive with low band VHF. It can be competitive with low band VHF when 1000 feet antenna heights are used at the same respective spacings and powers. UHF is not only competitive with low band VHF but is also competitive with high band VHF when all operate at 2000 feet antenna heights with the same spacings and powers indicated above. Therefore, it is concluded that a 200 mile minimum co-channel spacing for UHF assignments in the Table is necessary to make UHF single station coverage competitive with VHF station coverage provided 170 mile spacings are actually adhered to for VHF channels. Appendices 23 through 28 show that the 170 mile co-channel spacings for VHF channels in Zone I and those portions of Zone II which have the same characteristics as Zone I, as heretofore indicated, should not be just a *stated policy* of the Commission for VHF channel assignments but they should *actually be employed* in constructing the Table to make UHF at 200 mile co-channel spacings competitive with VHF. These charts further confirm the fact that UHF has the potential of equalizing the station coverage of both high VHF and low VHF when all operate at 2000 feet antenna heights at the respective maximum power for each group and that UHF has better potential for wide area coverage than either of the VHF groups of channels when the UHF is spaced at 200 miles and the VHF is spaced at 170 miles or its equivalent. They show that there is a basic error in the Commission's *assumption* that *only VHF channels* have a potential for wide area coverage—assigning VHF channels to the largest cities.

Appendices 26, 27 and 28 show that you can make any one of these groups of channels (low band VHF, channels 2 to 6; high band VHF, channels 7 to 13; and UHF, channels 14 to 83) the preferred wide area coverage channels simply by employing wider spacings for the groups the Commission wishes to prefer.[*] Appendices 23 to 28, inclusive, show that if a proper co-channel spacing policy is incorporated into the general Rules and Standards of the Commission and actually followed in an assignment table, each can be made to serve the same area and the same relative number of locations in such area. This ought to be a bare *minimum objective* for a policy of intermixture of VHF and UHF channels in the same city. *Contrary to this objective*, the general Rules and Standards and this firm, fixed and final city-to-city allocation plan show every sign of trying to skirt around the natural wide area coverage potential of UHF as if the technical problems in both transmitter and receiver equipment development for UHF may never be overcome or that scientific knowledge in overcoming the present equipment difficulties is frozen at the present stage.

Obviously, the Commission's assignment plan that presumes to look ahead for forty years ought to provide a sound economic setting for licensees of each group of channels to be competitive with all others to afford each licensee a fair chance to render service to comparable service areas, with the same opportunity for fair return on his investment.

Inasmuch as the Commission has used UHF by and large for assignment to small cities and as a mere supplement to the wide area single station coverage of VHF channels located generally in the larger cities, the burden of UHF is thrown generally upon the people least able to pay if they are ever to receive a Grade A service—the rural populations. General experience would tell us that the rural populations are the least able to pay the higher price (higher cost receivers) for Grade A television service and that a prospective UHF broadcaster has less chance to recoup investment in constructing and operating a UHF station which costs more than a VHF station. These considerations are not consistent with the original basic purpose of this firm, fixed and final

[*] Provided sufficient antenna height is utilized by UHF.

allocation plan—to protect the small communities against preemption of VHF channels by large cities. The Commission should abandon the use of VHF in large cities for wide area rural coverage. Optimum spacings less than those used in the assignment Table or in the Rules and Standards give more Grade A service to the rural population than the method used by the Commission.

Appendices 1 to 6 show incontrovertibly that optimum channel efficiency can be obtained at the optimum spacings indicated below, at both minimum and maximum powers, and antenna heights of 500′ to 1000′, as follows:

	Antenna Height
Low band VHF	500 feet
	1000 "
	500 "
	1000 "
	500 "
	1000 "
High band VHF	500 "
	1000 "
	500 "
	1000 "
	500 "
	1000 "
UHF	500 "
	1000 "
	500 "
	1000 "
	500 "
	1000 "

The values taken from the efficiency charts (Appendices 1 to 6) and the above table are practical because we can utilize powers, heights and co-channel spacings at any values within these parameters to obtain optimum use of 82 television channels. Roughly, ten times the power is required to obtain the same expansion of coverage that can be obtained with doubling the antenna height.

Values of power, height and spacing between these parameters may be used to obtain more optimum use of all channels, VHF and UHF. It is unreasonable to use excessive powers which preclude a simulated full triangular lattice, especially in Zone I and the parts of Zone II hereinbefore indicated, which would provide maximum station coverage at the expense of optimum use of the spectrum (all television channels).

Appendices 1 to 6 show that the maximum channel efficiency as distinguished from single station efficiency is obtained regardless of powers ranging from rather nominal values of 10 kw for low band VHF, 31.6 for high band VHF and 100 kw for UHF, to the highest practical powers obtainable with co-channel spacings ranging from between 100 and 155 miles. Therefore, it would seem logical to utilize this difference in efficiency of antenna heights versus power in a manner that will fit the median size city, as a general allocation plan, and the largest city as an exceptional case. To put it graphically, use a lattice that will fit the median size city in the country and tear out the lattice for the exceptional case, i.e., Los Angeles from a standpoint of geographic considerations and Denver from the standpoint of population characteristics.

Appendix 30 illustrates the different spacings that can be used with standardized interferences to provide substantially equal service areas for cities of all sizes located at random distances from each other in order to simulate a perfect full lattice.

Appendix 31 shows how to get different sizes of service areas for different size cities to supply their respective needs—trading areas or areas of cultural influence—with different co-channel spacings using standardized interferences and different powers and antenna heights. It shows how to get that unequal service area to meet the respective needs of the smallest community and the largest community with random spacings, random powers and random antenna heights in each group of frequencies. A sample of how this table may be put into effect is shown by Appendix 30.

IV

its excessive separation factor by arguing that it is necessary in view of the limited amount of propagation data now available to provide a "safety factor." The majority recognizes, however, that such a safety factor can only be justified if it is possible in the future to modify its present separations. If the separations in the Table are to be fixed, the excuse for the "safety factor" must fail. The Commission says that when more propagation data is available it will take appropriate action with respect to modifying its Table — presumably assigning channels at closer spacings. This seems a plausible solution on the surface. However, the Commission completely destroys any hope that more assignments will be made in the VHF portion of the spectrum by its admission in footnote 25 that it has not been able to remove existing operations which do not comply with its minimum separations because "it has not been possible to remove these cases without unwarranted dislocation." At present there are only 108 stations on the air in 64 markets. Obviously any attempt at adjustments after more stations get on the air would involve more unwarranted dislocations which would preclude the Commission from adding more assignments. Since each additional station put on the air would increase the problem of dislocation involved in any attempt to modify the spacings adopted now, it is apparent that the Commission's "safety factor" is simply an increase in mileage separations arbitrarily imposed without any propagation data to support it in the VHF. In the UHF where propagation data by contrast is almost nonexistent, they have failed to put in a safety factor in the general rules for co-channel spacing of UHF stations. Since the information on UHF propagation is admittedly so meager, the Commission is much more harsh with UHF spacings than they are with VHF. Either the Commission does not need a "safety factor" in the VHF or it is very reckless with the UHF, since the UHF propagation data that is available shows that interference is higher on the UHF than it is in the VHF on any comparable distance in miles from the transmitter. As a matter of fact, a minimum of 183 miles is required in the UHF to protect the Grade A service area of UHF stations. No place in the minimum spacing in the general rules and regulations have they impinged upon VHF Grade A service. In short, the Commission provides a "safety factor" where the information indicates it is not needed (in the VHF) and they don't provide it in the UHF band where the information is so meager it might be advisable. This is an admission that the Commission means to make local (small coverage) service out of UHF channels even when assigned to the largest markets regardless of its future potential for wide area coverage, or that it has a double standard in applying the "safety factor." Obviously the "safety factor" is a snare and a delusion.

The whole theory of a safety factor in minimum co-channel spacings is based upon administrative convenience rather than any sacrosanct value that may be attached to the minimum co-channel spacings adopted in the Commission's decision today, at least within the parameters of the engineering evidence shown by the efficiency charts, Appendices 1 to 6, for the powers, antenna heights and separations indicated.

The whole idea that engineering considerations dictate the respective minimum co-channel spacings for each zone stems from two inconsistent ideas expressed in the Third Notice, Appendix A, paragraph C4a, wherein the statement is made predicting service areas and interference: "The Commission is satisfied that on the basis of the data presently available to it the data underlying the propagation charts are sufficient to afford an adequate statistical basis for describing the field intensities under average conditions, but it is expected that there may be substantial variations in individual areas." On the other hand, in the same document, Appendix A, paragraph E1, under the subject of station separations, co-channel separations, the statement is made: "In the second place, much of the propagation data —although the best available * * * upon which the Commission relies is quite meager * * * until sufficient propagation data are available."

From these two statements the Commission acquires the philosophy that the tropospheric information it has is good enough for a national allocation plan but insufficient for *particular assignments* in specific cities. From an engineering standpoint there is absolutely no basis in fact to pretend that there is a difference in troposphere effects between stations where the co-channel spacings are reduced, the antenna heights raised to obtain greater efficiency in coverage and the power lowered to equalize the minimum co-channel spacings adopted in the Sixth Report and Order.

The Sixth Report and Order gives the implicit impression that engineering has dictated this unique plan—the inordinately wide spacings actually used in constructing the Table. *It should be clearly pointed out that engineering factors do not determine a unique allocation.* Thousands of different plans could be drawn up which were correct engineering-wise, changing the minimum co-channel mileage separations for each group of channels within the parameters of power and antenna heights that Appendices 1 to 6 recommend. Therefore there is wide latitude from an engineering standpoint for thousands of different plans. The engineering only places limitations on what can be done. The Commission has relied upon the simple rule of minimum co-channel spacings (even though it admits that a simple rule cannot be utilized) and for administrative convenience wants to throw away all of the engineering factors upon which all the minimum co-channel calculations for the plans are based. For instance, all of the Grade A and B service areas at all powers and antenna heights used in constructing the Commission's general rules and regulations and in its city-to-city allocation plan are based upon the simple formula that the desired station for at least 90% of the time produces a signal at the edge of its Grade B contour at least 28 db above the 10% interfering signal from each co-channel station, not more than 6 db below the adjacent channel interfering signal and 30 db above random noise. The standard measurement of these signals is the F 50-50 and the F 50-10 curves. Tables for the F 50-50 curve at 10 mile intervals from the transmitter show the field intensity of a 1 kw transmitter in db for antenna heights at 500, 1000 and 2000 feet. The F 50-50 is Appendix 32. The interfering signal field intensity of a 1 kw transmitter in db for the F 50-10 curve at distances for every 10 miles from 70 miles to 300 miles are shown in Appendix 33. Any layman can calculate the rate of decline of signal strength for the desired station from Appendix 32 between any 10-mile separation and the rate of decline in the interfering signal with Appendix 33 at every 10-mile spacing and be able to add the appropriate number of db's for kilowatts of power contemplated to the values in this Table for both the desired and undesired station to predict the desired station's service area by jockeying antenna heights up and power down until the efficiency of antenna heights over radiated power brings the desired result. In this manner he can *either equalize* the approximate service area maintained by the minimum co-channel spacings adopted by the Commission or obtain a service area which will satisfy the community to be served and at the same time make more optimum use of the channel. There is no secret or trick in maintaining the ratios by this simple device and give the same safety factor from the standpoint of tropospheric interference as is given by the Commission with its minimum co-channel spacings adopted in this decision. The Commission on the other hand would leave an area without a channel assignment even if it is just one or six miles under the minimum spacing, rather than make the channel coverage (optimum spectrum use) more efficient. Cf. Coldwater, Michigan, and Pittsburgh, Pa., in the city-to-city portion of the Commission's decision. Again the Commission's false "safety factor" philosophy prejudices those least able to pay in favor of the great metropolitan populations. It would rather space stations so far that their

service is limited by noise, *a 100% of the time interference factor* for the rural and small urban resident, by throwing emphasis to the importance of *a 10% of the time co-channel interference factor*. The rural resident can't get a signal in the noise zone with a hunting license because there isn't any signal but the metropolitan area resident in the interference zone can get a usable signal by orientation of a relatively inexpensive antenna installation (compared to the listener miles away from the transmitter) to take advantage of its ordinary rejection ratio. Therefore, it seems unjust and unreasonable that the Commission should take the hard and fast rule of minimum co-channel spacings as the sole criteria for station assignments as if they were all utilizing maximum power and maximum antenna heights.

I pointed out in my dissent to the Memorandum Opinion of the Commission on the statutory authority to adopt a Table of Assignments (released July 13, 1951) that Section 307 (b) of the Communications Act requires the Commission to determine the problems of fair, equitable and efficient distribution of radio service among the several states and communities in proceedings on applications for radio station licenses and modifications and renewals thereof. I think it plain that Congress intended not merely to protect rights of applicants but to provide the most effective procedure for Commission determinations. I do not believe that the Commission can substitute its views or preferences for other procedures for the method laid down by Congress. I will not here repeat at further length the arguments contained in my dissenting opinion above referred to.

If it be assumed, however, that the Commission is free to evade its duty to decide 307(b) issues in competitive hearings on applications and in lieu thereof to make a predetermination of such issues in a general proceeding, there are two fatal objections to the Commission's present attempt to make such a predetermination. First, essential considerations required to be decided on the basis of fact have been completely ignored by the Commission in the instant proceedings. See *Easton Publishing Co.* v. *FCC*, 175 F(2) 344, 4 RR 2147. The second is that the engineering basis upon which the Commission purports to rest its decision does not in fact support the result but on the contrary demonstrates its invalidity.

The majority admits that the most important elements in its assignment plan is its minimum spacing or station separation factor. It is demonstrated below that the minimum separation factor stated by the Commission is unsound from an engineering standpoint and is designed to preclude rather than permit maximum service. Further than that, it is shown that the Commission has completely failed to make assignments which would be permitted if it adhered to its own separations. The net result is that the Commission has drastically limited the number of television stations which could be licensed in this country and has created an artificial scarcity. I am profoundly disturbed not only by the long range effect of this action but by the immediate consequences, which are that years of litigation must ensue before any considerable number of new television stations can be put in operation in the United States.

It is theoretically possible from a technical standpoint to provide for over 2½ times as many VHF stations if a proper separation factor is used as could be provided if the Commission's separation factor is used. Practical considerations undoubtedly would limit somewhat the number of stations that are possible from a theoretical standpoint. But these considerations apply alike to the number permissible using the Commission's separation factor and to the number possible using a proper separation factor.

The standard by which the rules and television allocation table adopted by the Commission must be tested is whether they provide "a fair, efficient and equitable" distribution of television service in compliance with Section 307(b). As the Commission said in its Memorandum Opinion in this proceeding released on July 13, 1951, that is the "standard to be applied in all cases . . .". In their Report they have given only lip service to that standard and then principally in situations in which the standard enabled them to reject some contention made by one or more of the parties (par. 194).

The fatal defect in the approach of the Commission is that, despite their occasional reference to the "fair, efficient and equitable distribution" standard, that standard has been abandoned in favor of an undiscriminating adherence, sometimes explicit and always implicit, to a supposed policy of administrative convenience. The inevitable result is an allocation which is neither fair nor efficient nor equitable and which so far departs from the realities as to be completely arbitrary and capricious. The preceding discussion has to some extent indicated the arbitrary nature of the engineering conclusions upon which the allocations rest; a brief summary of a few of the practical results will serve to illustrate how far the allocations serve to defeat the injunction of the Communications Act that the Commission "generally encourage the larger and more effective use of radio in the public interest" (Section 303 (g)), and "when and *insofar as there is demand for the same*, the Commission shall make such distribution of licenses, frequencies, hours of operation, and of power among the several States and communities as to provide a fair, efficient, and equitable distribution of radio service to each of the same." (Sec. 307(b)) (emphasis supplied).

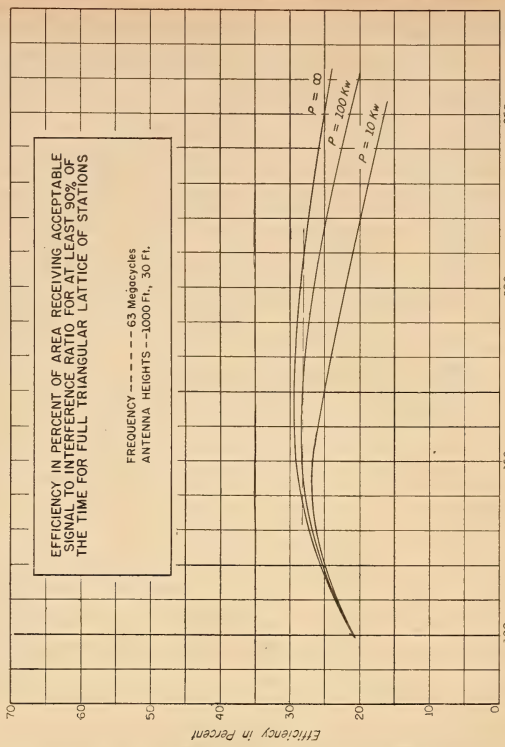
The Commission emphasizes at the outset that the allocations "must be based upon, and must reflect, the best available engineering information" (par. 2). Having announced that undebatable proposition, they then proceed to adopt a table of allocations based upon curves which they explicitly concede are inapplicable to any specific station. This is the first administrative decision of which I am aware which so frankly conceded that the general principles underlying it cannot be applied to any specific situation which will be governed by the decision. As the Commission admits, the allocations are based upon hypothetical situations which will never occur, upon the assumption contrary to fact, that the stations which will be involved will be "typical ones producing the average field intensities described by the charts." Such an arbitrary assumption may simplify the work of the Commission but it can scarcely be expected to result in a fair, efficient or equitable distribution of television facilities. It is easier to estimate the number of lemons in a barrel if you assume the barrel is filled with lemons, but the estimate is of dubious value if you know in advance that the barrel contains grapefruit and oranges but no lemons.

The most striking result of this blind devotion to administrative convenience is the arbitary specification of minimum co-channel separations on the mistaken theory that "the larger and more effective use of radio in the public interest" and the "efficient" distribution of television service requires maximum station coverage in terms of freedom from theoretical co-channel interference rather than maximum use of the available frequencies. The Commission has sought to protect the interference-free service areas of existing and proposed stations by reducing substantially the number of stations which can be accommodated throughout the country by the device of establishing excessive minimum co-channel assignment spacings. The result is, as the Commission states, to improve the Grade B service of the proposed stations; it is also greatly to reduce the number of stations and the availability of additional service, both Grade A and Grade B, to the rural areas and to increase the areas which will not receive any television service. The result is to sacrifice efficiency in the distribution of the available channels in order to confer an unnecessary benefit upon the fewer persons who, because of the Commission's Rules, will be able to enter the field. In addition, the Commission has established a new class of stations which will utilize these same channels for non-commercial educational facilities which play a part in the scarcity of VHF assignments for both commercial and educational use in any city.[6]

The resulting inefficiency in the utilization of available channels would have been sufficiently serious had the Table conformed to the Rules. But, in compiling the Table, the minimum co-channel separations were largely ignored; for example, in the Eastern Zone, only some 4% of the allocations approximate the prescribed minimum, and the median separation is 250 miles, or 47% in excess of the minimum of 170 miles specified in the Rules. That means that many communities are losing the possibility of television service in order that stations located in other communities may be protected.

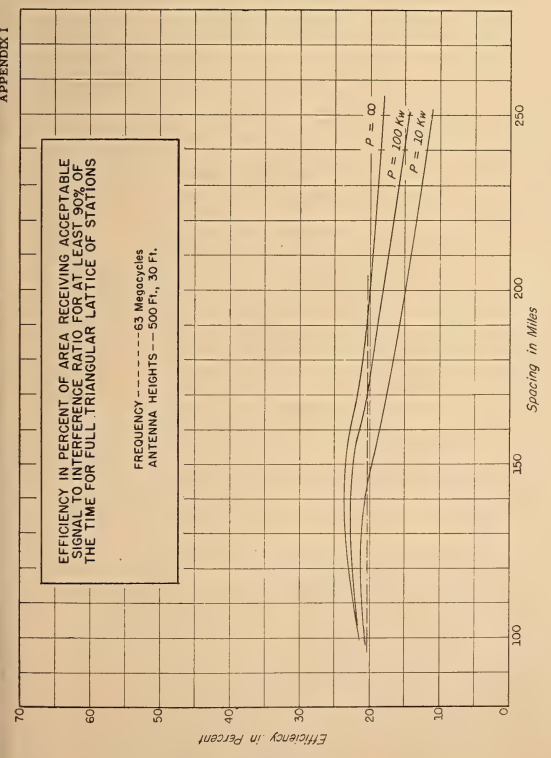
That unfortunate consequence is worsened by the arbitrary rules and the Commission's assumption that all stations, however small the community, will operate at the maximum permissible power. The Commission has rejected the proposal for assignments based upon limited power stations in small communities (par. 137-8) on the grounds that the Table and Rules "are based on the concept of affording each station the widest possible coverage . . ." and that limited power stations, although capable of serving the local needs of small communities, would be inconsistent with that concept. The result is obvious: fewer stations, less efficient use of available channels and disregard of local necessities and convenience in the interest of maintaining an inflexible concept.

Characteristic of the arbitrary approach to the problem and of the resulting inefficient utilization of channels is the measurement of permissible co-channel spacings by the accidental location of post offices (par. 105-8). Communities will be deprived of additional channels because of the wholly irrelevant fact that their main post offices, which have no logical connection with any proposed or possible television station, are located nearer another post office or an existing transmitter than the required minimum distance, notwithstanding the existence of numerous potential transmitter sites at greater distances. It is not an



[6] The Commission states several times in its opinion that the setting aside of channels for non-commercial, educational use is precisely the same type of reservation of channels as that provided by the assignment table for commercial stations in the various communities. This is not the view that I take of the assignment of shared use of the channels for non-commercial, educational television stations, and I do not believe the majority's statement correctly describes the action of the Commission. The Commission has created a new class of radio stations and a new use of the radio frequencies, namely, non-commercial, educational television. This class is as distinct from commercial television stations as point-to-point communication stations. The Commission in providing for any new use of frequencies and assigning specific frequencies on a full or shared time basis for a new service may be said to "reserve" frequencies for that service. This is an essentially different thing than a reservation of frequencies for specific applicants for specific communities, all of which are qualified for the use of the service involved. There are numerous Commission precedents, particularly where shared use of frequencies is involved, for designating areas in which the frequencies will be used for a certain service. For example, the Commission provided for shared use of frequencies for certain harbor purposes and certain highway purposes. Obviously, to assign a frequency for harbor use to Denver would be absurd. In designating areas for operation for non-commercial educational television stations, the Commission sought to select areas which are "cultural centers." It would obviously be a waste of channels for the Commission to assign channels for non-commercial educational stations to areas where there are no educational facilities for the operation of such stations. The fundamental difference between reservation of channels for a class of stations and reservation of channels for favored communities as against other communities equally qualified must be recognized if the validity of our assignments for non-commercial educational television stations is to be upheld.

answer to reply, as does the Commission, that the Table and Rules are concerned with "assignment spacing requirements" rather than "facilities spacing requirements." Transmitters will not, in the normal course of events, be erected on top of post offices; if there are available sites complying with the Rules, there is no reason to deprive a community of service, or of additional service, because of some ancient whim which determined the location of a main post office. Not by such accidents should the Commission make decisions affecting the efficient distribution of channels.



The Commission recognizes the economic problems which will be faced by UHF broadcasters where VHF broadcasting exists (par. 189) and expresses (par. 197) the pious hope that "UHF stations will eventually compete on a favorable basis with stations in the VHF." But, by giving excessive co-channel protection to VHF stations and inadequate protection to UHF stations the Commission has arbitrarily and adversely affected the ability of UHF stations to compete. The economic problems faced by UHF broadcasters are sufficiently serious without the interjection of additional difficulties by Rules and Tables based upon demonstrably incorrect engineering assumptions. The arbitrary penalization of UHF cannot be said to result in a "fair" or "equitable" distribution of television service or "the larger and more effective use" of television in the public interest.

In short, the Commission's preoccupation with the concept of administrative simplicity has led it into the error of first treating all stations as if they were equal in order to facilitate standardization of rules concerning separation and other matters and then adopting rules designed to assure, so far as possible, that the standardization would be carried out in practice without regard to particular situations or local requirements. Efficient distribution of channels and the provision of the maximum number of television stations have been sacrified to achieve a misleading appearance of simplicity of administration. The public interest, convenience and necessity have been abandoned to the theoretical convenience of the Commission. The small communities are to be subjected to rules drawn upon considerations applicable primarily or wholly to large cities. The apparent simplicity of administration is an illusion that will disappear as soon as the number and complexity of conflicting applications under the Standards emerge. The Commission thinks it has eliminated 307(b) contests between cities (it has not eliminated them all); but by creating a scarcity of frequencies it has created a bigger problem in each city where there will surely be more applicants than there are channels. The administrative burden created by competitive applicants for the limited number of frequencies by this artificial scarcity of channel assignments will far outweigh the administrative burden they are trying to eliminate—intercity 307(b) cases.

TELEVISION STATION EQUIVALENT SERVICE AREAS

NOTE: Diagrams above portray television station interference free "B" service areas for channels 7-13 (solid lines) based on standard interference and separations of 150, 160 and 180 miles, including offset carrier operation. Essentially equivalent service areas are obtained by varying the parameters - antenna height, power and station separation. Dotted lines show potential coverage without co-channel interference.

CHRONOLOGY OF THE TELEVISION FREEZE

SEPT. 30, 1948 – APRIL 14, 1952

May 6, 1948: Broadcast and non-broadcast sharing of TV channels abolished; Channel 1 deleted; new allocation plan (VHF) proposed.

June-July 1948: Hearing on new allocation plan, raising questions as to tropospheric interference and related problems.

Aug. 27, 1948: Because of these questions, FCC schedules FCC-industry conference to consider desirability of revising engineering standards.

Sept. 13-14, 1948: FCC-industry conference, slating technical sessions for November-December looking toward revision of standards.

Sept. 20-23, 1948: UHF hearing.

Sept. 30, 1948: VHF freeze announced.

Nov. 30-Dec. 3, 1948: FCC-industry engineering conference; Ad Hoc Committee is appointed to study VHF propagation factors.

May 26, 1949: Preliminary plans for far-reaching VHF-UHF hearing announced, with color among subjects to be considered.

July 11, 1949: FCC announces formal proposals for the hearing, including VHF-UHF allocation plan envisioning use of 42 UHF channels along with present 12 VHF channels.

Sept. 26, 1949: First phase of hearing, dealing with color, gets under way.

Nov. 22, 1949: Color sessions recess; field-test notice issued by FCC.

Feb. 20, 1950: Color hearing resumes.

May 26, 1950: Color hearing ends.

July 11, 1950: FCC begins deliberations on color case, the participants having submitted final summations July 10; also on July 11 the Condon Committee submits its color TV report to the Senate Interstate and Foreign Commerce Committee.

Sept. 1, 1950: FCC issues its "First Report" on color, favoring CBS system but advancing plan for manufacture of "bracket sets" as means of delaying final decision to permit further studies.

Sept. 29, 1950: Manufacturers say they cannot meet FCC's deadline for manufacture of bracket sets.

Oct. 11, 1950: FCC issues "Second Report," adopting CBS color standards effective Nov. 20.

Oct. 16, 1950: Hearings commence on second phase of overall TV proceedings—"general issues," including VHF, UHF, Stratovision and other questions except specific city-by-city channel allocations.

Oct. 17, 1950: RCA and two subsidiaries, NBC and RCA Victor Distributing Corp., file suit against color decision in federal district court in Chicago.

Nov. 10, 1950: Hearings concluded on "general issues."

Nov. 16, 1950: The Chicago court, after two days of hearings in which seven manufacturers, servicemen and others took RCA's side, grants temporary restraining order delaying effectiveness of color standards pending further decision of the court.

Nov. 27, 1950: Hearings on reservation of channels for noncommercial educational TV stations, last portion of "general" phase of hearing, gets under way. After recess Dec. 8 hearings resumed Jan. 22, 1951, were completed Jan. 31, 1951.

Dec. 22, 1950: The Chicago court, in 2-1 decision, upholds FCC's approval of the CBS color system, but prohibits the start of commercial operation pending a ruling by the Supreme Court. Judge Walter LaBuy dissents. The temporary stay order is continued until April 1, 1951, or such time as the Supreme Court dissolves the restraint.

Jan. 26, 1951: RCA initiates appeal to U. S. Supreme Court for itself and two subsidiaries, NBC and RCA Victor Distributing Corp.

Feb. 5, 1951: FCC, CBS and Justice Dept. jointly ask Supreme Court to affirm Chicago court's judgment but to dissolve the temporary restraining order on commercial start of CBS color.

Feb. 26, 1951: RCA, joined by Emerson Radio & Phonograph Corp., answers motion to affirm.

March 5, 1951: Supreme Court sets March 26 for start of oral argument on color case.

March 21, 1951: FCC issues "Third Report," proposing to allocate either 65 or 70 UHF channels for TV service to augment existing 12 VHF channels; also proposed to reserve 209 assignments for noncommercial, educational use out of the 1,965 allocated to cities and communities throughout the U. S.

March 26-27 1951: Supreme Court hears oral argument of RCA, Emerson, CBS and the Solicitor General, who presents the government's case.

May 28, 1951: Supreme Court, by 8-0 vote, affirms lower court ruling in favor of CBS color. Justice Frankfurter issued a "dubitante," neither concurring nor dissenting.

June 21, 1951: FCC announces that it will not take action to authorize partial lifting of freeze.

June 28, 1951: FCC hears oral argument, requested by Federal Communications Bar Assn. and others, on legality of general allocations table incorporated in rules and reservation of channels for noncommercial, educational use.

July 12, 1951: In "Fourth Report," FCC denies common carrier request for five UHF frequencies, designated these frequencies for TV. This makes 70 TV channels in UHF band.

July 13, 1951: FCC upholds its right to include TV allocations in rules and to reserve channels for noncommercial, educational stations.

July 25, 1951: "Paper hearing" to run from Aug. 27 to Nov. 26 (later extended to Dec. 17) announced by FCC.

July 26, 1951: "Fifth Report" by FCC authorizes existing TV stations to increase transmitter power to full capacity provided effective radiated power of metropolitan stations does not exceed 50 kw. Score or more stations apply for higher powers.

Dec. 17, 1951: Final filing in written hearings are received, bringing total of comments, oppositions and pleadings to more than 1,500. FCC staff begins full scale study of filings, looking to final report on TV rules, standards and city-by-city allocations.

April 14, 1952: FCC issues "Sixth Report" to lift freeze.

IF YOUR PLANS CALL FOR TV

LOOK TO **BLAW-KNOX** FOR TV TOWER EXPERIENCE

The big "Spring Thaw" on TV allocations is bound to bring a rash of orders for new equipment—much of which requires critical materials. That all-important tower for your antenna is no exception. So we respectfully suggest that if the proved safety, performance and long life of Blaw-Knox Towers is wanted, have your engineers discuss their plans with us *now* . . . it may advance your "inaugural program" by many profitable weeks.

The Newsweekly of Radio and Television

Watch your pennies, mister!

When you buy radio time these days, you want to make every penny count. In Baltimore, the way you do it is simple. You just buy WITH—the BIG independent with the BIG audience!

Every penny you spend on WITH helps produce exactly what you want from radio—*low cost results!* Because WITH delivers more *buying* listeners-per-dollar than any other radio or TV station in Baltimore.

No wonder WITH is so popular with the local folks! Their advertising *must* produce immediate, economical results. *And WITH regularly carries the advertising of more than twice as many retail merchants as any other station in town!*

Let your Forjoe man give you the whole WITH story today!

IN BALTIMORE W-I-T-H

TOM TINSLEY, PRESIDENT • REPRESENTED BY FORJOE & COMPANY

...and still they're buying

WLS advertising pulls . . . and pulls

. . . and PULLS

Write for facts about
"OPERATION GROCER 1952"

This letter from a WLS listener is just a routine order . . . or so it appears as you read it:

Peoria, Illinois,
January 16, 1952

Dear Sirs;
Please send me the jig saw puzzle you advertise on the National Barn Dance. I would like to have two of them.

WLS Radio Station
Chicago, Ill.

But the letter is dated *1952* . . . and the merchandise ordered was offered over WLS *19 years ago* . . . in 1933!

Yes, WLS advertising pulls . . . and pulls and pulls! We're out of jigsaw puzzles now, of course. But we *do* have availabilities . . . for advertisers who like advertising that brings results . . . today . . . tomorrow . . . and years from now.

WORK

YORK, PENNSYLVANIA

first with listeners

Recently completed Pulse survey for York **CITY** and **COUNTY** shows

- WORK preferred in 55 out of 72 rated periods.
- WORK has rating superiority as high as 17% in some choice time periods.

first in coverage

Pulse survey shows **NO OUTSIDE STATION** effectively covers the York trading area in **ANY** of the 72 rated periods.

Most powerful station in the York area, WORK's 5 KW delivers a bonus coverage in nine surrounding counties with a population of more than one million.

first in results

Advertisers — both local and national — expect and get outstanding results on WORK. Many advertisers have been using this station since its founding twenty years ago.

This long and successful experience has resulted in know-how that assures you profitable sales for every advertising dollar.

CLOSED CIRCUIT

WITH FREEZE out of way, FCC plans to pitch in on long delayed, long suffering AM activities among others. Because of full staff activity on TV during past half-year, AM processing lines have hardly moved. There are flock of cases ready for oral argument. Biggest upcoming action expected to be scheduling of thrice-deferred theatre television proceedings.

SOME MAJOR advertisers already thinking in terms of another round of network rate cuts in fall. They're eyeing evening time especially, and looking for reductions in area of 10-15% on some segments.

RESEARCHERS can again lower eyebrows raised over use of aided recall technique by Nielsen interviewers, asking respondents to identify network programs listened to "yesterday" in connection with new station network audience survey. Nielsen denies any intention to use answers in program ratings, says extra question is not part of survey but is being asked at request of NBC for network's own use.

LESS easily quelled is concern of affiliates that NBC plans to use network program listening data in connection with adjustments in station-network rates. NBC, whose revaluation plan last fall was vigorously resisted by most affiliates, says program audience information will be used for general sales purposes, denies present intention to inject it into station network rate adjustment situation.

FINAL decision on future of *Hymns of All Churches*, currently sponsored on about 900 radio stations by General Mills, is expected latter part of this week. Present contracts end latter part of June. It was understood that renewals would most likely be placed on at least 500 stations and other new stations probably added. Dancer-Fitzgerald-Sample, N. Y., is agency.

AS THINGS STAND now, FCC does not intend to grant any time extensions beyond July 1 freeze end. At that time it begins processing applications for cities having no TV. Other classes of applicants have additional time in view of processing line setup. But feeling is that to expedite handling, no extensions will be granted except under "extenuating" circumstances.

WHAT'S REAL reason behind retention by Thomas S. Lee Enterprises Inc. (General Tire & Rubber) of erstwhile ABC sports commentator Harry Wismer? One educated guess is that Pennsylvania Rubber Co., General Tire's subsidiary, is entering sporting goods field full tilt and that Mr. Wismer will provide top level sales contacts for company.

UPON FCC approval of UPT-ABC merger, CBS Central Division Vice President H. Leslie Atlass will swing into TV action after acquisition of WBKB (TV) Chicago. He reportedly has signed option with city's Saddle & Cycle

(Continued on page 6)

THREE OR MORE RADIOS FOUND IN 35% OF HOMES

PULSE survey on radio-ownership in Metropolitan New York indicates 35.1% of families have three or more radios in their homes. Of 1,570 families checked in New York's five boroughs, radios were found in all homes but 1.8%. Only 35.4% of families had but one set, while 27.7% owned two radios. Whereas, total of 35.1% owned three or more radios, 20.1% had three sets, 8.3% owned four sets, 4.2% had five sets, and 2.5% owned more than five radios.

Dr. Sydney Roslow, director of Pulse, said survey, conducted during January for Jos. Jacobs Advertising & Merchandising Inc., would have shown higher multi-set ownership if study had been extended to suburban counties, where radio ownership is normally higher than in city proper.

PALEY SELLS SHARES

CBS BOARD Chairman William S. Paley has sold 50,000 of his shares of CBS Class A stock, New York Stock Exchange records showed Friday. Shares sold (in March) were in block he owned through holding company, of which he retains 37,980. He also owns 530 shares direct, plus 222,500 directly owned shares of CBS Class B stock. Total CBS shares issued as of last Dec. 29 were 1,268,700 Class A and 1,069,196 Class B (including shares reserved for conversion of outstanding scrip certificates).

NBC CAMPAIGN SERIES

NBC on May 4 will launch *Hats in the Ring*, half-hour Sunday radio and TV series featuring legally qualified candidates for Presidential nomination of major parties to whom time is being donated by NBC. Series will originate in Washington and will be on NBC-TV 2-2:30 p.m. and NBC-Radio 10:30-11 p.m.

BUSINESS BRIEFLY

HOT WEATHER SPECIAL ● Maxwell House iced tea placing radio spot schedule in 25 southern markets starting in May following successful Texas test for instant coffee. Agency: Benton & Bowles, N. Y.

AUTUMN PREPARATION ● Erwin, Wasey & Co., N. Y., gathering available information for September start of its Pertussin and Musterole radio spot campaigns. Agency is interested in daytime minute spots, and round-up of information is to be set by May 5.

BEER SPOTS ● Stagg Beer, preparing minute radio spot campaign in middle west for 13 weeks with starting date expected shortly. Agency: Maxon Inc., N. Y.

CERTO PARTICIPATIONS ● General Foods, N. Y. (Certo-Sure-Jell), placing women's participations on more than 100 radio stations starting in May and coinciding with peak of each jelly-making fruit crop in each town and rural area. Contracts from 8 to 17 weeks. Agency: Benton & Bowles, N. Y.

BIGGEST SALE ● United Artists announces its biggest TV sale of year with Phillips "66" Petroleum purchasing *Telesports Digest*, half-hour weekly film series for 14 cities. Agency: Lambert & Feasley, N. Y.

HEALY TO McCANN-ERICKSON

ROBERT E. HEALY, formerly vice president in charge of advertising, Colgate-Palmolive-Peet Co., has joined McCann-Erickson, N. Y. as vice president and treasurer. He succeeds as company director John L. Anderson, who becomes consultant to agency.

Don't Lag in TV, Walker Tells Schools

FCC has given no "assurance" that educational channels will be reserved "as long as grass grows and water runs," FCC Chairman Paul Walker warned educators Friday. He addressed luncheon session of National Assn. of Educational Broadcasters at Columbus, held during Institute for Education by Radio-Television (early stories pages 35, 44 and 80).

In first speech since release of FCC TV allocation plan Chairman Walker reiterated that commercial TV stations must not let noncommercial outlets "carry the burden of meeting educational needs." They are governed by same rules as commercial stations, he said. He reminded educators they still may compete with commercial applicants for any commercial VHF or UHF channels assigned to their cities. "Not all possible assignments have been made," he added.

Contending efforts are under way "to initiate an organized campaign for the commercialization of these noncommercial educational assignments," Chairman Walker told educators "you have won only the first round" and "do not . . . let these reservations of 1952 go by default." He described reservations as a "fabulous inheritance."

FCC Chairman said the Commission's new plan provides "a high degree of protection" against excessive interference between stations, adding: "We refused to sacrifice a margin of safety for the sake of jamming in a few extra stations." He held up possibility of reducing mileage separations as well as additional assignments.

Some differences in propagation characteristics of UHF and VHF bands "are not nearly as significant as some have thought," he said. FCC has been assured that equipment will be available for UHF stations "in time for fullest development" of its potentials.

"UHF is going to grow because it has to grow. It is needed," he declared.

The chairman was presented with a certificate for life membership in NAEB and lauded

COURT EXTENDS DATE FOR ANTI-TRUST HEARING

ATTORNEY GENERAL's office pulled surprise maneuver Friday by requesting New York's Southern District Court to extend another five weeks hearing date—set for today (Monday)—of RCA motion to change or void Federal anti-trust subpena, served as opener to all-electronics industry investigation [B•T, March 3].

Malcolm A. Hoffman, special assistant to Attorney General and member of Anti-Trust Division, argued that extra time was needed for government study of RCA motion, an 800-page document involving, he said, complicated questions of fact. RCA, represented by John T. Cahill, corporation director and member of New York law firm bearing his name, opposed request. When court ruled for three-week extension, RCA attorneys pleaded, in surprise maneuver of their own, they could not appear at that time, and hearing was extended by more than seven weeks to June 12.

SEIZURE STATEMENT BY TRUMAN CRITICIZED

REMARK by President Truman implying he had power to seize newspapers and radio stations, just as he seized steel mills, brought quick reply Friday from Jim Bormann, WCCO Minneapolis, president of National Assn. of Radio News Directors (early story page 27).

"If the President can seize the press and radio of the country, constitutional guarantees of freedom of speech and freedom of the press are meaningless," he said.

Joseph Short, press-radio secretary to President Truman, refused to amplify the Thursday remarks at a Friday conference.

HAMPSON GARY DIES

HAMPSON GARY, 79, onetime FCC Commissioner and General Counsel, died late Thursday night in Palm Beach, Fla. Mr. Gary served as a member of the Commission from July 11 to Dec. 24, 1934. He left the FCC as General Counsel in 1938. He leaves a son, Franklin Gary, and daughter, Mrs. Helen Moran.

KELO SIOUX FALLS, SOLD

SALE of KELO Sioux Falls, S. D., from S. Fantle Jr. to local partnership controlled by motion picture theatre owners for $280,000 [AT DEADLINE, March 17] was approved Friday by FCC. New owners of 15-year-old station, on 1320 kc with 5 kw, are Joseph L. Floyd, theatre operator and originator of radio-TV show *Blind Date;* Edmund R. Ruben, owner of 18 theatres in South Dakota and Minnesota and former U. of Minnesota football star; L. T. Bentson, who has minority interest in WMIN St. Paul. Each owns one-third.

LAMB N. Y. OFFICE

EDWARD LAMB Enterprises Inc., announces opening of New York offices at Barclay Hotel. Under managership of Bernard H. Pelzer Jr., office will correlate Mr. Lamb's various interests, which include ownership of WTVN (TV) Columbus, Ohio; WICU (TV) Erie, Pa.; WTOD WTRT (FM) Toledo and WHOO-AM-FM Orlando, Fla. National promotion manager will be added to New York staff, Mr. Lamb said.

In this Issue—

Though some attorneys and engineers side with dissenting Comr. Jones in calling the FCC TV allocations a failure and others hint of court actions, there is no clear indication that anyone is intending to tie up the TV thaw in the courts. *Page 25.*

Set manufacturers swear that conversion to UHF won't be very painful. And government authorities are optimistic about the availability of materials to build new TV stations. *Page 25.*

Fifteen applications for TV stations are filed in the vanguard of a promised post-thaw deluge at the FCC. *Pages 70-71.*

With 242 stations theirs for the asking, educators are wondering whether they can afford the costly gift. *Page 80.*

Can two or more AM operators in a given community join in a common application for a scarce TV channel? FCC Chairman Walker gives the hint of an answer. He's concerned over "concentration of control" over broadcasting. *Page 69.*

Did the radio network rate cuts last July accomplish their intended purpose? Here's a box score on new advertisers that have entered network radio since the cuts and old ones who quit anyway. *Page 23.*

Radio took in more revenue in 1951 than it ever had before, but its income (before federal taxes) was lower than in 1950. The official FCC estimate of the 1951 financial record is on *Page 23.*

A remark by President Truman at his special news conference for the American Society of Newspaper Editors, is interpreted to mean he thinks he has the right to seize newspaper and Radio-TV any time he wants to. *Page 27.*

Last February, TV network gross again outstripped radio network gross—$14,786,047 to $13,560,948. It's not only that clients spent more money on TV; there were also more clients. *Page 27.*

Among big advertisers, news programs are becoming favored broadcasting buys. *Page 26.*

A Senate Subcommittee worrying about political campaign costs, thinks broadcasters ought to block out time segments for paid political programs to avoid costs of paying regular sponsors whose times are preempted by politics. *Page 26.*

Building-minded broadcasters have been given what amounts to a blank check on materials allotments by the National Production Authority. *Page 28.*

Closed Circuit

(Continued from page 5)

Club, elite social club occupying about six square blocks of land near lake front six miles north of Loop, for conversion to TV studios. Charles Luckman, former Lever Bros. president who designed CBS television center in Hollywood, would be retained as architect. Mr. Atlass also reported interested in buying local film studio—with Atlas Film Corp. (no relation) in suburban Oak Park mentioned.

COMMISSIONER Robert F. Jones, who strongly dissented from FCC majority TV allocations, is hitting sawdust trail next month. He speaks May 1 before Ohio Assn. of Broadcasters at Columbus and on May 20 before combined meeting of Pittsburgh Radio & Television Club and Pittsburgh Advertising Club. His topic on both occasions: Against what he characterizes as FCC majority's "Firm, Fixed and Final Plan" and in favor of his own rule making flexible plan.

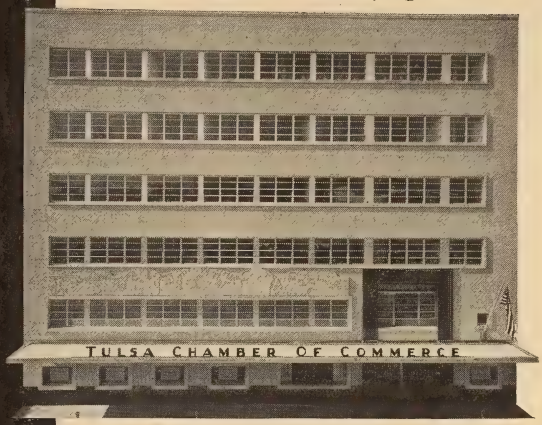
SENATE Appropriations Committee has asked FCC to submit additional justification for its $8 million fiscal 1953 budget, following issuance of the Commission's final TV allocation report week ago [B•T, April 14]. House chopped President's request down to $6 million and Commission hopes Senate will restore cut so it can handle expected TV application avalanche [B•T, March 31].

MAJOR manufacturer understood to have advised dealers that because radio discounts in many instances seem to "depend entirely upon how badly the station needs business or upon the dealer's bargaining ability" it is changing its factory-dealer cooperative advertising system. Under new deal, factory would pay half of cost of announcements obtained at "lowest local rate and maximum frequency discount" or one-third of station's published national rate for same type of announcements—"whichever is lower."

NBC's *Today* is going well commercially and is now nudging $50,000 per week or about 25% of available saleable spots. Among new accounts understood to be Bauer & Black, International Silver and Pepperell Sheets.

MORE TV CHANNELS ASKED BY EDUCATORS' GROUP

FURTHER extension for educational television was asked from FCC by Public Interest Committee of National Assn. of Educational Broadcasters in letter made public Friday.



Signed by Chairman Edward L. Bernays, letter hoped for FCC provision of added TV channels for "many metropolitan communities" not covered by recent allotments, that extra channels be given "great educational centers like New York, now inadequately covered."

RANDAU BUYS KXOB

CLEM RANDAU, executive director of Civil Defense Administration, has bought KXOB Stockton, Calif., from Lincoln Dellar for $200,000, it was reported Friday. Application will be filed with FCC soon. Mr. Randau and wife will own 55% of station. Other stockholders are Sherrill Corwin, Ralph Stolkin, Edward G. Burke Jr. Mr. Randau is minority stockholder in WNEW New York, was formerly executive of Field Enterprises, publisher of books and newspapers, owner of radio stations. KXOB on 1280 kc, with 1 kw, is affiliated with MBS.

Koberling & Brandborg, architects

"The Tulsa Spirit" is a phrase long famous in the Southwest and it is rich with meaning for there really is such a thing! This spirit is just *one* of the many plus factors which make Tulsa the heart of Oklahoma's No. 1 market. There's a difference — an important difference — in markets, and pride is one of them. Tulsans are proud of their city! They are willing to back up that pride with money! Tulsa *is* a market where *spendable* income is great and the folks spending that money are great too!

We of KVOO are mighty happy and proud to have had a part in helping the Tulsa market develop and grow since 1925!

If *you* want to tell the fine people of this area about *your* product, tell them *best* over the station *most* of them listen to *most* of the time — KVOO, The Voice of Oklahoma for more than a quarter of a century!

Pigs are not all Pork Chops

CUTS	POUNDS
HAM	29
BACON	27
PORK ROAST	18
PICNICS & smoked shoulder butts	11
CENTER CUT PORK CHOPS	10
PORK SAUSAGE	8
MISC. CUTS	5
SALT PORK	7
LARD	35

240 lbs. Live Hog = **180 lbs.** Wholesale Weight = **150 lbs.** Retail Cuts

The price of pork chops is one item in the "cost of living" that almost any woman—or economist—can quote off hand.

Although this figure has become almost symbolic of the level of meat prices, *only about 5% of a pig is center cut pork chops!*

A 240-pound porker, when dressed by the meat packer, comes down to *180* pounds of wholesale weight—unprocessed fresh meat cuts and fat for lard. Some of these cuts lose more weight when they are boned, cured, smoked or otherwise prepared. This leaves only about *150* pounds of pork products for the retailer to sell. And only *10 pounds* are center cut *pork chops.*

That's why you pay more for pork chops than for most other cuts of pork. For, from sausage to pork chops, the price of each cut is determined largely by how much there is of it and how much people like it.

Economists call this the law of supply and demand. Women call it "shopping." They compare, pick, choose. In a free market, their choice sets the values.

How to Help Orphans

EDITOR:

. . . The radio industry in general has before it an opportunity to show its spirit of cooperation and desire to further expand its chosen profession. . . .

Today there is before the FCC a backlog of AM applications and many of them have been in the files for a year and over. A minimum of these applications are from non-station markets and are at present static while the FCC is slowly working on applications from one and more station markets . . . The non-station markets must wait and go without primary and oftentimes good secondary service while processing goes on in favor of markets that are adequately covered . . . Would not the processing of these orphan markets be more fair?

An interest in their clients would be displayed if all equipment sales concerns would offer to the FCC the services of their engineering staff for a period that would clear up the backlog that the FCC acknowledges is 10 months behind in its processing. . . .

With such help provided, the FCC could clear up the backlog of AM applications and after they are cleared could concentrate almost fully on the huge TV problems that lie ahead. Perhaps this system could be extended to TV applications also . . .

"We increased fringe area coverage by 29%—at a cost of less than 3¢ per family!"

Sherm Marshall, General Manager, WOLF, Syracuse, N. Y.

General Electric Limiting Amplifier Helps a 250-watt Independent Outpull Higher Powered Competitors

THIS G-E amplifier cost WOLF, Syracuse, $897.* According to station management, this General Electric equipment has been twice as effective in attracting fringe area listeners as a $14,000 half-wave antenna system previously used alone. Why? Because it gets the signal into fringe areas at a low volume setting and automatically minimizes the effect of interfering signals and noise.

Since the installation of the amplifier, the station has had the largest Hooper shares of audience in its history. In dollar volume and number of advertisers, business has never been better.

More than 450 stations are now using the G-E Limiter. The Broadcast Man at the G-E office near you has plenty of information on its performance. Call him today and he will demonstrate why it's one of the most farsighted investments a station can make. Meanwhile, let us send you a new illustrated bulletin on the Limiting Amplifier. Write: *General Electric Company, Section 242-21, Electronics Park, Syracuse, New York.*

** Price today slightly higher.*

. . . Says the station manager

"In a recent campaign, with three stations dividing the advertiser's schedule, WOLF (250 watts) outpulled two regional 5 kw stations in out-of-town mail. Telephone orders came in from as far away as 46 miles. We attribute this penetration in large measure to the General Electric Limiter."

Sherm Marshall, General Manager

. . . Says the station engineer

"This limiter anticipates a peak—and is already cutting when the peak is reached. With it you can always use the full capabilities of your signal without causing even instantaneous overmodulation. It enables us to use more current without reducing the life of the modulation tubes."

Don Muir, Station Engineer

You can put your confidence in— **GENERAL ELECTRIC**

JOHN CARMAN, Chicopee Mills Inc., N. Y., to Doherty, Clifford & Shenfield Inc., N. Y., as account executive.

on all accounts

JOHN GIBBS, head of the firm bearing his name, is shepherd of a three-fold enterprise whose apparent complexity is controlled by the fundamental simplicity inherent in the word "quality."

Packager, producer and talent representative, Mr. Gibbs has built his principle into one of the most profitable ventures of its kind in the industry.

As a packager, he is the source of approximately a $12 million flow of revenue to the radio and TV networks. As a talent representative, his clients include, among others, actors Charles Laughton, Raymond Massey, Hume Cronyn and Jessica Tandy; emcees Tommy Bartlett and Johnny Olsen; and writers Somerset Maugham, Sandra Michael, Elaine Carrington, Orin Tovrov, Mona Kent and Jane Cruisinberry.

Mr. GIBBS

The television production efforts of his firm center on the NBC-TV hour-long *Robert Montgomery Presents* program, produced each week in conjunction with Mr. Montgomery for the American Tobacco Co. and Johnson's wax.

Mr. Gibbs made his entry into radio in Milwaukee in 1926 while still an undergraduate at Marquette U. in that city. He became sports announcer and finally chief announcer at WISN Milwaukee.

Three years after his graduation from Marquette, following successive jobs as promotion manager of a newspaper and program manager of a radio station, he joined the Cramer-Kasselt Co., Milwaukee, as director of its radio department. He remained with the agency until 1940 when he sold the first of a string of radio serials, *Against the Storm*, to Procter & Gamble. The program, still on the air, was originated and written by his wife, Sandra Michael.

On the strenth of its success, the Gibbs moved to New York where Mr. Gibbs established his own production agency. Within six months he had sold another serial, *Lone Journey*, and was clearly on his way as a reckonable radio entity.

Currently the complete list of his properties includes *Against the Storm*, sponsored by Philip Morris Co. on ABC radio; *Lone Journey*, sponsored by Lever Bros. on ABC radio; *When a Girl Marries*, underwritten by General Foods; *Mary Marlin* and *Marriage for Two*, sustaining on ABC radio; *Welcome Travelers* on NBC radio, sponsored by Procter & Gamble; *Robert Montgomery Presents* for Lucky Strike cigarettes and Johnson's wax on NBC-TV and *Johnny Olsen's Rumpus Room* on DuMont, sponsored by Premier Foods.

Mr. and Mrs. Gibbs met when both were working at WISN, she as a staff writer. They now live in Greenwich, Conn., on a 32-acre farm. In addition, the couple own a ranch in Montana and the Gibbs agency also has bought a ranch in La Quinta, Calif., to make television and motion pictures.

Mr. Gibbs' hobby is raising toy poodle dogs. In fact he served one of his poodles, Lena, as talent agent. Lena has starred on many a TV show and her earnings to the firm, Mr. Gibbs computes, come quite properly to about 10% of the money invested in her.

Got something to sell to TEEN-AGERS?

Beam your message at them during WHAM'S weekly

"Hi-Teen" Dancing Party

1:30 TO 4:00 P.M. SATURDAYS

on a participation or "Block" time basis

Started in January, this new program mushroomed to "most popular" classification almost overnight.

It has two "angles"—the three hundred (and more) teenagers who jam a Rochester ballroom to dance and participate in M. C. Ted Jackson's merrymaking—plus the thousands at home who listen to the goings-on (and your commercials) for two-and-a-half solid Saturday hours. And don't overlook the tremendous merchandising possibilities.

Incidentally—the station is WHAM, to which PULSE accorded 99.3% listener preference in 16 Western New York counties.

Ask the HOLLINGBERY man about participation

Completely NEW 5-kw AM...*

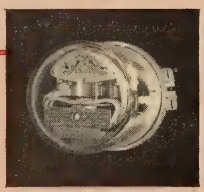
New small size-

1. Increase power to 10 kw with this simple kit

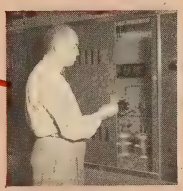
*RCA ALL-NEW 5-kw AM transmitter, Type BTA-5G. The 10-kw Type BTA-10G is same size, same appearance. Maximum floor area, only 33 sq. ft. Both transmitters are completely air-cooled.

..with a "10-kw" future!

New operating convenience - New operating economy



2. Up to 40% less floor area than previous "5 kw's"



3. Power tube costs reduced

4. 1/60th second arc-back protection

5. Lower power bills

6. Sliding doors—front and rear

Just read these exclusive features . . .

1. It is a 5-kw AM transmitter you can increase to 10 kw—easily—inexpensively—quickly. No lost air time for conversion. One simple kit makes it easy to increase power overnight. (Yes, you can buy this transmitter ready-built for 10 kw, too).

2. It requires less "operating" floor space than other 5 kw's—saves up to 40% floor area. Entire transmitter is only 84" high, 130" wide, 32½" deep.

3. It's the ONLY "5 kw" with such low tube costs. Power and modulator stages use the new small size, lightweight RCA-5762—costing less than half that of power types in most "5 kw's".

4. It's the ONLY "5 kw" with "split-cycle" overload and voltage protection—using thyratron-controlled rectifiers. Circuits work so fast audiences cannot detect "off-air" breaks.

5. It holds power bills to the LOWEST in the "5-kw" field—through smaller power tubes, fewer stages, fewer tubes (only 24 tubes and 8 different types).

6. It's the ONLY "5 kw" with horizontally-sliding doors *front* and *back*. Benefits:

   √ Saves over 60 square feet of floor area
   √ Provides more elbow room for operator
   √ Makes it easier to get at transmitter

For all the facts about this basically new transmitter . . . newest of nearly three hundred RCA "5-kw's" now on the air . . . call your RCA Sales Representative.

feature of the week

IT WAS 7 a.m. and disc jockey Bill Lowry, driving to the WGST studios in Atlanta for his morning record program, switched on his car radio. As he, himself, tells the story:

"I heard the announcer:

" 'Watch out for cancer's seven danger signals. Do you have a lump or thickening anywhere in your body? Do you have a sore that will not heal?'

"That was enough to start me thinking. I had a lump on my left leg. It had been there for eight months. Could this be cancer?"

Instead of going to a football game for which he had tickets the next day, announcer Lowry went to his doctor. Four days later, the father of two small daughters and "a little red-headed son" learned that what he suspected was true: He had cancer.

Mr. Lowry was operated on shortly after and became one of the 70,000 people in the U. S. to be pronounced cured of the disease last year.

To point out that an equal number—70,000 others—died needlessly of the same disease (as part of the total 210,000 cancer fatalities in America), Mr. Lowry has recorded his story on a 5½-minute platter, being distributed to other disc jockeys throughout the country by the American Cancer Society.

Described as a "somewhat reluctant" radio chairman of his local cancer drive last year—before he knew of his own illness—Mr. Lowry also has taped a request to fellow jockeys, explaining why they should play his story on the air. Their program, like the one Mr. Lowry had heard while driving to work, might also prevent a cancer death.

strictly business

NEW director of sales for DeFrenes Co., Philadelphia producer of television and motion picture film, is Col. Edward Davies, who should have much to contribute to a successful future for the company. Col. Davies was one of the first to make commercial spot film for television.

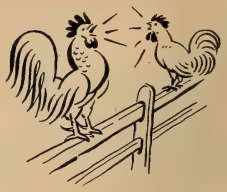
In the early days of TV, he charged $600 to $1,000 for a spot commercial and was amazed when advertising agencies paid the price.

Col. Davies' wide experience in radio and television dates back to the crystal set days, when he was an employe of Gimbel's in Philadelphia and Ellis Gimbel suggested the crystal radio might be a good addition to the toy department.

The mistakes made in television, according to Col. Davies, are very few compared to those made at the beginning of radio. "I was present at the birth of radio," he said, "and now feel like a midwife at the birth of television."

Edward Davies was born in Philadelphia where he attended Central High School and U. of Pennsylvania evening school. After graduation in 1911, his first position was with Gimbel's personnel department in Philadelphia. He left in September 1917 to join the Army in World War I. An infantryman, he received a battlefield commission.

He returned to Gimbel's after the war and in March 1921 helped to found radio station WIP Philadelphia, becoming the station's first general manager. He was instrumental in inaugurating what are claimed to be the first football broadcast, the first church service and the first grand opera performance on radio.



COL. DAVIES

In 1932, Col. Davies entered the advertising field as radio director for John Falkner Arndt Co. Five years later, he returned to WIP as vice president and director of sales. At this time the station became

BROADCASTING

VOL. 42, No. 16 APRIL 21, 1952

NETWORK RATE CUTS' EFFECT

Boon or Boomerang?

By BRUCE ROBERTSON

LAST spring, when the radio networks announced that they were putting a 10% overall rate reduction into effect July 1—CBS and NBC a direct cut in rates, ABC and MBS a change in discount structure that amounted to virtually the same thing—a major argument for the move was that it would serve to attract new business to network radio, advertisers who had not previously used this means of advertising.

Nine months have elapsed since those rate reductions were introduced and the question arises as to just how well they have accomplished their assigned purpose of adding new names to the list of radio network sponsors.

BROADCASTING•TELECASTING last week checked the network rosters for an answer and came up with the fact that, since July 1, 1951, a total of 19 advertisers who were not previously network clients have bought time on one or more of the four major national networks. Of the 19, all but one are still using network time, to the sum of 11 hours a week.

Clients Added

The 18 new advertisers now on the networks represent annual gross billings of about $7.3 million.

By networks, ABC has added three new network clients, using a total of one hour and five minutes of network time; CBS, seven clients, using two hours and 25 minutes; MBS, five clients, using three hours and 15 minutes; NBC, five clients, using four hours and 15 minutes. (American Chicle Co. has programs on three networks, so the client figures add up to 20 instead of 18 advertisers.)

These figures are, of course, no guide to the amount of advertising each network is carrying in comparison to the volume before July of last year. As always, advertisers have switched programs from one network to another and have increased (or decreased) the amount of time purchased from any one network. And at least 24 sponsors have dropped out of network radio since last July, not counting those that sponsored one-time shows or such seasonal features as football.

The 18 new advertisers now on the networks are companies that either have never used network radio before or have been away from it for many years. Their names and the approximate total gross annual billings represented by each follow:

American Bakers Assn. $400,000, American Chicle Co. $1,000,000, American Protam Corp. $500,000, Avco Corp. $700,000, Borg-Warner Corp. $200,000, Credit Union Nat'l. Assn. $600,000, Economics Lab $125,00, Ex-Lax $1,300,000, Kingan & Co. $250,000, La Maur Products $30,000, Leslie Salt Co. $35,000, Morton Salt Co. $100,000, North American Van Lines $15,000, Orange Crush $350,000, Reynolds Metals Co. $550,000, Seabrook Farms $115,000, Stokely-Van Camp $725,000, Sylvania Electric Products $375,000.

Programs and networks used by these newcomers are listed in the table which begins on this page.

Comparing the number of the newcomers with the number of sponsors who have quit network radio since last July, it would seem that if the rate cuts achieved the result of enticing new money into radio networks, they were not wholly successful in retaining the money already coming in.

Business Lost

Following are the 24 sponsors who used networks on or since the date of the rate reductions but who have since that date taken their budgets entirely out of that kind of advertising: (This list does not include cancellations since last February. It was made up from Publishers Information Bureau reports which do not go beyond that month.)

American Dairy Assn. had David Lawrence on NBC, Sun., 15 min., April-Dec.

American Soul Clinic had *Witness Time* on ABC, Sun., half-hour, May-Sept.

Hazel Bishop Inc. (lipstick), had *Inside News of Hollywood* on ABC, 5 min., Mon.-Fri., Sept.-Dec.

Block Drug Co. (toothpaste) had Elmer Peterson on NBC, Sat., 15 min., March-Aug., and *No School Today* on ABC, Sat., 15 min., June-Sept.

Cudahy Packing Co. (Old Dutch Cleanser) had *Nick Carter* on

(Continued on page 36)

AM-FM INCOME

Drops 9.4% in 1951

DESPITE a record high of $455.4 million total revenues in 1951—2.5% higher than 1950's $444.5 million—AM-FM income (before federal taxes) totaled $61.8 million, a 9.4% decrease from 1950's $68.2 million.

According to the FCC, which last week issued the 1951 figures based on estimates supplied by networks and stations, the basic reason for the decline in income was because of the substantially reduced income of the four national and three regional networks—$10.8 million in 1951 vs. $19.0 million in 1950. This is a 43.2% decrease.

The networks also showed a decline in total revenues—$104.1 million in 1951 compared to $110.5 million in 1950, a 5.8% decrease. Expenses for networks went up 2%—from $91.5 million in 1950 to $93.3 million in 1951.

Total AM-FM-TV revenue for all broadcasters reached peak of $694.9 million, 26.4% over 1950's $550.4 million. Of this, TV accounted for $239.5 million in 1951 compared to $105.9 million in 1950, or 126.2%.

TV income, released in preliminary form last month, showed that for the first time networks made more money from TV than from AM [B•T, March 10].

Broadcast income before federal taxes for all services hit $105.4 million for 1951 compared to $59.0 in 1950. This was a 78.6% increase.

Total revenues of 2,240 AM and FM stations (excluding the 25 network O&O stations) were $351.3 million in 1951 compared to $334.0 in 1950, a gain of 5.2%. Income for these stations was $51.0 million in 1951 compared to $49.2 million in 1950, a jump of 3.7%. There were 2,203 such stations in 1950.

Commission reported that total FM revenues for 602 stations in 1951 was $3.2 million compared to $2.8 million for 669 stations in 1950.

Losses in income continued in FM, however. Loss for 65 non-AM affiliated FM stations in 1951 was $1.5 million compared to loss of $2.6 million for 86 such stations in 1950. Income for AM-affiliated stations could not be computed because of combined bookeeping methods used by all such stations. The Commission did point out, however, that eight of the 65 FM-only stations reported a profit in 1951.

In other breakdowns, the Commission showed that in 1951:

(1) AM stations took in 2.4% less in total revenues compared to previous year in cities where there was 50% or better saturation of TV sets. In non-TV markets, AM stations' revenues were 8.2% more.

(2) Decrease in total revenues was noted by 182 of 439 AM stations in TV markets.

(3) Increased loss or decreased income was felt by 239 of the same 439 AM stations in TV markets.

(4) TV accounted for 43.5% of

RE-BUYS WLAC

Insurance Firm Acquires

RE-PURCHASE, after 17 years, of WLAC Nashville by its former owner, Life & Casualty Insurance Co. of Nashville, was reported last week. Seller is J. Truman Ward. The insurance firm is paying $1,250,000 for the 50-kw Class I-B station on 1510 kc. Sale is subject to FCC approval.

Included in the terms of the contract is a life-time management contract for Mr. Ward at $30,000 per year. Provision is made that if Mr. Ward dies before 17 years from date of purchase, the $30,000 per year will be paid to his heirs until the seventeenth year of the contract.

WLAC, which is now a CBS affiliate, was established as WDAD-WLAC in 1925. It was owned by Dad's Auto Accessories Inc., a subsidiary of the Life & Casualty Insurance Co. Its first assignment was on 1330 kc with 500 w unlimited time, but in 1927 it was granted 1 kw day, 500 w night. This was made 1 kw day and night soon thereafter.

In 1928, during reallocation of AM stations, WLAC was assigned to 1490 kc with 5 kw, sharing time with WBAW Nashville. WBAW was then owned by the Waldrum Drug Co. was later sold to Tennesseean Publishing Co. *(Nashville Tennesseean)* with call letters changed to WTNT. WTNT was deleted in 1931, and WLAC was authorized unlimited time.

In 1935, the station was sold to Mr. Ward for $75,000. During the 1941 reassignments due to NARBA, WLAC was changed to 1510 kc. In 1941, it received a construction permit to go to 50 kw, with directional antenna at night.

Mr. Ward is a noted breeder of famous Tennessee walking horses. He owns the Maryland Farms, where he breeds these well-known show and riding horses.

Change of ownership will not affect any personnel, it was said. F. C. Sowell is general manager of WLAC.

FAIRBANKS NAMED

Succeeds Ensign at ABC

APPOINTMENT of William F. Fairbanks as ABC's eastern radio sales manager was announced last week. He succeeds William H. Ensign, who resigned to rejoin CBS Radio's Network Sales Dept. as an account executive, effective today (Monday).

Mr. Fairbanks

With ABC since November 1950, Mr. Fairbanks is a former director of planning of the Mutual Network, and before that was associated with NBC's Research and Sales Promotion and Advertising Depts. from 1933 to 1942.

Drawn for BROADCASTING • TELECASTING by Sid Hix

"Here come the players on the field, folks . . . The game is about to begin!"

GANGER ELECTED

President of P. Lorillard

ROBERT M. GANGER, who joined the P. Lorillard Co. in March 1950 as executive vice president, director and chairman of the operations planning committee, was elected president of the company last week.

Mr. Ganger succeeds Herbert A. Kent, who now becomes chairman of the board, and is succeeded as vice president by William J. Haley, previously vice president in charge of finance. Lewis Gruber, general sales manager, was elected vice president.

Previously Mr. Ganger served for 22 years with Geyer, Newell & Ganger, New York.

FEDERAL ADV.

Executive Split Set

AN AGENCY shift involving more than $3.5 million in billings will take effect shortly when a group on Federal Adv. Agency officials and employes, headed by President Gordon E. Hyde, leave that agency to join D'Arcy Adv. Co., New York.

In an executive capacity with Mr. Hyde will be Kenneth W. Plumb, vice president and secretary, and Douglas Boyd, vice president and art director, plus about half of the Federal personnel.

Among clients to move along with these personnel will be Gerber Baby Foods, Stromberg-Carlson Co., American Optical Co.'s sun glass division, and Davol Rubber Co.

Meanwhile, Jules B. Singer, vice president and major stockholder of Federal, is expected to decide early this week whether he will continue under the Federal name or take his accounts to another agency. He supervises the Gem account for American Safety Razor Corp., Doeskin, General Cigar and United Distillers.

OPPENHEIM

To New CBS Radio Post

NEW administrative manager of advertising and sales promotion for CBS Radio Network is Charles J. Oppenheim, it was announced in New York by George Bristol, CBS Radio director of advertising and sales promotion.

Mr. Oppenheim

Director of program promotion for CBS Radio since October 1949, Mr. Oppenheim will continue directing program promotion and trade promotion. Before April 1948 he had been WOR New York publicity director and WINS New York promotion and research director. Born in New York in 1915 and a graduate of Cornell U., he is married and father of two daughters.

N.Y. AUTO RADIOS

Pulse Finds 11% Increase

RADIO-equipped automobiles in New York City have increased 11% during the past year to reach a total of 852,400, according to a special Pulse survey conducted during January, the results of which were released last week.

The Pulse study indicated that 42.3% of the families in New York City own automobiles, as compared to 38.2% a year ago. More than four out of five cars—81%—are equipped with radios. Radio-cars have increased 46% since January 1950, this year's survey also indicated.

Pulse research was confined to the city proper where car ownership is at a lower level than in the suburbs, it was pointed out. It was estimated that more than 1½ million automobiles in the area are equipped with radios.

WTCN IS SOLD

Ex-Ambr. Butler Acquires

SALE of WTCN Minneapolis-St. Paul to former U. S. Ambassador to Cuba and Australia Robert Butler and associates for $325,000 by Mid-Continent Radio-Television Inc. was announced last week. Transfer is subject to FCC approval.

Associated with Mr. Butler, who resigned as U. S. Ambassador to Cuba about a year ago, are Alvin Gluek, brewer; Robert Mitchell, attorney; Quentin David, advertising man, and Carl Schuneman, department store executive. Mr. Butler will own 65% of ABC-affiliated WTCN, which operates on 1280 kc with 5 kw day, 1 kw night. He is president of the Builders Trust Co., St. Paul, and of Walter Butler Co., architectural, engineering and construction firm.

Sale of WTCN comes just about one month after CBS merged its WCCO Minneapolis with WTCN-TV, accepting a 47% interest in the dual operation [B•T, March 10]. At the time that announcment was made, it was reported that WTCN would be sold in order to comply with the FCC's duopoly rules.

Mid-Continent is now 50% owned by Northwest Publications (*St. Paul Pioneer-Press* and *Dispatch*) and 50% owned by Minnesota Tribune Co. Northwest Publications is part of the Ridder newspaper chain which also owns WDSM Superior, Wis.; controls KILO Grand Forks, N. D. and KSDN Averdeen, S. D.

Application for FCC approval of the merger of CBS and Mid-Continent has not been filed.

Rorke Leaving JWT

HAL RORKE, radio-television director of J. Walter Thompson Co., Chicago, for seven years, resigns July 1 to move to Hollywood, where he owns a home. He will return to business after a vacation, but has no plans at this time. Mr. Rorke worked for six years as CBS publicity director for the Pacific Network in Hollywood and as an assistant department manager in New York. He is a former managing editor of the *Los Angeles Daily News*. No replacement has been selected by the agency.

Mr. Rorke

CBS-Guild Talks

CBS Hollywood negotiations with the Publicists Guild last week dragged into the 17th week as the union offered a counter-proposal to CBS's offer of a wage boost of 15% across the board and $85 weekly starting salary. The guild counter-proposal, on which the network has not acted, requests a 20% wage boost and $92.40 starting salary.

WILL THE THAW BE A BLIGHT OR BLESSING?

After a week's study of the FCC's giant economy size allocations report, different people have different reactions. Most Washington lawyers and engineers feel the report has flaws but can be lived with. Some, however, side with dissenting Comr. Jones and think it's a mess (see story in right-hand column). Manufacturers naturally are pleased because of promised expansion of their business (see left-hand column). Educators, handed 242 chances to get into TV, are wondering what to do with this expensive gift (story on page 80). A dash of cold water is thrown on plans considered in some cities by rival AM operators to merge for joint operation of scarce TV (page 69). Meanwhile, 15 applicants file for stations under new allocations (pages 70, 71).

Easy Conversion To UHF Promised

WHEN UHF television stations take the air, VHF receivers can be easily and cheaply adapted to receive the new band.

This is the promise of the set manufacturing industry following the FCC's April 14 action ending the 3½-year freeze [B•T, April 14].

Leading set makers contacted by BROADCASTING • TELECASTING said they had long ago starting preparing for the arrival of UHF by designing and/or testing various types of conversion equipment. At least two-score types of tuners, adapters and converters have been built and tested.

No fears have been expressed about ability of present sets to pick up UHF signals of VHF quality with the use of conversion techniques. With arrival of UHF service, manufacturers will be marketing sets that tune the 12 VHF channels along with the new UHF channels.

Price Range $10 to $50

In general, the prices for conversion range from as low as $10 up to $50, depending on the type of receiver. Many manufacturers using turret tuners explain that simple addition of tuning strips or plugs will permit UHF reception on two or more of the VHF channels in present tuners. In the case of continuous tuners, addition of a coil plus possible other changes will do the job.

Where sets have been built without thought of UHF, simple converters can be attached to receivers. These, of course, are more complicated and expensive than tuners. One type of adapter for continuous tuners adds an extra concentric knob with belt-driven channel selector.

"Radio-television manufacturers have solved the engineering problems involved in making UHF transmitting and receiving equipment and are prepared to take and fill orders promptly," said Glen McDaniel, president of Radio-Television Mfrs. Assn.

"UHF converters and tuning strips will be available to VHF set owners wherever UHF stations are constructed, and receivers with built-in UHF reception facilities will be ready for new television areas. It does not appear that any shortage of materials will restrict the supply of these devices in the immediate future.

Materials Outlook Good

"While the effect of lifting the TV freeze will be psychological at the outset rather than an actual upsurge in business, we anticipate a gradual and steady increase in the production and sales of TV transmitters and receivers for a number of years."

The TV station freeze thaw will not find telecasters wanting for raw materials the last half of this year. The industry has been reassured on this score by Henry H. Fowler, National Production Authority Administrator, who described construction controls as "reasonably unfrozen." He had told NARTB convention delegates early this month that construction will be permitted "on a fairly regular scale" [B•T, April 7].

Despite the current steel upheaval, structural steel probably will remain in ample supply for new TV stations and current alteration projects after July 1. NPA authorities foresaw no appreciable change in the picture at the end of last week.

This means that the handful of new TV stations expected to commence operation by year's end will receive sufficient materials to meet their goals. Additionally, NPA already has indicated that construction now underway by existing radio-TV broadcasters can be completed and that other major projects not yet begun may be planned with reasonable assurance of materials [B•T, March 24].

Further tipoff was given by the government last week with issuance of approvals for virtually all radio-TV applicants (see separate story page 28).

In instances involving minor alterations or remodeling, broadcasters may continue to write their own tickets for steel, copper and aluminum.

There is less of a problem concerning metals for radio-TV receivers and related products, with manufacturers expecting to meet their 1952 set quotas. No question will arise until 1953 when the growth of new TV station markets could pose a materials problem, it was felt.

Stromberg-Carlson Co. was one of the first manufacturers to put a UHF converter on the market, said Stanley H. Manson, manager of advertising and public relations. The unit retails for $49.50 and is in production. The new line of Panoramic vision models includes a strip tuner. Set owners can put in as many as six UHF strips.

Crosley Plans Ultratuner

Crosley Division, Avco Corp., also has a UHF continuous tuner or converter on the market, according to Leonard F. Cramer, assistant general manager. It is known as the Ultratuner. When UHF reception is available, he said, Crosley will make available two-band continuous tuners receiving both VHF and UHF. These will cost possibly $20 or $30 more list, depending on cost of new tubes not yet in

(Continued on page 38)

HURRY & BUY TACTIC
Urged by Some Set Dealers

RELEASE of FCC's new TV allocation brought forth high-pressure advertising by set dealers in one city which does not now have any television service.

Heeding the public hunger for service, some of the newspaper advertising copy implied that pictures would be flooding the area overnight.

An advertisement in a Tampa, Fla., newspaper, proclaimed that Florida "gets 58 TV channels; Tampa-St. Pete area granted 4 outlets as U. S. lifts 2-year-old freeze." Then followed this message:

"More than 2,000 new TV stations to operate shortly. There will be a terrific demand for TV sets. Don't wait for television shortage. Don't wait for prices to go up. Buy Now . . . ."

Legal, Scientific Opinion Divided

IS ANYONE going to take the FCC's final TV allocations report to court?

That was the $64 question last week, following the issuance of the long-awaited end-of-freeze announcement [B•T, April 14].

The answer seems to be: There's lots of talk about going to court, but none among the Washington legal and engineering fraternity can say for sure yet.

There is less question, however, on whether anyone will go to court in specific city instances. Several Washington attorneys have virtually promised to take just that action.

One prominent attorney flatly stated that he would go to court on behalf of one client to protest the "mathematical rigidity" of the allocations plan. He felt that his first move would be to petition the FCC for reconsideration of its decision regarding his client. This has to be filed within 20 days after publication of the Sixth Report and Order in the government's *Federal Register*.

It is doubted whether any attempts at litigation will be made prior to August.

Zenith Will Sue

However, only loser that has publicly stated it would go to court is Zenith Radio Corp., Chicago radio-TV receiver manufacturer. Zenith, a pre-freeze applicant for Channel 2 in Chicago, had protested Commission's proposal to change WBKB (TV) frequency from Channel 4 to Channel 2. Final report made this change definite, and Zenith stated, according to newspaper reports, that it would fight the decision in court.

Before Zenith does that it probably will re-file its petition asking the FCC to rescind its decision changing the WBKB assignment, it was understood. Zenith was among a number of petitioners whom the Commission denied, but indicated that further petitions could be filed.

There was no clearcut consensus on the Commission's final report. Most broadcasters and manufacturers hailed the decision as the beginning of a new era in TV's growth to major communications size (see comments in separate story on page 70).

Most Washington attorneys and engineers expressed unhappiness with the report but figuratively shrugged their shoulders, claiming they could "live with it." Their concern was primarily with the methods of processing applications and how soon their clients might

(Continued on page 48)

NEWS SHOWS

More Sponsors Are Signed

By FLORENCE SMALL

AT LEAST eight advertisers figured in important actions last week with the most significant development being a perceptible drift to news shows, presumably as a result of heightened public interest in that form of program during an election year.

Gulf Oil Corp. is understood to be considering at least 10 to 15 markets for radio news shows which will be placed on a local basis and start in June.

Gulf, which sponsors *We the People* on NBC-TV (Friday, 8:30-9 p.m.), meanwhile announced that the editors of *Life* magazine will produce that program during the forthcoming political campaigns and conventions, starting May 9 for 13 weeks.

Phillips Petroleum Co., Bartlesville, Okla. (Phillips 66), which is sponsoring six quarter-hour news shows weekly in 28 radio markets, starting the last week in April, will sponsor half-hour *Telesport Digest* with Harry Wismer once a week on 18 television stations. Agency is Lambert & Feasley, New York.

New York, New Haven and Hartford railroad will sponsor five 15-minute programs a day on WHDH Boston directly from Chicago during the national political conventions there in July. The programs, Station Manager William B. McGrath said, are believed to represent the first such instance of convention reporting by a Boston outlet. The railroad, through Chamber & Wiswell, Boston, also will sponsor WHDH coverage of Massachusetts primaries April 29 and of national voting next November.

Armstrong Rubber Co., West Haven, Conn. (tires), on June 2 will start a test campaign in St. Louis and Des Moines, sponsoring newscasts in those cities. Maxon Inc., New York, is the agency.

Other advertisers who figured in transactions last week include Warner-Hudnut Co., Bymart-Tintair Inc. and Mohawk Carpet Mills.

Studying Summer Spots

Warner-Hudnut, which a fortnight ago cancelled its Walter Winchell show on ABC radio because of the news commentator's illness [B•T, April 7], is contemplating a radio spot campaign for the summer and is expected to spend over a million dollars in a network television show next fall. Kenyon & Eckhardt, New York, is the agency.

Bymart-Tintair, in what Executive Vice President Phil Kalech said is an "attempt to get a more powerful penetration into rural and urban markets than we were able to achieve in our first year of television advertising, when we confined ourselves to the more spectacular but less comprehensive television advertising," is releasing a schedule of advertising on 132 radio stations and 38 TV stations, starting this month, with about 25 spots per week on each station.

"Through market tests," Mr. Kalech said, "we have learned that Tintair now enjoys more than half of the home hair coloring market in the United States and that Clo, the new shampoo, which was introduced in the eastern seaboard as recently as March 1, 1952, has now become the leading selling shampoo on the market. Clo is now being introduced nationwide." In addition, the company announced that it had entered the Canadian market and would use newspapers and radio. Phelwood Distributors, Toronto, Ont., will manufacture and distribute to wholesalers and retailers in the Dominion the complete line of Tintair products.

Mohawk Carpet Mills, Amsterdam, N. Y., supplementing a radio spot campaign already underway, is scheduling a television spot series on 46 TV stations in the country's first 32 markets starting this month.

The cartoon spots feature "Mohawk Tommy," Indian character newly created for the carpet company's advertising.

The firm's radio spots began March 24 on 94 radio stations in 65 markets.

The intense tri-media (radio, TV and newspapers) advertising campaign is in support of the Mohawk "Spring Carpet Festival" being carried out beginning with the carpet fashion opening in retail stores handling Mohawk carpets.

Discussing the Gulf-*Life* teamup, Gulf President S. A. Swensrud said: "The next few months are bound to be important ones in the political history of the country and in order to bring to the people an interesting and dramatic presentation of all sides of the picture we have invited the editors of *Life* magazine to produce *We, the People* and to bring to the program their great journalistic background and resources."

Andrew Heiskell, publisher of *Life*, said: "We are delighted at this opportunity to undertake an important public service by examining the Presidential contest and the big issues which face the American people. We hope to present the dramatic picture of the current political scene each week."

The Gulf executive emphasized that *Life* will act solely as the program producer and that this arrangement does not constitute joint sponsorship.

Young & Rubicam, New York, is the agency for Gulf and *Life*.

THOMAS F. O'NEIL (l), president, Thomas S. Lee Enterprises, shakes hands with Harry Wismer, radio-TV commentator, after signing contract under which Mr. Wismer joined the Lee firm in an executive capacity [B•T, April 14].

POLITICAL TIME

'Block' Periods Suggested

BLOCKING of time periods for paid political radio and TV programs during the pre-election weeks was advocated Thursday by members of the Senate Subcommittee on Privileges and Elections.

The subcommittee is studying ways of modernizing election laws, including upward revision of the 1925-established limits on the sums that can be spent in campaigning.

Legislation to give radio and TV stations and networks libel relief because of their inability to control remarks by candidates also is being considered by the subcommittee.

Spokesmen for CBS opposed legislation designed to give libel relief. This is contrary to the position taken by most of the industry.

The idea of setting aside time periods during Presidential campaigns was offered by Sen. A. S. Monroney (D-Okla.), subcommittee member, as a means of saving money and obtaining desirable hours. Like Chairman Guy M. Gillette (D-Iowa) and Thomas C. Hennings Jr. (D-Mo.), he was searching for ways to keep down the cost of telecasts and broadcasts.

Subcommittee members wondered about payment of the 15% agency commissions on network time charges when sponsored programs are pre-empted by political programs. They questioned, too, the non-cancellable talent costs that go along with pre-empted time periods.

Adrian Murphy, president of CBS Radio, and Joseph V. Heffernan, NBC financial vice president, expressed interest in the time-blocking idea though Mr. Murphy doubted if much money would be saved parties and candidates. Sen. Monroney suggested that industry representatives get together and reserve political time in the autumn.

Mr. Murphy presented the broadcasting case to the subcommittee, flanked by Julius F. Brauner, counsel. Mr. Heffernan gave the TV story. He was accompanied by Hugh M. Beville, NBC director of plans and research; Davidson Taylor, general production executive, and James E. Greeley, counsel.

Asked his views on the idea of blocking time in advance during Presidential campaigns, Mr. Heffernan said it might be possible "to work something out." He added that NBC confines its privilege of pre-empting sponsors' time and selecting hookups to political advertising.

Industry Spokesman

When Sen. Monroney asked if the industry had an association that could make such arrangements, Mr. Heffernan said NARTB serves the industry as trade association. He noted, too, that NBC's SPAC committee meets later this month and perhaps could consider the idea.

Subcommittee fears that commercial sponsorship of the national conventions on TV might be dominated by beer plugs at exciting moments were eased by Messrs. Murphy and Heffernan. They explained that the major parties have veto power over the three sponsors —Philco (NBC), Westinghouse (CBS) and Admiral (ABC). They explained the video sponsorship will be dignified and plugs will not be inserted at critical moments.

Sponsorship insures the largest possible number of stations on the networks, the subcommittee was told, with advertising fees only partly compensating for cost of installations and coverage.

In the discussion of radio's libel dilemma, Messrs. Brauner and Murphy said CBS prefers the hazards of damage suits to the protection of legislation that might force the network to refuse its facilities to a candidate. Most of the radio-TV industry members, including NARTB, advocate protection by state and federal statutes because of their lack of control over libelous statements. Many states have enacted such statutes.

On behalf of radio, Mr. Murphy said it is still the most economical medium for reaching the people. Only an "insignificant increase in cost-per-thousand" has occurred since 1944, he said.

Mr. Heffernan said TV may be able to deliver an audience "for about three-tenths of a cent for each person of voting age reached. With the exception of network radio, we believe this is a lower cost than that of any national medium. Our studies and those of others also indicate that television is the only national medium for

(Continued on page 32)

MEDIA SEIZURE

Truman View Held 'Yes'

RADIO and television stations can be seized by the government any time the President sees fit, judging by the tenor of a statement made Thursday by President Truman.

Newspapers, too, face the same prospect, according to some interpretations of the President's comment, made at a news conference held in connection with the convention of the American Society of Newspaper Editors, held in Washington.

This is believed to be the first time such a threat to newspapers has been implied by President Truman.

Col. J. Hale Steinman, co-publisher of the Steinman newspapers which own the Steinman radio and television stations, in Pennsylvania and Delaware, asked the question that inspired the Presidential observation.

"You have seized the steel mills, Mr. President," Col. Steinman said. "Can you also seize newspapers and radio stations?"

The President, obviously not relishing the query, answered quickly in this way: Under certain circumstances the President must act in the best interest of the country. He then turned quickly to another editor who had taken the floor to ask a question on another subject.

Radio and TV stations under Sec. 606(C) of the Communications Act are subject to seizure in case of war, threat of war or other national disaster, or to preserve neutrality. The President upon proclamation may close or commandeer communication stations and equipment. Legislation enacted last year (S 537) amended the Communications Act to give authority to seize "electromagnetic communications" devices in case of emergency. Subsequently President Truman issued an Executive Order implementing the law [B•T, Dec. 17, 1951].

After the Presidential news conference, Col. Steinman told BROADCASTING • TELECASTING that Mr. Truman's remarks pose extremely serious issues.

"I was very serious in asking the question," he added.

Several prominent editors were quoted by Associated Press as being critical of the President's response to Col. Steinman. The wire service quoted them as follows:

● Alexander F. Jones, *Syracuse Herald-Journal*, ASNE president—"If he has the power to seize steel mills and radio stations, I see no reason why he does not have the right to seize farms on the basis that the cost of food is too high. . . . The reason he would never do that is a matter of several million votes but the principle is the same."

● E. K. Gaylord, *Daily Oklahoman* and *Oklahoma City Times* and WKY-AM-TV—"If the President could do that we're pretty close to dictatorship."

● George W. Healy Jr., *New Orleans Times-Picayune* — "If the President has that power we don't have a democratic government."

● Lester Markel, *New York Times* (Sunday)—"There is a question whether he should have seized the steel mills. Even if you consider that, the seizure of radio and newspapers goes far beyond and raises much deeper questions. The steel mills are not organs of public opinion, but the newspapers are."

Earlier, the manner in which radio and TV were used by the President to announce seizure of the steel mills was singled out for editorial criticism by the *Christian Science Monitor*. In an editorial, "Steel and Politics," the *Monitor* on April 10 stated in part:

The manner of the seizure is no less disturbing than the fact. Seizure without due process of law is accompanied by a direct radio appeal which seeks prejudging of the case by the public before the courts can act. We don't believe Mr. Truman means to be a dictator, but here is a method dictators use.

Eric W. Stockton

ERIC W. STOCKTON, board chairman, Stockton-West-Burkhart Inc., Cincinnati-New York advertising agency, died unexpectedly April 16 at his home in Cincinnati. Survivors include his wife, two sons and a sister.

FEBRUARY GROSS

Further Reflects TV Rise

GROWTH of television as an advertising medium is spotlighted by Publishers Information Bureau's reports on the volume of advertising on the radio and TV networks during February. Totals for both radio and TV were less than in January, however.

Not only does the February TV network gross time sales revenue of $14,786,047 top the month's radio network gross of $13,560,948, but the TV networks during the month broadcast programs sponsored by 192 advertisers, 16 more than the 176 who sponsored programs on the four major radio networks.

And, although the maximum number of stations carrying any sponsored TV network show was 62, in contrast to the 536 stations broadcasting the most widely disseminated network radio programs, with the average radio network comprising three or four times as many stations as the average TV network included, the average ex-

ENGINEERING FIRM

Three Form in D.C.

ESTABLISHMENT of the radio-TV consulting engineering firm of Vandivere, Cohen & Wearn in the Evans Bldg., Washington, was announced last week. The three partners had been associated with the engineering firm of Weldon & Carr.

Edgar F. Vandivere was graduated from Emory U. in 1934 and earned a graduate degree at Duke U. in 1935. After teaching at Clemson College, he joined the FCC in 1942, leaving in 1951 from a position as a branch chief in the Technical Research Division to join Weldon & Carr as senior physicist.

Jules Cohen was graduated with an E.E. from the U. of Washington in 1938. He served with the Navy during World War II, attaining the job of executive officer of the Electronics Division, Commander, Service Forces, Pacific Fleet. He joined Weldon & Carr in 1945.

Wilson C. Wearn is a 1940 electrical engineering graduate of Clemson College. He served with the Army during World War II and then taught electrical engineering at Clemson. He later was a technical expert with the FCC Hearing Division. He joined Weldon & Carr as a senior engineer.

CONSTRUCTION

NPA Issues More Grants

A BLANK check for construction permits and materials allotments virtually has been issued to the nation's building-minded radio-TV broadcasters, according to a progress report on station projects revealed by allocation authorities last week.

A summary of applications prepared by the Industrial Expansion Division of the National Production Authority showed that numerous broadcast bids had been approved through April 11 and others were pending with assurance their projects would be completed.

The breakdown, which spells out NPA's construction grants for the second quarter announced last month [B•T, March 24], covered these radio-TV broadcasters:

NBC projects in Hollywood, Burbank, New York and Brooklyn; CBS in Los Angeles and Chicago; ABC in San Francisco; Allen B. DuMont Labs. in New York; WNBF-TV Binghamton, N. Y.; WCAU-AM-FM-TV Philadelphia; WHEC Rochester, N. Y.; WTMJ-TV Milwaukee; WDAF-AM-TV Kansas City, Mo.; WHUM Reading, Pa.; WJBK-TV Detroit; and others, including community TV antenna interests. (See table)

At the same time, the Commerce Dept. lifted its short-term freeze on steel deliveries for civilian uses and the Defense Production Administration announced that third-quarter steel quotas would double the April-June allocation for commercial building. It was indicated that industrial (radio-TV) supplies would ease as well. Commerce Secretary Charles Sawyer predicted that steel output "will very shortly be back to normal," thus indicating an ample supply in the months ahead for radio-TV broadcasters as predicted by NPA Administrator Henry Fowler [B•T, April 7].

Probable Grants Noted

The accompanying table shows allotments granted both for construction permits and quotas of materials for the first two quarters. In those instances where approval was not indicated the application was pending with every likelihood of being granted in subsequent quarters.

Applications still pending at NPA included those of NBC, WHUM Reading, Pa., WJBK-TV Detroit and three community TV and other firms—Lycoming Television Co., Williamsport, Pa.; Southern Radio-TV Co., Miami Beach, Fla., and Havens & Martin, Richmond, Va.

Of the seven NBC projects listed, four have been publicly approved, including the network's bid for materials to construct new facilities at Burbank, Calif. Actually, this two-studio project was scaled down from $25 million and, while NPA listed the value at $5 million-plus, the estimate is closer to $2.7 million [B•T, March 17, 10]. Work has begun, however, on the projects still pending, with the result the network will be able to complete them in Rockefeller Center, New York and in Hollywood.

Meanwhile, NBC will erect two additional studios on the 49-acre Burbank property, it was reveiled in Hollywood.

NBC has been granted the "go ahead" by NPA for the second unit of buildings. Approval of the network's application covers the third quarter of this year and will make available critical materials necessary.

NBC recently broke ground for the first studio unit, to be ready by Oct. 1 [B•T, Mar. 24]. With NBC New York executives' approval on plans, the second unit is expected to be completed by year's end. O. B. Hanson, NBC New York vice-president in charge of engineering, was in Hollywood during early April blueprinting plans.

ABC is moving ahead with work on studios and offices in San Francisco on the strength of two quarterly grants, while DuMont Labs. reports similar progress on two WABD (TV) New York projects. Company has applied through the third quarter.

* * *

GRANTS ANNOUNCED IN NPA PROGRESS REPORT

(T—Indicates Application Pending; A—Approval Given; Quarter Covered in Application; * Not Given)

Applicant & Locality	Project	Amount	% Completed	Quarter	Allotment
Vermont TV Inc., Barre, Vt.	TV	$26,000	60%	1, 2, 3, 4	A
NBC Hollywood	Radio-TV Studios	67,000	*	1	T
NBC Brooklyn	TV Studios	115,000	*	1	A

Lycoming TV Co., Williamsport, Pa.	Community TV Antenna Sys.	350,000		1, 2, 3, 4	T
Southern Radio-TV Co., Miami Beach, Fla.	TV Antenna Tower	50,000		3	T
Havens & Martin, Richmond, Va.	TV	150,000		3	T
NBC Burbank, Calif.	TV Studios	5,650,000		2, 3	A

CBS Material Guarantee

CBS reported its Los Angeles TV center as 45% complete, with guarantee of materials through the third quarter. CBS also applied for materials to erect facilities now in the International Amphitheatre in Chicago for the Democratic and Republican National Conventions in July and received NPA approval.

Not shown in the breakdown were Tampa Broadcasting Co. (WALT Tampa, Fla.), which was exempted on alterations estimated at $7,500, and KWTX Broadcasting Co. (KWTX Waco, Tex.), exempted similarly on station alterations for $71,680.

Details on other broadcast projects and on community TV projects are shown in the table. Many of them involve applications filed with NPA over the past eight months [B•T, Sept. 24, 1951, et seq.].

NATIONAL SPOT

NARTSR Shows Advantages

NATIONAL spot radio's flexibility in meeting advertisers' individual needs economically and effectively is stressed in a new presentation unveiled by the National Assn. of Radio & Television Station Representatives last week and being shown now to advertisers and agencies.

The presentation emphasizes that markets differ individually, product distribution varies from market to market, markets desired in sales campaigns often vary, high listenership periods are not uniform among stations, and listening tastes are different. In NARTSR's view, the best way for an advertiser to reconcile all these and other variances to his own advantage is to purchase time on a national spot basis.

"For most advertisers most of the time," the presentation asserts, national spot is the "most effective medium," affording "complete flexibility" in time, programs, markets, stations and budgets.

It also suggests that national spot and network radio should be regarded as separate media.

Spot, it notes, is the only national medium which has enjoyed continuous growth for 15 years—having gained in volume from $13.8 million in 1935 to an estimated $134 million in 1951. Spot's 1935-1950 gain of 771% is compared to a 269.7% rise in network business during the same period.

As evidence of national spot's effectiveness, NARTSR cites advertisers who have used the same station or stations for 10 years or longer, including Household Finance, BC Headache Remedy, Rapin-Wax, Texas Co., Stanback, J. A. Fogler, Carter Pills, Dr. Caldwell, McKesson & Robbins, Phillips Petroleum, St. Joseph's Aspirin, Conoco Motor Oil, Socony-Vacuum and Colgate.

It is pointed out that *Esso Reporter*, as another example, was placed on 11 stations in 10 markets in 1935, whereas in 1951 it was on 52 stations in 49 markets.

FCC Figures Cited

From the station's standpoint, it is stressed that 70% of the spot dollar goes to the broadcaster, compared to 30% of the network advertiser's dollar.

FCC figures are cited to show that, in 1950, clear-channel station income came 27.2% from network business, 50.7% from spot and 22.1% from local sales. For regional stations: 19.4% network, 31.4% spot, 49.2% local. For local stations: 9.9% network, 13.5% spot, 76.6% local.

Emphasizing the market-to-market variations in brand popularity, NARTSR officials reported that BAB-O ranked first in its field, nationally, "until a national spot campaign for Ajax put Ajax in first place."

As evidence of spot's flexibility in choice of markets, the presentation notes that the Borden Co. uses one station to promote its cheese, 35 stations in 31 markets for Starlac, 72 stations in 61 markets for evaporated milk and 86 stations in 68 markets for Borden products. Of the latter 86, it is pointed out, 24 are CBS affiliates, 23 ABC, 15 NBC, 11 Mutual and 13 are independents.

The presentation was developed by Murray Grabhorn before he left the NARTSR managing directorship to join the Edward Petry & Co. representation firm a few weeks ago. It was shown to newsmen at a luncheon Tuesday by T. F. Flanagan, now managing director of the association. Other NARTSR leaders on hand included Joseph J. Weed of Weed & Co., president; Eugene Katz, Katz Agency; Robert D. C. Meeker, Robert Meeker Assoc., and Russell Woodward, Free & Peters.

One of the country's biggest finance companies, a $123 million business, will celebrate its 25th birthday next July. Its founder and board chairman, in this special report, tells how radio helped build his enterprise from a single office operated by him and his wife to its present bigness—150 offices and 975 employes.

EIGHT BELLS, ALL'S WELL FOR SEABOARD

By WILLIAM A. THOMPSON
FOUNDER AND CHAIRMAN OF THE BOARD, SEABOARD FINANCE CO.

IT WAS a tribute to the penetration of radio advertising when newsboys sounded bicycle bells and sang out "Eight bells and all is well" as they smacked their newspapers against entrances of Seaboard Finance Co. offices in California back in 1940.

Seaboard had been a radio advertiser for three years, first by purchasing time signals and then with sponsored programs. From the beginning, the ringing of ship's bells marking the hour had been the maritime theme preceding the Seaboard commercial.

Proof that the company's advertising dollar had been well spent was on more businesslike and authoritative records in its files. The bicycle bells, however, were still a pleasant dramatization of the statistics.

By this time we were quite thoroughly sold on this medium of advertising in areas in which we had tried it. We gave every credit except one—in the beginning we elected to *buy* radio time; no station or network representative had approached us to *sell* us so much as a spot announcement.

First in Field

Seaboard Finance Co. was first in its field in the Los Angeles area to become extensive radio advertisers. We believe that we were also first nationally. We have never checked for verification.

When we embarked on a testing program of radio time in 1937, Seaboard was then a comparatively young company (we celebrate our 25th anniversary on July 1, of this year), with 22 offices in California only and an annual volume of business of $3,949,000.

Today Seaboard is represented by 150 offices in 23 states. Volume of business for 1951 was $123 million.

When Seaboard opened the doors of its first office, a small frame house at 2514 So. Figueroa St., in Los Angeles, on July 1, 1927, personnel consisted of two—my wife and me.

Our capital was my experience as general manager of a small chain finance company, a small amount of money, and a fair amount of credit. The latter was important since the money we had on hand was only $2,790.

Seaboard not only weathered the depression when sturdier firms failed, but it grew. The personnel was expanded to include 975 employes. Among those who came to us in our first years, six are still with the company. First earnings went back into the company to provide working capital. In 1935, Seaboard for the first time sold stock to persons not employed by the company.

We attribute our present place in the finance field (fourth largest in the United States) in large measure to adhering to one rule in every phase of operation—absolute honesty. And we also believe that it was this rule applied to our advertising copy for radio which has brought, and continues to bring us, successful results.

Seaboard specializes in small loans—loans for radios, refrigerators, other household appliances and furnishings (hard goods); accumulated bills, medical expenses and money for other human emergencies. We also loan large sums of any denomination, in states where there is no loan limit, but it was and is to the small borrower that we direct our radio advertising copy.

In our thinking, it was poor business to encourage anyone to ask for an unwarranted loan or to permit him to borrow beyond his ability to repay without hardship. Either would be a disservice, instead of the personal service on which the policy of our company is predicated.

Some years prior to 1937, we had made one abortive venture into radio advertising. Our returns seemed slight for the money spent. We learned, however, in the light of later experience that had we spent more the over-all returns would have been more satisfactory. But as it was, we pigeon-holed the idea of radio for us.

Then at a dinner, I met Frank Bull and Dick Smith, partners in the advertising firm of Smith & Bull, with whom I had had a slight earlier acquaintance.

They were both crusaders for radio advertising and pointed to its successful use by many of their agency clients. Mr. Bull, a sportscaster and disc jockey as well as advertising specialist, was extremely articulate.

Soliciting or Not?

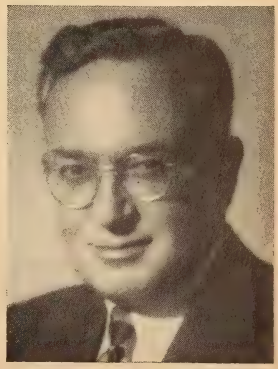
And the emphasis of both men was consistently on "radio time rightly placed and rightly used." Neither was soliciting the Seaboard account — or perhaps they were. I've never been quite sure.

I believe I closed the discussion that night with a polite, "Well, you may be right but our one experience with radio was unrewarding."

Three days later, after thinking over the conversation, I phoned the advertising partners and asked them to come to my office to discuss the matter further. Before they left my office that night, Smith & Bull were advertising representatives for Seaboard. And we were committed to trying radio again.

The initial program laid out for testing was the purchase of time signals on independent Los Angeles stations. The ship's bells insignia, which so amused us when newsboys took it up and which we still use, were fixed on as our signature.

And it was agreed that results both as to applicants directly traceable to our radio advertising as well as true representation were to be checked and analyzed thoroughly.



To do this, our loan application blanks were changed to carry a detachable portion on which was indicated whether the applicant had been sent to us by word-of-mouth, or some one advertising medium. (We also used direct mail and newspaper advertising.) Interviewers were then instructed to give a detailed report of each applicant's picture of borrowing possibilities.

Information relative to applicant sources and inferences drawn from advertising copy were then relayed to Smith & Bull. Any announcement that in any way could be considered misleading, was changed immediately.

Back in 1937 semantics was not so popular a subject as it is today. We soon learned, however, that a single word, though technically correct, could produce an erroneous picture in the mind of the hearer.

Those round-the-clock time signals on local stations proved

(Continued on page 58)

Mr. THOMPSON

NEWS AWARDS

For Smith, Murrow, Davis

"EXCELLENCE of presentation and interpretation of foreign news" was basis for judging seven annual awards of the Overseas Press Club, announced Friday.

Three of the awards went to broadcasters:

Howard K. Smith, CBS Radio European news chief, won for "the best consistent radio reporting from abroad." Mr. Smith is on CBS Radio from 12:30-12:45 p.m., Sundays during *World Affairs Report* and at frequent intervals on the 8 a.m. daily *World News Roundup* and other CBS Radio newscasts.

Edward R. Murrow, CBS Radio newsman, editor of CBS-TV's *See It Now* and, with Fred Friendly, co-producer of the same program, won the Overseas Press Club award for "the best consistent television presentation of foreign news." Mr. Murrow has been honored by the group previously in 1940, 1948, and 1950.

Elmer Davis, veteran news analyst of ABC, won the award for "the best radio interpretation of foreign news." Mr. Davis' analyses are on ABC radio, Monday through Friday, 7:15-7:30 p.m. EST.

Other awards, voted by secret ballot of 700 present and former foreign correspondents, went to:

William Oatis, prisoner of the Communists in Czechoslovakia, who won the $500 George Polk Memorial Award for consistent demonstration of courage beyond the call of his profession. (Mr. Polk was an American newsman who disappeared mysteriously in Norway a few years ago.)

Frank Noel, Associated Press photographer now a prisoner of the Chinese Reds, for "the best interpretative picture" to illustrate foreign news of the year.

Cyrus Sulzberger of *The New York Times* for the best consistent press reporting of foreign news.

Joseph and Stewart Alsop of *The New York Herald Tribune* for the best press interpretation of foreign news.

Presentation of the awards will be made at the club's annual dinner, to be held at New York's Waldorf-Astoria Hotel, May 7, the seventh anniversay of V-E Day. John Daly, club president and moderator of CBS-TV's *What's My Line?* will preside.

Meighan Returns

HOWARD S. MEIGHAN, suddenly replaced by Adrian Murphy as president of CBS Radio in mid-March [B•T, March 17], was back at work at CBS last week after a vacation which started immediately after the executive realignment. Officials explained that he was returning to Columbia's "General Executive Group," concerned with overall policy problems of the company, as scheduled when he relinquished the radio network presidency.

PLANNING final details for retail sales campaign which opened yesterday (Sunday) are George Johnston (seated), general manager of Drug Merchandise Guild, and (standing, l to r) Frank J. Miller, treasurer, Maudsley-Miller Adv.; Homer Griffith, agency account executive; Alex Keese, manager, WFAA-570 Dallas; Robert Sherry, drug firm district sales manager; Terry Lee, WFAA-TV sales manager, and Buell Herman, Dallas manager for Edward Petry & Co., station's national representative. Contract calls for 12 quarter-hours weekly on WFAA-570 and a nightly sportscast plus a weekly film over WFAA-TV.

BMI CLINICS

Eight Meetings Set On West Coast

WITH regional or state broadcaster associations acting as host and involving two separate sets of speakers, eight BMI radio program clinics are to be held in the western states starting next Monday (April 28) through May 9.

★

Jim Cox, BMI West Coast representative, will be chairman and moderator of the clinics, with Glenn Dolberg, director of station relations, also participating in sessions.

Traveling speakers and their topics for discussion at clinics in Phoenix, April 28; Hollywood, April 29; Salt Lake City, May 1; Boise, May 2 are: George Higgins, managing director, KMBC Kansas City, Mo., "Programming for Better Sales"; James Russell, president KVOR Colorado Springs, "Importance of Local News"; Murray Arnold, program director, WIP Philadelphia, "Programming Twists and Aids"; Ed Frech, program director, KFRE Fresno.

Augmenting the speakers at Hollywood clinic at Hollywood's Roosevelt Hotel will be Alan Torbet, general manager, KROW Oakland, and Mark Haas, vice president and director of broadcast, KMPC Hollywood, who will discuss "Programming and Selling for Profit" and "Radio's Inferiority Complex," respectively.

In Salt Lake City at Hotel Newhouse, featured regional speakers will be Arch Madsen, general manager, KOVO Provo, with topic "Citizenship for Radio" and Del Leeson, promotion manager, KDYL-AM-FM-TV Salt Lake City, discussing "Expansion of Local Accounts Through Merchandising."

Boise clinic regional speakers are Walter E. Wagstaff, general manager, KIDO Boise, with topic "The Do-Re-Mi of Public Service" and Henry Fletcher, general manager, KSEI Pocatello, discussing "Radio's Short Cut to Suicide." Clinic will be held at Hotel Boise.

Joined by Carl Haverlin, BMI president, a separate traveling clinic will originate in Vancouver, B. C., on May 5 and follow balance of the circuit.

The traveling speakers and topics: William Fineshriber, MBS executive vice president, "Quicker Than the Eye"; William Holm president, WLPO La Salle, Ill., "Opportunities in Local News"; Mahlon Aldridge, general manager, KFRU Columbia, Mo., "After the Sale — What Then?" Harry McTigue, president, WINN Louisville, Ky., "Music is Our Business."

Two regional broadcasters will augment the Seattle clinic at the Olympic Hotel. Robert Wesson. program and promotion, KHQ Spokane, will discuss "Importance of Teamwork Between Programming and Sales." Jerry Geehan, station manager, KMO Tacoma, will talk on "Building an Audience on Local Spots."

The Portland regional speakers are to be Frank Loggan, general manager, KBND Bend, Ore., with topic "Promoting Local Sales" and Lee W. Jacobs, president KBKR Baker, Ore., discussing "The Inflation of Broadcasting." Portland clinic will be at Hotel Benson.

Regional speakers at San Francisco BMI clinic in Clift Hotel on May 9 will be Russ Coglin, program director, KROW Oakland, with topic "A Locomotive Named Programming," and Fred Ruegg, program director, KCBS San Francisco, discussing "Radio's Inferiority Complex."

Under auspices of the Television Broadcasters of Southern California, BMI has also scheduled a special two day TV clinic session in Hollywood Roosevelt Hotel, May 26-27, with specialists in their respective categories from all parts of the country. Program will follow similar BMI television clinics being held in New York May 19-20 and Chicago May 22-23.

LBS DENIED

Baseball Injunction

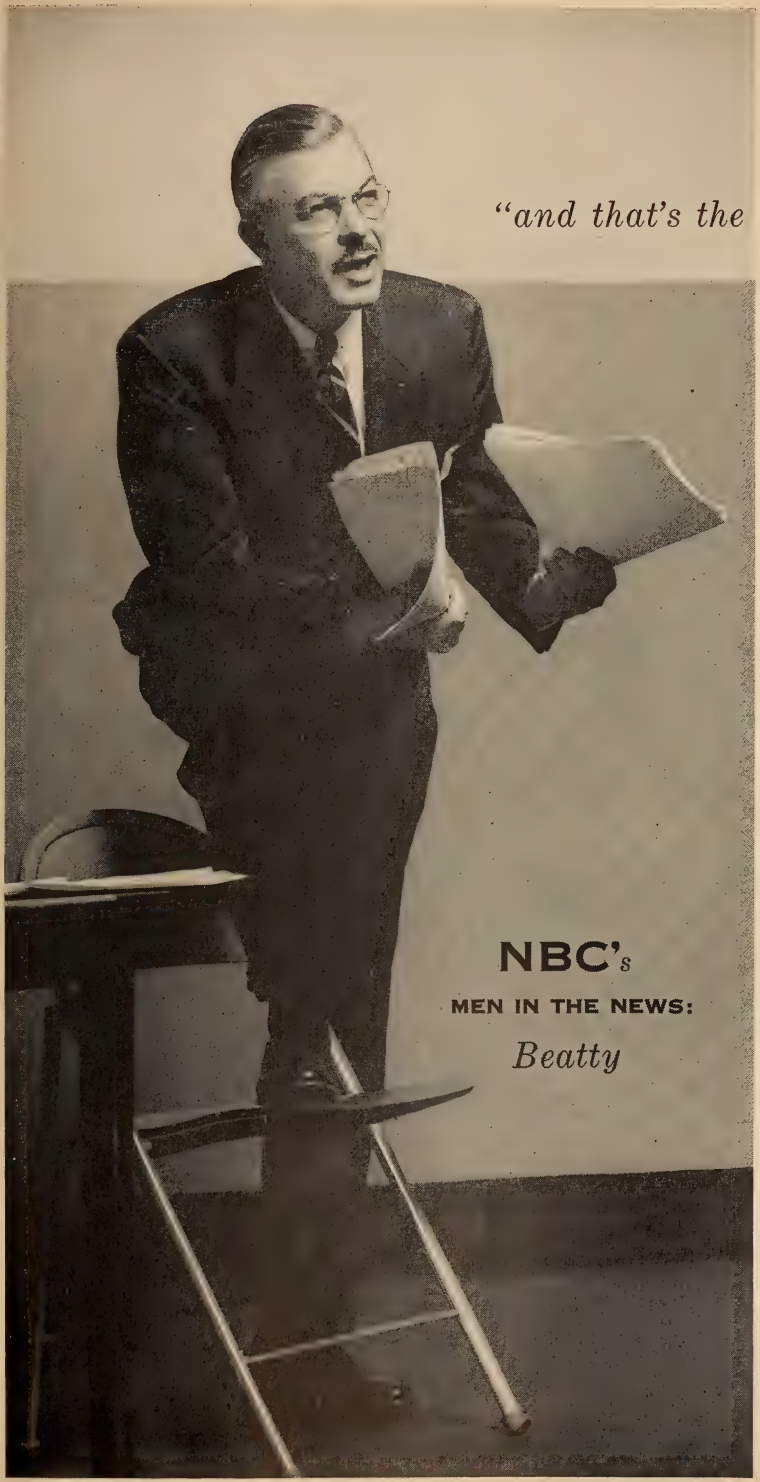
LIBERTY Broadcasting System's plans for Game-of-the-Day baseball broadcasts during the 1952 season were voided Monday in Chicago Federal District Court as Judge John P. Barnes denied relief in the form of a temporary restraining order against 13 major league ball clubs and Western Union [B•T, April 14].

The decision is considered a major blow to Liberty's status because it cripples the network baseball programming until next year. In the meantime, Liberty President Gordon McLendon is seeking full speed for the trial on the $12 million conspiracy suit brought against the clubs and the telegraph company Monday.

The petition filed Monday by Liberty attorneys, McConnell, Lutkin & Van Hook, Chicago, named Western Union as a co-defendant and charged it with conspiracy because of existing contracts with the major leagues. Basis for the charge was that the contracts provide for ball club control of distribution of official scoring accounts.

Liberty said this practice was illegal under terms of the Communications Act, provisions of which apply to Western Union because of its classification as a common carrier. Judge Barnes ruled this point down, however, on testimony that these contracts have always been filed with the FCC and never objected to by that body. The Judge said ball clubs present exhibitions for the public and have certain rights over them, and that he saw no evidence proving an illegal conspiracy and none against Liberty particularly.

Liberty's only recourse now is to bring the anti-trust suits to trial as soon as possible, which an LBS attorney said would be October at the earliest.



The network late last week was negotiating with the Chicago White Sox, with which it has an exclusive Chicago-area broadcast contract, to extend the coverage nationally. It was also reportedly conferring with the Brooklyn Dodgers for national rights.

WALK DEDICATION

Long Island Outlet Opens

DEDICATION of WALK East Patchogue, L. I., N. Y., was to take place at opening day ceremonies last Saturday, according to Capt. John T. Tuthill Jr., president. WALK is assigned 500 w daytime on 1370 kc.

Capt. Tuthill said the station is awaiting FCC authorization to go on the air and that the Saturday ceremonies officially opened the new building. Other WALK officials are W. K. Macy Jr., vice president and principal stockholder, and Niles E. Fegerdahl, general manager.

"and that's the end of the world"

Morgan Beatty meant to say: "And that's the News of the World," but "old disaster man" Beatty was nonplused by a news story. The story? A baby born to a 79-year-old mother and an 80-year-old father.

It isn't easy to confuse Morgan Beatty. He earned the title "old disaster man" on the 1927 Mississippi flood story and has covered most of America's violent upheavals since. As a Washington analyst, Beatty had a two-year beat on the 1937 Supreme Court battle. He accurately forecast the successful Russian resistance in 1942.

Now America's leading interpretive reporter, his NEWS OF THE WORLD for Miles Laboratories is the highest rated daily news show in radio. In this vital election year, Beatty's primary assignment, and that of 100 other NBC men of news, is to cover the primaries, the conventions, the elections as they've never been covered before.

Beatty, Swayze, Chaplin, Hicks—big names in news—but only a part of the thousand-man, news-gathering force which makes the NBC News Center supreme in broadcasting.

Nearly everyone in America learns the news first from radio or television. And the fact that NBC, day after day, broadcasts the highest rated news shows on radio and television proves most people learn news first from NBC. They learn more news, too, because regularly, on radio and television, NBC broadcasts more hours of news than any other network.

In this, the most intense political campaign year since 1932, all news assumes larger significance and quickening importance. As before, most Americans will learn the news first and learn more of it from NBC.

February Gross

(Continued from page 27)

penditure for network time of each group was virtually the same.

On the average, radio network program sponsors spent $77,051 for network time in February (at gross rates). TV network program sponsors, on the average, spent $77,011 for network time (gross).

Comparing Tables III and VI (gross network time sales by product groups for radio and television) shows that for February 1952 advertising of only 11 of the 26 categories accounted for greater expenditures of radio network time than of TV network time, with 15 of the groups spending more for video than radio networks.

Tables I and IV show the top 10 advertisers for the month in each of the network broadcast media, both lists headed by Procter & Gamble Co. and both also including General Foods Corp., Lever Bros. Co., General Mills, Liggett & Myers Tobacco Co. and Colgate-Palmolive-Peet Co.

Tables II and V show the leading advertiser in each product group for February on the radio and TV networks, respectively. Tables III and VI, also already noted, show the total expenditures for network time—radio and TV—with February and January-February 1952 compared to the like periods of 1951.

Table VII compares the monthly network gross figures for radio and TV since last August.

TABLE VII

MONTHLY RADIO AND TV NETWORK GROSS SINCE AUGUST 1951

Month	Radio Network Gross	TV Network Gross
Aug. '51	$11,804,161	$ 9,302,071

Political Time

(Continued from page 26)

which the cost per person reached has declined in the last year."

He said all but three cities (Seattle, Phoenix, Albuquerque) of the 63 areas with TV are to be on the interconnected network this summer. He estimated there are 17 million TV sets in the hands of the public, with another million or two to be added by November. The TV audience in the 1948 campaign watched through 400,000 sets served by 30 stations in 18 cities.

Industry witnesses were questioned by John Moore, committee counsel, about the danger of faking political programs, recalling a composite photo used in a Maryland senatorial campaign. He suggested rules against faking should apply to radio and television but was reminded of the Communications Act and FCC regulations.

Bills designed to give the industry libel protection (S-2539, HR-7062) are pending before the Senate and House Interstate and Foreign Commerce Committees.

Danger of antagonizing the public toward candidates who appear in place of popular programs was stressed by Sen. Monroney.

Present law limits national committees to $3 million expenditure in any one campaign. Senatorial candidates are limited to $25,000 and House candidates to $5,000.

KALTENBORN

Honored in New York

H. V. KALTENBORN, NBC news analyst, was honored Thursday at a luncheon under the joint auspices of the Radio Executives Club of New York and the New York chapter of Radio Pioneers to commemorate his completion of 30 years in broadcasting.

In his professional capacity, the guest of honor looked ahead 30 years to deliver a brief newscast dated April 17, 1982, reporting that former President Truman was predicting Democratic successes at the polls following "30 years of Republican misrule" and that truce talks in Korea were continuing.

Later, Mr. Kaltenborn said the tribute really should be given to the American system of free broadcasting which permitted him to speak his mind with no government censorship or control over his words, a privilege he said was granted only where broadcasting is supported by advertising and not subsidized by the state.

J. R. Poppele, national president of Radio Pioneers, founded by Mr. Kaltenborn, presented him a volume containing signatures of more than 500 members of that organization. G. W. Johnstone, New York president, gave Mr. Kaltenborn an engraved pocketpiece from that city's chapter. I. E. Showerman, REC president, presided at the meeting, during which Rolf Kaltenborn, H. V.'s son, participated in a burlesque of his father's method of news analysis.

KICKOFF at Poor Richard Club luncheon, Philadelphia, entertains Fulton Lewis jr. (third from l), upon Family Finance Corp.'s sponsorship of his 7 p.m. Monday through Friday commentary over WIP there. Among those present are (l to r) Howard Hopson, president of Hopson Adv.; Harold LeDuc, Poor Richard president; Mr. Lewis; Alan K. Dolliver, sponsoring firm's president; John LaCerda, luncheon chairman, and Clyde Spitzner, WIP local commercial manager.

Harold Essex Elected

HAROLD ESSEX, vice president of the Piedmont Pub. Co., Winston-Salem, N. C., in charge of the company's broadcast operations (WSJS-AM-FM Winston-Salem), has been elected chairman of the company's senior management board, it was announced last week.

ABC PICKS WHITE

To Cover Conventions

PAUL W. WHITE, former news director of CBS and now with KFMB-AM-TV San Diego, has been appointed managing editor of ABC's radio and television news staffs to direct their coverage of the Republican and Democratic Presidential conventions this summer.

His appointment for the assignment, for which he has been granted a three-month leave of absence by the KFMB stations, was announced by Thomas Velotta, ABC vice president in charge of news and special events.

ABC's radio-TV coverage of the conventions, to be held in Chicago in July, is being sponsored by Admiral Corp.

BMI PROGRAM CLINICS

APRIL 28 – MAY 12

A concentrated cross-country schedule brings the BMI Program Clinics to you in your own area. Thirty-eight Clinics in 37 States under the auspices of your State Broadcasters Associations. Five additional clinics in Canada complete the Itinerary.

Past BMI Program Clinics have been hailed as "the most comprehensive job of spreading info about latest programming techniques and ideas"—(Variety) and "BMI Clinics spark local showmanship"—(Sponsor). This 1952 series will be bigger and better.

TABLE 2

BROADCAST REVENUES, EXPENSES, AND INCOME OF AURAL BROADCAST SERVICES

1950-1951 (Millions)

	1951 (Estimated)	1950	Percent Increase or (Decrease) in 1951
		Broadcast Revenues	
4 Nationwide networks and 3 regional networks (including owned and operated stations) [1]	$104.1	$110.5	(5.8)
Other AM and FM Stations [2]	351.3	334.0	5.2
Total	$455.4	$444.5	2.5
		Broadcast Expenses	
4 Nationwide networks and 3 regional networks (including owned and operated stations) [1]	$ 93.3	$ 91.5	2.0
Other AM and FM Stations [2]	300.3	284.8	5.4
Total	$393.6	$376.3	4.6
		Broadcast Income (before Federal Income Tax)	
4 Nationwide networks and 3 regional networks (including owned and operated stations) [1]	$ 10.8	$ 19.0	(43.2)
Other AM and FM Stations [2]	51.0	49.2	3.7
Total	$ 61.8	$ 68.2	(9.4)

[1] The number of network owned and operated stations in 1950 was 26 and in 1951, 25.
[2] Including 2,203 AM, AM-FM or independent FM stations in 1950 and 2,240 in 1951.

TABLE 3

Broadcast Revenues, Expenses and Income of Frequency Modulation (FM) Stations

Item	1951 Number of stations	1951 Estimated Amount (Millions)	1950 Number of stations	1950 Amount (Millions)
		FM Broadcast Revenues		
FM stations operated by: AM licensees:				
Reporting no FM revenues [1]	351	—	420	—
Reporting FM revenues	186	$1.9	163	$1.4
Non-AM licensees	65	1.3	86	1.4
Total FM stations	602	$3.2	669	$2.8
		FM Broadcast Expenses		
FM stations operated by: Non-AM licensees	65	$2.8	86	$4.0
Industry total [1]				
		Total FM Broadcast Income (Before Federal Income Tax)		
FM stations operated by: Non-AM licensees	65 [2]	($1.5)	86	($2.6)
Industry total [1]				

( ) Denotes loss.

[1] In view of the difficulty in a joint AM-FM operation in allocating FM operation expense separately from AM station operation expense, licensees of such stations were not required to report FM station expense separately. As a result, FM industry totals for expense and income are not available. AM-FM licensees, however, were requested to report separately the revenues, if any, attributable to FM station operation if such data were readily available. In only a few instances did AM-FM licensees state they were unable to segregate the FM revenues.

[2] Eight of the 65 FM stations operated by non-AM licensees reported profitable operations in 1951.

TABLE 4

Comparative Broadcast Revenues of 1,834 Identical AM Broadcast Stations [1] in Markets With and Without Television Stations, 1950-1951

Type of Market	Number of AM Stations	Broadcast Revenues of AM Stations 1951 (Millions)	1950 (Millions)	Percent of increase or (decrease)
Markets with television stations and estimated television set saturation [2] of:				
Under 30% (16 markets)	98	$31.0	$30.1	3.0
30%-50% (27 markets)	142	42.7	42.8	(0.2)
50% and over (20 markets)	199	94.3	96.6	(2.4)
Total (63 markets)	439	$168.0	$169.5	(0.9)
Markets without television stations	1,395	170.4	157.5	8.2
All Stations	1,834	$338.4	$327.0	3.5

[1] In operation full year in both 1950 and 1951.
[2] Ratio of TV families to total families within area served by TV station—as of July 1, 1951.

TABLE 5

Percentage Change in Broadcast Revenues Between 1950 and 1951 of 1,834 Identical AM Broadcast Stations [1] in TV and Non-TV Markets

Percentage change (1)	Number of stations reporting Total (2)	In TV markets (3)	In non-TV markets (4)	Percent of stations Total (5)	In TV markets (6)	In non-TV markets (7)
Decrease in broadcast revenues:						
Over 20%	80	28	52	4.4	6.4	3.7
20-15	52	24	28	2.9	5.5	2.0
15-10	81	31	50	4.4	7.1	3.6
10-5	140	52	88	7.6	11.8	6.3
5-0	171	47	124	9.3	10.7	8.9
Sub-total	524	182	342	28.6	41.5	24.5
Increase in broadcast revenues:						
0-5%	310	81	229	16.9	18.5	16.4
5-10	286	37	249	15.6	8.4	17.9
10-20	376	68	308	20.5	15.5	22.1
20-30	169	33	136	9.2	7.5	9.7
30-40	72	16	56	3.9	3.6	4.0
40-50	39	10	29	2.1	2.3	2.1
50 and over	58	12	46	3.2	2.7	3.3

Grand Total	1,834	439	1,395	100.0	100.0	100.0

[1] In operation for full year in both 1950 and 1951.

TABLE 6

Changes in Income (Before Federal Income Tax) Between 1950 and 1951 of 1,834 Identical AM Broadcast Stations [1] in TV and Non-TV Markets

Stations Reporting	Number of Stations Total	In TV Markets	In Non-TV Markets	Percent of Stations Total	In TV Markets	In Non-TV Markets
Increased loss in 1951	75	17	58	4.1	3.9	4.1
Decreased income in 1951	611	193	418	33.3	44.0	30.0
Income in 1950 and loss in 1951	100	29	71	5.5	6.6	5.1
Sub-total [2]	786	239	547	42.9	54.5	39.2
Decreased loss in 1951	133	28	105	7.2	6.4	7.5
Loss in 1950 and profit in 1951	183	41	142	10.0	9.3	10.2
Increased profit in 1951	732	131	601	39.9	29.8	43.1
Sub-total [3]	1,048	200	848	57.1	45.5	60.8
Total	1,834	439	1,395	100.0	100.0	100.0

[1] In operation for full year in both 1950 and 1951.
[2] Indicating a less favorable financial position.
[3] Indicating a more favorable financial position.

AM-FM Income

(Continued from page 23)

the total revenues of AM-FM-TV stations in all 63 TV markets in 1951, compared to 26.2% in 1950 and 10.7% in 1949. Revenues of 524 AM-FM stations and 108 TV stations in these cities totaled $342,276,000 for 1951, of which $148,986,000 was attributed to TV.

(5) For the first time, total TV revenues exceeded total AM-FM revenues in six TV cities—Columbus, Los Angeles, Philadelphia, New York, Cleveland and Baltimore.

By age of station, the FCC repeated what has been reported previously—that pre-World War II stations are making out better than post-war stations. Of the 800 stations established before 1942, only 93 or 11.6% reported a loss in 1951. Of the 1,388 stations established in 1942 or subsequently, 330 or 23.8% reported a loss in 1951. Greatest number seem to be in the 1946-48 class. 184 reported a loss in 1951.

The 800 pre-war stations had total revenues of $239.8 million in 1950, income of $44.5 million. This compares to the 1,388 postwar stations' total revenue of $122.6 million, income of $11.0 million.

Commission called attention to the fact that one network (believed to be CBS) was revising its financial data which would reflect more completely the division of expenses between AM and TV. This might mean that the final AM network income data for 1951 may be higher than shown in last week's report on estimated 1951 income.

The Commission also reported that the 19% of AM-FM stations which reported losses in 1951 represents the smallest proportion of losers since 1946.

TABLE 7

Broadcast Revenues of All Broadcast Services (AM, FM and TV) in 1951, Percentage of Revenues of All Services Accounted for by TV, 1949-1951, and Percent Change in Aural Revenue, 1950-1951 for Specified TV Markets

Metropolitan Areas or Communities with TV Stations	Number of Stations 1951 Aural [1] (AM & FM)	TV	Broadcast Revenues [2] 1951 All Services (AM, FM & TV) ($000)	TV ($000)	Percent TV of Total Revenues in 1951	1950	1949	Percentage Increase or (Decrease) in Aural (AM & FM) Revenues 1950-1951
Los Angeles	26	7	$23,939	$13,464	56.2	42.3	17.3	(3.8)
Philadelphia	20	3	15,182	8,200	54.0	39.6	19.9	0.9
Columbus, Ohio	5	3	4,142	2,439	58.9	38.9	12.7	(2.8)

[1] Jointly operated AM-FM stations counted as one station.
[2] Includes network owned and operated stations.
[3] Includes 46 metropolitan districts in 1949.
[4] Includes 58 metropolitan districts in 1949.

NOTE: 1951 data compiled on basis of Standard Metropolitan Areas, 1950 Census. 1950 and prior data compiled on basis of Metropolitan Districts, 1940 Census. Only minor variations occur when the 1950 and prior data are compiled on basis of Standard Metropolitan Areas, 1950 Census.

Four-Day Session Held in Columbus

EDUCATORS, commercial radio-TV broadcasters and government agency officials converged on Columbus, Ohio, the past four days for Ohio State U.'s 22d Institute for Education by Radio-Television.

While the accent was on television in view of FCC's lifting of the allocation freeze, a myriad of varied subjects ranging from international broadcasting to small college station problems occupied a crowded agenda. Sessions were held at the Deschler-Wallick Hotel Thursday through Sunday.

The theoretical approach to broadcasting was reflected in a series of panel discussions touching on news and special events aspects of commercial radio-TV stations, tape recordings, youth discussion broadcasts, organized listeners' groups, programming of music, religious and other broadcasts, international broadcasting and communications research, educational radio, fare offered by government agencies and national organizations and numerous TV panels.

FCC was represented by Chairman Paul A. Walker and Comrs. E. M. Webster and Frieda Hennock. Other government participants were to include Jack T. Johnson, assistant administrator, Federal Civil Defense Administration; John Meagher, acting chief, Radio-Television Division, Dept. of State.

Symposium on TV Held

Opening conference session last Thursday evening was a symposium on TV programming and a similar general session was held Friday on "What the Educational Administrator Expects from Television." (See separate story page 80 and AT DEADLINE.)

A number of allied groups also held concurrent meetings with the institute, which last year, in acknowledgment of the growth of the visual medium, incorporated television for the first time in its title.

Among those organizations meeting were the National Assn. of Educational Broadcasters, Assn. for Education by Radio-Television, *New York Times* Youth Forum, Intercollegiate Broadcasting System and Ohio Assn. of Radio News Editors. FCC Chairman Walker was to address the *Times* forum Friday.

Comr. Webster was to address a Saturday session on "Broadcasting to Foreign Countries," which included a talk on international radio consumer studies by Leo Lowenthal, chief of the Voice of America's Program Evaluation Division on collaboration of international broadcasting systems, by Pierre Crenesse, director of the French Broadcasting System's North American branch; and shortwave coverage of the world audience by Gen. Frank E. Stoner, VOA communications coordinator.

Comr. Webster told a work-study group that "frequency demands of virtually all nations have far exceeded the spectrum space available . . . and countries thus far appear to have been unable collectively to tailor their demands to the restricted space."

"Large and powerful nations must accept full responsibilities before the present 'chaotic condition' in international broadcasting can improve," he asserted.

Not Hopeful

The FCC Commissioner was not overly optimistic. He expressed belief that the original Atlantic City frequency agreement in 1947 was not intended to "provide for the international broadcasting requirements of a deeply troubled world using high frequencies as a means of engaging in a heated propaganda battle."

Noting successes and failure of international conferences since World War II, Comr. Webster called on larger nations to assume world leadership in radio, despite their reluctance, and "see to it that the high frequency broadcasting problem is equitably resolved." Planned use of international frequencies had become inoperative by 1949 because the number of stations had increased to "fantastic proportions," he observed.

A session on "Communications Research" was scheduled Saturday under chairmanship of Merritt C. Ludwig, supervisor of the Fund for Adult Education television project at WOI-TV Ames, Iowa. Dallas W. Smythe, research professor, Institute of Communications Research, U. of Illinois, was to discuss the significance of findings in the TV monitoring studies sponsored by the National Assn. of Educational Broadcasters.

Mr. Lowenthal planned to tell the work group that international communications research is a relatively new field requiring new skills. His advance talk described field studies in the Near East where, he said, the Voice of America commands a faithful audience. These studies, he added, pose difficult questions on national attitudes in relation to broadcasts of political programs and propaganda.

Use of radio frequencies for education was to be covered by Franklin P. Dunham, chief of radio-television, U. S. Office of Education, in a session on the subject with respect to commercial stations. Noting that the U. S. places a high value on education, Mr. Dunham in his prepared talk emphasized that not only do commercial outlets have a legal obligation to "serve the public interest, convenience and

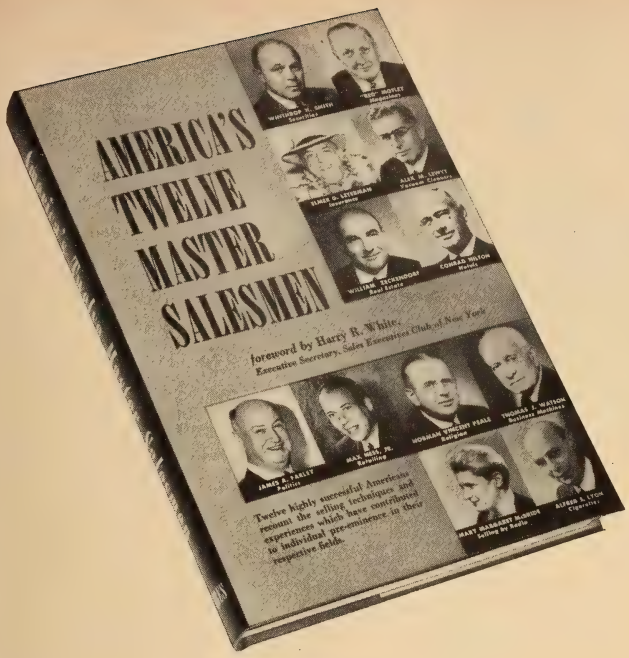
(Continued from page 35)

necessity," but they have found it is "good radio business."

"Our network and independently-operated commercial stations glory in their opportunity to serve the public with instantaneous news flashes, excellent commentators, top sports coverage and programs of general educational merit and high public acceptance," Mr. Dunham said, noting the opportunity afforded under the American system of broadcasting.



Another highlight of Saturday sessions was to be an exploration of new techniques in presenting radio-TV news and special events (see separate story page 44).

National organizations' use of radio was planned Saturday to include Robert K. Richards, NARTB public affairs director, and Jerome Reeves, program director, WBNS Columbus.

Music was to dominate another panel Saturday in a discussion by Walberg Brown, general manager, WDOK Cleveland. Contention was advanced that serious music can compete effectively with other fare for radio listeners.

Annual institute dinner was slated for Saturday evening in the grand ballroom of the Deschler-Wallick Hotel, with Jacob B. Taylor, vice president of Ohio State U., as toastmaster. "Oliver J. Dragon" ("Get on the Dragonwagon this election year") of *Kukla, Fran & Ollie* was to address the assemblage on "The Cultural and Educational Possibilities of Television." Burr Tillstrom, director of the NBC-TV program; Lewis Gomawitz, director, and Beulah Zachary, producer, were to appear.

Highlight of dinner was slated demonstration of *The Standard Hour* and *The Standard School Broadcast* by the Standard Oil Co. of California with concert orchestra and soloists under direction of Carmen Dragon.

When it came to radio, there was only one choice

"Who is the top salesman in your field?" That was the question put to hundreds of executives by Forbes, distinguished publishing firm, in a recent informal poll.

The answers are now out, for everyone to read, in a fascinating new book, "America's Twelve Master Salesmen." Here, the greatest salesmen of our time—in real estate and retailing, cigarettes and securities—tell their secrets of getting results.

When it came to selling by radio, the master salesman turned out to be a woman . . . MARY MARGARET McBRIDE.

That's no surprise to Mary Margaret's millions of faithful followers . . . to her happy sponsors . . . or to ABC. First Lady of Radio, Lady Aladdin of Broadcasting, number-one miracle of modern radio—whatever she has been titled—Mary Margaret McBride is undoubtedly the greatest single selling force in radio history. She is believed and beloved as no other person in advertising.

Wouldn't it be wonderful if *you* could hire one of America's twelve master salesmen? It so happens, you can! Mary Margaret McBride is now available for sponsorship—local, regional or national—on all ABC Radio Stations except in the Chicago area! For details, get in touch with The ABC Cooperative Program Department.

Easy Conversion to UHF Promised

(Continued from page 25)

production. Production of UHF-only sets is planned for markets where no VHF service is available.

Admiral Corp., Chicago, plans to bring its VHF sets into UHF usage by giving free tuning strips to more than two million owners of sets with turret tuners and to all new buyers in 1952, Vice President Richard A. Graver said with no outside converter necessary. All that servicemen need do, he explained, is remove an unused VHF tuning strip from the Admiral turret tuner and insert a UHF strip.

He said Admiral was the first company to produce the turret tuner, having "long anticipated" the use of UHF.

Hallicrafters, Chicago, has four approaches to the UHF problem: Install UHF strips on set models equipped with the dynamic or turret tuner; manufacture a UHF tuner for new sets not having the dynamic tuner, with the UHF tuner mounted in a space provided in the chassis; manufacture a converter, which could be hooked on or placed on top of the receiver, and make combination UHF-VHF sets if customers want one. A spokesman for the company said they could manufacture such a combination set now as preparatory work has been completed. All Hallicrafters sets manufactured since June 1950 are equipped with turret tuners.

Belmont Radio Corp., Chicago, which manufactures Raytheon television sets, has a continuous UHF tuner which can be mounted on the VHF tuner with a substitute dial. One-knob action will bring in 83 channels. If the auxiliary unit is added at the factory for conversion, the cost is $29.95. If it is attached in the field, it is $39.95. The unit is a small box-like mechanism described as the size of a portable radio which can be set on top or at the side of the chassis.

UHF Conversion Facilities

All sets in the line of Scott Labs., Chicago and most of those made by John Meck Industries, Plymouth, Ind., are equipped with a turret type tuner to which UHF strips can be added. The sets have been pre-wired for UHF conversion. The company has also produced a separate converter experimentally, but will not produce these until there is a demand for them, which Meck officials expect next year "at the earliest." The firm has also manufactured the UHF tuning strips experimentally, and could place these in the hands of dealers "within a week" if the public demand warranted production.

Standard Coil Products Co., maker of tuners, has always produced a tuner compatible to special needs of UHF without additional structural change or converter, said Glen E. Swanson, president. The company has made 5,750,000 tuners, he said, which can be readied for UHF by simple substitution of coil strips for about $10, including installation. It serves Admiral, Emerson, Capehart and others, he added. An 82-channel VHF-UHF tuner was demonstrated in February and has an August delivery date, he said.

H. L. Hoffman, president of Hoffman Radio Corp., West Coast firm, said its sets will give complete UHF coverage, with present sets easily adaptable. Conversion can be done by adding an external converter or putting a slug on the tuner, he said.

"Kaye-Halbert Corp., Culver City, will make sets with UHF strips built-in when UHF stations are on the air and demand exists," said Harry Kaye, president. He said present sets can be converted easily.

General Electric Co. is prepared to market a continuous-tuning UHF "translator" for use with present VHF sets, according to spokesmen, who said it will retail for $49.95. Additionally, the company has developed—and is expected to announce details in the near future—an adapter for installation inside VHF sets to permit them to receive selected UHF channels.

Installation By Set Owner

All Westinghouse VHF sets can be converted for UHF reception without sacrificing any of the 12 VHF channels and models introduced this year contain built-in UHF circuits making possible single-dial tuning of UHF as well as VHF, F. M. Sloan, manager of the Television-Radio Division, reported Thursday.

This year's sets, he said, "are equipped to use a new tube-type plug-in channel receptor. Two units may be used to give two additional UHF channels and it is anticipated that this will meet the needs in most areas for some time. The set owner can make this installation. In case more than two UHF channels are available in an area, an all-channel continuous tuning unit will be available. A dial for UHF tuning is incorporated in all sets."

Sets with single-dial tuning manufactured before this year, Mr. Sloan said, can be equipped via the new tuner.

Retail price for the new tuner is $24.95 and Mr. Sloan said volume production is expected to bring this down. The units will be available in each area when UHF broadcasting commences, he added. No price has been set for the continuous tuner covering all UHF channels.

DuMont Labs has both internal and external converters but has not decided when actual production will start, spokesmen reported. Nor have probable prices been revealed, but they will be "competitive" with those of other manufacturers. Many models of the DuMont VHF line contain built-in provision for conversion by substituting tuning strips for local UHF channels.

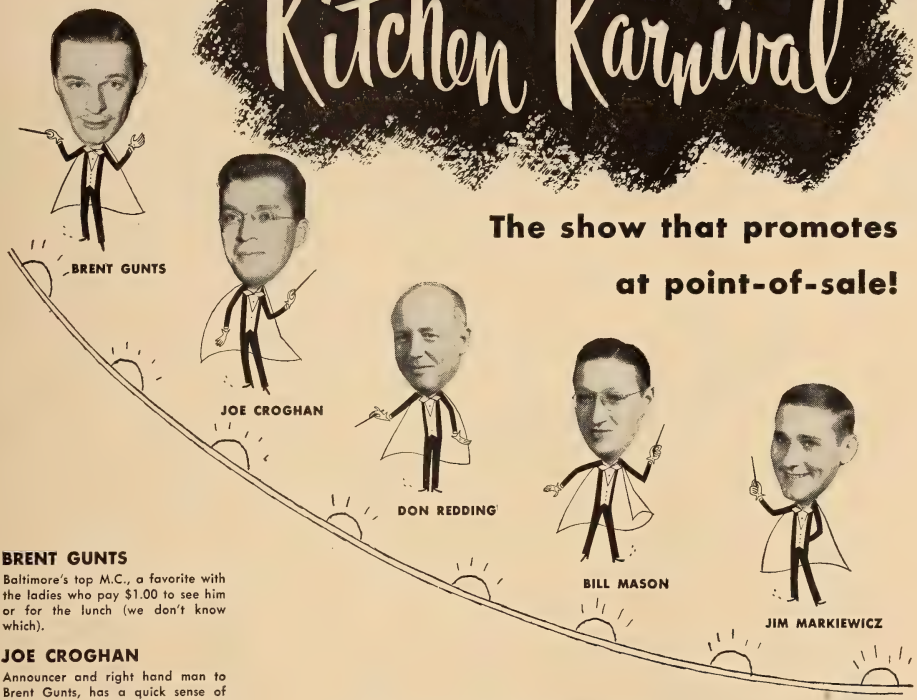
Spokesmen for Emerson Radio & Phonograph Corp. said their company has been at work on development of adapters or converters but they were not in a position to discuss details.

Sylvania Electric Products has developed a converter which is reported to be "in or ready for" production, with retail price to be around $40.

Stewart-Warner Corp., Chicago, said all sets have been convertible to UHF by addition of tuning strips since 1949. No plans for making converters were disclosed.

RCA-Victor said it has been in production several months with UHF receiving equipment. For VHF sets it has an all-channel UHF selector to be added to a set. Two low-cost selectors are designed for areas with only one or two UHF stations. The selectors are said to function on any make TV set, with simple installation.

Six years of field testing and experiments have gone into the equipment, it was added, based on Washington and Bridgeport UHF reception. Reception will be as good as in the VHF band, according to RCA.



Fred D. Ogilby, Philco Corp. vice president in charge of TV, said, "all Philco television sets have been equipped to accept adapters for a number of years. As soon as the UHF stations are in operation and the adapters are needed, they will be available in any quantity, since they have already been developed and perfected. We plan to make no profit on the adapters but sell them as a service to our customers when needed."

Merchandising Magic in Baltimore!

Kitchen Karnival

The show that promotes at point-of-sale!

BRENT GUNTS
Baltimore's top M.C., a favorite with the ladies who pay $1.00 to see him or for the lunch (we don't know which).

JOE CROGHAN
Announcer and right hand man to Brent Gunts, has a quick sense of humor and a winning touch with commercials.

DON REDDING
WBAL's Sales Service Manager, whose primary function is to correlate the terrific power and effect of "K. K." with the effort of the manufacturers' own local broker or representative.

BILL MASON
Merchandising Manager, carefully plans the campaign and promotions for sponsors. He sets up luncheons, shows and displays, and personally visits dozens of chain and independent stores weekly.

JIM MARKIEWICZ
Another experienced grocery detail man. Full-time on the street, achieving distribution, stimulating sales, setting up displays, obtaining bona-fide orders for "K. K." products. Weekly written reports to sponsors on activities.

Kitchen Karnival, WBAL's outstanding daily half-hour festival of fun, offers participating sponsors guaranteed, concentrated merchandising for their products in the Baltimore area food stores. Your product is exposed to thousands of customers. For instance: Your product is mass displayed at luncheon broadcasts and at church and civic broadcasts in and around Baltimore; it is sampled by luncheon guests and audiences numbering over 500 each week; it is given as prizes at every broadcast; it gets special point of sale display and active in-store promotion from full-time merchandising men.

50,000 Watts • NBC in Maryland
Nationally Represented by EDWARD PETRY & Co.

CHICAGO AD GROUP

To Sponsor Contest

FOURTEEN radio and television awards will be given to industry members in Chicago by the Chicago Federated Advertising Club in its 10th annual competition this year. Entries from advertisers, stations, networks and producers must be entered by April 25 for judging in the contest, results of which will be announced at the annual banquet.

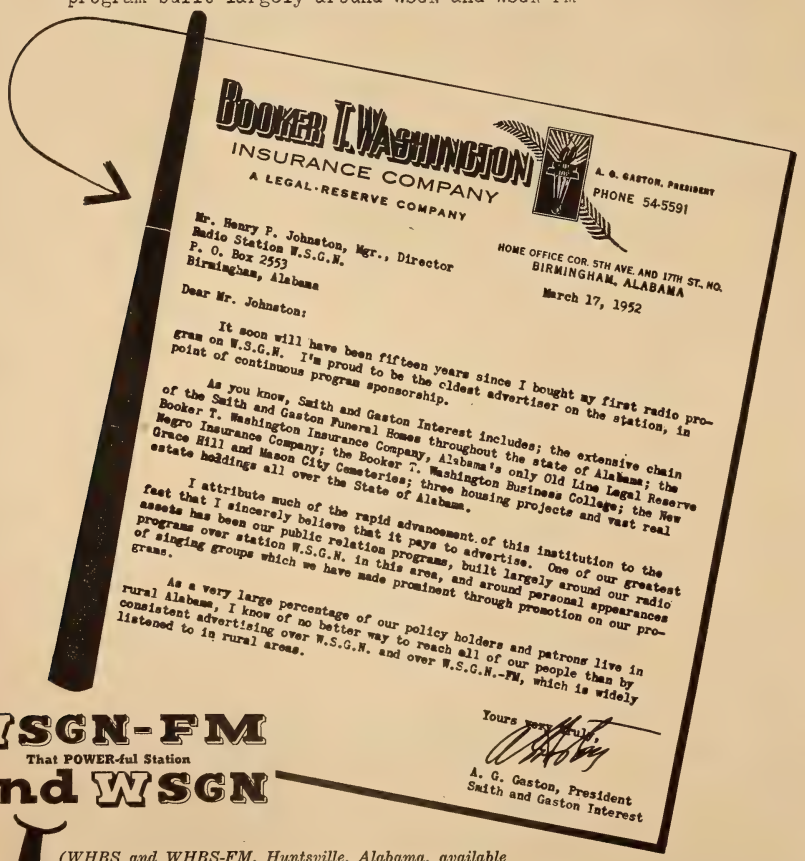
Radio entries competing for awards in four classifications each in network and local groups should be in the form of a letter with descriptive and factual matter concerning the program or commercial (data on ratings, sponsor identification and accomplishments) all accompanied by 33 1/3 transcriptions, the judges request. TV entries on shows or commercials will be judged on the basis of letters and/or film.

Separate awards will be given in radio and television to network and local entries in these classes: (1) programs—drama, variety, music, audience participation, juvenile, disc jockey; (2) commercial announcements, including station breaks and (3) new program created during the year. A fourth radio category is for special features, such as sports, public service, women's shows, news and veteran's shows.

Radio judges include Al Bland, WBBM-CBS; Kenneth Craig, CBS; Jane Daly, Earle Ludgin; Bruce Dennis, WGN; Fred Harm, WJJD; Homer Heck, WMAQ-NBC; Irene Hess, Ruthrauff & Ryan; Lee Petrillo, WCFL; Nick Wolf, Leo Burnett, and Dick Woollen, WENR-ABC, all Chicago.

Judges for TV entries are Jack Arnold, Henri, Hurst & McDonald; Hill Blackett, Grant Adv.; Bob Brewster, McCann-Erickson; Dave Dole, Leo Burnett; Fred Klein, Toni Co.; Jack Odell, Quaker Oats Co.; Karl Sutphin, BBDO, and Alan Wallace, Needham, Louis & Brorby.

Representing radio and television, respectively, on the general awards committee are Howard B. Meyers, manager of the O. L. Taylor Co. and Gerald A. Vernon, TV network sales manager for ABC.



ABC CHICAGO

Moves to New Studios

ABC CHICAGO completed a $300,000 move last weekend, transfering its Merchandise Mart facilities to the Chicago Daily News Bldg. across the river from its Civic Opera Bldg. headquarters [B•T, March 31]. WENR, ABC's owned and operated radio outlet, has what Vice President John H. Norton Jr. terms "a completely new broadcasting setup" with six modern studios, five of which are now being built on the 24th and 25th floors. One of the new studios will be used for both radio and WENR-TV, while another, now a TV room, will be converted to radio use also.

New facilities in addition to the AM studios include a master control unit and an engineering equipment maintenance shop, as well as 12 tape recorders. Modern portable equipment for remotes is being purchased also, including microphone stands, amplifiers and cords.

"one of our greatest assets...public relations program built largely around WSGN and WSGN-FM"

WSGN-FM
That POWER-ful Station
and WSGN

(WHBS and WHBS-FM, Huntsville, Alabama, available in optional combination at substantial savings.)

WSGN is affiliated with ABC and is the key station for the Alabama Broadcasting System.

CONVENTIONS

Full CBS Staff Assigned

EVERY regular CBS Radio and CBS Television news broadcaster, backed by the entire radio network editing and writing staff, will be in Chicago for coverage of the Presidential conventions, it was announced last week.

Regular news commentators to be assigned to the political coverage, under sponsorship of Westinghouse Electric Corp., include Edward R. Murrow, Robert Trout, Eric Sevareid, Lowell Thomas, Bill Downs, Don Hollenbeck, Allan Jackson, Winston Burdett, Douglas Edwards, Walter Cronkite and the entire New York and Washington news staffs of both CBS Radio and TV networks. David Schoenbrun, who has been covering Gen. Eisenhower's Paris headquarters, also will be sent to Chicago.

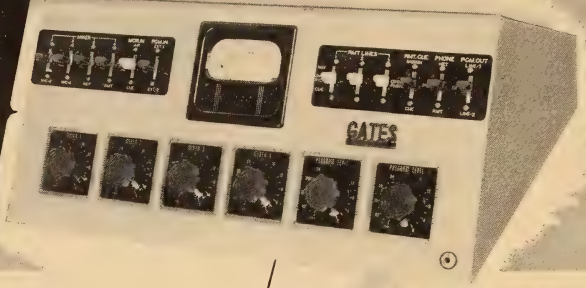
Regional reporters, also to be in Chicago for CBS AM-TV commentaries, are Grant Holcomb, KNXT (TV) Los Angeles; Jim Bormann, WCCO Minneapolis-St. Paul; Charles Ashley, WEEI Boston; Charles Shaw, WCAU- TV Philadelphia, and Jack Knell, WBTV (TV) Charlotte, N. C. KSD-TV St. Louis will also be represented by a local news broadcaster.

CBS Radio coverage will be directed by Wells Church, editor-in-chief of CBS Radio news, assisted by Theodore F. Koop, Washington news head; Henry Wefing, New York editor; Dallas Townsend, special events director, and Lew Shollenberger, Washington special events director.

Executive producer of CBS-TV convention coverage will be Sig Mickelson, CBS-TV director of news and public affairs, who is also chairman of the TV network pool executive committee. He will be assisted by Fritz Littlejohn, director of news, and Betty Koenig, TV program assistant. CBS-TV technical operations will be headed by R. G. Thompson, director of technical operations.

WASH. STATE CLINIC

Set for Friday, Saturday



WASHINGTON State Assn. of Broadcasters is to hold its WSAB Sales Clinic and annual spring meeting this Friday and Saturday at Pullman, Wash.

Among those listed as speakers for the clinic are Kevin Sweeney, vice president, BAB; Joe Ward, general manager, Advertising Research Bureau Inc., and Maurice Mitchell, Associated Program Service. BAB has scheduled a program clinic in Seattle Friday, and WSAB hopes that William Ryan, BAB president, will speak before the gathering, either Friday or Saturday. Expected to be on hand is Jim Cox, West Coast representative for BMI, which also is holding clinics in the northwest region.

Up to the Job!

1. Complete facilities for Smaller Stations
2. Adaptable for more Comprehensive Installations

The GATES 52-CS Studioette is ideally suited for smaller stations because it provides complete studio operation for present AM, FM and TV service — yet is often incorporated into a larger master control type of installation.

In design and construction, the GATES 52-CS Studioette is modern in every respect. At modest cost, it possesses many features usually found in only the most comprehensive and expensive consoles and is intended for service where fidelity, noise and distortion requirements are exacting.

facilities

The 52-CS **Studioette** provides four mixing channels, two for microphone service and two for turntables. Both turntable channels are provided with cue attenuators so that turntables, network or remote lines may be connected to an external cueing amplifier where desired. The **Studioette** will accommodate three remote lines with complete override and cue facilities.

Four amplifiers are provided; two 2-stage preamplifiers, one 4-stage high gain program amplifier and one 3-stage, 50 Db. gain, monitoring amplifier. Power supply is self-contained.

the GATES 52-CS STUDIOETTE

For AM, FM, TV Studio applications. Also recommended for recording studio use and as high quality control unit for public address and centralized radio installations.

Response—Plus or minus 1½ Db., 30-15,000 cycles.
Distortion—Program circuit including preamplifiers, less than 1% from 50 - 15,000 cycles. Monitoring amplifier, 2% or less at 4 watts output, 50 to 15,000 cycles.
Noise—Program circuit overall 65 Db. below plus 8 Dbm.

Outstanding Features

- Same high quality components as in all GATES speech equipment.
- Input transformers have multiple mu-metal shields.
- All transformers impregnated and moisture sealed.
- Shock mounted tubes in preamplifiers and first stage high level amplifier.
- Self contained power supply.
- Attractive steel cabinet tilts back for changing tubes, cleaning attenuators and reaching terminal strips.
- Under-chassis wiring quickly exposed by removing top.
- Large, illuminated 4" VU meter.

Write today for GATES SPEECH INPUT CATALOG where the functional block diagram and complete specifications of the GATES 52-CS Studioette will better acquaint you with the complete facilities provided in this versatile, yet inexpensive, speech input equipment.

BASEBALL WIRES

Majors' Service Maintained

WESTERN UNION strike did not affect baseball game reconstruction service to stations and networks so far as major league play was concerned, but wired reports of minor league games were halted completely by the line tie-up, company spokesmen said last week.

It was reported that supervisory personnel and, in some cases, non-union women telegraphers had coupled with sportswriters at baseball fields to feed play-by-play descriptions to radio outlets. Caught in some instances without any workers of its own, Western Union was understood to have resorted to its arch rival, telephone, to fulfill its sports services, with result that even news copy was being "wired" from baseball parks by the end of last week when service was restored to 1,104 cities throughout the nation.

$100 JACKPOT for best guess among 149 media men in 14 states on arrival time of first ship to pass through ice-clogged Duluth Harbor into Great Lakes goes to Clifford E. Bolgard (seated), media director at Sherman & Marquette Adv., Chicago, from John Erickson (right) of Free & Peters, same city, station representative for WDSM Duluth. Station also conducted a local promotion, counting 50,000 entries from the public for $500 in cash prizes and $1,500 in merchandise. Other Free & Peters Chicago radio salesmen are (l to r) Art Bagge, Dean Milburn and Ray Neihengen.

NEW YORK ADWOMEN

Contest Winners Announced

WINNERS in the 23d annual advertising course conducted by Advertising Women of New York were presented $100 and $50 defense bonds as first and honorable mention prizes at New York's Waldorf-Astoria last Monday. Helen Berg, AWNY president, made the presentations.

Winners include: Carol Brock, hostess editor of *Good Housekeeping* magazine, first prize in merchandising, and Doris Standfield, advertising department, Johnson Pub. Co., New York, who tied with Mrs. Brock for first place in public relations and publicity; Marcia Wiley, Yachting Pub. Co., New York, tied for first prize in copywriting, and won honorable mention in public relations and publicity; Phyllis Levoy, Esquire Socks, New York, tied with Miss Wiley in copywriting; Vee Hoover, Bellinger-Davis Travel Service, New York, first in art and layout; and Nancy Lee Hicks of Time Inc., New York, and Margo Hughes of Johnson Pub. Co. were awarded honorable mentions in merchandising.

If a Tony Wons were to ask that question over a WGR microphone today, he'd have an audience far bigger than the "good old days." One day recently, ONE offer of a sample jar of skin cream brought 3,000 requests flooding in from Buffalo, western New York and Pennsylvania and from our Canadian listeners across the river.

Yes, WGR means **We Get Results!**

NIELSEN-SAMS

To Make Separate Surveys

A. C. NIELSEN CO. and Standard Audit & Measurement Services last week were proceeding with individual station and network coverage survey projects, following failure of attempts toward a merger of the two audience measurement services.

Announcing that it had proved impossible to work out an agreement between Nielsen and SAMS, A. C. Nielsen, president of his company, said Monday that "Negotiations have been discontinued and we are proceeding at full speed and with all the resources of our organization to produce—for the benefit of the radio and television industries—the most accurate, impartial and useful coverage service ever developed."

BMB Is Praised

Praising BMB as "a well executed pioneer effort," Mr. Nielsen declared that the seven years since BMB's first survey show that a "vastly improved technique" is needed today to give stations measurements which will do them full justice. The problems which existed "even in the old days" have been "greatly magnified by the growth of television," he averred.

Without entering into the respective merits of the two systems of audience measurement used by the two organizations, industry observers noted that Nielsen's use of a probability sample and personal interviews will give results quite different from those obtained by Standard through a quota sample and a mail ballot. Fear was expressed that attention of the buyers as well as the sellers of broadcast time would be focused on the differences in individual network or station coverage data as reported by the two measuring services, rather than on the up-to-date picture of today's radio and TV station and network audiences both services are designed to produce.

KBIG announces the appointment of

ROBERT MEEKER & ASSOCIATES, Inc.

as exclusive national representatives

And what does that mean to you? It means, if you're an advertiser intent on selling Southern California, a new, easy, low-cost way to get what you want:

BUY KBIG, Giant Economy Package of Southern California Radio, directing 10,000 watts of sealed-beam power over the Great Salt Water Route to cover Southern California like the sky

THROUGH MEEKER, A l w a y s-Where-You-Need-Them-Most Station Representatives, with offices in New York, Chicago, Philadelphia, San Francisco, Los Angeles.

New York Chicago Philadelphia
San Francisco and Los Angeles.

When You Think Southern California, Think BIG (5,000,000 people)
When You Think BIG, Think K-BIG (10,000 Watts—740 kc.)
When You Think K-BIG, Think MEEKER (other end of your phone)

★ remember **KBIG** and **MEEKER**

a complete coverage combination for Southern California

The long TV "freeze" is over at last!

And now that FCC is opening the floodgates, preparing to expand TV, you can begin to see where you might fit into the TV picture.

Whatever you decide to do about TV, it goes without saying that it should be based on the latest and most accurate information about what's happening in the TV and associated fields.

For the last 7½ years, nearly all top executives in the broadcasting, telecasting and allied fields have been reading Martin Codel's weekly TELEVISION DIGEST and utilizing its various services. Perhaps it's time for you to start doing so, too.

We want you to test the usefulness of TELEVISION DIGEST without committing yourself to any long-term obligation—hence this offer to send you our full TV Services for the next 13 weeks for only $18. Regular rate is $100 per year—and our current semi-annual Factbook plus FCC's Final Allocation Report, which you will get as part of this trial offer, would cost $10 if purchased separately.

Use the convenient order form below. We'll start service the very day it reaches our office.

USE THIS HANDY ORDER FORM

Television Digest
Wyatt Building
Washington 5, D. C.

Please send me the full TV Services* of TELEVISION DIGEST for next 13 weeks at your Special Introductory Rate of $18 [Regular rate: $100 per year]. Address the Reports to:

NEWS RIGHTS

House Rules Clarification To Be Asked—Bormann

MEMBERS of the National Assn. of Radio News Directors will strive in the 83d Congress for a clarification of House rules spelling out rights of radio-TV reporters in covering Congressional proceedings, NARND President Jim Bormann, WCCO Minneapolis, promised last week.

Mr. Bormann also said the association will work closely with the American Bar Assn. to set up a "code of decorum" for radio and video coverage of legal trials and legislative hearings.

NARND objectives were outlined by Mr. Bormann in a talk prepared for delivery during a session of Ohio State U.'s 22d Institute for Education by Radio-Television at Columbus last Saturday. The WCCO news and public affairs director was to serve as chairman for a panel discussion of "New Techniques in Presentation of News by Radio and Television."

Mr. Bormann decried the House ban on radio-TV coverage and a resolution adopted by ABA's House of Delegates recommending legislation to prohibit similar reporting of trials and hearings.

These twin developments, he asserted, "constitute a serious transgression of the people's right to know what their government and their courts are doing" and are aimed at restricting full access to the news. He described the actions as a "cause of serious concern" to radio-TV newsmen and declared NARND will "resist" them.

NARND members will seek clarification early next year, in view of early adjournment of the 82d Congress, in hope of spelling out rights of reporters to use their "tools of trade freely, but with discretion." They also plan to devise a code with ABA assistance that would "modify the obtrusive features" of full radio-TV coverage "without extinguishing the people's right to be fully informed."

Role of news coverage as a factor in successful station operation and public relations was explored by Charles Day, WGAR Cleveland, during that session. He cited "tremendous growth" of stations since World War II and noted that many, particularly in smaller areas, geared their operation to good news coverage. Adequate news operation automatically solves public relations problems, he added.

"Better friendships mean a deeper understanding of what the community problems are and enable a station to put its shoulder to the wheel in common with people and organizations—civic, fraternal or educational," he asserted.

Other panel members scheduled were John Shelley, WHO Des Moines, and James Byron, WBAP-TV Forth Worth, on news and special events coverage for radio and TV, respectively.

Strictly Business

(Continued from page 20)

part of the Mutual network. Col. Davies again left WIP, when called back as a reserve officer in World War II, serving as lieutenant colonel in the counter-propaganda section of the infantry.

Col. Davies started his own business as radio and television consultant in 1946. A year later he organized the Edward Davies Assoc., television spot producer. One television film he produced was Musselman's Apple Products. This commercial, made in 1949 with Pennsylvania Dutch characters and dialect, is still in use. The O-Cel-O Mop film, made two years ago, also is still on television. Other films include Valley Forge Beer and American Floor Covering Co.

When the Television Assoc. of Philadelphia was formed in 1951, Col. Davies was an originator and was its president last year. The group, starting with 20, now has 110 members. He is board chairman.

Col. Davies' new appointment with DeFrenes Co. became effective April 1. The firm has made film for 36 years and is the oldest in Philadelphia. Some DeFrenes accounts are RCA air-conditioning, Sylvan Seal milk, Good and Plenty candy, Old Reading beer, Drexel furniture, Philadelphia Saving Fund Society and Rival food.

Three awards were made by the Navy for motion pictures produced by the DeFrenes Co. in 1950.

Col. Davies believes now that "the freeze on TV stations is lifted, the new independent stations will have to rely on the film companies for their program needs, since it will be economically impractical for the stations to use live talent and produce their own shows. The cost of film will be negligible compared to production of live shows, and as the number of television stations increases, the cost should go down."

Col. Davies married the former Thelma Melrose, who was a member of the Philadelphia Civic Opera Co. His hobbies include gardening and caring for his seashore home in Beach Haven, N. J. Col. Davies is also the originator of the Island Arts and Science Club in Beach Haven and is a member of the Poor Richard Club.

GIFT OF WDET

Accepted by Wayne U.

DETROIT Board of Education, acting on behalf of Wayne U., has formally accepted WDET (FM) Detroit as a gift from the UAW-CIO [B•T, April 7].

Without conditions, the land, tower, transmitter, studio building and equipment were given free and clear to the university. Total evaluation was estimated at $125,000. Dr. Paul B. Rickard, head of the university radio-TV department, will manage the station.

HEAVY

It isn't often that just three figures

can pack such a sales wallop as these Hooperatings on the WGBI audience: 56.6 in the morning . . . 59.0 in the afternoon . . . 72.0 in the evening.* These ratings—*which set a record for all CBS stations*—become even more impressive in view of the extremely high sets-in-use percentages in all three time segments!

This remarkably heavy listening occurs in Scranton, which is situated in the Scranton-Wilkes-Barre market where WGBI is the favorite station among 694,000 people who are eager to listen and able to buy. And there's also a bonus from Hazleton, where WGBI has the largest share of listeners in some time periods in the Wilkes-Barre-Hazleton area.**

In fact, the only things that's *low* at WGBI is the rate structure . . . which warrants calling your John Blair man *today!*

**Figures from Hooper Scranton Radio Audience Index, March-April 1951.*
***Figures from the Pulse of Wilkes-Barre-Hazleton, November 12-16, 1951.*

ABC-UPT MERGER

Gordon Brown Opposes

OPPOSITION to the proposed ABC and United Paramount Theatres merger was voiced during the FCC hearings last week by Gordon Brown, owner of WSAY Rochester, who appeared as a public witness [B•T, April 14]. Mr. Brown has been an enemy of radio networks ever since he and ABC disagreed on the network's rate practices several years ago.

Also testifying were Harold M. Wheelahan, general manager of WSMB New Orleans, and Paul Raibourn, Paramount Pictures vice president in charge of television.

Today (Monday) Leonard H. Goldenson, UPT president, and Robert B. Wilby, UPT director, are scheduled to return for cross-examination by the FCC. Wednesday Barney Balaban, president of Paramount Pictures, is slated to appear, and A. H. Blank, UPT director, will probably be cross-examined a week from today.

Mr. Brown last week predicted that instead of increasing network competition—as ABC President Robert E. Kintner said would happen if ABC merged with UPT—there would be less competition between networks. He said that Mutual and Liberty networks, now behind ABC on the competitive ladder, would be left even farther back if ABC were allowed to zoom ahead with the aid of UPT's resources.

Mr. Brown claimed that the merger of ABC and UPT looked, to him, like the merger of two monopolistic groups into a much larger group.

He is concerned about the merger of ABC with a motion picture distributing company because he fears feature films—which might otherwise be used by the independent station owner for pay-as-you-see TV—will be used by the network adjunct of the ABC-UPT combination for network programming.

Mr. Brown said he thinks pay-as-you-see television will be the salvation of independent TV outlets, asserting that cost of programming cannot be met by advertisers.

Mr. Wheelahan appeared Tuesday afternoon and spent most of his time under direct examination. Major portion of his testimony concerned WSMB programming and public service record. WSMB is now owned by City Stores Mercantile Co. and United Paramount-Richards Theatres. What is sought is Commission approval of transfer of control from E. V. Richards Jr. to UPT.

Mr. Raibourn, who appeared the last half of the week, underwent a gruelling cross-examination from FCC counsel Arthur Gladstone.

Mr. Gladstone is a Commission attorney regularly assigned to the Common Carrier Bureau but "drafted" by Frederick W. Ford, chief of the FCC Hearing Division.

He seemed to be trying to establish a basis to prove that Paramount Pictures attempted to hold back television development by control of certain electronic devices, through its relationship with Scophony Corp. of America. SCA controlled rights to certain electronic developments, principally large-screen theatre TV. Paramount Pictures at one time was a 25% owner of Scophony with General Precision Equipment Corp. also holding 25%. The other half of SCA was owned by British interests.

WJBK GRANT

Gets 1500 kc, 10 kw

WJBK Detroit got FCC approval last Wednesday to increase its power and change its frequency from 250 w, 1490 kc, to 10 kw day, 5 kw night, on 1500 kc with directional antenna [B•T, April 14].

Cost of the project will total $259,535.

Simultaneously, two other applications contingent on the WJBK frequency shift and power boost were approved by the Commission. WABJ Adrian, Mich., got a CP to change from 1500 kc to 1490 kc, and from daytime to fulltime operation. And WMRN Marion, Ohio, got permission to install a new antenna and ground system and make other changes; however, it keeps its present frequency of 1490 kc with 250 w fulltime.

Last fall FCC Hearing Examiner Fanny Litvin issued an initial decision looking toward the grant of WJBK's application and the other two dependent applications, but the FCC Broadcast Bureau subsequently submitted objections to these proposed findings.

In its final decision, the Commission ordered that WJBK would have to construct a two-element directional array to determine the effect of a powerline, which is nearby the transmitter site, upon the pattern.

If these tests are satisfactory, WJBK can go ahead and build the proposed eight-element array. WJBK plans to build towers from hollow tubing, running the wires inside the tubing to the warning lights. In addition, all transmission lines and couplings are to be buried underground to insure a true pattern.

With the power increase, the Fort Industry Station will serve 7,980 more people than it does now during the day, and 1,197,344 more at night.

WABJ Adrian, operating fulltime, will provide the first nighttime primary service to its area. The change in WMRN Marion's antenna will cover 98½% of Marion at night instead of 85% of the city, its present nighttime coverage. The increased area includes 8,192 persons daytime and 4,873 persons nighttime.

NEW rate card has been issued at WHAS Louisville, Ky., effective May 15, according to Neil Clinc, sales director at the station. Card provides new time bracket from 6 to 7 a.m. with A and B Class unchanged.

IN SYRACUSE . . . TELEVISION SUPPLEMENTS RADIO

...Does NOT Replace it as a Source of Entertainment and Information

Syracuse is a two-TV-station city. According to Niagara Mohawk Power Company monthly surveys, 71% of the homes in the Syracuse area have TV sets. According to the calamity howlers, radio in Syracuse should be a dead duck. But two separate *surveys of television homes* show that radio is alive and vigorously kicking. (Details, including methods of sampling, free on request). Here are the results:

Survey	Date	Number of Homes Called	Number of TV Homes	TV Homes Only, Average Hours per Day	
				Radio	Television
No. 1	Oct. '51	763	493	2.90	4.50
No. 2	Dec. '51	704	493	3.24	4.76
Combined		1467	986	3.07	4.52

The Survey Also Showed:

1. An average of 2.4 radios per TV home.
2. 61 radios purchased *after* the homes had television.
3. Average of 4.4 hours per day of radio listening in non-TV homes.
4. Comparative loss of radio listening time in TV homes—only 30%.

The combined radio-listening and TV-viewing time of 7.59 hours per day proves that TV has *not* replaced radio—merely *supplements* it as a source of information and entertainment.

OIL NEWSLETTER

PREPARED BY THE OIL INDUSTRY INFORMATION COMMITTEE NUMBER 30 OF A SERIES

FOR YOUR INFORMATION:

U.S. oil men found more new oil in 1951 than ever before in any one-year period in history, but they had to buck big odds and invest vast sums of money to do it.

They drilled nearly 45,000 new wells in 1951 (another all-time record), and spent more than two billion dollars in their ceaseless search for new oil reserves. The result was more than five billion barrels of new oil for the wings and wheels of America.

Indicative of both the odds and the costliness of the great quest for liquid petroleum, however, is the fact that 16,500 of the 45,000 wells turned out to be nothing but dry holes – holes which represented a loss of time, labor and capital.

Much of 1951's two billion dollar investment went down the drain in this fashion, but for oil men and for America there is no alternative.

Only a drill will determine whether a well will be a producer or a dry hole, and oil men must drill thousands of them to expand known fields and to bring in new fields.

The chances of finding oil in commercial quantities in an area where it never has been found before are long and hard. The basic odds are eight to one against success; the chances of bringing in a field with an ultimate recovery of a million barrels or more are 43 to one; the odds against finding a field that will yield 50 million barrels or more are 966 to one.

Even if an oil man is lucky enough to beat these odds and bring in a well, here are some additional facts which must be considered: one million barrels of oil is equivalent to only four hours' supply for the United States; 50 million barrels is enough for only eight days' supply.

Last year, oil men drilled 6,189 new-field exploratory wildcats and of these 5,505 were dry holes. Since their average cost is $90,000 or more, it is readily apparent why the search for oil is both hazardous and expensive.

Finding oil is only part of what it takes to keep the family car rolling, and to fill other demands for petroleum products. Year after year, oil men plow back into their business more than 50 cents out of every dollar earned. This plowing back, which was the biggest in history in 1951, helped oil men to set new crude supply records, and enabled them to add new refinery capacity, new transportation and marketing facilities, and to expand their operations extensively to keep pace with consumer demand.

Planning, foresight, private enterprise and competition make such feats possible.

Legal Scientific Opinion Divided

(Continued from page 25)

get a grant or be heard in comparative hearings.

But, a serious and vehement minority of the several dozen Washington practitioners contacted by BROADCASTING • TELECASTING during the week dissented sharply from this attitude.

"The FCC decision is one of the lowest points in the history of radio regulation," declared one attorney noted for the pithiness of his observations.

"From an engineering or an economic point of view, this is ludicrous," said a well-known consulting engineer.

Composite of opposition views run the gamut. Some of these views are as follows:

• The primary purpose seems to be to establish a system of TV allocations to deprive applicants and licensees of their rights as set forth in the Communications Act. For example, there is nothing in the final TV report regarding protection to stations against interference, nothing about service, no penalties against non-use of a channel.

• The Commission has abdicated its responsibility for choosing between applicants on the basis of demand. It has instituted in place thereof a "mumbo-jumbo" of separations, etc. The document withdraws from the FCC the responsibility of deciding between conflicting applications on the basis of service and equitable distribution, etc.

• Separation criteria are too rigid. For example, Jackson, Miss., is 218 miles from Pensacola, Fla., which is assigned VHF Channel 3. Therefore, Jackson cannot have the same VHF channel. Yet, had the FCC started drawing up its assignments from west to east, instead of vice versa, Jackson would have had Channel 3 and Pensacola would not. Thus, an accident of drafting decided the assignment. Even with the Commission's avowal of the rigidity of its minimum separations, it does not adhere strictly to them.

• Monopoly now existing in one and two-station markets is perpetuated. Desirability of VHF is enhanced through the extra-wide coverage it is permitted and the scarcity of such channels in key markets. Fact that in most major cities there are less than four VHF channels means that TV is doomed to be a two-network service. Such cities as these have less than four VHF: Atlanta, Miami, Baltimore, Cleveland, Cincinnati, Detroit, Indianapolis, New Orleans, Kansas City, St. Louis, Buffalo, Portland, Ore., Memphis, Nashville, Houston, Richmond, Norfolk, Seattle, Spokane.

• Educational reservations, particularly where a VHF frequencies are involved, are an abortion. In many of the largest markets, change of reservation to UHF would permit the establishment of four VHF assignments, foster four competitive networks.

• Attempt to consider UHF as good as VHF—or that some day soon it will be—is merest fiction. UHF will cost more money to get less coverage than VHF.

• Channel-by-channel procedure is a "monstrosity." Already there is talk of "meetings" among applicants. Failing something like that, applicants in each city will be engaged in a "rat race."

• Plan does not give TV service to the people, it indicates where there is not any service. There is no requirement for protection. Therefore, station operators will never know who they are covering and how much territory. Coverage will depend on power and antenna heights of co-channel and adjacent channel stations, not on individual stations.

• Third Notice set up five priorities, never said anything about zones, 220-mile separations in Gulf areas, combination of facilities and city spacings. Therefore, the final report makes a "mockery" of administrative procedure rules.

• When shown how to avoid intermixture evils, Commission blithely ignored recommendation. For example, Madison, Wis., commercial operators asked that lone VHF channel be made educational, three UHF channels commercial. But Commission refused to budge.

• Decision flouts Sec. 307(b) of the Communications Act, dealing with equitable distribution of frequencies to various cities and states. How can anyone economically establish UHF in New Jersey, when that state will be blanketed with VHF signals from New York and Philadelphia TV stations?

Only formal action during past week was a directive to the Federal Communications Bar Assn. Committee on Practice and Procedure to study the document, report recommendations to the FCBA executive committee.

It is believed that such a report will be ready in about two weeks.

FCBA Practice and Procedure Committee is chairmanned by William J. Dempsey, includes also Thomas W. Wilson (Dow, Lohnes & Albertson), Robert M. Booth Jr. (Bingham, Collins, Porter & Kistler), James A. McKenna Jr., W. Theodore Pierson, Henry G. Fischer.

Whole long procedure last fall of filing comments, counter comments, pleadings was a pure waste of time in the view of those opposing the Commission's final TV report.

In fact, one law firm in Washington is chortling over its prescience: It advised its clients not to file anything on the ground that the expense and time involved was not worth the minute chance of changing the Commission's mind.

Many observers were certain that the three-and-a-half year freeze was totally unnecessary (see editorial, *Four Wasted Years?*, B•T, April 14). They feel the same results could have been accomplished without putting TV on a siding for that length of time.

Attitude Dates From 1948

Opponents of the document rallied round Comr. Robert F. Jones and his bitter dissent. They pointed out that his dissent was predicated on previous expressions of his attitude—going back as far as 1948 when he opposed the Commission's action denying the Yankee Network the right to apply for a Hartford, Conn., channel for Bridgeport, Conn.

The Commission at that time ruled that Yankee Network would have to petition for rule-making procedure in order to change a channel from Hartford to Bridgeport. When Yankee did so, it turned the New England radio chain down.

They emphasized that he iterated the same viewpoint in the Third Notice last year [B•T, March 26, 1951]. In that case, Comr. Jones referred to his previous stand that a fixed allocation was illegal and improper.

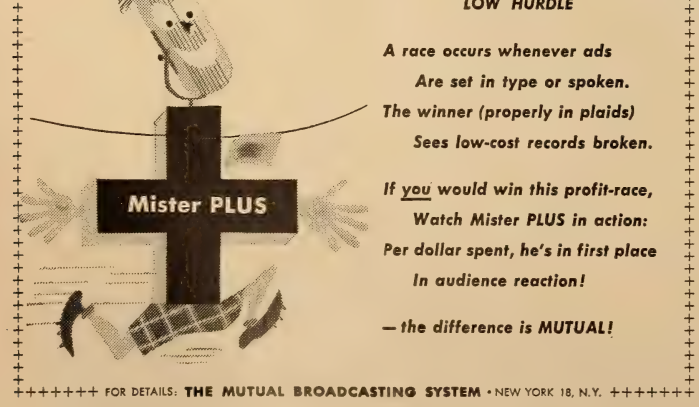
When the Commission asserted its right to make a fixed allocation last year, after FCBA had attacked the legality of the proposal, Comr. Jones maintained the same position, they pointed out.

Essence of Comr. Jones dissent is this, according to his friends: The Commission cannot prejudge application proceedings on an abstract basis without considering the differences in terrain, size of cities, trading areas, cultural areas —all of which are different for each city in the country.

General attitude of those opposing the Commission's final report is that it is not necessary to accept it as a *fait accompli.*

Since there will be no processing until July 1, they say, there is still time "for private enterprise to be released from the shackles and bonds of an abstract allocation plan which evades competitive hearings on applications and ignores the basic elements required to be decided between cities pursuant to Section 307 (b) of the Communications Act."

A proponent of the Commission's report disagreed with Comr. Jones' dissent in this manner:



Basically, he said, Comr. Jones disagrees with the FCC majority on two counts—legality of fixed allocations and separations.

Separations Can Be Reduced

Legality of fixed allocation may be a debatable question. It can never be finally decided until the courts have a chance to rule on it.

On separations, Comr. Jones' essential point is that they can be reduced. Such a move would, he averred, risk the unknowns of interference. It would eliminate the safety factor which the FCC put into its assignments for future years when more is known about propagation. Therefore, to reduce separations now is too great a risk.

He also claimed that Comr. Jones compared median separations in the Commission's table of assignments to charge the FCC with inconsistency. But, cities do not arrange themselves evenly, he declared. Therefore, it would be impossible to equalize separations throughout the country. What the FCC has done has been to set up minimum separations, he pointed out.

N.Y. RADIO, TV CLUBS

Proposed Merger Protested

UNEXPECTED protests to the proposed merger of Radio Executives Club of New York and American Television Society led I. E. Showerman, REC president, Thursday to call a special post-season meeting of his organization for May 15, time and place still to be announced. Protests arose after mailing of ballots to REC and its members for vote on the merger [B•T, April 14], Mr. Showerman said.

Besides asking votes on the merger, endorsed by officers and boards of both organizations, letters request members to indicate preference of a name for the combined association, listing suggested names.

NEW LIGHT on time-buying in Detroit...

The best time to drive a sales message HOME is between the hours of 6 P.M. and midnight. WWJ delivers more Detroit listeners* during those six impressionable hours — Monday through Friday — than any other station.

And WWJ's average cost-per-thousand nighttime listeners is 28% lower than the average cost-per-thousand for nighttime radio in Detroit.

So—If you've got something to sell, do a WWJ-sized job. Cover a market-place that sold over 4 billion dollars worth of goods in 1951 . . .

WCAU CENTER

Opening to Mark Anniversary

WCAU-AM-FM-TV Philadelphia will formally open its new radio-video center at dual ceremonies also celebrating WCAU's 30 years of radio broadcasting and four years of television programming. Date is to be set sometime in late May.

With major construction completed and installation of technical and office equipment proceeding on schedule, Donald W. Thornburgh, WCAU stations president-general manager, announced last week that the new center will be ready for the anniversary celebration.

WCAU is now located at 1622 Chestnut St., which, in 1931 when it was built, was reportedly the first building in the country constructed exclusively for radio.

Both buildings are a far cry from the small Market St. building where the station first went on the air in 1922.

The new center will boast 100,000 sq. ft. of floor space and is completely air-conditioned.

Ground floor of the new building will house an 80-seat cafeteria, dressing and make-up rooms, a printing and photography shop, heating, air-conditioning and power plants, storage, unassigned space and garage facilities for two mobile units and four cars or pickup trucks.

Second floor contains executive offices, sales and auditing offices and program and public relations departments.

TV studios have been designed to meet all requirements for present and future techniques. The three studios are 60x80 ft. and two stories high with a clear height of 20 ft. A fourth studio, slightly smaller, will be available for programs or rehearsals.

Many improvements in client facilities have been incorporated in the new building. Each of the three TV studios has a client booth. Also there are two comfortably furnished, acoustically-treated conference-audition rooms, one adjacent to the TV sales department and the other next to radio sales. A third conference-audition room, for television production personnel, is located in the TV production department.

The auditioning rooms have adjoining booths with film and sound projection equipment. In addition, there will be a completely equipped commercial film department.

Mr. Thornburg commented, "WCAU's new building, which is the most complete radio and television center in the world, represents unlimited potential for radio and television broadcasting.

"WCAU has always been at the forefront in facilities, engineering and programming, and, as we start our 30th year, we stand prepared to meet any challenge the art of broadcasting may present."

Artist's conception of WCAU's new Radio-TV Center, located on the outskirts of the city. ➤

DOMINICAN REPUBLIC

Opens New Radio Network

FIRST steps in the Dominican Republic's plans for expansion of its communications services have been completed with the opening of a country-wide radio network and will be supplemented in August by a TV station now under construction in Ciudad Trujillo, the capital, RCA Vice President Meade Brunet, managing director of the RCA International Div., has announced.

Both the radio network, known as La Voz Dominicana, and consisting of an AM and two shortwave stations in Ciudad Trujillo linked via VHF repeater stations with an AM outlet in Santiago, and the new TV station are equipped by RCA.

SHARE TRANSFERS

Sought by Canadian Outlets

SEVERAL Canadian stations are requesting share transfers at the May 16 meeting of the board of governors of the Canadian Broadcasting Corp. at the Chateau Frontenac Hotel, Quebec. Requesting transfers are CKRS Jonquiere, CKBW Bridgewater, CJLS Yarmouth, CFAR Flin Flon, CJBR Rimouski, CGNB Campbellton, CHNC New Carlisle. CHEX Peterborough, CKWS Kingston, CKLN Nelson, CKCK Regina and CJOB Winnipeg.

Recapitalization is being requested by CJBR Rimouski and transfer of license from individual licensee to incorporated company is being asked by CKOM Saskatoon and CHUB Nanaimo. Transfer of control in licensee companies is requested by CJNT Quebec, and CKXL Calgary. Emergency transmitter licenses are sought by CHLP Montreal and CJON St. John's, Newfoundland.

ABC Regional Meet

REGIONAL meeting of radio affiliates will be held by ABC at the Fort Worth Hotel, Fort Worth, on May 5, network spokesmen announced last week. About 70 persons representing radio stations in Arkansas, Louisiana, Oklahoma, Southern Kansas and Texas are expected to attend.

BAB SALES MEET

First Held in Hollywood

RADIO is far from being a "dead duck," Kevin B. Sweeney BAB vice president, assured some 70 Arizona and Southern California station operators and sales executives last Wednesday at a BAB clinic in Hollywood's Roosevelt Hotel. Clinic session for members only was first in a series of 42 to be held throughout the country.

In the comparison of increased radio set sales as against decreased newspaper circulation, he declared industry is growing 50 times as fast every year as newspapers. He referred to continued public demand for radio sets.

"Nearly 13 million new radio sets were sold in the United States last year and nine million were not replacements," he said. "There are 105 million sets in use in this country today."

Newspaper circulation is going down while that of radio is increasing daily, he continued, substantiating his statement with facts and figures.

The morning closed session was given over primarily to station managers who off the record aired their own specific sales problems with Mr. Sweeney and John F. Hardesty, BAB director of local promotion, joining in the general discussion. In giving station operators the current financial setup of BAB, Mr. Sweeney also told of new projects being readied for them. He cautioned stations to stick to their rate cards and not make "special deals."

BAB sales services were described by Messrs. Sweeney and Hardesty at the afternoon session.

Music Copyright

DECISION on action to be taken by Canadian broadcasters on music copyright problems will be made this Monday and Tuesday at a meeting of board of directors of Canadian Assn. of Broadcasters at Toronto. The CAB board will meet to hear the results of exhaustive and detailed studies of the copyright problem by legal counsel and CAB management. Among possible actions to be taken is a test case to prove legal right of Canadian Copyright Appeal Board to empower the Composers, Authors and Publishers Assn. of Canada (CAPAC), Canadian subsidiary of ASCAP to go through Canadian station books to arrive at a gross revenue figure on which to base fees for fiscal year[B•T, April 7].

THE "FIVE ALARM FOLLIES"
sells more than fire prevention!

If you were a schoolchild in the busy, bustling Fort Wayne area, you'd recognize the Do-Funny Players as the stars of "Five Alarm Follies".. the WOWO-sponsored puppet performance that's traveling this Indiana school circuit with its remarkably effective message of fire prevention techniques.

Efforts like this, conceived and executed in the public's behalf, do much to keep WOWO in the minds and hearts of the 2 million people who make up its loyal audience. Folks here have learned to expect the best of this station, on the air and in the area.

That's why WOWO stays on top as one of America's great selling forces. That's why *you* should get the facts on WOWO's influence in this important 49-county market. Check with Paul Mills at WOWO or Free & Peters.

McFarland Last Lap

WHEN CONGRESS reconvenes this week following its Easter recess, there will be the opportunity, for the first time since 1934, to write new substantive communications law.

The House Interstate and Foreign Commerce Committee has reported its own version of the McFarland bill (S 658) to rewrite the Communications Act of 1934. In most particulars, it conforms with the Senate bill drafted by the majority leader. But in the House draft are passages which, if enacted, would make broadcasting the most hazardous business extant.

These provisions would authorize the FCC to suspend station licenses for up to 90 days and to levy fines of $500 per day for each infraction of the law. There are no such provisions in the Senate bill, passed four times by the upper body. There's a "cease and desist" provision in both drafts, and that certainly is bad enough because of the tendency of government regulatory bodies to abuse their power.

Two other provisions in the House bill are hard to fathom. One is the failure to follow the Senate in eliminating the so-called "double jeopardy" clause. Under the existing law (which the Senate bill would remedy) any licensee adjudged guilty of attempting to monopolize radio communication in any way would be refused licenses, however remote its manufacturing or communications activities may be from its broadcast operations.

The other, a "sleeper," would put the FCC in the equipment brokerage business—or so it seems. It would allow an unsuccessful applicant for license renewal to condition the grant to the successful applicant upon purchase of the plant and equipment of the former licensee.

In at least one respect, the House committee has improved the Senate bill. That's the provision that would preclude the FCC from discriminating against applicants identified with other media "for the gathering and dissemination of information." That would apply to newspapers, motion picture companies or radio stations (seeking TV). It's a desirable and timely provision, particularly in the light of the thawing of the TV freeze.

The House leadership can steer the McFarland bill through the Rules Committee and through the chamber. Then there will be the opportunity by both Senate and House to appoint conferees and reconcile differences.

We hope Sen. McFarland, who toiled long and hard in drafting the original bill, will be named a Senate conferee. The chances then would be excellent for a safe and sane bill.

TV Evolution

THE Radio-Television Mfrs. Assn. has done a real service to television as well as to the public at large in presenting a comprehensive and factual report carrying out the Jerry Jordan investigation of the influence of TV on other entertainment forms.

It proves that, contrary to the fears of sports promoters and reactionary sociologists, television will not make us a nation of pop-eyed, indolent mutes unwilling to unfasten our gaze from the kinescope or to stir outside the living room to watch or participate in recreation.

It proves also that television does not spell economic ruin for the boxoffice; indeed the evidence is that for most other forms of entertainment television can promote, rather than retard, the gate.

It should receive special attention from the National Collegiate Athletic Assn. whose silly restrictions on the telecasting of college football look even sillier now that the full statistics are in.

Television isn't going to destroy any other recreation form that amuses people. There's no need to break up the college stadia for scrap or burn the fieldhouses. We doubt that many printing presses will be melted down to be remade into television antenna towers.

It's a big country, big enough to let TV in without crowding anything else out.

TV's Zero Hour

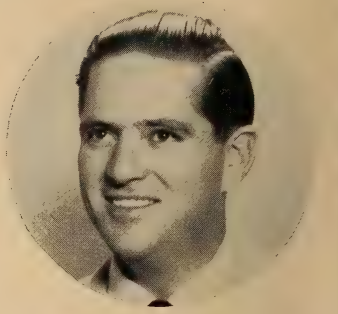
THE TV FREEZE is ended—on paper. From now until the Zero Hour July 1, when the waiting period ends, all eyes will be turned toward the FCC and the courts for any moves designed to enjoin the FCC's final allocations report, released a week ago today.

Lawyers are talking litigation. So are distraught applicants who futilely sought new VHF facilities in their markets. And those who had VHF facilities assigned only to see them deleted in the final report.

The FCC majority is confident that the courts will not enjoin the *entire* plan. It does not, however, exude the same confidence as to piecemeal quests for injunctive relief. It doubts whether any court, confronted with the issue of blocking nation-wide television, would issue a blanket injunction in effect re-freezing TV, after a four-year drought.

Comr. Robert F. Jones, in his hard-hitting dissent, has won over a lot of attorneys and engineers. They say it would be better to start over again with the Jones philosophy of applications based on supply and demand, rather than follow the FCC majority's "planned allocation." To do this, they contend, would save time in the long run.

There's doubtless considerable merit in the Jones plan. We said last week that it is a "lost cause." This is refuted by Jones proponents. They disagree with the FCC majority that the entire allocation cannot be enjoined. They insist it is a final order and is subject to court review.



In the furore over procedures, there's the tendency to lose sight of the most revolutionary and dangerous aspect of the thaw—the capitulation to the educators to the tune of 242 assignment "reservations."

Most schools function under the aegis of government—federal, state, local. Thus, the government, once removed, places itself in competition with private business. That is socialism.

Hearings are scheduled before special boards set up in New York and Pennsylvania on what to do about educational reservations to those states. Broadcasters should appear. They should blast the fallacy of noncommercial educational operation. They should recite the history of AM educational stations, which dwindled from 150 to a half-dozen before TV's advent. They should raise the question of government education competing with private enterprise which is ready and willing to supply all of the time needed to meet school requirements—time now being offered but which most schools eschew because they haven't the money to finance the programs or the will to produce them.

The politico-pedagogues already are talking about "semi-commercial" or "non-profit" operation. No member of the FCC—with the possible exception of the educators' darling, Comr. Frieda B. Hennock—has fallen for this hoax. But remember, a few months ago no one thought the FCC would tumble to those socialistic education reservations!

our respects to:

JOHN HUDSON POOLE

FOR the past four years one of the nation's outstanding UHF television enthusiasts has been developing experimental station KM2XAZ which operates on Channel 22, covering Los Angeles area from atop Mt. Wilson.

Besides directing early developments of UHF receivers and transmitters on the Pacific Coast he also played a prominent role in forming the national VHF-UHF Allocations Plan.

Now with his early faith all but justified as the broadcasting industry opens upon a nation-wide advance into the UHF spectrum he helped pioneer, the paradoxical John Hudson Poole shows his continued belief in AM by creating a brand new 10 kw daytimer—KBIG—to service Southern California on 740 kc.

Indicative of Mr. Poole's fresh approach to engineering problems, KBIG's transmitter is located at Avalon, on Santa Catalina Island, 20 miles off Southern California's populous coast. Station is scheduled to start operating in early May.

Mr. Poole claims "Sea water conducts radio waves over amazingly long distances, and the 10 kw AM transmitter will give 50 kw coverage of the mainland."

Born in Detroit on Feb. 2, 1917, Mr. Poole became a Californian 18 months later when his father, Col. John H. Poole, a West Pointer and career Army officer retired from service.

Early schooling was in Pasadena and Los Alamos, N. M. (later the home of the atom bomb), with two years in Gunnery School, Washington, Conn., earlier the alma mater of Robert Meeker. However, these two didn't meet until 15 years later when Robert Meeker Associates became KBIG's national representatives.

It was in school at Los Alamos that Mr. Poole was hard bitten by the radio bug. At 14 he became a ham operator. It remains his hobby today.

Graduating Gunnery School in 1937 Mr. Poole enrolled in University of California at Los Angeles, and about this time, also earned his FCC commercial radio telegraph operator's license. At this time he became imbued with a burning urge to channel his future into the electronics field. He left college in 1938 to enter R.C.A. Institutes in Chicago and completed a course in practical radio engineering.

By this time, young Mr. Poole held the highest licenses issued by FCC for all classes of radio station operation. He has kept them up to date by constant service and renewals.

Three months after Pearl Harbor, Mr. Poole

VOA FUNDS CUT

Hope for Senate Aid

DESPITE the critical reversal in the House, State Dept. authorities are hopeful that sharp cuts in the Voice of America program will be restored in the upper chamber.

The International Information Administration plans to appeal the House action when its officials appear before a Senate Appropriations subcommittee early in May.

Reasoning behind this hope is the belief of department authorities that the Voice has more friends on the Senate side—among them Sens. William Benton (D-Conn.) and Karl Mundt (R-S. D.)—and the knowledge that the broadcasting budget traditionally has fared better in the upper chamber.

The House, in effect, knocked out $36 million-plus for five new overseas shortwave stations and two seagoing transmitter projects (actually $20.5 million on the floor). Additionally, it chopped overall information funds from $133 million to $85.5 million.

Two May Suffer

IIA authorities said that if the cut is sustained, two of seven stations slated for completion this year would be unable to begin operation. Moreover, broadcasting funds would be slashed to provide for absorption of other operations, including proposed Japanese programming taken over from the Army. New language projects would be abandoned, too.

During House debate, it was the understanding that VOA funds would be cut back to fiscal '52 levels —or about $19.8 million. Thus, the actual amount would be substantially less than this sum.

The twin death blows were delivered in the lower body by Rep. Charles B. Brownson (R-Ind.) and Rep. Thomas B. Curtis (R-Mo.) whose amendments sparked a heated debate on the '53 budget.

Congressmen took pot shots at various phases of the information program, but the chief criticism was that VOA is not effective propaganda—say, like Radio Free Europe—and is too costly to the taxpayer. Content of programs also was savagely attacked. Confidence was expressed, however, in Dr. Wilson Compton, new IIA administrator, and in radio and other advisory committees.

On April 17 in a speech before the Southern Pine Assn. of New Orleans, La., Dr. Compton predicted that "if within a few years we are able to complete these powerful radio broadcasting and relay installations, we will be able to reach over 98% of the world's population. . . ." Failure to carry on a "vigorous offensive," he said, would "invite calamity."

But he added, perhaps wistfully: "Whatever Congress' final decision, we will get along. I am more interested in our doing a good job . . . than in complaining because it did not appropriate more." Dr. Compton's speech was prepared before the House wielded its big axe.

Eight Bells, All's Well

(Continued from page 29)

the value of radio advertising, rightly placed and rightly used, as Smith & Bull insisted, within a matter of three months. We had contracted for this time for a year. We were now ready to expand it.

Our next step was to be non-network time on the larger network stations. When one of these was approached, we were told that our business—finance—made us unacceptable as advertisers. A few loan companies had a number of years before fallen into disrepute. Their poor reputations were still remembered.

We might have had satisfactory results for the same dollars spent with small local independent stations who took no such stand. However, we felt strongly that public education was indicated. This seemed the place to begin.

A company loaning money with which to buy a stove is operating on the same business premise as the company which sells the stove. In order to stay in business, the stove merchant must have a mark-up sufficient to return a profit.

And for the same reason, a finance company must also have a markup on its merchandise, which is money. The one major difference is that the purchaser of the stove is usually not aware of the sum he pays over the dealer's cost. But when he borrows money to pay for that stove, he knows exactly what that money costs him because he pays a fixed and stated rate of interest.

The station manager accepted this logic the moment it was voiced with: "You know, I never thought of it that way before, but you're right."

With the time we bought and the continued careful policing of copy, it soon became evident that radio was a highly valuable advertising medium for a finance company. Others in this field began to follow us onto the air.

And that our copy was well thought out and effective was attested by the fact that some of our competitors picked it up verbatim with only change of name and address of the advertiser instead of ours.

The ship's bells, however, did remain individual since a maritime theme was not adaptable to the name of any company other than Seaboard.

After testing radio for a year in the Los Angeles area we began to work our way up the coast with extensive time purchased on stations in Bakersfield, Fresno, Modesto, San Jose, Oakland and then San Francisco. From there we expanded to Portland and Seattle and fanned out East and South.

In 1939 we sponsored our first program—the 8 p.m. news with Pat Bishop on KFI Los Angeles. The 15-minute program was introduced with the by then familiar ship's bells and theme line "Eight bells and all is well."

At about the same time, we also contracted for an 8 a.m. newscast on KMPC Los Angeles, with Frank Hemingway at the microphone. And as the "eight bells" reached even the newsboy level of penetration with a program aimed primarily at adult audiences, Mr. Hemingway's imitations a few years later of such war criminals as Hitler, Mussolini and Hirohito, became subjects for popular imitations among news carriers of all ages, both literally and figuratively.

Our third sponsored newscast series was over KSFO San Francisco, with Brooke Temple reporting 15 minutes of news at 8 o'clock each morning and evening. These programs were followed by others, Seaboard Finance presenting such personalities as *Singin' Sam*, Elton Britt and the *Squeakin' Deacon*.

Fan Mail Flowed

At this point in our radio programming, it would be needless to say again that we were quite sold on the benefits of air advertising. But our experiences with the *Squeakin' Deacon*, as an example, revealed a secondary benefit to be gained from employing a radio personality.

The Deacon's fan mail, as did that of the other radio personalities, came in in bales. The Deacon had a unique relationship with members of his audience. After taking his recommendation to consult Seaboard Finance Co. in time of financial need, they reported back to him on just how the whole thing was done.

Through thousands of letters which came to him, we were able to analyze, with the same thoroughness that we had applied earlier in our radio copy, our method of client relations. Sometimes we basked in the glow of compliments and in other instances —well, we made changes in our mode of operation.

KSFO, without interruption, has been for more than 10 years, and still is, giving San Franciscans their morning and evening news with Seaboard the sponsor.

Our other West Coast sponsored programs have ceased for varying reasons, and at present we have concentrated our radio budget on spots. This does not, however, mean that this will remain our established policy.

Effective radio advertising, like good radio reception, is never static, we've learned.

Seaboard has never bought network time, though we have long since been extensive national radio advertisers. Rather, we have confined our time buying to a local basis, and believe our reasoning is correct as it applies to us, though this too could change.

We consider Seaboard's 150 offices throughout the country to be offices for those communities, and in no way branches of a large concern. The complete structure of these offices and their methods of conducting business are in each instance adapted to the community in which it is situated. Therefore, it only follows logically that advertising should likewise be individualized on the local level.

A healthy portion of Seaboard's advertising dollar today goes for radio time. In some communities we spend as much as 80%. In other communities, because of checked results, we have found it necessary to apportion the budget differently.

Some areas in which there are Seaboard offices are under-stationed area-wise. In others, by careful check, we have established that resulting penetration has indicated that our advertising dollar is best spent if it is budgeted for a variety of mediums.

Over the nation, however, radio stations in ever increasing numbers are receiving the lion's share of our advertising since those initial purchases of time signals in Los Angeles in 1937.

Our current radio and television budget is between $250 and $300 thousand.

In addition to West Coast radio and our Los Angeles television, Seaboard has spot schedules going on stations in some 15 other markets. They include the South, Mid-West and East Coast.

Television as a medium for us is today in the same testing stage as was radio at the turn of 1938. Smith & Bull, still our advertising agency, is placing TV spots for Seaboard in Los Angeles, and keeping careful records of the traceable returns from them.

Courtship Period for TV

When we have established to our own satisfaction its place in our advertising plans, as well as types of program best suited for us, Seaboard intends to test TV in other cities.

In all honesty, we feel that with television we are in what could be called courtship period. We'd like to learn whether or not we are compatible with this newcomer before we become engaged—or in other words, sign time contracts.

Our first impression of the medium is good, but we still don't feel we are sufficiently well acquainted with the potential of the medium to branch out further at present. Our friendship with radio, however, is based on a long-time intimacy.

In fact a cycle in Seaboard's radio advertising was completed last September in one of our downtown Los Angeles offices.

A young man, expecting his first child, applied for a loan to finance hospitalization for his wife. As credit reference in addition to his job, he gave Seaboard Finance Co., although he said he had never before been a borrower.

In February 1940, he rammed his bicycle through the panel of

A MONTHLY REPORT TO EDITORS

Highlighting Significant Facts about Bituminous Coal

ELECTRIC FURNACE METHOD OF STEELMAKING.

Electric furnaces which, in a single operation, can reduce beneficiated iron ores to steel are now receiving new and intensive study by research engineers. They would take the place of the traditional coke oven and blast furnace steps in today's conventional type of open hearth operation. Electric furnaces may offer the steel industry a way to expand its capacity with far less capital investment than required by present methods. The coal industry is directly concerned, too, because electric furnaces in steelmaking would create new demands for electric power, which in turn mean more coal.

CURRENT TREND IS TO COAL FOR STEAM GENERATION.

Technical trends reported by *Power* Magazine indicate that *pulverized-coal firing still dominates* utility practice and that in industrial and institutional plants there is a *significant rise* in choice of stokers and pulverized fuel systems. "For boilers of 50,000 lbs. per hr. and over," *Power* reports, "use of stoker firing has doubled and pulverized-coal firing quadrupled" in industry, exclusive of the electric utilities. These facts come from *Power's* recent survey of steam plants in the U. S., representative of design and construction work in progress in 1951 and early 1952.

COAL COMPANIES DOING BIG JOB IN LAND RECLAMATION.

More than 100 thousand acres of marginal land underlaid with coal have been reclaimed by the nation's surface coal-mining companies. Before the mining operation much of this land was too hilly for plowing, or too poor to support crops. But after mining, this reclaimed land is given new usefulness. This land now supports young hardwood and pine forests, clover, alfalfa, grasses and other foliage crops and is dotted with artificial lakes stocked with fish.

COAL COMPANY GIVES $10,000 FOR MINER'S SUGGESTION.

Recently a foreman in one of America's coal mines won a ten-thousand-dollar prize from his coal company for a suggestion that substantially raised production. He solved a problem involved in conveying coal from the working face by devising a method that avoids the shifting of heavy equipment and the removal of roof supports. His method saves two-thirds of the time formerly required and greatly increases the amount of coal produced by each shift.

If you have any questions about coal or the coal industry, your inquiry to us will receive prompt reply.

Eight Bells

(Continued from page 58)

glass in Seaboard Finance Co.'s entrance door when his bicycle belt jammed on the seventh ring and he looked down to adjust it. He offered to pay for the damage. When it came to terms it appeared that sum involved would be a lifetime obligation for him. Best he could do, he said, from his paper route, was 50¢ a week.

As it turned out, the manager of this office had boys of his own, and anyway the glass was insured.

The expectant father thought this should be proof of character and willingness to repay his debts. So did the interviewer to whom he told his story. We also thought that it was additional proof, if more were needed, of the value of radio advertising today even if the most effective penetration in this instance had occurred 12 years earlier.

The young man said that in the intervening years, each time he heard our ship's bell insignia on the air, he had had in the back of his mind that if he ever needed to borrow money, Seaboard was the place to come.

And that is exactly the point of view among listeners that we have always aimed for with our radio copy.

POWER increase from 250 w to 1 kw has been announced at CJEM Edmundston, N. B.

Present at signing of baseball contract are (seated, l to r) Jose Ramon Quinones, president of Puerto Rican Network; Messrs. O'Meara and Saba, McCann-Erickson; (standing, l to r) Jose Ramon Diaz, network sportscaster; Mr. Hull, and Miguel Angel Torres, sports announcer.

FLOOD

News Coverage, Relief Aid Are Given by Radio, TV

COMPREHENSIVE coverage of the midwest floods was provided Americans last week as a public service by radio and television networks and local stations alike.

NBC sent newscaster Morgan Beatty to the scene at 6:30 a.m. Wednesday as a passenger on the Presidential plane's special flight over the devastated Omaha area. Mr. Beatty's reports, aired via WOW Omaha, were broadcast on his regular 7:30 and 11:15 p.m. network broadcasts.

Other special radio reports produced by NBC included two eyewitness descriptions on *News of the World*, one of which was taped from a plane flying over flooded areas. Further accounts were compiled for a special all-flood 15-minute broadcast at 11:30 p.m. Monday, narrated from New York by Vic Roby. On-scene coverage was effected through KELO Sioux Falls, S. D., as well as WOW.

NBC television carried three unscheduled reports from Omaha Monday, Tuesday and Wednesday, with a full 15-minute description of the disaster compiled for a special telecast Thursday evening.

CBS Radio was among the earliest to give attention to the disaster by broadcasting a 25-minute wrap-up April 13. Complete reports were broadcast from Omaha—via KFAB there—Sioux City and Des Moines.

Many CBS Radio newscasts featured pickups from Omaha as early as Monday, with Douglas Edwards and Edward R. Murrow broadcasting their regular programs from the flood area the last several days of the week. CBS Radio capped its week with a report Friday via WCCO Minneapolis by James T. Nicholson, executive vice president of the Red Cross.

CBS-TV reports of the Missouri River overflow were narrated by Mr. Edwards, directed by Don Hewitt and produced by two CBS-TV sound-camera crews. Like his radio reports, Mr. Edwards' TV broadcasts also originated from Omaha Wednesday and Thursday.

Highlights of the ABC radio coverage included reports to Tom Casey in Chicago on the Missouri-Mississippi river system from Virgil Sharpe of KOIL Omaha and an appeal by Rep. Karsten of Missouri to turn flood control over to the Federal Dept. of the Interior.

ABC radio's *Headline Edition* and the later *News of Tomorrow* both stressed the flood results throughout the week, providing such particulars as details of Red Cross work by the director of the New York chapter and a business analysis of flood havoc by the midwest editor of *Business Week*.

ABC television audiences saw pictures of the floods at Pierre, S. D., Sioux City, Iowa, and Omaha—plus screen documentation—on such programs as *John Daly and the News* and *Nightcap News* with Dorian St. George.

Mutual, which had kept pace with other networks' news bulletins of flood damage, was cleared by week's end for any public service announcements within the succeeding 10 days that pertained to the flood relief for victims.

Locally, WOW Omaha made one-to-ten-minute tape recordings along the river at disaster points, averaging about 18 a day, with 35 newsmen, announcers and engineers operating from the station's newsroom, while more news was being picked up from 125 other newsmen along the river. WOW personnel picked up the flood in North Dakota, following it with airplanes, autos, a helicopter and telephone.

KOWH Omaha was broadcasting 24 hours daily and said it would maintain the schedule until the flood crest reached the Omaha-Council Bluffs area and the clean-up begun. During the first part of the flood the station recruited trucks and drivers to evacuate families from the potential flood area.

ISLAND NETWORK

Signs Baseball Contract

CONTRACT covering the broadcast of major league baseball and Puerto Rico's professional league games was signed last week between the Puerto Rican Network Inc., San Juan, and the McCann-Erickson office located in that city for two of its clients, R. J. Reynolds Tobacco Co. and Blatz Brewing Co.

Network officials report the contract represents the largest radio program package in the history of island radio. Broadcasts, co-sponsored by Blatz beer and Camel cigarettes, began April 16 with the opening game of the New York Yankees, to which exclusive broadcast rights were obtained for Puerto Rico. All Yankee games will be relayed direct from the ball park for broadcast on WAPA San Juan, WPRP Ponce and WORA Mayaguez.

Upon termination of the major league season, contract calls for airing of home games of the San Juan Senators and the Ponce Lions, both Puerto Rican teams.

Details for the national and local baseball coverage were completed by Harwood Hull Jr., network's general manager; Theodor Saba, San Juan manager of McCann-Erickson, and Don O'Meara, local radio director for the agency.

Don't overlook F.M.

You're working in the city. Turn on your radio. Listen to one of your AM commercials. It's coming through, clear as a bell, from that big transmitter nearby. Sounds fine, doesn't it?

But there are many places in the country where that commercial of yours can't be heard at all—even though it's broadcast from an AM station right in the neighborhood.

For in many places "radio climate" is such that the AM signal is torn to pieces by static, garbled by interfering "crosstalk." *The folks you're trying to sell can't hear your message at all.*

FM solves that problem for you in many areas. FM is clear as a bell *whatever* the "radio climate." So in making *your* time schedules—Don't Overlook FM.

NOTE: During its recent spot radio campaign on Zenith Hearing Aids, Zenith used separately keyed spots on FM and AM stations in many cities. In several cases, returns from FM outnumbered those from AM. In others, FM was—on the basis of cost per inquiry—the best broadcast buy. Here's real proof of the growing importance of FM!

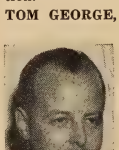
EXPORT AD MEET

Slated May 8 In New York

RADIO and television are scheduled for consideration by members of the Export Advertising Assn. when they hold their fourth international convention May 8 at New York's Plaza Hotel.

Fernando Eleta, owner and manager of Radio Programs Continental, Panama City, will discuss "What's Wrong with Radio in Latin America," and Roger Pryor, vice president of Foote Cone & Belding, will tell the group "What To Look Out For" in TV. Both are scheduled to speak during the one-day convention's morning session under chairmanship of Shirley Woodell of J. Walter Thompson Co.

Suit Names CBS



SUIT for $1,350,000 damages has been filed against CBS in Los Angeles Superior Court by Bill Anson, KFWB Hollywood disc mc. Charges listed in the action are unfair competition, infringement of common law copyright and breach of contract. The suit alleges that the CBS Radio and TV program *Songs For Sale* is identical in nature as Mr. Anson's *Song Jury* and *Music Is My Business* which he had on radio and television respectively.

air-casters

JACK NELSON, formerly with Erwin, Wasey & Co., N. Y., to WAYZ New Haven, Conn., as continuity chief and director of promotion.

TOM GEORGE, WOR New York, to WCOL Columbus, Ohio, for daily *Inquiring Reporter* show.

Mr. George

JACK FRAZIER, sales manager for Cincinnati district of Post Cereals, division of General Foods Corp., to WLWT (TV) that city, in merchandising department.

GENE NORMAN, KNBH-TV Hollywood disc m.c., to KHJ-TV that city for daily two-hour program.

STAN EDWARDS to announcing staff of CHUM Toronto.

DR. ROY K. MARSHALL, educational director, WFIL-AM-FM-TV Philadelphia, to receive award from Temple U., that city, on April 23 for "contribution to education through the media of radio and television. . . ."

ROY MAYPOLE, special events reporter and m.c., KTTV (TV) Hollywood, made an honorary chieftain of United Scottish Societies as "outstanding television personality of Scottish descent."

BURNIS ARNOLD, former associate farm director, KVOO Tulsa, Okla., to WHAS Louisville, Ky., as farm program director.

PETER GRANT, WLW Cincinnati announcer, awarded plaque for "outstanding contributions to the growth of art and music in Cincinnati" by United Fine Arts Fund.

FLORENCE MELODY, program department, WWRL Woodside, N. Y., promoted to traffic manager.

BOB BYE, announcer, CKRM Regina, appointed production supervisor.

KEITH McKENZIE, formerly of *Seattle Post Intelligencer,* to continuity staff of CHUB Nanaimo, B. C.

FIRE PREVENTION

WOWO, WSJS Get Medals

WOWO Fort Wayne, Ind., and WSJS Winston-Salem, N. C., were announced last week as radio winners of the National Board of Fire Underwriters' gold medal awards, given annually to a radio station and a daily and a weekly newspaper for outstanding public service in increasing fire prevention.

In announcing the double-broadcasting ward, Lewis A. Vincent, general manager of NBFU, said two gold medals were granted in radio this year to resolve a tie, first since inception of the medals in 1941.

Noting that both stations had done "an outstanding job in pointing up fire safety programs," Mr. Vincent praised WOWO, gold medal winner in 1949 and recipient of honor citations in 1945 and 1947, for its extensive fire prevention programming. WSJS' broadcasting highlight was frequent airing of tape recordings made while local firemen inspected Winston-Salem homes.

Honor citations went to WEOA Evansville, Ind., for *Fire Fighters' Quiz*, directed to a school-age audience; to KANS Wichita, Kan., first place winner the past two years, for "stimulating fire safety throughout its listening area"; and to WHO Des Moines, Iowa, which received an honor citation in 1947, for a special series broadcast during Fire Prevention Week and for contests in rural schools on fire safety.

Conferring on gold medal awards presented by NBFU to WOWO and WSJS are (l to r) Mr. Kaland, Mr. Sether and Mr. Posner.

* * *

Judging the 19 entries were William Kaland, program director, WNEW New York; Sam Posner, DuMont Television Network's assistant program administrator, and Seymour Siegel, director of New York's Municipal Broadcasting System (WNYC).

Other entrants were WSB Atlanta; WLS Chicago; WHK Cleveland; WDSC Dillon, S. C.; KDLA De Ridder, La.; WTAC Flint, Mich.; WNGM Moberly, Mo.; WNBC New York; WDBO Orlando, Fla.; KPOJ Portland, Ore.; KONO San Antonio, KSOO Sioux Falls, WVPO Stroudsburg, Pa., and WEIR Weirton, W. Va.

BRAND NAMES

Two-Day Meet Held in N.Y.

FRANK WHITE, MBS president, was reelected treasurer, and Barry T. Leithead, president of Cluett, Peabody & Co., N. Y., was elected chairman of the executive committee for Brand Names Foundation, when the merchandisers' organization held a two-day meeting in New York Tuesday and Wednesday.

Other men prominent in broadcasting and allied fields named among the foundation's officers were Don Francisco, vice president of J. Walter Thompson Co., N. Y., listed among the new directors, and William O'Neil, president of General Tire & Rubber Co., voted among incumbent directors to serve until April 1, 1953.

Paul West, president of the Assn. of National Advertisers, and William B. Ryan, president of BAB, were named by their respective organizations to serve for one year on the foundation's board. Frank M. Folsom, RCA president, will continue to serve as an honorary director, having previously been elected a board chairman.

High point of the two-day event was the granting of "Brand Names Retailer of the Year" awards to dealers in 16 different merchandising categories, with certificates of distinction also distributed in each group. Certificate in the department store classification was won by the William F. Gable Co., Altoona, Pa., and accepted by its president, George P. Gable, who is also president of WFBG, NBC affiliate in Altoona.

All delegates and their wives were NBC breakfast guests Wednesday—Brand Names Day—in the Rainbow Room of the RCA Building. In welcoming the guests, John K. Herbert, NBC radio vice president and general sales manager, accredited the sales efforts of local merchants with making mass production an economic possibility.

In a letter to breakfast guests—published in a booklet of Brand Names advertisers on NBC radio, their programs, and their program times — NBC President Joseph H. McConnell reminded the merchants that "Radio helps you to sell brand-named products to your customers." After the breakfast, which included entertainment by NBC's Bob and Ray, the guests were taken on a tour of the New York NBC radio and television studios.

The Brand Names Foundation meetings ended with dinner Wednesday at which James A. Farley, board chairman of the Coca-Cola Export Corp., gave the keynote address. Entertainment was provided by cast principals from NBC-TV's *Your Show of Shows* in an hour-long Max Liebman production.

GENERAL FOODS Corp., New York, will break ground for new general offices on a 48 acre tract in White Plains, N. Y., about July 1. Building is scheduled for occupancy in the spring of 1954.

NATIONAL ADVERTISERS GO LOCAL WITH WINS!

When national advertisers want to get their selling message right down where consumers live and buy in the metropolitan New York market, they use *local* radio.

That means WINS to a blue list which includes:

FRED A. LYMAN, manager of Allen B. DuMont Labs., N. Y., factory distributor branch, appointed to newly formed post of national merchandise manager of Receiver Sales Div.

SIDNEY R. CURTIS, vice president and general manager of Stromberg-Carlson's Radio-Television Div., named vice president in charge of government contracts. CLIFFORD J. HUNT, general sales manager of Radio-TV Division, promoted to general manager.

R. J. McNEELY, sales director-member of board of directors, Hoffman Radio Corp., L. A., to Belmont Radio Corp., Chicago (mfrs. Raytheon radio-TV receivers), as western regional sales manager, headquartered in L. A.

EMANUEL WEINTRAUB, manager of commercial service department, CBS-Columbia Inc., Brooklyn, promoted to chief buyer of firm's Military Procurement program. HENRY E. HINZ, senior project engineer of Admiral Corp., to CBS-Columbia Inc., as chief mechanical engineer.

J. W. RAHDE, Western Union vice president and comptroller, named vice president in charge of finance replaced by W. R. DRUMMOND, his assistant.

HALSEY BARRETT, eastern sales manager for Consolidated Television Sales Inc., N. Y., father of girl, June McDonald, April 12.

LORRAINE CHECKI named production assistant with Robert Lawrence Productions Inc., N. Y., TV film producers.

GEORGE J. PAULUS, district sales manager of southeastern states for Raytheon Mfg. Co., Waltham, Mass., to Tele King Corp, N. Y., as regional sales manager in same area.

LOUIS ARTIGUE, associated with Wynn Rocamora, Hollywood (talent agency), resigns to open own agency at 8776 Sunset Blvd., that city.

RUSSELL L. DIETRICH, territorial manager, Hoffman Sales Corp., L. A., transfers to Dallas as south-eastern district manager.

SAM RHEINER, assistant to Sam Spiegel, executive producer, Horizon Productions, Hollywood (feature films), appointed to labor advisory board of IMPPA.

HOFFMAN RADIO Corp., L. A., appoints Sociedade Continental de Exportacao, Sao Paulo, Brazil, as distributor.

GENERAL ARTISTS Corp., Hollywood talent agency, moves to 9650 Santa Monica Blvd., April 28.

RCA TUBE Dept., Camden, N. J. announces availability of flip type index designed to place basic electrical and mounting information on RCA television and radio speakers at fingertips of radio service dealers. Index can be ordered through RCA electronic components distributors.

STANDARD RADIO TRANSCRIPTION SERVICES Inc. signs DORIS DAY, CBS Radio and Warner Bros. singer, to exclusive contract for Standard Program Library.

Equipment . . .

JENSON Mfg. Co., Chicago, announces development of new high frequency unit, RP-302, which makes 3-way system from coaxial speaker or 2-way from single unit direct radiator. Unit improves realism of sound reproduction and provides "highs" from 4,000 cycles up extending range to limits of audibility with extremely low distortion.

HEWLETT-PACHARD Co., Palo Alto, Calif., announces manufacture of two new test sets for super high frequency work. Model 624A SHF offers continuous frequency coverage over the 8,500 to 10,000 mc range. Set has direct tuning and reading dials. Model 623 SHF has overall frequency range of 5,925 to 7,725 mc with operating frequency ranges determined by klystron tube that is installed.

AMPLIFIER Corp. of America, N. Y., producer of Magnemite Recorders, announces manufacture of "Interviewer," battery-operated midget tape recorder designed to simplify recording of interviews and conferences. Unit measures 11⅛ x 8½ x 5½ inches, runs 15 minutes on single winding and accommodates two hours of recording on reusable 5 inch reel of standard ¼ inch wide tape.

Technical . . .

LEO DeCONNICK, engineering staff, WLWC Columbus, Ohio, appointed chief engineer at KTMS Santa Barbara.

Mr. DeConnick

RICHARD BECHER, engineering staff, WKAN Kankakee, Ill., to WBBM Chicago, in same capacity.

EDDIE BRASLAFF, still cameraman, CBS Radio, Hollywood, resigns after 10 years to freelance.

RODNEY CHIPP, engineering director of DuMont Television Network, addressed joint meeting of Chemistry Teachers' Club and Physics Club of New York Saturday on "Television Up-To-Date."

Canadian Tax Law

CANADIAN BROADCASTING Corp. and other government-owned corporations are to pay corporation taxes henceforth, according to an announcement of Canadian Finance Minister Douglas Abbott at Ottawa late on April 8. The new arrangement is retroactive to Jan. 1, 1952. Insofar as the CBC is concerned, the ruling is academic, for the CBC has been operating on a deficit in recent years and now is being granted an annual government subsidy of about $5,000,000.

Open Mike

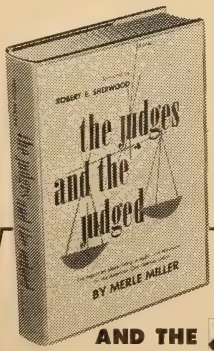
Policy Statement

EDITOR:

I wish I knew how many pounds of P. I. deals we have carefully filed in the wastebasket. I'd like to know how many hours I have wasted being sure that I'm not throwing away a legitimate order. I imagine the P. I. mailing lists are made up from your YEARBOOK [or] your MARKETBOOK . . .

I wonder how many stations would like to join me in making a notation in our new listings that would state plainly and unmistakably "No P. I. accepted."

I'd further like that statement to include everything except straightforward, legitimate orders. No "30 one minute spots for a one-half hour rate." No payments in merchandise, dollars per postcard, letter, 'phone call or box top.



Would you include such data in your listings if sufficient stations requested it?

W. E. Bradford
Manager
KSST Sulphur Springs, Texas

RACE PROGRAMS

WHIM Asks FCC Opinion

DOES broadcasting a feature race-of-the-day—with a summary of horse racing news and interviews with celebrities of the sports world about 6 p.m.—jeopardize a station's license?

That, in essence, is what WHIM Providence, R. I., has asked the FCC.

The Commission's answer to this may have a bearing on the entire question of horseracing broadcasts and upon the status of the 16 stations that were set for hearing because of horseracing programs [B•T, March 3].

In a letter to the Commission, WHIM pointed out that FCC's statement at the time it renewed WANN Annapolis' license created doubt as to the propriety of any kind of horseracing broadcasts.

WANN was on temporary license for nearly a year while the FCC considered how to deal with racing programs. WANN discontinued the broadcasts and was granted a renewal a few weeks ago [B•T, March 3].

What WHIM wants the Commission to do is issue a declaratory ruling on whether the broadcasting of a feature horserace and a summary of the results at the close of the day is contrary to the rules.

The Providence station pointed out that the programs proposed "could not conceivably be of any interest to bookmakers or their patrons since the resume of the day's racing would be presented . . . after the tracks had closed" for the day.

WHIM said in its letter that an FCC ruling on the matter will have "a vital effect upon the entire broadcast industry" because many stations throughout the country have presented programs of the type it proposes.

WHIM asked for the ruling within the next two weeks so that it could make appropriate arrangements for carrying the daily feature at Narragansett Park at Pawtucket, R. I., three miles from Providence. The season opens there June 30.

Last month, the FCC put 16 stations on temporary license to determine, at a hearing, whether the stations are aiding gamblers by airing odds, giving scratches, track conditions, prices paid, etc. [B•T, March 3].

Since then, a few stations have been granted regular renewals after notifying the Commission that they had discontinued the broadcasts before the notice was received [B•T, March 10].

'GOOD NEIGHBOR'

KWBW Spots Aid Drive

POWER of radio spots alone to win community support for a local project has been demonstrated by KWBW Hutchinson, Kan.

The Dragon Club of Hutchinson Junior College sponsored a "Good Neighbor Day" to "help a young man who is helping himself." Candidate chosen was a young service station operator who had been a polio victim as a child.

Verne Powell, assistant superintendent, Hutchinson Recreation Commission, wrote Mrs. Bess Wyse, KWBW president: "The wholehearted and enthusiastic response by KWBW has swept the city and a tremendous amount of business for Vernon Miller has resulted."

Mrs. Wyse explained the local newspaper had been contacted but turned the project down on the basis that "it smacked of commercialism." The promotion was all done by radio.

"In one morning," added Mrs. Wyse, "the gasoline distributor had to fill the tanks at the filling station three times because of our radio spots."

MBA Meeting Set

MISSOURI Broadcasters Assn. plans its annual spring meeting May 5-6 at the Hotel Jefferson, St. Louis, according to G. Pearson Ward of KTTS Springfield, secretary. He said BAB would direct the first day's session, to be of interest to sales departments and representatives. BMI will present a program clinic on the second day. Both MBA members and non-members are invited, Mr. Ward said.

INSTITUTION ADS

Sen. Johnson Comments

CENSORSHIP was Sen. Ed C. Johnson's reaction last week to a controversial proposal made on Capitol Hill a fortnight ago that newspapers might raise advertising rates as a means of discouraging "extravagant" advertising [B•T, April 14, 7].

Sen. Johnson (D-Col.), who is chairman of the Senate Interstate & Foreign Commerce Committee, said, "When the government starts to tell the newspapers what kind of advertising and how much of it they can carry, it's moving toward the day when it will seek to control their news columns, too."

Suggestion for the raise in rates was contained in a report released by the Senate Small Business Committee on Newsprint headed by Sen. Hubert H. Humphrey (D-Minn.).

However, Sen. Humphrey, who has launched a drive to have so-called "political" institution advertising cut down, if not eliminated, stated that the recommendation on newspaper advertising rates crept into the report through a staff error and had been considered by the committee but not approved.

Sen. Humphrey last week was waiting for a reply from the Internal Revenue Bureau to his query on the whys and wherefores of business firms deducting institutional advertising as an expense.

Who's on First?

CAN coffee pour out of musical clock? It wasn't that zany a certain day in April in Albany, Ga., but almost. Two top disc jockeys in town did a quick switch. WGPC's Bill Fowler moved his *Musical Clock* to competing station, WALB, whose Bill Bowick took over Mr. Fowler's time slot with his *Coffee With Bill.* Listeners were agog, switched from one station to another. But Messrs. Fowler and Bowick were a step ahead. They played identical tunes throughout the morning. Oh yes, the date: April 1.

Benjamin Gottlieb

BENJAMIN W. GOTTLIEB, 66, of B. W. Gottlieb Assoc., Philadelphia advertising agency, died April 10 of a heart attack. Mr. Gottlieb was a former managing director of the old *Jewish World.* He produced and appeared on foreign language programs over WDAS Philadelphia. Surviving are his wife, Bessie W., a son, Maxim B., and three daughters, Mrs. Ruth Brill, Mrs. Sophie G. Cooper and Mrs. Jeanne Elion.

1952 TELECASTING YEARBOOK ADDENDA

CHANGES and additions received after the 1952 TELECASTING YEARBOOK went to press are included in the following list which also will serve to correct some errors made in compiling the large volume. For convenience, the information is arranged numerically by YEARBOOK page number. At the end of this addenda are three further changes in the 1952 BROADCASTING YEARBOOK addenda which was published earlier [B•T, March 3].

Page 23—Insert J. Harold Ryan as vice president and treasurer of the Fort Industry Co. stations.

Page 45—Insert Joseph Brenner, Prichard & Brenner, 321 S. Beverly Drive, Beverly Hills, Calif.

Page 78—Add J. Harold Ryan, as vice president and treasurer of WAGA - TV Atlanta and Glenn C. Jackson as managing director.

Page 108—Add J. Harold Ryan as vice president and treasurer of WJBK-TV Detroit; Gayle V. Grubb, vice president and general manager, and Harry L. Lipson, general sales manager. Delete name of E. Hal Hough and substitute Richard E. Fischer as program director. Delete Robert Striker as film buyer and substitute Arthur MacColl, as manager, film department.

Goodwill Industries

RADIO and TV promotion will be sought by Goodwill Industries, which employed 18,000 handicapped persons last year in repair of worn out articles for resale, according to Robert J. Enders Adv., Washington, representing Goodwill Industries. A quarter-hour transcribed show, *8:30—USA*, featuring Kate Smith and Morgan Beatty, plus transcribed spots and a TV film showing work done by the handicapped at Goodwill workshops, are to be distributed to radio and TV stations all over the country. The campaign also will include live spots.

MEDIA CREDIT

Houston Meet Considers

CREDIT discussions will be led by three credit managers of combined media operations at the May 13 program of the newspaper-radio-TV advertising media group of the National Assn. of Credit Men's Credit Congress May 11-15 at Houston, Arthur F. Gerecke, chairman of the group and credit manager of the *St. Louis Post Dispatch* and KSD-AM-TV St. Louis, has announced.

Thomas McFarland, first vice chairman of the combined media group and credit manager of the *Milwaukee Journal* and stations WTMJ-AM-TV Milwaukee, will head the discussion on "Cost of Credit Departments and Efficiency of Their Procedures," with participants including Stannard M. Butler and Clarence W. Pierson, credit managers of the *Schenectady* (N. Y.) *Union Star* and the *Minneapolis Star-Tribune*, respectively.

Discussion on "Coast-to-Coast Round-Up of Business Prospects and Their Effect on Credits and Collections" will be led by Robert T. Holman, credit manager of the *Cleveland Press* and WEWS-AM-TV Cleveland, and credit managers C. S. Hograth, *Chicago Tribune;* Robert R. Gramm, *Washington Times-Herald;* Clifford D. Scherer, *Houston Post;* Gilbert W. Sites, *Los Angeles Times* and KTTV (TV) there, and Mr. Pierson.

"Credit Problems of Radio and Television" will be led by Harry E. Hull, credit manager of *Detroit News* and WWJ-AM-TV Detroit with participants including Paul F. Benton, comptroller of KMO Tacoma-KIT Yakima, Wash., and William F. Budde, credit manager, KWK St. Louis.

An afternoon panel discussion on "Trends, Problems and Procedures in Advertising Agency Credit and Recognition" will be led by W. A. Lightbody, agency credits and accounts manager, *Chicago Tribune,* with Mrs. Hermine A. Fischer, credit manager, *Christian Science Monitor,* Boston, and Joseph Burg, credit manager, ANPA, New York.

Leigh E. Ore

LEIGH E. ORE, 63, former manager of WJSV (now WTOP) Washington, died April 13 at Garfield Hospital there following a heart attack. At the time of his death, Mr. Ore was national representative of the American Cancer Society in Washington. Prior to 1933, he was manager of WJSV. Survivors include his wife, Emily, a daughter and a son.

CAVIAR EMPTOR!

Caveat Emptor—**let the buyer beware** if he thinks caviar can substitute for bread and butter—or glamour TV for dollar value.

Let him beware if he is paying fancy television prices—and getting little for his money but fancy.

Either TV works for you at a reasonable, economical cost—either you get dollar-for-dollar advertising value for your investment—or it's not worth a salty roe.

Du Mont has no champagned attitude towards television. Whether it's time, program, facility or production costs—item for item, Du Mont gives sponsors real value for their money. Because Du Mont costs are always realistic, always reasonable, an advertising budget on the Du Mont Television Network pays off in results, not in fancy.

If you find that you are paying for glamour when you should be paying for sales, then let Du Mont show you how to make your TV budget work for you on a bread and butter basis. Let Du Mont show you how to get the greatest value in television advertising today.

JOINT TV BIDS

Chairman Walker Expresses Concern

POSSIBILITY that the FCC might permit merger of AM applicants for TV and discount a possible duopoly situation [B•T, Feb. 4] was dashed somewhat last week when an exchange of correspondence on the subject was made public by Sen. Edwin C. Johnson (D-Col.), chairman of the Senate Interstate & Foreign Commerce Committee.

Senator Johnson wrote FCC Chairman Paul A. Walker March 12 and posed four questions concerning the possibility of two or more Denver AM operators joining together to apply for TV.

Chairman Walker's reply the next day indicated the Commission had not considered the problem. He did say, however, there had been some inquiries and discussion by some staff members with outside lawyers.

Significant portion of Chairman Walker's reply was contained in these words, which may be taken to indicate his attitude: ". . . I have been particularly concerned with the protection of the public against the dangers of excessive concentration of control over the mediums of mass communication."

At the time Chairman Walker replied to Senator Johnson, he emphasized that the Commission was working on the final TV allocation report and was not likely to have time to consider the problem until after the TV freeze was lifted.

He did say, though, that the consolidation of AM applicants was undoubtedly going to occur to "quite a number of AM operators."

"And it is a problem that the Commission is going to have to formulate a policy for," he added.

It is understood that as of last week the FCC has not yet taken the subject up.

In some quarters, it is felt that a decision should be formulated and announced by the Commission within the next few weeks. This would aid TV applicants preparing to apply during the pre-July 1 waiting period, it was pointed out. Unless that is done, there will be no way for applicants to know whether a merger of AM interests is legal or not in the FCC's eyes.

Merger of AM stations for TV is based on two factors: High cost of TV construction and operation and as a method of overcoming protracted hearings where the number of applicants exceeds the number of available TV channels. A joint applicant would have more funds than single applicants, it was pointed out. Also noted was the possibility that combinations might eliminate need for hearings.

It is emphasized by those who are eager for Commission approval of this type of merger that although a TV station might be owned by the same people who also own two or more AM stations, the AM stations would be owned individually and the joint ownership would extend no further than the TV station. The AM stations would continue to be operated separately and competitively, they point out.

Although the Commission has taken no stand on the question, nor has it considered it, discussion with some FCC staff executives indicated they feel such a merger would call into force the duopoly provisions of the FCC rules. This prohibits same ownership (or control) of more than one broadcast station in the same city. The Commission does permit a single owner to have individual AM, FM and TV stations in the same city.

Only application that might fit the description of merged AM applicants is that of KVOR Colorado Springs and KGHF Pueblo, Col. [B•T, March 10]. KVOR and KGHF plan a joint TV station mid-way between the two cities. Whether the Commission will consider this in the same light as a merger of two AM stations in the same city is unknown.

Text of Senator Johnson's letter to Chairman Walker follows:

It is my understanding that most of the radio stations licensed to serve the Denver area have filed, or are planning to file, individual applications for licenses to operate a television station. However, there are twice as many of these radio stations as there may be channels allocated to Denver. This must result in long drawn-out hearings and endless litigation.

If these applications could be joined so that the actual number of applications for Denver television licenses

(Continued on page 101)

'SHORT-TERMER'

Lowman Was Director, Once

LAWRENCE W. LOWMAN, CBS vice president, last Wednesday enjoyed what may be the shortest board directorship in the history of that organization. He was elected Wednesday afternoon and then, per agreement, he promptly resigned after the stockholder meeting.

His nomination (and election) came when the management, seeking to retain one vacancy on the board while re-electing all incumbents, was confronted with an unexpected nomination from the floor: A representative of the Assn. of Women Shareholders proposed Mrs. William S. Paley, wife of the CBS board chairman, for vacancy.

Executive Vice President Joseph H. Ream, countering with the Lowman nomination, explained that the management wished to keep one directorate vacant and that Mr. Lowman, as soon as elected by proxies already in hand, would resign from the board. He did.

Directors re-elected: Prescott S. Bush, Bruce A. Coffin, Lloyd H. Coffin, J. A. W. Iglehart, Samuel Paley, Joseph H. Ream and Dorsey Richardson, all of whom were chosen by Class A stockholders; and Frederick L. Chapman, David H. Cogan, Ralph F. Colin, James B. Conkling, Leon Levy, Edward R. Murrow, William S. Paley and Frank Stanton, elected by Class B stockholders.

President Stanton presided in the absence of Chairman Paley, whose government duties prevented his attendance.

CBS-TV EXPANSION

Stanton Tells Plans

IN ITS bid to achieve station-ownership parity with its rivals, CBS-TV will prosecute applications for new TV stations in markets where it owns radio outlets without television — specifically San Francisco, St. Louis and/or Boston —President Frank Stanton told the annual CBS stockholders meeting last Wednesday.

In response to questions, Mr. Stanton pointed out that CBS now owns WCBS-TV New York, KNXT (TV) Los Angeles and 45% of WTOP-TV Washington; is seeking FCC approval for purchase of WBKB (TV) Chicago and for a merger arrangement which would give it 47% of WCTN-TV Minneapolis-St. Paul, in addition to its purchase of 45% interest in KQV Pittsburgh, which has a TV application pending [B•T, March 10].

Mr. Stanton noted that FCC rules permit a single entity to own as many as five television stations outright—the number owned by NBC and ABC—and that new rules have been proposed dealing with ownerships of minority interests or combinations of majority and minority interests.

In answer to other questions from stockholders, the CBS head expressed the view that it is too early to predict whether TV programming of the future is going to be predominantly live or predominantly film, though he did voice a firm opinion that keeping coaxial cables and radio relays on "standby" duty for special events, while filming all other programs, would impose a severe economic burden.

Denies Cancellations

He renewed protests of officials of CBS-TV and other networks that reports of widespread TV cancellations by sponsors are misleading. He pointed out that this season is traditionally an unsettled one among advertisers and cited CBS-TV's recent report that its business is at an all-time high with sales the first two months of this year running 95.7% ahead of those for the same period last year [B•T, April 7].

Mr. Stanton said he knew of only 1½ nighttime hours on CBS-TV that are not being retained by present sponsors through the summer. Asked specifically about published reports that Pepsi-Cola plans to give up its Saturday night half-hour on CBS-TV when current contracts expire, he said CBS-TV had received no notice to that effect and pointed out that sponsors are not required to give notice until a month before the end of contracts. Pepsi-Cola has eight or nine weeks to run.

He reviewed the color TV situation at a stockholder's request, noting that the CBS system is the only one authorized by FCC even though production of color sets has been halted by the National Production Authority. He said he assumed other manufacturers will apply for FCC approval of their compatible system if they feel it is superior, but pointed out that as yet they have not done so.

Members of the CBS board were re-elected at the meeting (see story this page).

TV Thaw Comments

Joseph H. McConnell, president of National Broadcasting Co.: "We are on our way to a truly national television service." He added that "As the audience grows, the economic structure of the industry will be broadened and strengthened. And this new strength will be translated into improved programs, into technical advances, into wider coverage of world and national events and personalities."

J. L. Van Volkenburg, president of Columbia Broadcasting System Television Network: "Within the foreseeable future television will become a nationwide medium bringing news, information and entertainment into added millions of homes from coast to coast." He added that the freeze-lift "marks one of the most historic dates in the progress of mass communications."

T. F. Flanagan, managing director of the National Assn. of Radio and Television Station Representatives, New York: Representation organizations "are delighted at the lifting of the freeze" and "have already installed the machinery with which to sell and service spot TV to advertisers and advertising agencies." Radio will feel the impact but "The overall general prognosis is the generous use of radio for national advertising." National spot TV already "enjoys a healthy volume which will grow in a sharply rising line as each new TV station goes on the air."

Harry Kopf, NBC vice president and general manager of WMAQ and WNBQ (TV) Chicago: "Better programs are likely to result. . . . The day is coming when television networks will be able to select program origination points almost at will. . . ."

John H. Mitchell, general manager, WBKB (TV) Chicago: "The TV freeze lift is wonderful. An added factor is the establishment of an educational TV station in Chicago. WBKB will be more than happy to contribute personnel to the universities and colleges in helping them get this station started."

J. Harry LaBrum, president of the Chamber of Commerce of Greater Philadelphia, upon the failure of the FCC to allocate any additional VHF channels to that city than were proposed in the FCC Third Notice: "The allocation of four UHF channels to Philadelphia does not remedy the gross discrimination against the city. . . . The development of UHF transmitters and receivers will require time and will not answer the needs of Philadelphia now or in the foreseeable future."

Albert M. Greenfield, chairman of the Chamber's board, referring to Philadelphia's number of TV sets in use, second only to New York and "possibly" Los Angeles: "Perhaps Philadelphia cannot yet be called the 'Television City.' But we believe we have a better claim to the title than does any other community."

On Capitol Hill, from chairmen of the Senate and House Interstate & Foreign Commerce Committees:

Sen. Ed C. Johnson (D-Col.), Senate committee chairman: "When are we going to get TV licensed . . . unless we get additional examiner teams it will be many more months." Television, he said, would not blanket the non-serviced parts of the U. S. until some 20 "examiner teams" were engaged to process applicants at a favorable pace and that there were only seven such teams at FCC now.

Rep. Robert Crosser (D-Ohio), House committee chairman: "We want to see progress ahead. . . . I have confidence in the Commission. . . . It is my prediction that the FCC's report will prove to be good. . . ."

From the West Coast:

Louis D. Snader, president of Snader Telescriptions Corp., Beverly Hills: "Our vista was never 109 TV stations. This is a 2,500-station country."

Basil Grillo, vice president in charge of production, Bing Crosby Enterprises: "The long promised freeze lifting will result in the greatest demand for film products in TV's history."

Don Fedderson, general manager, KLAC-TV Hollywood and president, Television Broadcasters of Southern

(Continued on page 99)

APPLICATIONS

New and Amended Bids Received

FIRST week following the issuance of FCC final TV allocations report [B•T, April 14], saw 15 new and amended applications for television outlets filed with the Commission. Of these, nine were new.

There were four requests for UHF stations, three of which were new.

★

Among the nine new applications was one from WINR Binghamton, headed by the mayor of that New York industrial city. Greer & Greer, a firm which has interests in several southwestern theatres, applied for two stations in New Mexico—one in Albuquerque and another in Santa Fe. And James A. Noe, former governor of Louisiana, asked for an outlet in Monroe, La., where he owns KNOE.

Binghamton Mayor Donald W. Kramer has 10% interest in WINR, which applied for UHF Channel 40. E. R. Vadeboncoeur is WINR vice president; he is also vice president and general manager of WSYR Syracuse. N. L. Kidd, treasurer of WINR, has 25% interest in management group of WNDR Syracuse and owns stock in WELI New Haven, Conn.

Firm of Greer & Greer, composed of E. John Greer and Saloma S. Greer, has no radio or television interests but has interests in motion picture theatres in Santa Fe and Denver, in addition to real estate holdings. Cost of the two TV stations, on Channel 7 in Albuquerque and Channel 2 in Santa Fe, would total nearly $683,000.

Mr. Noe, owner of WNOE New Orleans and KNOE Monroe, La., plus 50% interest in KOTN Pine Bluff, Ark., applied for Channel 8 for Monroe.

First application after the freeze—an amended one—was for Channel 8 in St. Petersburg, Fla., filed by WTSP-AM-FM (see story this page).

For other new applications and amended applications, see opposite page.

POST-THAW

'First' Application Filed With FCC by WTSP

FIRST TV application following the FCC's end-of-freeze report [B•T, April 14] was filed at 8:30 a.m. April 15 by WTSP St. Petersburg, Fla. Station amended its pending application to ask for Channel 8 with 316 kw, 421 ft. antenna height above average terrain in lieu of Channel 5 with 16.8 kw, 417 ft. antenna height.

★

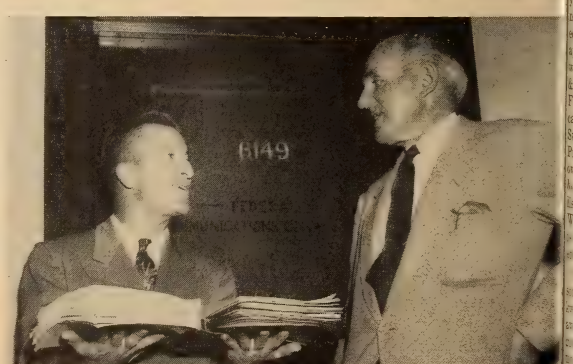
It proposed to spend $541,550 on construction (it already has the land), $278,000 for first year's operating expenses and expects to take in $175,000 during the first year. Equipment will be RCA.

Station is owned by Nelson P. Poynter, who is also owner of the *St. Petersburg Times* and the *Congressional Quarterly*, published in Washington, D. C. F. J. Kelly is vice president and general manager of Pinellas Broadcasting Co., licensee of WTSP-AM-FM. Application was filed by the Washington law firm of Miller & Schroeder.

Meanwhile, the FCC ran out of revised application forms by Tuesday of last week after it had handed out 4,000 sets—mostly to eager, hurried Washington radio attorneys and consulting engineers.

Additional print run of 5-7,000 was ordered and is not expected to be available until early this week. Since each application must be filed in triplicate, the 4,000 forms handed out during the first two days of last week might be considered to mean 1,333 applications on the way to the Commission. Actually, most applications are made up with six copies—the applicant, his law firm and consulting engineer each holding a copy in addition to the three filed with the FCC.

* * *



PATHÉ TV PLAN

Offers 4-Film Package

COOPERATIVE film syndication plan was announced Tuesday by Pathé Television Corp. President Bruce Eells, who said his organization will supply film financing, would distribute films of established producers and share residual income of TV films with stations signing for them now.

Pathé currently plans four half-hour film packages, the first three to be available Oct. 1: A comedy story with music, starring Spike Jones and band; *Passport to Danger*, spy drama property owned by the Swedish firm of A. B. Kinocentralen, Stockholm, and to be produced for TV in Europe; *Pathé Playhouse*, a series of unrelated dramas to be produced in Sweden by Robert B. Spafford, president of Skyline Productions; and the tentative *Rainbow Riley*, a Western which may be produced by Cy Roth of Coyt Productions, Hollywood. Initial budgets for the distribution firm have been set at $3 million per year.

Pathé TV will sell the four films as a single package, Mr. Eells explained, to a probable 30-40 stations in existing markets on a cost basis. Subscriber stations would receive rights to three exclusive runs of each program in their locality during an overall period, probably two years.

F. J. Kelly (l), general manager-executive vice president of WTSP and station's attorney, Neville Miller, wait outside FCC office early Tuesday to file first TV application since TV thaw. Mr. Kelly holds FCC's Sixth Report in his right hand, WTSP application in left.

Listed by States

†DENVER, Col.—Aladdin Radio & Television Inc., Ch. 7 (174-180 mc), ERP 57.5 kw visual; antenna height above average terrain 970 ft., above ground 187 ft. Estimated construction cost $377,505, first year operating cost $683, 048, revenue not estimated. Studio equipment RCA, transmitter RCA, antenna RCA. Legal counsel Pierson & Ball, Washington. Consulting engineer, E. C. Page, Washington. Applicant is licensee of KLZ-AM-FM Denver. Principals include: President Harry E. Huffman (13.3%), owner of 66% interest in Winters-Huffman Drug Store, and Executive Vice President Hugh B. Terry (16%).

†HARTFORD, Conn.—The Travelers Bcstg. Service Corp., Ch. 3 (60-66 mc) ERP 100 kw visual; antenna height above average terrain 326 ft., above ground 450 ft. Estimated construction cost $608,896, first year operating cost $455,096, revenue $400,000. Studio equipment RCA, transmitter RCA, antenna RCA. Legal counsel Kirkland, Fleming, Green, Martin & Ellis, Washington. Consulting engineer A. D. Ring & Co., Washington. Applicant is licensee of WTIC Hartford. Principals include: President Jesse W. Randall and Vice President and General Manager Paul W. Morency. Travelers Insurance Co., Hartford, owns 100% of stock.

†ST. PETERSBURG, Fla. — Pinellas Bcstg. Co., Ch. 8 (180-186 mc), ERP 316 kw visual; amended engineering data not submitted, except that antenna height above ground will be 457 ft. Estimated construction cost $541,550, first year operating cost $278,000, revenue $175,000. Make and type of equipment not specified in amended application, except that antenna will be RCA. Legal counsel Miller & Schroeder, Washington. Engineer F. J. Kelly, St. Petersburg. Applicant is licensee of WTSP-AM-FM St. Petersburg. Principals include: President Nelson Poynter (96%), owner and publisher of *St. Petersburg Times* and co-editor and publisher of *Congressional Quarterly*, Washington, D. C. Mr. Kelly also is executive vice president and general manager of WTSP-AM-FM.

TOPEKA, Kan.—S. H. Patterson, Ch. 13 (210-216 mc), ERP 25.2 kw visual; antenna height above average terrain 534 ft., above ground 537 ft. Estimated construction cost $174,231.23, first year operating cost $225,000, revenue $250,000. Studio equipment DuMont, transmitter DuMont, antenna RCA. Legal counsel P. W. Seward, Washington. Consulting engineer Radio Engineering Co., San Francisco. Applicant is licensee of KJAY Topeka and KSAN San Francisco; owner of both is S. H. Patterson, who has various real estate holdings.

MONROE, La.—James A. Noe, Ch. 8 (180-186 mc), ERP 96.5 kw visual; antenna height above average terrain 575 ft., above ground 574 ft. Estimated construction cost $331,921, first year operating cost $214,690, revenue $195,260. Studio equipment RCA, transmitter RCA, antenna RCA. Legal counsel Roberts & McInnis, Washington. Consulting engineer McIntosh & Inglis, Washington. Applicant is licensee of WNOE New Orleans and KNOE Monroe. Owner is James A. Noe, 50% owner of KOTN Pine Bluff, Ark., who has interest in various oil and gas companies in addition to radio interests.

DULUTH, Minn. — Red River Bcstg. Co., Ch. 3 (60-66 mc), ERP 25.6 kw visual; antenna height above average terrain 813½ ft., above ground 558 ft. Estimated construction cost $283,501, first year operating cost $175,000, revenue $200,000. Studio equipment RCA, transmitter RCA, antenna RCA. Legal counsel Segal, Smith & Hennessey, Washington. Consulting engineer Millard M. Garrison, Washington. Applicant is licensee of KDAL Duluth. Principal in applicant firm is President and Treasurer Dalton LeMasurier (70%), general manager of KDAL and 79% stockholder and president of WQUA Moline, Ill.

ALBUQUERQUE, N. M.—Greer & Greer, Ch. 7 (174-180 mc), ERP 111 kw visual; antenna height above average terrain 4,152 ft., above ground 274 ft. Estimated construction cost $352,123, first year operating cost $160,000, revenue not estimated. Studio equipment RCA, transmitter RCA, antenna RCA. Legal counsel I. E. Lambert, Wichita, Kan. Consulting engineer A. D. Ring & Co., Washington. Principals include: E. John Greer (50%), who has interest in nine theatres in Santa Fe and Denver, and Saloma S. Greer (50%), who has interest in four Santa Fe theatres; both have real estate holdings and interests in Santa Fe and Albuquerque.

SANTA FE, N. M.—Greer & Greer, Ch. 2 (54-60 mc), ERP 52.8 kw visual; antenna height above average terrain 419 ft., above ground 600 ft. Estimated construction cost $330,753, first year operating cost $120,000, revenue not estimated. Studio equipment RCA, transmitter RCA, antenna RCA. Legal counsel I. E. Lambert, Wichita, Kan. Consulting engineer A. D. Ring & Co., Washington. Principals include E. John Greer (50%), who has interest in nine theatres in Santa Fe and Denver, and Saloma S. Greer (50%), who has interest in four Santa Fe theatres; both have various real estate holdings and interests in Santa Fe and Albuquerque.

BINGHAMTON, N. Y.—Southern Tier Radio Service Inc., UHF Ch. 40 (626-632 mc) ERP 171 kw visual; antenna height above average terrain 598 ft., above ground 440 ft. Estimated construction cost $245,714, first year operating cost $202,625, revenue $212,000. Studio equipment GE, transmitter GE, antenna GE. Legal counsel Dow, Lohnes & Albertson, Washington. Consulting engineer Craven, Lohnes & Culver, Washington. Applicant is licensee of WINR Binghamton. Principals include: President Donald W. Kramer (10%), mayor of Binghamton, senior partner in law firm of Kramer, Night & Wales, and president of Hawthorne Heights Inc. (real estate development); Vice President E. R. Vadeboncoeur (12.7%), vice president of WSYR Syracuse, and Treasurer N. L. Kidd (12.6%), one-fourth interest in management group of WNDR Syracuse and stockholder in WELI New Haven, Conn.

DURHAM, N.C.—Durham Bcstg. Enterprises Inc., Ch. 11 (198-204 mc), ERP 200 kw visual; antenna height above average terrain 364 ft., above ground 441 ft. Estimated construction cost $310,000, first year operating cost $153,900, revenue $200,000. Studio equipment DuMont, transmitter DuMont, antenna RCA. Legal counsel Fletcher & Midlen, Washington. Consulting engineer Virgil D. Duncan, Raleigh, N. C. Applicant is licensee of WTIK Durham. Principals include: President Harmon L. Duncan (25%), owner of WHIT New Bern, N. C., and Vice President and Secretary J. Floyd Fletcher (50%).

FREMONT, Ohio—Wolfe Bcstg. Corp., UHF Ch. 72 (818-824 mc), ERP 23.52 kw visual; antenna height above average terrain 184 ft., above ground 261 ft. Estimated construction cost $145,000, first year operating cost $100,000, revenue $125,000. Studio equipment RCA, transmitter RCA, antenna RCA. Legal counsel A. L. Stein, Washington. Consulting engineer A. R. Bitter, Toledo, Ohio. Applicant is licensee of WFRO-AM-FM Fremont. Principals include: President Robert F. Wolfe (44%), paper jobber, and R. C. Force (0.20%) manager of WFRO.

JOHNSTOWN, Pa.—Rivoli Realty Co., UHF Ch. 56 (172-178 mc), ERP 85.8 kw visual; antenna height above average terrain 606 ft., above ground 540 ft. Estimated construction cost $187,300, first year operating cost $150,000, revenue $200,000. Studio equipment RCA, General Radio, Transmitter DuMont, antenna RCA. Legal counsel Fisher, Wayland, Duvall & Southmayd, Washington. Consulting engineer George C. Davis, Washington. Applicant is licensee of WARD-AM-FM Johnstown. Principals include: President-Treasurer Walter M. Thomas (12.5%), owner of 50% of Laurel Theatre and 33% of Roxy Theatre, both in Johnstown, and Secretary Margaret E. Gartland (57.5%), owner of 50% of Laurel Theatre, and 33% of Roxy Theatre and 50% of First National Bank Building, Johnstown.

†WILKES-BARRE, Pa. — Wyoming Valley Bcstg. Co., UHF Ch. 34 (590-596 mc), ERP 233 kw visual; antenna height above average terrain 1,004 ft., above ground 243 ft. Estimated construction cost $397,-500, first year operating cost $225,-000, revenue $250,000. Studio equipment GE, transmitter GE, antenna GE. Legal counsel Miller & Schroeder, Washington. Consulting engineer John Creutz, Washington. Applicant is licensee of WILK-AM-FM Wilkes-Barre. Principals include: President Isaiah C. Morgan, M. D. (12½%), Secretary and General Manager Roy E. Morgan (12½%), and Second Vice President and Station Manager Thomas P. Shelburne (12½%).

†MEMPHIS, Tenn.—Hoyt B. Wooten, d/b as WREC Bcstg. Service Ch. 3 (60-66 mc), ERP 100 kw visual; antenna height above average terrain 978 ft., above ground 1,050 ft. Estimated construction cost $500,216, first year operating cost $450,000, revenue $600,000. Studio equipment RCA, transmitter RCA, antenna RCA. Legal counsel Spearman & Roberson, Washington. Consulting engineer A. D. Ring & Co., Washington. Applicant is licensee of WREC Memphis. Sole owner and licensee is Hoyt B. Wooten, who has no other interests.

SAN JUAN, Puerto Rico—Jose Ramon Quinones, Ch. 4 (66-72 mc), ERP 54.5 kw visual; antenna height above average terrain 317 ft., above ground 382 ft. Estimated construction cost $244,009.78, first year operating cost $125,000, revenue $200,000. Studio equipment RCA, transmitter RCA, antenna RCA. Legal counsel Dow, Lohnes & Albertson, Washington. Consulting engineer Commercial Radio Equipment Co., Washington. Applicant is licensee of WAPA and permittee of WPAA. Jose Ramon Quinones is sole owner; in addition to radio interests, he owns three Puerto Rico sugar cane farms and is president of Puerto Rico Farm Bureau.

Thaw Stirs Market

FCC's television freeze-lift announcement last Monday touched off a round of activity in radio-TV stocks, but the flurry was subsiding by mid-week. Trading in RCA common stock, for example, saw almost 70,000 shares change hands on Monday, while 23,400 were traded Tuesday and 11,600 on Wednesday. Prices which were up at the outset appeared for the most part also to be settling back by the middle of the week.

He can make you happy

Sam Levenson offers you the gift of laughter . . . he's generous about spreading it around. He's made so many people happy that half of all the sets turned on at Levenson's time are turned on to see Levenson, and that's added up to a 22.5 Trendex rating.

Now he's moved to Tuesday at 8, when even more people can be happy over his wholesome, effortless humor and inspired story-telling.

One of those happy people could be a sponsor who knows how family pleasure can carry over into family buying.

That happy sponsor could be you.

SIXTH REPORT

Clarification Policy Set

ALL REQUESTS for clarifications and interpretations of the FCC's voluminous and exacting Sixth Report and Order, which was issued last week [B•T, April 14], must be put in writing.

That was one of the first actions of the FCC following a week of heavy reading by broadcasters and their Washington legal and engineering counsel.

Commission sources said that they must be asked questions in writing so that their replies can be official and on the record. Otherwise, they fear that conflicting answers may be given to the same question.

Most of the inquiries verbally submitted to the Commission last week were matters answered in the decision, these sources said. Some of the questions raised led to these answers:

1. As of now it is impossible to judge when an applicant may get a grant. That won't be known until after the July 1 deadline for the beginning of processing when most of the applications will have been filed.

2. FCC will put out shortly after July 1 a list of cities and their positions on the various processing lines.

3. Definitely scheduled is work on the change of assignments for the 30 stations required to shift frequencies. If applications to accomplish this are accompanied by requests for maximum powers and antenna heights, those items will be processed at the same time the channel reassignments are.

4. Will FCC view sympathetically requests for rule-making at end of year to shift unused channels from one city to another where applicants await additional frequencies? Commission sources indicate uncertainty on this, claim that nobody has given it much thought. Answer is same regarding petitions to delete educational reservations on unused channels.

5. All applications do not have to be in by July 1. If filed after that date, they will be placed in the proper processing line. But if from a city without TV service now, those delaying may find all channels granted.

6. What happens to an application belonging to the Group B (1) processing line which is filed after the Commission completes actions on all applications in that group? Does it get priority over applications in Group B (2)? Answer is yes, it will be considered a Group B (1) application and receive priority over Group B (2) applications.

7. Grantees who have to return for modifications of CPs will be put into Group C, which will be started as soon as the first modification is received. Group C will be processed as soon as the first case comes in.

Question of how fast the various processing lines can be moved is the great unknown. At the present time, the Commission is understaffed and is awaiting Senate action on its requested $8 million 1953 budget. The House passed a $6 million appropriation, which is not only a cut of $2 million from the amount requested, but is actually $500,000 under present required levels.

Should the Senate not restore the House cut, the Commission will have to survey its activities, determine which will be cut down to shake loose personnel for the expected TV avalanche.

Commission officials vow that all personnel are loaded with work at the present time and that if any must be moved to tackle TV workload it will mean a virtual "freeze" on other activities—AM, amateurs, telephone and telegraph, etc.

FILM PRODUCTION

Stopped by CBS-TV

CONTINUING to own package, CBS-TV has withdrawn from production of TV films and turned over the half hour *Amos 'n' Andy* filming to Hal Roach Productions, which receives screen credit.

All personnel in the unit will now be carried on Hal Roach Productions' payroll. Series, since start in 1951, has been filmed at Roach Studios, with network renting technical facilities and carrying actors and directors on its payroll.

CBS-TV was the only network actually producing its own films. It now reverts to a policy maintained by other networks who farm out all film production to established motion picture producers.

AUTO DEALERS

Buy Drama-Sports Packages

AUTO dealers seem to be emphasizing heavy dramatic-sports packages, Milt Blink, executive vice president of United Television programs, said last week in reviewing spring sales of TV film programs.

Chrysler-De Soto dealers in Buffalo and Rochester had bought *Double Play With Durocher and Day* in their cities, while Harts Sales Corp., auto polish manufacturers, signed for the same program in San Antonio, Dallas, Houston, and Phoenix.

Dramatic *Royal Playhouse* series is currently on the air for Ford dealers in Davenport and Nash dealers in Pittsburgh. In its original version, *Fireside Theatre*, the same program is featured by the Clark-Smith Auto Sales Corp., in Phoenix.

Studebaker Dealers in Milwaukee have purchased a private detective series distributed by UTP, and Lou Levinthal, a used-car dealer in Indianapolis, is running a 5-minute dramatic-impact series, *Paradox* on WFBM-TV for 52 weeks. Sieberling Tires has purchased the *Big Town* series for Brownsville, Tex.

Cumberland-Nash dealers in Rochester struck out on an individual choice, Mr. Blink reported. They bought UTP's *Old American Barn Dance*.

GOAR MESTRE (l), president of CMQ Television Network, Havana, Cuba, signs contract of affiliation with NBC-TV as Sheldon Hickox Jr., director of NBC television station relations, looks on. Contract is effective April 15 and covers use of kinescopes of NBC-TV programs.

ATOMIC BLASTS

Set for U. S. Showing

ATOMIC blast scheduled tomorrow (Tuesday) at Frenchman Flat, near Las Vegas, Nev., will be seen by television audiences over the whole nation as a result of a public service venture by the seven Los Angeles TV stations.

The seven stations, comprising the Television Broadcasters of Southern California, will set up relays on a pool basis from the Frenchman Flat scene to Los Angeles where live telecasts will be made available to the national networks.

Under the production supervision of Klaus Landsberg, vice president and general manager of KTLA (TV) Los Angeles, the co-operative telecast will include the atomic blast itself and behind-the-scenes interviews with troops participating in the atomic warfare maneuvers.

Equipment to relay the blast to Los Angeles has been dropped by helicopter on strategic mountain peaks, beginning with Mt. Charleston, 8,000-ft. receiving point from Frenchman Flat. Relay then goes to Mt. San Antonio (Mt. Baldy) and to Mt. Wilson, site of the seven Los Angeles TV transmitters.

Cost of operation is estimated at more than $75,000.

NBC-TV in New York announced that it would carry a live telecast if arrangements are completed to relay the blast simultaneously.

CBS-TV said the explosion would be carried live.

ABC-TV spokesmen said the network was not even planning to carry films of the atomic experiment.

CBS Radio reported it would send commentators Robert Trout, Lowell Thomas and Dallas Townsend to cover the event, with their broadcasts originating at KLAS Las Vegas.

MBS said it is sending a crew headed by Maj. George Fielding Elliot to work with the staff of KRAM Las Vegas.

Plastic Props Are Boon To Production

(Report 212)

A PLASTIC resistant to water, fire, shattering and warping is being demonstrated by NBC which, with Studio Alliance, New York, theatrical supply house, has developed the compound for TV use in sets, props and costumes.

An opaque plastic—shown in fireproof flats two-thirds the usual thickness—can be painted repeatedly with glazed or dull finishes, thereby, since sizing is not necessary, saving one step in the usual painting process. Having the toughness but not the weight of wood, the plastic—like wood—can be nailed, sawed, planed and sanded.

It can be cast in molds to reproduce art objects—such as an antique urn or a hand-carved picture frame—with precise detail and a great saving in weight: a gilded bust weighing 15 pounds was reproduced in plastic weighing two pounds. Details can be cast so precisely, according to Arthur Segal, partner in Studio Alliance, that reproducing unwanted lines was initially a manufacturing problem.

A translucent plastic can also be used to create a marble-like texture and appearance or, with color introduced into the plastic mixture, stained glass windows. A transparent plastic, currently in development, will make it possible to build shatter-proof crystal chandeliers. An elastic plastic can be used for metallic chains and braids on military uniforms or ornate draperies —which themselves can be cast in plastic.

Cost of the process varies, with hand-made objects proving cheaper to date than tooled reproductions which require special machinery. In some instances—such as a portable antique vase—plastic is already cheaper than the usual and coarse papier maché, as well as more durable, Benjamin L. Webster, NBC manager of staging services, reported.

Durability of plastic props—which can be dropped without damage—is soon to be proved by Ringling Bros. circus, which has ordered ornately carved float-wagons coated with the processing, he added. The technique, developed over the last six months, was also used for some props in NBC-TV's presentation of the opera, *Amahl and the Night Visitors.*

'Lucy' Heads Nielsen In Homes Percentage

CBS-TV's *I Love Lucy* reached 9,561,000 homes and was viewed in 59.1% of all TV homes able to receive the program, according to A. C. Nielsen's second TV report for March. Based on two weeks ending March 22, complete ratings follow:

Rank	Program	Homes (000)
1	I Love Lucy (CBS)	9,561
2	Texaco Star Theater (NBC)	8,094
3	Red Skelton (NBC)	8,059
4	Colgate Comedy Hour (NBC)	7,542
5	You Bet Your Life (NBC)	7,345
6	Your Show of Shows (Reynolds, R. J., Tobacco) (NBC)	7,229
7	Fireside Theater (NBC)	7,213
8	Arthur Godfrey & Friends (Liggett & Myers Tobacco) (CBS)	6,582
9	Your Show of Shows (Participating) (NBC)	6,503
10	Philco TV Playhouse (NBC)	6,436

Rank	Program	Homes %
1	I Love Lucy (CBS)	59.1
2	Arthur Godfrey's Scouts (CBS)	57.9
3	Red Skelton (NBC)	51.5
4	Texaco Star Theater (NBC)	50.9
5	Colgate Comedy Hour (NBC)	47.6
6	Your Show of Shows (Reynolds, R. J., Tobacco) (NBC)	46.2
7	You Bet Your Life (NBC)	45.7
8	Arthur Godfrey & Friends (Liggett & Myers Tobacco) (CBS)	44.8
9	Fireside Theatre (NBC)	44.7
10	Mama (CBS)	43.5

Total Markets on Air 64* **Stations on Air 109*** **Estimated Sets in use 16,887,589**

* Includes XELD-TV Matamoros, Mexico

Editor's Note: Totals for each market represent estimated sets within television area. Where coverage areas overlap set counts may be partially duplicated. Sources of set estimates are based on data from dealers, distributors, TV circulation committees, electric companies and manufacturers. Since many are compiled monthly, some may remain unchanged in successive summaries. Total sets in all areas are necessarily approximate.

The Atlanta market is a beauty in more ways than one. So far as we know, the city's famed dogwoods bear no particular significance to sales . . . but did you ever notice how much better work does seem to go amid pleasant surroundings? One of these more pleasant things about doing business in Atlanta is a television set-up that pampers an advertising budget. Telecasting over Channel 2 with 50,000 watts from the world's tallest television tower, WSB-TV delivers a package that makes sense to cost-conscious time buyers. Let one of us show you WSB-TV's coverage pattern and tell you about the production facilities we have for you.

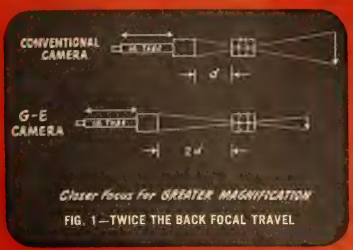
30 ADVANCED FEATURES

✓ INTERCHANGEABLE WITH MOST EXISTING TELEVISION CAMERAS



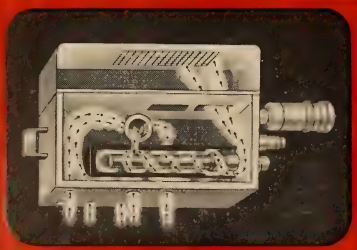


FIG. 1—TWICE THE BACK FOCAL TRAVEL

✓ With short focal length lenses, G-E camera (bottom) can focus closer on subjects for greater magnification—up to 25 times.

✓ Vibration-isolated blower provides full length cooling of I.O. tube for long tube life and top picture quality.

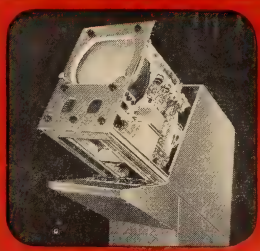
✓ Flush viewfinder window. Removable visor for unrestricted viewing. ✓ Recessed knobs prevent accidental misadjustment.

SEND FOR THIS NEW BULLETIN—Complete specs, diagrams and photographs of this new G-E TV Studio Camera Channel. Wire or write us for Bulletin ECB-5. *General Electric Company, Section 232-17, Electronics Park, Syracuse, New York.*

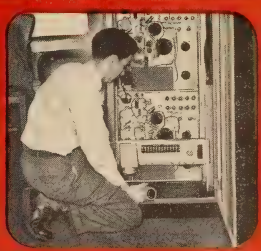
in new G-E studio camera channel!

ALREADY in production and already in service, General Electric's Type PE-8-B represents another major engineering achievement in television from Electronics Park, world center for electronics research and development. Feature by feature—to give you unprecedented picture quality and simplicity of operation—this channel is far ahead of anything in its field today!

Check the advantages listed below. Compare them, point by point, with those of any other camera channel. Then call your G-E Broadcast Man and ask to see this new unit in action.



- ✓ **Twice the back focal travel** of conventional cameras! Now, for the first time you can focus on closer subjects with a long focal length lens. (See Fig. 1)
- ✓ **Silent blower** permits close-up operation without microphone pick-up.
- ✓ **Special shielding** around yokes and blower motor prevents picture distortion by eliminating effect of stray magnetic fields.
- ✓ **Faster lenses supplied at no extra cost!**
  50 mm — f2.3 100 mm — f2.3 152 mm — f2.7
  ✓ Lenses are positively indexed.
- ✓ **Circuits provide sweep failure protection** for your $1200 I.O. tube. ✓ Quick change sweep expansion switch prevents underscanning effects on the face of the tube.
- ✓ **Lens versatility.** More than 15 different TV lenses can be mounted without special adaptation.
- ✓ **Stabilized and friction-damped turret** prevents oscillation or sagging when shifting lenses or tilting camera.
- ✓ **Automatic engagement of focus control** when side door of camera is closed.
- ✓ **Low center of gravity in camera** and Fearless pan and tilt head assure stability and smooth operation.
- ✓ **Focus handle clutch** protects against damage and misalignment.
- ✓ **Removable I.O. yoke** with ball-bearing slide assembly and plug-in electrical connections.
- ✓ **Microphonics minimized.** No signal circuits included in control console.
- ✓ **Average brightness measurements** of channel picture can be made at the channel amplifier.
- ✓ **14 kv independent power supply** for monitor picture tube. ✓ Calibration input terminals supplied.
- ✓ **Change-over switch** for composite or non-composite signals.
- ✓ **Waveform monitor** includes IRE calibration scale.
- ✓ **Simultaneous vertical and horizontal waveform presentation.**
- ✓ **Large quiet blower** provides ample monitor cooling.
- ✓ **Entire channel is factory-wired,** with all plug-in interconnections.



✓ **Change I.O. tube in 2 minutes!** Remove only one thumb screw and turret. ✓ Easy to store lenses for safekeeping.

✓ **Rapid focus by crank or knob.** ✓ Use inside coupling knob (above) for focus during "line-up".

✓ **Counter-balanced "draw-out" and removable panels** for accessibility. ✓ 12½" aluminized picture tube.

✓ **Convenient, accessible rack unit.** 2-way telephone communication between rack, camera and control console.

EDUCATORS, JCET

TV Thaw Is 'Challenge'

FCC has spun the wheel of fortune for TV station-minded educators throughout the nation but the question remained last week whether many institutions would get their blue chips on the table within the prescribed one-year time limit.

While a number of prominent educators, including representatives on the Joint Committee on Educational Television, expressed themselves as highly gratified over the FCC's non-commercial educational reservations, they made plain they did not regard the allocations as a "victory" *per se* but as a decision within the province "of the public interest" and a challenge to education.

The Commission set aside 242 reservations for non-commercial educational stations, of which 80 or 13% are earmarked for VHF [B•T, April 14]. Processing starts July 1.

Despite the concern over finances, educational groups were urged to apply immediately for precious frequencies within the structure of FCC's table of assignments—"even before funds are available" lest they "inevitably be lost" by remaining "fallow."

Estimate 15 to File

JCET, prime mover in the educators' drive, with the help of a $90,000 grant from the Fund for Adult Education of the Ford Foundation, estimates perhaps 15 organizations may file this year for educational outlets—and at least half "should get in substantial readiness" to file.

Losing no time once FCC announced its allocations plan, educational leaders and JCET officials called a news conference in Washington last Monday.

JCET announced that the final TV allocations plan "retains the principle of reservations" it had proposed before the Commission, and lauded the FCC "for creating a television allocation plan which will provide [the American people] with wider access to the benefits of education."

Submitting to questioning were Ralph Steetle, JCET executive director, and other committee representatives, and spokesmen for U. S. Office of Education, National Assn. of Educational Broadcasters, National Education Assn. and Assn. for Education by Radio-Television.

Mr. Steetle told BROADCASTING • TELECASTING that perhaps a dozen groups or institutions now are seeking educational stations in such cities as Houston, Milwaukee, San Francisco, Detroit, Los Angeles, DeKalb (Ill.), Columbus, Champaign (Ill.) and others.

Among universities expected to file shortly for channels are U. of Missouri (no educational channel reserved by FCC), Michigan State College, U. of Illinois, Ohio State U., U. of Kansas, State U. of Iowa, U. of Southern California, Wichita U., Houston U. and Southern Illinois U.

Statewise, several state education departments have joined other groups for "initial steps" in New York, New Jersey, Connecticut, Michigan, Wisconsin, Oregon, California, Ohio, Washington, Texas and others.

Mr. Steetle, while expressing no such sentiment during the news conference, told this publication he wanted to stress that "commercial television stations have done a good job" in presenting educational fare but that there is no question of overlap in programming.

"The interest of the Ford Foundation, additionally, will continue unabated in this program to facilitate the establishment of an educational system of television broadcasting," Mr. Steetle said. He said this interest implies "financial support" in instances involving educational groups in need of funds.

In his prepared statement, Mr. Steetle praised the FCC for its attitude and expressed confidence that many schools "will move forward immediately to construct and operate television stations."

Basically, however, it was made plain at the conference that responsibility for implementing educational TV will rest with individual institutions, which have been canvassing sources of revenue to sustain construction and maintenance costs of educational stations (see separate story page 100).

Seymour Siegel, JCET representative and NAEB president, suggested non-commercial TV stations could be built for as little as $250,000 and operated for one year on a maximum of another $250,000 —depending on the type and size of community and its interests. Where educational networks are in existence, the cost conceivably would be less, he added.

UHF For WNYC

Mr. Siegel, also director of Municipal Broadcasting System (WNYC) New York, who hopes to obtain the only local commercial channel available—UHF No. 31—and who announced that WNYC will apply this week, probably today (Monday) for the lone channel, said commercial operators will shy away from the UHF frequency in New York because six VHF operators already are established successfully there.

He said an application for a non-commercial channel had been substantially completed when FCC ruled that applicants for such channels must be identified with educational institutions. He said authority for WNYC's application was issued in February by the city's board of estimates for a TV station. He indicated his hope of an uncontested hand in obtaining UHF Channel 31.

He urged educational groups to "apply for channels without delay —apply for construction even before funds are available."

JCET officials conceded that in some instances, state universities would have to go to their legislatures every year because "funds are hard to come by and slow to come by." On the other hand, in cases like that involving the Board of Regents of the State of New York, it was said television is a "small item" when siphoned from a substantial budget set aside for support of public schools.

The Board of Regents has proposed an 11-station non-commercial educational TV network at an estimated cost of $3,855,540 with an annual technical operating cost of $2,273,941 based on 12 to 16 hours programming daily, seven days a week. Total of ten UHF channels were reserved for the New York State plan.

Arthur S. Adams, president of the American Council on Education, posed a challenge for educators, stating: "The time is now—the time we have this opportunity is short."

Experience Needed

Belmont Farley, JCET representative for NEA, said educators' TV station dreams can come true "but it will take a little longer. What we don't know now and have in experience, we will learn." An estimate of two to five years was given.

Seymour Krieger, JCET counsel,

TV PROGRESS

Ohio Institute Charts Course

PROGRAMMING of commercial TV stations "will improve" but industry cannot do the job alone without the aid of educational broadcasters, the Institute for Education by Radio-Television was told Thursday.

This was the gist of talks by commercial broadcasters and educators in a session on "improvement of television programming" ushering in the 22d annual IERT conference sponsored by Ohio State U. at Columbus.

The general session was flavored with references to the NARTB Television Code, FCC's ill-fated *Blue Book* of several years ago and trade criticism.

Panel Members

Panelists included Edward Lamb, president of WTVN (TV) Columbus and WICU (TV) Erie, Pa., WTOD Toledo and WHOO Orlando, Fla.; Mrs. A. Scott Bullitt, president of KING-TV Seattle, a member of the NARTB TV Code Review Board; Armand Hunter, director of TV development, Michigan State College, and Dallas Smythe, Institute for Communications Research, U. of Illinois.

Mr. Lamb said "there are many factors which lead me to feel that TV programming at commercial stations will improve," largely through consumer and organized viewing groups rather than by dint of "self-policed codes of good conduct."

He described the new NARTB TV code as a good thing but only "a mild incentive" to improvement.

He insisted that "more and more commercial broadcasters are daily coming to a realization that FCC was essentially correct in its *Blue Book* announcement several years ago." As a result, he said, they have realized that the "best programming" is local and public service fare.

Most immediate problem, Mr. Lamb stated, is improvement of commercial TV programming, which "will arrive out of a real, rugged competition for audience attention." He said educators no longer can afford to sit back and "criticize commercial telecasting" but must face up to the task of putting educational stations on the air. The American public will be able to use this new program source as a gauge to measure usefulness of all TV stations.

Noting that educational groups are receiving reservations for more than twice as many channels as commercial outlets now on the air, Mr. Lamb suggested that private broadcasters might question granting free time to public service and educational programs.

"It is unfortunate that this recent allocation plan did not accept the proposal offered by Sen. Edwin C. Johnson (D-Col.) and others of us who have been touring the country," he said.

Mrs. Bullitt suggested that televiewers show more response to good programming to guide commercial stations and felt programming problems would be solved in time. She stressed public service programs, a high level of program selectivity and research, adding that there is a difference at times between so-called good and bad shows and that research reflects changes in audience taste.

'Silence Is Lethal'

"When stations offer something worthwhile, they frequently get the silent treatment," she said. "Silence is lethal."

Responding to a question, Mrs. Bullitt said that while some individuals in the industry take issue with educational reservations, "there will be very feeble opposition" once the educators start to build stations.

Mrs. Bullitt expressed confidence that programs will show continual

(Continued on page 82)

said he is delighted "the Commission has seen the light" and said that previously applications before the FCC were "predominantly commercial." He said the burden had been on educators to present a strong case for non-commercial TV outlets "immediately" while commercial telecasters sat back and "clamored" for three and a half years for the FCC to lift the freeze.

JCET officials urged special haste by organizations in larger cities where FCC has earmarked VHF in its assignments.

Turning to programming, a JCET representative said educational stations will "try to get away from the deadening monotony of standard stuff" telecast by commercial stations. But even so, JCET officials emphasized that its proposed educational fare would fall within the broadest possible definition of the word, and include culture, fine arts and entertainment.

In this connection, the educators had a kind word for DuMont Network's *Johns Hopkins Science Review*, NBC-TV's *Meet the Press* (whose format they felt could be embellished with general educational uplift)—and even *Kukla, Fran & Ollie*.

The purpose of educational programming, JCET avowed, would be to weigh "the total impact of educational and cultural fare on all levels of people" and to afford "mature, literate and adult fare" which education hopes to translate in terms of public understanding in government and democracy.

JCET still is "interested in educational programming of commercial stations" and the need for cooperation between commercial telecasters and educational outlets. Role of the latter in supplying new personnel for potential commercial outlets was cited.

EDUCATIONAL TV COST

'Who's Going to Pay?'

FINANCING of educational TV presents a grave problem, Calvin S. Hathaway, director of the Cooper Union Museum for the Arts of Decoration, New York, declared last Wednesday.

Speaking before the Friends of the Museum, Mr. Hathaway said that although "we are keenly interested in the potential widening of our horizons by the new Washington decree . . . I only wish that Washington or Albany or the ultimate beneficiaries who own television receiving sets would tell us: Who's going to pay?"

He cited the expense of TV programming and noted that the New York State Regents hope to operate a proposed network. He added, "but there seems to be no reason to hope that the State of New York will be any more interested in helping to cover a museum's television expenses than commercial television has been."

Because the stations would be operated without profit, there are no problems involving unions or copyright-royalties. "The American Federation of Musicians has cooperated fully and completely" with schools on broadcasts involving musicians, Mr. Siegel interposed.

Cost of operating these stations would be "cheaper than chewing gum—perhaps the least expensive way you can educate except perhaps radio," according to ACE's Mr. Adams. He cited a potential Boston VHF audience of four million viewers and added that in New York the cost "will approximate that of one newspaper per person per year." In some instances, the audience would be select or limited, however, it was acknowledged.

"Within five years, state universities and private institutions will serve each community, state and the nation on a scale only dimly appreciated today," Mr. Adams told newsmen.

Some educational groups, it was acknowledged, have indicated interest in applying for commercial TV licenses. It also was noted that FCC was asked to rule on partial commercialization by educational applicants as a policy. (The Commission rejected this proposal, suggested by the U. of Missouri and other schools.)

The ACE president strongly endorsed the plan and expressed confidence that construction and operation "will begin promptly in many communities." Actual spade work for these stations may take place at the current Educational Television Programs Institute at Pennsylvania State College, slated to have been held yesterday (Sunday).

NEA's Mr. Farley noted that one state (presumably New York) is "well on the way to the creation of a statewide network of television stations. In numerous cities and in many institutions . . . plans for financing and operating educational stations have been made and will be carried out at an early date." The reservations will help some groups overcome some "limitations" on TV, he added. Los

FINAL TELEVISION ALLOCATIONS REPORT

EXTRA COPIES AVAILABLE NOW AT $3.00 EACH

This is the complete report—196 printed pages—just as the FCC released it last Monday.

This volume shows the complete city-by-city breakdowns for all 2,053 proposed stations in 1,291 communities. There are sections on antenna heights, educational reservations, power, procedures, Hennock's and Jones' opinions, zoning and mileage separation.

You'll want library copies, home copies, tear copies and working copies. Press run was limited. Please use the coupon below and order today.

TV Progress

(Continued from page 80)

improvement but emphasized that objectives will not be reached over night. With new educational TV outlets taking the air, programming is bound to improve, she noted, but the pattern has not yet crystallized.

Burden of responsibility for improvement in video fare was placed on educators by Dr. Hunter, a prime mover in Michigan State TV development, who felt a "fundamental philosophical conflict and opposition" within private industry is hampering progress.

"Industry has certain . . . economic obstacles in its path," he said in calling on educators to improve programming. "The FCC has no practical method of enforcing it and the public has no articulate means of demanding it," he added.

Dr. Hunter predicted that "the battle will be long and hard" and that the educators as outside forces are the only ones who can perhaps swing the support and weight needed to help the industry win the fight and eventually achieve the common objective.

He called on educators to determine needs and standards through qualitative program research and experiment with new ideas.

Statistics on Programming

The research phase elicited statistics from Prof. Smythe, also a director of studies for the National Assn. of Educational Broadcasters. He scored "the apparent predominance of stereotyped material in the entertainment which provides the bulk of TV programming."

Delving into NAEB monitoring studies in three cities, financed partly by the Fund for Adult Education over a 15-month period, Prof. Smythe said entertainment occupies about three-fourths of program time in New York and Los Angeles. He gave this breakdown: Information type programs (news, weather, sports, etc.) 19% in New York and 24% in Los Angeles; public issues and events, ranging from 4% in Los Angeles to 7% in New York, and drama, 33% in both cities. Comparisons with Chicago were not available, though studies are under way and are being extended to other cities. This research covered 1951 and 1952.

Prof. Smythe particularly deplored "crime and violence on TV," which he said had risen in both cities and suggested such studies "may lead to revisions of TV program policy of the highest importance."

A tribute to the late W. W. Charters, co-founder and honorary director of the institute, was given by Judith Waller, NBC Central Division, who cited his "wise counsel in serving IERT."

Dr. I. Keith Tyler, Institute director, presided over the panel held in the Deshler-Wallick Hotel. Kenneth G. Bartlett, Syracuse U., led the floor discussion.

Educators, JCET

(Continued from page 81)

Angeles also is "ready to go" with UHF, it was said.

JCET assisted 838 colleges, universities and school systems and public service agencies to file formal statements in response to the FCC's proposal for reservations. The difference between the 242 finally reserved and the 209 set aside in the Commission's Third Notice represents extra channels granted to groups which had not even applied. JCET will continue to aid schools, offering engineering and construction data.

Detroit educational agencies are "well along" in their planning, according to President David Henry of Wayne U., an ACE representative on JCET. Applicants for UHF in that city include Wayne U., U. of Detroit and Dept. of Education.

Mr. Henry said:

"Much experimentation in programming is under way in many institutions and in many localities. Considerable thought has been given to how educational agencies can pool their resources for effective operation. I am sure that educational agencies are ready to meet the time schedule for transmitting and receiving UHF. Some are ready for the immediate use of VHF allocations." FCC reserved a UHF channel for educational use in Detroit.

Similar reports were given for land-grant colleges and state universities. James H. Denison of Michigan State College, another JCET representative, said many "are prepared to file applications for construction permits immediately, and others will not be far behind." MSC was rejected for a VHF channel at East Lansing.

Dr. A. N. Jorgensen, U. of Connecticut president, felt that state universities that have been assigned TV channels "must now move forward as soon as possible."

Earl McGrath, U. S. Commissioner of Education, Office of Education, Federal Security Agency, described the FCC plan as the opening of "a new era" for education. But he warned:

The FCC's decision must be implemented by actual broadcasting operations if its benefits are to be felt in the community. Thus, educators also face a serious challenge this year—a challenge to determine whether they will build and operate these stations, or whether they will allow this invaluable portion of the public domain, the television spectrum, to remain unused and ultimately to be turned to other than educational uses. Clearly then, educators in all of these cities must begin at once to initiate or complete plans for the construction and operation of their own independent television stations.

Dr. I. Keith Tyler, director of radio education at Ohio State U. and a key figure in JCET, said he was pleased that the FCC recognized education's role in TV's development and commended the Commission for its handling of the allocations plan. (OSU was rejected in a bid for a VHF Channel.) He felt that FCC had not solved one of the "most difficult problems," asserting:

Education is now forced to rely upon UHF in some cities which already have so many VHF stations and such a high saturation of VHF receiving sets as to make the educators' task almost hopeless. These cities include New York and Los Angeles as well as Columbus where Ohio State University was prepared to go ahead immediately with an educational television station if the Commission were able to make available a VHF channel. But for most of the nation's cities, the door is now open for educational stations.

Colleges, universities, school systems and other educational institutions must now take up the challenge. They must proceed as rapidly as possible to plan cooperatively in each community the use of these valuable channels. It may take time to explore resources, to educate communities and to marshall the necessary finances, but the time to begin is now.

Elsewhere, educators commended the FCC's educational reservations and felt they opened a new "vista"

(Continued on page 100)

A BULLITT-PROOF PROGRAM

KING-TV President Gives Recipe to IERT

MRS. A. SCOTT BULLITT, KING-TV Seattle president, gave a recipe for an average program at the Ohio State U. Institute for Education by Radio-Television meeting at Columbus Thursday. Speaking during the TV program panel, she gave the recipe as follows:

Take one cup sponsor's requirements and sift gently.

Two tablespoons agency ideas, carefully chilled.

Add one-half dozen staff suggestions, well beaten.

However fresh and flavorful, they will curdle when combined with agency ideas, so they must be beaten till stiff.

Stir together in a smoke-filled room and sprinkle generously with salesmen gimmicks.

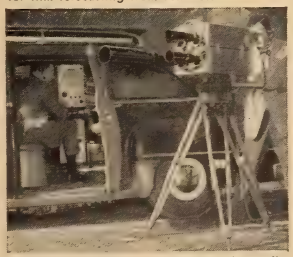
Cover the mixture with a tight lid so that no imagination can get in and no gimmicks can get out, and let stand while the costs increase.

Then take one jigger of talent—domestic will do—flavor with production problems, a pinch of doubt and, if you have any—a dash of hope.

Fold these ingredients carefully together so they can get into a small studio.

This requires a very light touch as the slightest jolt will sour the results.

Be sure to line the pan thoroughly with union regulations or the mixture will stick.



Place in the oven with your fingers crossed. Sometimes it comes out a tasty delicacy, and sometimes it's just cooked.

GPL Equipment goes Cross-Country

Included in cross-country demonstration unit is the GPL Utility Projector, with "3-2" intermittent which permits use with I.O. camera for film telecasting from remotes.

Compact GPL studio camera chain fits easily in station wagon, and may be operated from there, drawing power by cable from studio and returning signal to transmitter.

...to Drive its Story Home!

Stations all over the country will soon be able to see GPL TV equipment in operation right in their own studios. They can compare it with their present equipment, try it for compactness, smooth efficiency, flexibility, operational simplicity, and overall performance quality. Maintenance-minded engineers will examine its swing-up, swing-out panels. Camera and camera control men will note its many new operating features—pushbutton turret control, remoting of focus, turret and iris—all engineered for faster, smoother control.

Be sure *your* station is on the schedule of the GPL Mobile Unit Tour. *See* why network users have said: "Best picture on the air today!" Compare "the industry's leading line—in quality, in design."

Write, wire or phone today, and we'll work your station into our itinerary for earliest possible dates.

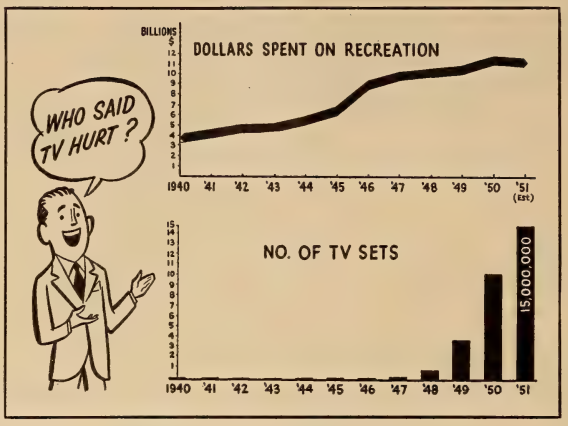
TV AIDS SPORTS



Cooperation Is '52 Keynote

TELEVISION manufacturers, having shown that TV actually helps rather than hurts recreation industries, are preparing to cooperate with professional baseball clubs during the 1952 season.

Cooperation is replacing the hostility once shown by baseball operators, and Radio-Television Mfrs. Assn. will soon launch its drive to boost interest in the sport and to stimulate attendance at the parks. Final plans will be discussed Tuesday at a New York meeting of the RTMA Sports Promotion Subcommittee. Chairman of the group is Dan Halpin, RCA Victor.

The current study of TV's impact on recreation and communications, released by RTMA on the basis of a three-year investigation, bears out the original premise of Jerry Jordan, research specialist, that harmful effects of TV set ownership are confined to the "novelty period" [B•T, April 7]. Mr. Jordan is son of C. E. Jordan, executive vice president of N. W. Ayer & Son, Philadelphia. The agency has continued young Mr. Jordan's research project during his service in the Army.

Glen McDaniel, RTMA president, said the summary of 1951 business in the recreation and communications industries "indicates that Jordan's original theory is working out and that television is becoming a promotion partner, and not a harmful competitor of most recreation."

TV's Impact on Recreation Industries

The new RTMA study shows steady growth for recreation and news industries, one of the fastest growing segments of American industry, of which TV is a part. The tremendous increase in 1950 TV set sales helped boost the total income for that year and the decline in 1951 caused a leveling off for the year.

Five out of eight major other classifications of recreation are running ahead of the pre-TV year 1947, with RTMA describing video as "an addition, not a replacement" in the home. "Opening hundreds of new stations will not change that condition," according to RTMA.

The average TV family can add about four hours of TV a day and not curtail other types of recreation seriously, according to RTMA, because of such factors as largest number of children in history, shorter working hours, modern homes, labor-saving appliances, faster transportation and better organized existance.

"Television simply fills another need for our expanding economy—just as magazines did a few generations ago," says RTMA, adding, "just as the movies, radio and organized sports have done in later years."

As to newspapers, RTMA notes daily newspaper circulation holding close to its all-time 1950 peak, according to the *Ayer Directory*. Reading time hasn't changed noticeably, with sports and entertainment pages "definitely stimulated." On top of that, RTMA finds, newspapers have gained "twice as many dollars in total advertising revenue since 1947 as were spent on all television advertising in 1951." Newspapers in TV markets were found to have only a slight "novelty levelling-out" in 1949.

Magazine Growth

Magazines have grown just twice as fast as population in the last decade, RTMA reminds, with TV families reading as much as non-TV families and all advertising revenue records broken. A 1949 drop was shown during the novelty period but last year "magazines come back strong with a whopping big $70 million gain over the pre-TV year of 1947."

As to broadcasting, RTMA scoffs at prophets who shouted, "Television will take the audience and the income." RTMA quotes BROADCASTING YEARBOOK net income figure of $485.5 million for the aural industry in 1951, an alltime record. "A pretty healthy corpse," RTMA suggests.

Good pictures are drawing well, according to RTMA, with only the mediocre Hollywood films "taking it on the chin." It cites opening of 3,000 new drive-in theatres as against the 2,000 that closed, adding, "about 80 million people a week paid half-a-billion dollars more for movies in 1951 than in 1941." Gains in symphony, ballet and opera attendance has doubled in a decade, it is stated.

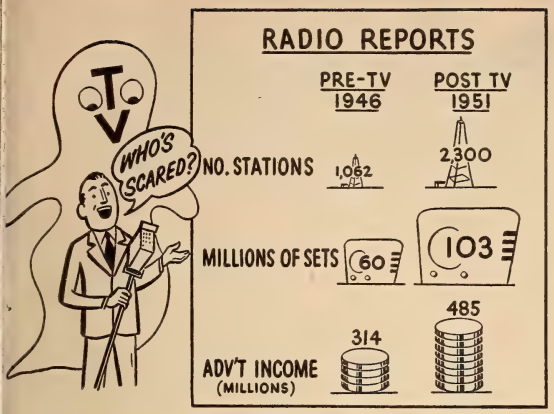
Increase of 200% in spectator sports right after the war and prior to general TV inevitably was influenced as people started buying homes, durable goods and paying big taxes, "regardless of television," according to RTMA.

RTMA recalled the predictions that video would empty sports stadia, terming them "as groundless as the earlier fears that once threatened to bar sports writers from the parks and did ban radio 20 years ago. Sportscasting is paying its way with $6 to $7 in rights fees; educating millions to the thrills of sports and opening enormous possibilities as network and theatre TV expand. Million-dollar gates for big events are coming back, with television fees leading the way to greater stability; more assured income; pension and welfare funds."

Sports Participation

TV hasn't stopped people from participating in "doing" sports, RTMA continues, with dollars spent on participating sports up nearly 10% over 1947 and intramural sports increasing "spectacularly."

As to baseball, RTMA explains that the nine clubs that maintained their regular TV of all games or day games played to increased crowds in 1951 and the seven clubs that cut or eliminated TV had a loss. Major leagues received about $4,562,000 for sportscasting fees in 1951, almost equal to the entire National League gate receipts in 1940, biggest pre-war year, the report says. "Since the lush attendance following the war, paid admission in parks that have televised regularly and consistently have dropped only about half the percentage decline of those which did not televise—or reduced or restricted television," it continues.



Minor league baseball is described as "one unhappy note in the sports picture" but RTMA points out that only about 40 of the 350 clubs are near enough to TV to be affected by it and losses were general in 46 out of 50 leagues. Much of the blame is ascribed to overemphasis of the "major league frame of mind" and such other elements as big-league broadcasts by 1,000 radio stations, stories of national news services and loss of

TV's Impact on Broadcast Income

layers to the military.

The minors can come back if ney are courageous and get help rom the majors, broadcasters and aseball writers, RTMA believes, ontinuing, "And local TV of their wn games may help them to do o, when enough new stations are uilt to spread telecasting over a arger number of teams."

Referring to a 15% loss in male tudent enrollment at colleges, TMA cited National Collegiate thletic Assn. research to show hat colleges in TV areas fared etter in 1951, compared to 1950, han those in non-TV areas. "The ay is not distant when more than ,000 TV stations will offer the pportunity for hundreds of col- eges to build closer contacts with heir alumni, friends and neighbors hrough well-planned television of ootball," in RTMA's opinion.

Professional football is proving hat TV belongs alongside news- apers and radio in building in- erest in a sport confined to a imited number of cities, according o RTMA. Upward turn in racing lso is shown, with TV credited an assist." Boxing, too, is benefiting rom telecasts, RTMA asserts. On he other hand attendance is off n professional hockey and basket- all, where TV has been eliminated n many areas. College basketball, n the other hand, is up 3% despite candals and is still telecast in nany places. Tennis and golf also vere aided, it is claimed.

No Harm to Yanks

"THE only time televising a game hurts the gate is when the weather's bad . . ." George Weiss, president of New York Yankees baseball club, asserted last week at Sports Broadcasters luncheon in New York. Questioned by Bob O'Connor, WOR-TV New York sports director, as to television's usefulness in promotion, Mr. Weiss replied: "It doesn't do us any harm."

TV EDUCATION

Chicago Panel Set

DAVIDSON TAYLOR, NBC vice president, will be one of four featured panel speakers on education and television at the American Council on Education's 35th annual meeting in Chicago May 2-3.

Mr. Taylor will discuss "The Responsibilities of Educational Television on Commercial Stations."

Other panel members include Ralph Steetle, executive director, Joint Committee on Educational Television, who will recall "History of Recent Attempts to Achieve a Working Plan for TV"; Franklin Dunham, who will consider "Advantages and Disadvantages of Alternative Approaches to Educational Television," and George Probst, radio director of the U. of Chicago, whose topic is "Television and Public Service."

Panel chairman will be Rev. Theodore M. Hesburgh, C.S.C., executive vice president, University of Notre Dame. Recorder will be I. Keith Tyler, director of the Institute for Education by Radio-Television. He will summarize the speeches of each of the panel members for delivery to the entire convention Saturday.

MIAMI CABLE 'RACKET'

WTVJ (TV) Fights Swindle

ADVENT of coaxial cable service to Miami, Fla., has inadvertently given rise to a "racket" in which swindlers are collecting "$30 license fee on home television reception of the cable programs." The swindlers represent themselves as tax agents and say that the tax must be paid before July 1.

WTVJ (TV) Miami has carried the story on all of its news programs, cautioning viewers against paying any money to the "tax collectors." In addition, the police and the Better Business Bureau have been notified and an investigation is underway.

RELIGIOUS SHOWS

WOI-TV Has Workshop

REGISTRATION of 50 persons from 10 midwest states is expected for the religious television workshop to be conducted at WOI-TV Ames, Iowa, this week. Richard B. Hull, radio-TV director at Iowa State College, which owns the station, is planning workshop sessions under sponsorship of the TV-radio committee of the Iowa Inter-Church Council.

Seminars will concern program monitoring, general discussions of TV, scripting, production and putting a half-hour show on the air. Rudy Bretz, TV consultant for CBS New York, and Charles Schmitz, educational director of the commission on films, radio and television for the National Council of Churches, are in charge of the program. Panelists will represent state and city councils of churches, pastors, directors of Christian education, laymen, Council of Church women and parent and teacher groups.

Members of the college and station staff will direct several meetings. The Monday evening speaker will be Charles Guggenheim, producer of *The Whole Town's Talking* on WOI-TV, in cooperation with the Fund for Adult Education. Tuesday luncheon speaker will be Ed Wegener, WOI-TV production manager, while the Thursday luncheon address will be given by Merritt Ludwig, project supervisor of the Fund for Adult Education, an independent organization established by the Ford Foundation.

Bill Niethamer

BILL NIETHAMER, WOAI-TV San Antonio staff member, died April 10 of a heart ailment after several months' illness. Mr. Niethamer was with the station for two years as commentator and narrator on local news programs.

ORIGINAL Richard Rodgers musical score for NBC-TV's documentary, *Victory at Sea*, to be seen next fall, has been recorded and filmed by NBC Symphony Orchestra under direction of Robert Russell Bennett.

WOC-TV

HOW TO COOK-UP SALES in the Quint-City Area

"Today's Cooking" — 1:30-2:00 p.m., Monday thru Friday, conducted by capable home economist, Norida Frank—has recipe for increased sales in WOC-TV area. For example, Kaukauna Dairy Company, using three participations weekly, ran 8-week test.

For $1.00, offered viewers link of cheese, cheese grater, simple recipe folder. *Total response to offer was 2,175.*

Cost of this 8-week telecasting, $1,500—for which sponsor received IN EXCESS OF $2,100 *in direct sales to viewers . . . plus direction of* THOUSANDS OF PEOPLE TO GROCERS for *Kaukauna Klub* products.

If you have a product adaptable to home economics type of telecasting, "Today's Cooking" will put it on front burner, *sales-wise.* Get the facts from your nearest F & P man . . . or direct from us.

LES MITCHEL, producer-director CBS Radio *Skippy Hollywood Theatre* from 1946-51, has retained rights to all scripts and plans to act in similar capacity when they are filmed as half-hour TV series, *Guest Star Theatre.*

Space at Churubusco Studios, Mexico City, has been leased and production on first 13 starts June 1 with **Budd Lesser**, Mr. Mitchel's radio script editor, heading the story department for TV version.

Plans call for many of the stars in radio version to appear in the roles they created and list includes **George Brent, Andy** and **Della Russell, Martha Scott, Dane Clark, Caesar Romero** and **Constance Bennett.** Scripts will be filmed two at a time with each star getting salary plus right to use his two films as pilot films on series which may be developed.

TV version will not conflict with the 39 radio scripts which were sold to **Frederic W. Ziv Co.**, Hollywood.

* * *

Bo-Mor Productions, Hollywood, headquartered at General Service Studios, newly formed by **Richard Morley**, formerly executive producer Primrose Productions, that city. Plans call for three half-hour TV film series—a musical, each program complete in itself, a dramatic format and a beauty-charm type show. Another musical TV film series is in offing which will be quarter-hour. **Val Lindberg**, production manager Primrose Productions, will serve with new company in similar capacity.

* * *

George Brent Productions Inc., Hollywood, newly formed by **George Brent**, film actor, and **William B. White**, Hollywood talent agent, to produce 26 half-hour TV film series, *Address — Tangiers*, starting this summer. Film writer, **Robert Blees**, is writing scripts to feature Mr. Brent as owner of a tanker in Tangiers and entrepreneur of numerous shady deals. Tangiers was selected as locale because of dramatic potentialities in this city of no income tax, passports or extradition. Mr. White will produce. Several low-budget feature films are also planned.

* * *

New TV film production company, **National Repertory Theatre**, has been set up in Hollywood by **Arthur Kennedy, Tony Owen**, former executive at Columbia Pictures, **Donald and Jay Hyde**, and **William Koz-**

lenko, who will function as executive story head. Actors **Edward Arnold, Diana Lynn, Akim Tamiroff, Millard Mitchell** and directors **Robert Florey, King Vidor, David Miller** and **Ray Enright** have been signed by the new company for its forthcoming dramatic series. The company will function as a stock company with important motion-picture and stage personalities alternating as stars and supporting players.

First picture, entitled *The Victim*, written by Mr. Kozlenko, features Mr. Kennedy, Mr. Arnold, **Julie Bishop** and **Morris Ankrum.** Second picture, *This Is Villa*, stars Mr. Tamiroff and Mr. Kennedy. Short plays are being lined up by Mr. Kozlenko, who was former editor of *One Act Play Magazine*, for future production. Address is Motion Picture Center, Hollywood.

* * *

Tele-Voz Co., Mexico City, headed by **Miguel Aleman Jr.**, signs **Budd Lesser**, script editor CBS Radio *Skippy Hollywood Theatre* from 1946-51, for similar capacity on half-hour TV film series, *Gloria Swanson Show.* **Edward C. Simmel**, vice-president **Simmel-Meservey TV Productions Inc.**, Beverly Hills, subsidiary, Simmel-Meservey Co., and distributor of series, will direct first four films [B•T, April 7].

* * *

Production . . .

Athena Productions Inc., Hollywood, headquartered at California Studios, plans May production on first of 39 half-hour color TV film series, *Son of Robin Hood*, with **Clifford Sanforth**, president, acting as producer - director. **Howard Laurence Field** is adapting scripts from *Son of Robin Hood* and *Son of Robin Hood in Nottingham*, novels written by **Paul A. Castleton.** Mr. Sanforth was formerly co-producer, with Leonard Picker, on Columbia Pictures' feature film, *Bandit of Sherwood Forest*, which is currently being reissued to theatres.

* * *

Hour Glass Productions, Hollywood, summer production schedule for second 13 quarter-hour TV film series, *Man of Tomorrow*, includes *Ham Radio* in Nebraska, *Basque Sheep Boy* in Idaho and *Page Boy* in Washington.

* * *

Cathedral Films, North Hollywood, Calif., with **Rev. James K. Friedrich**, president, starting new half-hour TV films, *The Christian Life Series*, which relates modern life situations to stories in the Bible. First film, produced by Dr. Friedrich and directed by **John T. Coyle**, is already completed. Company's future production is to be geared for TV as well as church market.

* * *

Pennant Productions Inc., Hollywood, plans new 13 half-hour TV film series, *Fiction Theatre*, to follow current *Date With Destiny* series, initial venture of newly-formed company. Plans resulted from response to newspaper advertising in 12 cities for story ideas.

* * *

Shochiku Film Enterprises Ltd., Tokyo (Japan), plans TV film production. **Kenneth Hirose**, president, is setting up co-production deals with American, British, French and Italian companies and is in Hollywood for business conferences.

* * *

Wilkins-Gooden Productions, Hollywood, completed series of 52 quarter-hour TV films, *Jonathan Story*, to be distributed by **Sterling Television Co. Inc.**, New York. Program is type of serial story.

* * *

Crown Pictures International, Hollywood, plans half-hour TV series of mystery films to be produced in Mexico City, but in English with an American cast. Conferences with Churubusco - Azteca Studios have been arranged by legal firm of Cancina & Reba, retained to represent Crown Pictures International in their Mexican TV plans.

* * *

Sales . . .

CBS-TV *Files of Jeffrey Jones*, being filmed by **Lindsley Parsons Productions**, Hollywood, purchased by following firms: **Crawford Clothes**, Long Island (men's clothing), on WABD (TV) New York, effective June 6; **Pearson Pharmacal Co.**, N. Y., (Ennds Chlorophyll tablets), on KING-TV Seattle, started April 13; **Pittsburgh Brewing Co.**, Pittsburgh, on WDTV (TV) Pittsburgh, from April 18.

* * *

Sarra Inc., Chicago, has completed a series of three 20-second spots featuring **Elgin National Watch Co.'s** Durapower Mainspring. The series, with the theme "The heart that never breaks," was produced with the aid of **Young & Rubicam**, Chicago, and **Joseph Morton** of the radio-TV department.

* * *

Film People . . .

Frank Ferrin, producer CBS-TV *Smilin' Ed McConnell and His Buster Brown Gang*, signs five-year contract with **Brown Shoe Co.**, St. Louis (mfrs. Buster Brown shoes), and **Leo Burnett Co. Inc.**, Chicago, to continue producing series of half-hour TV films and releasing NBC radio taped program of same name. Mr. Ferrin has just completed his first feature film, *Gunga Ram*, and in selling it for theatrical distribution will include TV rights.

* * *

Ward Bond, film actor, signed by **Jerry Fairbanks Productions**, Hollywood, for lead in half-hour TV film, *The McGurk Way*, for **Fruehauf Trailer Co.**, Detroit, which dramatizes development of American transportation.

* * *

Carl Hiecke rejoins **Revue Productions**, Hollywood subsidiary MCA, as production manager on current half-hour TV films for *Chevron Theatre* and *Gruen Guild Theatre.* Included in former's series are "Playmates," "A Mansion for Jimmy," "Meet the Little Woman" and "The Reluctant Burglar."

* * *

Flying A Pictures, Hollywood, signs **Gail Davis**, western film actress and U. of Texas beauty contest winner, to enact lead in *Annie Oakley*, 52 half-hour TV film series. Initial film, *Bull's Eye*, starting April 15 with **Dorothy Yost** as writer, **Wallace Fox** director and **Lou Gray** producer, is expected to be completed by mid-May at which time it will be shown to all advertising agencies simultaneously. Company also produces *Gene Autry* and *Range Rider* TV film series.

* * *

Pennant Productions Inc., Hollywood, signs **Vy Russell** and **Sue Dwiggins**, Hollywood free-lance writing team, to coordinate story material on half-hour TV film series, *Date With Destiny.*

* * *

Peter Coe, film actor, to write and direct *Port of Embarkation*, TV film series packaged by **William Morris Agency**, Hollywood, which is of adventure type laid against background of U. S. Immigration offices.

FOURTH birthday celebration was held for *Man's Best Friend* on KTLA (TV) Los Angeles, sponsored by Kendall Dog Foods Inc., that city. On April 5, many of 2,500 dogs which have been seen on the program were recalled for guest appearances.

CBS-TV CLINIC

Speakers Are Announced

CBS-TV announced this week a list of company officials who will address its TV station operators clinic, scheduled for both radio and television affiliates of CBS [B•T, April 14] after FCC's lifting of the television freeze last week.

CBS-TV President J. L. Van Volkenburg said the clinic will be held May 1-2 at the Waldorf-Astoria in New York, with more than 500 officials expected to attend from the 62 CBS-TV affiliates and 207 CBS Radio outlets.

Designed to aid those planning to enter TV as well as those now in it, the agenda covers such subjects as procedures in applying for television licenses, construction costs, equipment needs, income expectations, programming, sales, research, promotion and publicity.

FCC's lifting of the freeze, Mr. Van Volkenburg said, "marks one of the most historic dates in the progress of mass communications. Within the foreseeable future television will become a nationwide medium bringing news, information and entertainment into added millions of homes from coast to coast. CBS Television welcomes the challenge and opportunities inherent in tomorrow's television."

CBS President Frank Stanton and Mr. Van Volkenburg will head the roster of company officials who will address the clinic.

Other CBS-TV speakers will include Herbert V. Akerberg, vice president in charge of station relations, who will discuss the development of the CBS-TV network and its stations and appraise the future; William B. Lodge, vice president in charge of engineering, on application procedures and TV station coverage; Hubbell Robinson Jr., vice president in charge of programs, on program plans; Fred M. Thrower, vice president in charge of sales, on TV as an advertising medium; A. B. Chamberlain, chief engineer, on TV station costs; John Cowden, director of sales promotion and advertising, on activities in those fields as they relate to a new TV station; David J. Jacobson, director of public relations, on publicity and exploitation on the station level; Oscar Katz, director of research, on the past and probable future growth of the TV market, and Sig Mickelson, director of news and public affairs, on public interest programming.

Additional industry speakers will be designated later, CBS-TV said.

INSPECTING police radio-equipped WTVJ (TV) Miami vehicle are (l to r) Ralph Renick, WTVJ news director; Mitchell Wolfson, WTVJ president, and Police Chief W. E. Headley. Two such WTVJ vehicles cruise city for film coverage of accidents. Films are shown as a public service on WTVJ's You May Be Next.

AFM STANDS PAT

On Old Movie Policy

AMERICAN Federation of Musicians has refused to grant a request of Independent Motion Picture Producers Assn. that AFM President James C. Petrillo send a special committee to Hollywood to renegotiate all policies affecting fees and percentages now demanded by AFM for old movies sold to television.

Refusal is based on the AFM claim there are no negotiating committees in Hollywood and that all such matters are handled by the union in New York. J. E. Chadwick, IMPPA president, had asked for a meeting in Hollywood "where producers reside and where facts are more obtainable" [B•T, April 7].

IMPPA wants AFM to eliminate the demand for 5% of grosses realized from sale of old theatrical movies to TV and revision of its policy on payment to musicians for rescoring those films. IMPPA members met this past weekend to formulate future steps.

VISTASCOPE CORP.

Paramount Buys 50%

A 50% interest in Vistascope Corp. of America has been acquired by Paramount Pictures Inc. from Sol Lesser, president. Firm immediately will set up facilities for marketing the French photographic invention in the U. S. VCA has exclusive license on Vistascope equipment in this country, which will be made available on royalty basis.

The invention permits the use of photographs for motion picture and TV foreground settings to be combined with live action. Equipment is described as able to completely eliminate need for expensive matte shots or construction of foreground sets in live-action films, through use of photographs for these foreground settings, thus effecting a budget saving.

Linked directly with the camera, it makes available for the foreground any structure, group of structures or natural formation which can be lensed in still form. Color as well as black-and-white can be used in the device, it was explained.

KPRC-TV RATES

Cost Per Thousand Drops

ATTRACTIVE bar chart in orange, red and green shows advertisers that KPRC-TV Houston, Tex., circulation will be up 113.4% by Oct. 1, 1952, while the cost for reaching viewers will be down 43.5% per thousand families by the same date.

Basing figures on the increase of TV set sales from 82,000 on July 1, 1951, to 127,500 in the area on March 1, 1952, an increase of 55.4%, station officials say a projection of set sales indicate 175,000 sets will be in use by Oct. 1.

In contrast to the charts showing a jump in KPRC-TV's circulation, other bars show the drop in cost of advertising per 1,000 families as of March 1, 1952, and the expected Oct. 1, 1952, figure.

On July 1, 1951, KPRC-TV's charge per half-hour for each 1,000 families was $3.66, on March 1, 1952, $2.82 and on Oct. 1 is estimated $2.06 for Class A (6-10:30 p.m. daily) time. For Class B per half-hour impression (5-5:59 Monday through Friday, 10:31-midnight daily and noon-5:59 p.m. Saturday and Sunday), rates are indicated as: July 1, 1951, $1.22 per thousand, March 1, 1952, $0.94 and Oct. 1, 1952, $0.69. These same rates apply for Class C minute announcements (from before 5 p.m. Monday through Friday, before noon Saturday and Sunday).

Rates for chain break were $0.98 per thousand on July 1, 1951; $0.75 on March 1, 1952, and are projected at $0.55 for Oct. 1.

EDDIE CANTOR, star of NBC-TV *Colgate Comedy Hour*, will begin a six city tour for American National Red Cross blood compaign on April 29.

PROGRAM PROBE

Rep. Gathings Still Wants

REP. A. C. GATHINGS (D-Ark.) wants a probe of radio and television programs no matter what committee may be assigned the task.

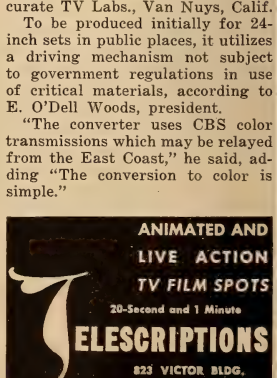
The Congressman in effect said this in a statement April 10 in which he asked the House Interstate & Foreign Commerce Committee to do the job.

It was this particular committee which stepped into the picture a few weeks ago to stop a resolution introduced by Rep. Gathings and given clearance by the House Rules Committee [B•T, April 7]. The resolution would have set up a select committee to investigate not only radio-TV but also other media channels, namely comic books, pocket-size books and magazines. It was aimed at "immoral and offensive" matter.

Rep. Gathings noted in his statement that the Congress already has on tap a long-pending resolution that he introduced a year ago which would direct the House Commerce Committee to investigate radio-TV programs.

Under prodding by the commerce group and by the House leadership, Rep. Gathings dropped radio-TV from his proposed investigation and study of the various media by a select committee. According to the Congressman, it is immaterial to him who does the radio-TV investigation, whether it be a select committee or the Interstate & Foreign Commerce group.

In his statement, the Congressman asserted he doubted whether the NARTB TV code "will work out as successfully as intended. A thorough study of the types of programs that are put on the air indicates that crime must pay in that the networks and individual stations persist in using crime programs."



NEW COLOR CONVERTER

Accurate TV Labs. Announces

A NEW prismatic color converter which fits on face of the picture tube has been developed by Accurate TV Labs., Van Nuys, Calif.

To be produced initially for 24-inch sets in public places, it utilizes a driving mechanism not subject to government regulations in use of critical materials, according to E. O'Dell Woods, president.

"The converter uses CBS color transmissions which may be relayed from the East Coast," he said, adding "The conversion to color is simple."

AUTRY-REPUBLIC

Final Briefs Filed

FINAL briefs have been filed in federal court, Los Angeles, in suit of Gene Autry to prevent Republic Pictures and its subsidiary Hollywood Television Service, from releasing any of the cowboy actor's old western movies to television.

Mr. Autry maintains his contract with Republic reserved even more rights than that of Roy Rogers who won a similar suit against the film studio several months ago. Republic, however, allegedly considers it has right to do anything it desires in the way of releasing those films.

The court has 30 days in which to render its final opinion. However, there is a possibility that its decision might await decision on Republic's appeal in the Roy Rogers suit.

CBC TV POLICIES

Dunton to Divulge April 30

CANADIAN BROADCASTING Corp. policies on commercial television are to be announced on April 30 at Toronto by CBC Chairman Davidson Dunton. He will speak at a television forum of the 37th annual meeting of the Assn. of Canadian Advertisers.

The policy statement will be the outcome of a number of meetings with CBC by members of the ACA and the Canadian Assn. of Advertising Agencies held at Toronto in recent months.

While no official statement has been made on CBC policy on commercial TV, it is understood that slightly more than half the programs to be telecast will be available for commercial sponsorship, with CBC retaining full control of program content and production.

Rates unofficially are expected to be quite high on a basis of number of sets in Toronto and Montreal areas, somewhere in the neighborhood of six TV homes for each advertising dollar. This will drop as there are more sets sold.

Mr. Dunton's statement will come during the afternoon session of the first day of the ACA annual meeting, being held at the Royal York Hotel, Toronto, April 30-May 2.

The TV forum panel will include in addition to Mr. Dunton, Mrs. Harriet Moore, director of psychological services, Social Research Inc., Chicago, and L. L. Cromien, Peterson Productions, Toronto.

At the May 1 afternoon radio session, Mark Napier, chairman of Canadian Advertising Research Foundation and vice president and managing director of J. Walter Thompson Co., Toronto, will discuss "More things advertisers want to know." Market research will be topic of a panel forum that afternoon, with participants being T. G. MacGowan, Firestone Tire & Rubber Co., Akron, Ohio; Abe Hackman, Macy's Inc., New York; and Dr. O. J. Firestone, economic adviser of the Dept. of Trade and Commerce, Ottawa.

FOOTBALL SUIT

Judge Grim Sets June 16 As Date for Trial

TRIAL DATE for the government suit against the National Football League, charging violation of the Sherman Anti-Trust Act through a radio and television "blackout" of the league's games, has been set for June 16 by Judge Allan K. Grim in U. S. District Court, Philadelphia.

Judge Grim set the trial date after granting, with restrictions, a request by NFL for names of persons to be produced as witnesses by the government and for access to documents to be introduced as evidence by the Attorney General's office.

The government charged last fall that the NFL was violating the act by restricting radio broadcasts and telecasts of its games [B•T, Oct. 15, 1951]. After hearing argument on NFL petition Jan. 8 to throw the case out, Judge Grim ordered a hearing and gave the league 45 days to reply to the government charge [B•T, Jan. 14]. The league declared Feb. 23 that it is not engaged in interstate commerce or trade as defined in the Anti-Trust Act and therefore, is not violating the act by restricting radio broadcasts and telecasts [B•T, March 3].

Judge Grim first denied the league counsel's original motion for access to all federal documents concerning the prosecution, saying "all the information would not be relevant," after the Attorney General's office had filed an answer to the NFL motion for the data, insisting that the information was "privileged."

The federal judge's restricting proviso in his acquiesence to the defense counsel's reduced demands was that persons volunteering information leading to the prosecution would not be identified. Persons who did not wish the NFL to have knowledge of their statements also would have their wishes respected, according to a further proviso.

NFL co-counsel, former Sen. Francis J. Myers (D-Pa.) hinted in court argument that the government made only a superficial investigation before filing suit. "They are on a fishing expedition to get evidence to prosecute the National Football League," he said.

Assistant U. S. Attorney W. Perry Epps said that granting the NFL demand for all documents would be burdensome, since the defense counsel had, among other things, asked for the schedules of the many radio and television stations affected by being blacklisted from broadcasting games.

Mr. Myers replied that granting the league's demands "would not be burdensome to the government, but it is vitally important to the NFL in their case to know if any of the stations had time available at the time of the games, or if they had contracts with sponsors which could not be cancelled."

Judge Grim set May 22 as a date for pre-trial conference with NFL and government attorneys.

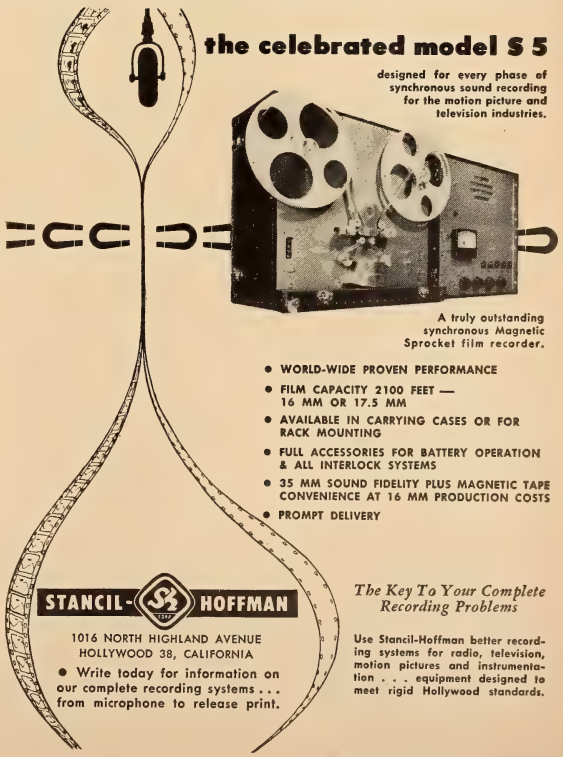
TV'S MOVIE EFFECT

Exaggerated, Balaban Says

LONG-RUN effect of television on movies has been "exaggerated," according to John Balaban, president of Balaban & Katz Corp., Chicago, which owns a chain of movie houses and WBKB (TV) there. Mr. Balaban, who believes movie-goers merely have become more selective in their tastes, reported to B & K stockholders at a meeting in Chicago Tuesday.

He said TV profits this year would be about the same as last, $850,000, or more than half the total company net of $1,646,637. WBKB netted about $300,000 in 1950. Theatre profits were down from 1950, he reported. The company's $1,646,637 net income for the fiscal year ending Dec. 29 equalled $6.28 per share, a drop from $2,175,354 and $8.28 per share from the previous year. Dividends last year were $6 per share, compared with $7.25 in 1950.

Tiny TV Set



A TINY television set with a one-inch screen was put on display at an exhibition in Birmingham, England, by a manufacturer as an advertising novelty. The manufacturer said that the miniature set cost $1,540 to make.

FORD FOUNDATION

Reports on TV Value

TELEVISION is "an influence of the greatest importance" in the opinion of the Ford Foundation's Fund for Adult Education, Foundation President Paul G. Hoffman said in an annual report April 11. Fund administers the foundation's Television-Radio Workshop under a $1.2 million grant and also received $3.6 million in grants for other adult educational projects in 1951.

Of the $1.2 million grant for the Television-Radio Workshop last year, $325,000 had been paid as of Dec. 31. Total grants approved by Foundation in 1951 amounted to $22,331,736, of which $12,005,559 was actually paid during year. These payments plus $18,057,000 paid in 1951 on grants approved in 1950 brought last year's total payments to $30,062,559.

Our Respects To

(Continued from page 54)

was dodging torpedoes aboard an East Coast oil tanker. With prospects of an immediate transfer to special duty with Royal Air Force in the British Isles, he accepted a direct commission in the U. S. Army Signal Corps.

Shortly afterward he was in East Anglia as technical officer in charge of a million-watt radar station, observing operations of Hitler's Luftwaffe. A year later in London, 1st Lieut. John Poole's budding Army career was nipped by an attack of spinal meningitis.

The 25-year-old officer, who was flown home, didn't travel alone. Olivia de Reya, assistant to the publicity director of J. Arthur Rank's Two Cities Film, and a frequent hospital visitor, found herself cheering one soldier in particular. She decided to make it a lifetime job and became Mrs. John Hudson Poole on July 3, 1943.

A week later they flew back to the States. After six months' convalescence, Mr. Poole returned to active service and spent two years more with the Signal Corps. Upon discharge, he joined his wife and established their home in Southern California. The Pooles, who now include Anthony Francis 8, Peter Allen 4, and John H. Jr. 1½, make their home today at Corona Del Mar, Calif. near Laguna.

Mr. Poole took over active management of mining and oil interests previously handled by his father up to time of his death during the war years.

In 1947, Mr. Poole purchased AM station KSMA and KRJM (FM) Santa Maria, Calif. He combined the two into one profitable operation. Characteristically, he uncovered a far more desirable frequency for his stations shortly after taking over. He feels his technical ability paid off when KSMA was switched from the high end to central spot on the Santa Maria radio dial. About this time the FCC approved commercial broadcasting of facsimile. Within a few months enterprising Mr. Poole had the FM part of his operations sending out facsimile transmission to a number of experimental receivers.

Early in 1948, when inadequacies of the then-existent 13 VHF television channels were just becoming apparent, he obtained an FCC construction permit to build a UHF experimental TV station atop Signal Hill, overlooking Long Beach.

Initial experiments were made with a picture transmitter designed and built by himself and two ex-Army radio men. They demonstrated that there was reasonable chance of successful operations in the UHF region. He then set to work developing more powerful equipment in conjunction with Stanford Research Institute and R.E.L. Company of New York.

By 1950, KM2XAZ was operating up to 40 hours per week, radiating standard TV signals on the ultra high frequencies, and Mr. Poole could be seen almost anytime riding around Long Beach in a station wagon, fully equipped to make reception tests under all conceivable conditions.

Reaffirms Faith in UHF

By this time Mr. Poole says, he was thoroughly convinced UHF was to play a great future role, although most of the industry claimed the obstacles appeared insurmountable.

In an appearance before the FCC, Mr. Poole restated his faith that high radiated powers in the order of 200 kilowatts would be available before many years, and that other UHF equipment would be developed rapidly if an allocations policy providing incentive were adopted.

Never one to fear a fight, he opposed ABC, CBS, Allen B. DuMont Laboratories and a long list of others in upholding the issue of VHF-UHF intermixture, pointing out that four-fifths of America's available TV channels are in UHF.

Mr. Poole feared that this great segment of the telecasting frequencies would be crippled at birth if barred from use in the principal markets of the United States.

With Long Beach TV tests completed, Mr. Poole applied for authority to move KM2XAZ intact to Mt. Wilson so they could be continued over much longer distances. Early last fall, he bought the transmitter building occupied by KFMV (FM) Hollywood on Mt. Wilson. He leased a portion back to Harry Maizlish, head of KFMV (FM) for its continued operation. Rest of building was for KM2XAZ. By February the transfer was completed and the UHF television station now is undergoing initial tests from its new mile-high vantage point.

By no means forgetting AM radio, Mr. Poole in 1950 bought former facilities of KWKW Pasadena when station moved to a new location and frequency. With FCC sanction, he set up 1000 watt KALI Pasadena, on 1430 kc, which started operating Feb. 16 that year. He shared honors of the day with birth of his third son, John Jr.

KALI well launched, Mr. Poole sold his Santa Maria properties. Then he filed FCC application for the 740 kc channel.

Island Advantages

It was at this time that his experience transmitting from ships far at sea made him realize that Santa Catalina Island, always visible from the windows of his home, was the natural spot to locate a powerful regional radio station. Mr. Poole was granted his FCC construction permit in April last year on condition he dispose of KALI.

A 1000-watt transmitter was installed for tests and measurements were made throughout Southern California. He declares they revealed a coverage which makes the KBIG call letters a must.

Mr. Poole's life at present is occupied by shuttling between a Long Beach office, where he conducts his mining, oil and securities business; Los Angeles financial district; and new KBIG Hollywood studios and executive offices at 6540 Sunset Blvd., with side trips to Catalina Island and Mt. Wilson.

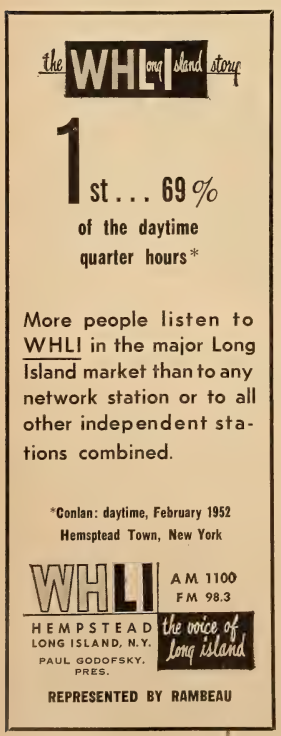
His stock market dealings have been strongly influenced by his radio operations. Mr. Poole likes to say that money which is building KBIG literally comes from television. He made a killing in the market after buying TV shares heavily in the early days.

He believes the revolution brought about by radio and TV is just getting off to a fair start. Mr. Poole likes to look to a future when there will be a KBIG-AM-TV-FM-FACSIMILE and perhaps something else as yet undreamed of.

It looks as though John Poole is well started toward realizing his dream of the future. However, the early May inaugural program of KBIG in both Avalon and Hollywood studios, thrilling as it may be, will have to take a back seat to a more intimate milestone. For that's exactly the time the family doctor predicts arrival of another Poole dual acquisition: Twins!

CANADIAN TOP TEN

Four Local Shows Place



AGAIN in March, four Canadian evening network shows are among the ten most popular, according to the national rating report of Elliott-Haynes Ltd., Toronto. The ten leaders, with ratings, are: *Charlie McCarthy* 32.8, *Radio Theatre* 31, *Amos 'n' Andy* 29.9, *Our Miss Brooks* 27.5, *Ford Theatre* 20.7 (Canadian), *Great Gildersleeve* 19.8, *Share the Wealth* 19 (Canadian), *Your Host* 19 (Canadian), *NHL Hockey* 18.9 (Canadian), and *Suspense* 18.8.

Daytime, one out of five leading shows was Canadian. They were: *Big Sister* 19.2, *Ma Perkins* 17.6, *Happy Gang* 17.2 (Canadian), *Road of Life* 16.9, and *Pepper Young's Family* 16.1.

French-language evening leading shows were: *Un Homme et Son Peche* 39.3, *Radio Carabin* 34.9, *Metropole* 30.7. *Jouez Double* 27.4, and *Theatre Ford* 25.7. Daytime French leading five shows were: *Jeunesse Doree* 31.5, *Rue Principale* 29.7.

FM Tower Topples

DAMAGE of $15,000 resulted when 65-miles-an-hour winds toppled the 420-foot FM tower belonging to WLAN Lancaster, Pa., on April 5. Frank H. Altdoerffer, WLAN owner and general manager, said the tower, unused for some time, was covered by insurance.

programs promotion premiums

MERCHANTS in Oskaloosa, Iowa, reported largest sales day last week since Christmas as result of "Radio Sale Day" launched by KBOE there. Many retailers took part by lowering prices on several items and advertising them only on radio. Station furnished banners for window displays and promoted the event for 10 days on the air. Success was so great, station reports, that plans are now being made to make "Radio Sale Day" a semi-annual attraction.

WKNE BEGINS PUBLICATION

AS additional feature of its promotion campaign, WKNE Keene, N. H., last week began publication of *WKNE Time*, monthly magazine with pictures and stories of both local and CBS Radio stars. Also included are a column for the younger set, a recipe section for the ladies and short articles on the commercial and technical aspects of radio for the men.

COLLEGE WRITERS WANTED

TALENTED college writers will be given a chance to demonstrate their capabilities at KPRC-TV Houston. New program idea has been developed by Burt Mitchell, station's program director, to make local TV shows possible. Letters have been sent to 26 universities inviting their radio-TV departments to submit their best 30 minute scripts written expressly for TV. Houston dramatic groups will present the scripts on KPRC-TV.

WOKE AIRS HOUSING FORUM

ON-THE-AIR housing forum designed to answer all questions from listeners regarding proposed sale of houses and land in Oak Ridge, Tenn., owned entirely by the U. S. government, was broadcast recently by WOKE there. Forum consisted of two panels. One group was made up of citizens who asked questions of those on the other panel who were officials of the Atomic Energy Commission. Queries were phoned in by listeners. Program lasted nearly two hours with enough additional questions to have kept it on the air an additional hour if time had been available, station reported.

WIP IN EASTER PARADE

EASTER finery was utilized by WIP Philadelphia during holiday festivities in that city. At annual Easter parade, station tied in Capitol Records new release of score of "With a Song in My Heart." Four models promenaded on Rittenhouse Square carrying portable radios and twirling umbrellas lettered with "You're listening to the Capitol release 'With a Song in My Heart' broadcast by WIP—610 on the dial."

EARTHQUAKE COVERAGE

NEWS of the earthquake which shook six states April 9 was aired by KOMA Oklahoma City instantly, station reports, when program director, Bob Eastman cut all programs off the air and announced that the earthquake was occurring. His convictions, based on the shuddering of the building which houses the station, were confirmed by a conversation with the Weather Bureau which was broadcast by Mr. Eastman in his flash announcement. Station continued to broadcast information gathered from other points effected by the earthquake.

FARM SERVICE REPORT

SUMMARY and report has been completed by KPRC-TV Houston on its farm television services from Oct. 1, 1951, through March 31, 1952, Bill McDougall, radio-TV farm and garden director, announced last week. The farm schedule, inaugurated last Oct. 1, lists programs and services to agricultural interests by KPRC-TV in cooperation with colleges and universities, county agents, Houston Chamber of Commerce, rural youth organizations, milk interests, co-ops, farm bureaus, soil conservationists, cattlemen's groups, U. S. Production-Marketing Administration and other organizations.

SCHOOL FORUM

ROUNDTABLE discussions on current affairs comprise format of *The Interschool Forum*, new weekly half-hour program on WBRY Waterbury, Conn. Forum features students from public and private schools in area. Series, now in its fourth year, will run six weeks. Roland W. Tyler, debate director at Taft School and member of State House of Representatives, directs program.

BAND SPONSORED

STATE U. of Iowa band was aired by KCIM Carroll, Iowa, on commercial basis for the first time in history, station reports. School officials granted permission for sponsorship by Manning Creamery Co. after approving broadcast code for band. Provisions were band director could delete unsuitable portions of broadcast, university approve sponsor and that KCIM accept sole responsibility for copyrights and licenses of music performed. Both school and sponsor were happy with arrangement, station reports.

WAAM COVERS FIRE

SCOOP was scored in TV circles in Baltimore by WAAM (TV) there, according to station reports. Live telecast fortnight ago of a million dollar six alarm fire was handled by the station which is located one half mile from where the fire occurred. Cameras were mounted on the WAAM roof. First pictures of the blaze which began at 5:35 p.m. were on television screens on Channel 13 at 6:02 p.m. Total of 58 minutes of fire coverage was televised by the station during a two hour period.

STUDENTS SEE CANDIDATES

PUBLIC, parochial and private school students in the Philadelphia area will see *Presidential Timber*, telecast each Friday, 10:30-11 p.m. EST on CBS-TV. Special daytime schedule has been arranged by WCAU-TV Philadelphia so that children in history and social studies classes may see and hear Presidential candidates.

COVERAGE TESTIMONY

REPORT attesting to wide listening audience claimed by WLW Cincinnati has been received by the station. It was stated that because of mentions on WLW programs, a disabled war veteran received over 10,000 letters. Paul Jones, announcer, and Lee Jones, singer at the station, both broadcast soldier's name and address and letters began arriving from nearly every state in the union.

"SNEAK PREVIEW" MEETING

MORE than 30 driver-salesmen of Blue Ribbon Cake Co., Wilkes-Barre, Pa., met in WIP Philadelphia studios last week to attend "sneak preview" of *I Was a Communist for the FBI* which company will sponsor on that station. Sales strategy for Blue Ribbon products in the Philadelphia area was outlined for salesmen who were present so that "every man will know which products we're pushing and what he should stock."

WGAR REPORTS SCOOP

SCOOP was scored by Jim Martin, news editor, WGAR Cleveland, station reports, when he hopped a plane fortnight ago, flew to New York and climbed on board a troop ship arriving at Staten Island to welcome northern Ohio personnel arriving on troop ship. Mr. Martin tape recorded interviews, returned to Cleveland and broadcast the event the same night.

KDAL PLAYS HOST

IN attempt to acquaint 700 local school teachers with the mechanics of business in relation to education, KDAL Duluth cooperated with 63 business firms in the city a short time ago for a "Business-Education Day." Teachers visited the station to hear talks by members of all departments and attended luncheon where KDAL executives were hosts.

SUNDAY SCHOOL SERIES

SERIES of programs, *Sunday School With Uncle Bob*, has been inaugurated at KEX Portland, Ore. Bob Amsberry, station m.c., has turned teacher for weekly show designed for shut-ins who are unable to attend regular church classes.

NEWSPAPERS

FCC Policy Discussed

NOW that the House version of the McFarland bill (S 658) would provide that FCC could not discriminate against a newspaper applicant for a broadcast facility, at least one newspaper is happy.

The House Interstate & Foreign Commerce Committee's re-worked McFarland Bill was released officially a fortnight ago [B•T, April 14].

The section on newspapers is designed to prohibit alleged FCC policy of favoring a non-newspaper applicant over the newspaper applicant "all other factors being equal."

The McFarland bill would modernize the functions of the FCC. Under pressure from newspaper interests, the House committee inserted its new section on newspapers.

Plaudit was given the committee by the *Hartford* (Conn.) *Times* (WTHT Hartford) in an editorial printed early in April. It was reprinted in the *Congressional Record* April 10 by Rep. Antoni N. Sadlak (R-Conn.).

According to the *Times*, "We believe the unsoundness of such discrimination against newspapers has long since been proved by the high standards maintained by newspaper-owned radio stations. We think our own operation of Station WTHT is a case in point. . . .

"Ever since the invention of radio, the broadcasting of news has been a great public service. Radio is the fastest reporter in the world. Largely because of the interest of newspapers, and newspaper-supported agencies like the various press associations, radio news has become more and more accurate and has been more and more intelligently presented. The same beneficial processes will operate in the field of television unless a doctrinaire policy is permitted to intervene. The House version of the McFarland bill would keep radio and television open to newspapers on an equal basis with others. In the interest of fairness and public service we believe that to be good public policy."

MILLER'S Furniture Store, Harrisburg, Pa., signs for sponsorship on WHGB there of Martin Agronsky, ABC commentator, Mon. through Sat., and ABC's *America's Town Meeting*, 9-9:45 p.m. Tuesday. Present are (l to r) Carl Patton Jr., Miller's adv. mgr.; John Shearer, WHGB acct. exec.; Mr. Agronsky; Allen Solada, WHGB coml. mgr., and Jack Hooper, WHGB sta. mgr.

ATLANTIC Refining Co. and Philco sign to sponsor full Cleveland Indian schedule over WERC Cleveland. At signing are (seated, l to r) Ed Young, pres., Young Bros. Electronics, Philco distributor for northwestern Pennsylvania; Harry Burkett, Atlantic Refining dist. mgr.; Leonard Neiderritter, pres., Leonard Neiderritter Co., and Charles E. Denny, WERC gen. mgr.; (standing l to r) Earl Chaffee, Chaffee Tire Co., Art Ingram, WERC coml. mgr.

WJR BUILDING

Hinges on Zoning Bid

PETITION by WJR Detroit has asked the city's common council to rezone an area on the Detroit River to permit the station to erect a three-story television-broadcasting building. Preliminary hearing has been held in discussion form only and the council not indicating when it will decide on the case.

The proposed building, planned as an adjunct to WJR's present quarters in the Fisher Bldg., would be on property in the city's river front development area. Property runs 173 ft. in width along Jefferson Ave. and back 900 ft. to the river.

A city plan commission staff report stated that "this area was designated for multiple dwelling use in the master plan on the basis that recreational and residential developments would permit enjoyment of the river front by the greatest number of people.

AMERICAN LEGION SHOW

Air Power Programs Set

AMERICAN LEGION has prepared a new series of programs concerning U. S. air power. First of the programs is set for the week of April 28 and will feature a roundtable discussion led by Secretary of the Air Force Thomas K. Finletter.

First program is to be a half-hour. Subsequent programs of 15 minutes duration are to be sent out at two-week intervals. Radio stations desiring these broadcasts may obtain them by writing to the Public Relations Div., American Legion, 1608 K St., N. W., Washington, D. C.

Union Rejected

WITH 19 "no union" votes cast, two AFL affiliates lost their unionization campaign of employes at Capitol Records Inc., Hollywood, a NLRB tally just released reveals. The employes constitute the thirty-third small-shop group in the Los Angeles area to reject unionization by way of NLRB-conducted elections since Jan. 1, it was said.

New Business

(Continued from page 14)

names Al Carmona Adv., Hollywood. Radio-TV will be used.

FREEWAX Corp., Tallahassee, Fla., names Liller-Neal-Battle, Atlanta, to handle new product, Freewax. **C. K. LILLER** is account executive.

BURGK & NELSON, S. F. (clothiers), appoints Ad Fried Adv., Oakland, to promote new Oakland store. Radio and TV are being used.

Adpeople • • •

C. W. COOK, product manager for Instant Maxwell House Coffee, named sales and advertising manager of Maxwell House division, General Foods.

ROBERT H. DILLER, former news editor, WIND Chicago, to Austin-Western Co., Aurora, Ill. (construction equipment), as assistant advertising and sales promotion manager.

DONALD B. DOUGLAS resigns as vice president in charge of advertising for Quaker Oats Co., Chicago, but continues as board member.

RALPH FOOTE, advertising manager, Beech-Nut Packing Co., Canajoharie, N. Y., retires effective July 1 but will continue as advertising consultant to company.

JOSEPH J. MERLO resigns as advertising-sales promotion manager, Payne Furnace Div. of Gas Equipment Inc., Monrovia, Calif.

BAB EXPANSION

Seeks Chicago Manager

BAB PLANS for opening a Chicago office and the addition of several promotion and research specialists to the New York staff were announced last week.

President William B. Ryan said a search for a manager for the Chicago branch is now in progress and that its success will largely determine the date when the new office will be opened. The Chicago manager's primary duty will be to make personal presentations to national advertisers and agencies in behalf of radio advertising.

For the managership, BAB is looking for "a seasoned radio promotion man with sales know-how." Additionally, "a person of similar capacity" is to be added to the New York staff, along with a number of research and promotion specialists to expand BAB services at both national and local levels.

"The present staff has been making presentations to national advertisers, chain store heads and ad agencies at the rate of approximately 30 a month," Mr. Ryan reported, adding that "This is to be stepped up to at least 90 such presentations a month."

He also said that several new research projects will be launched shortly, requiring additional supervisory and exploitation personnel.

To Address JLA

TWO broadcasting representatives —Robert K. Richards, NARTB director of public affairs, and Jack Rayel, NBC supervisor of TV package program sales—will speak at the 1952 conference of the Assn. of Junior Leagues of America to be held early this week at the Lake Placid Club, Essex County, N. Y. Mr. Rayel is to appear at a radio-television workshop today (Monday) where members of the 177 Junior Leagues will discuss their educational-entertainment programs, broadcast mostly to children. Mr. Richards is to speak Wednesday night.

REASON WHY

People in Kansas and adjoining states depend on farming for a living. That's why we've programmed to their needs for 25 years. And it's why they buy WIBW-advertised goods.

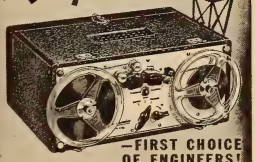
LABOR POLICY

RCA Tells of Record

RCA is proud of its "outstanding record" on fair employe practices and maintains a steadfast policy of no discrimination in all its activities at government, military and civilian levels, RCA President Frank M. Folsom told a Senate subcommittee last Wednesday.

Mr. Folsom testified before a Senate Labor and Public Welfare subcommittee looking into labor-management relations in connection with fair employment practices legislation. Hearings were held on the two bills (S 55, 1732), authored by Sens. Hubert H. Humphrey (D-Minn.) and Irving Ives (R-N. Y.), members of the full committee.

The RCA president noted that RCA "has long been a leader in establishing progressive employment practices" and that Brig. Gen. David Sarnoff, RCA board chairman, displayed leadership in reaffirming company policy since 1919.



It also was explained that Negroes hold such NBC job titles as director of community affairs, senior staff writer, accountant, studio engineer, announcer and others. Employment opportunities for Negroes at RCA Victor also were cited by Mr. Folsom.

Original employment by RCA, or by any of its divisions and subsidiaries, is based on the applicant's fitness and suitability for the work to be done. Job retention and promotion to greater responsibility are based on the same credentials, plus the worker's record of performance, Mr. Folsom stated. As a result, he added, such a policy has produced gains for minority-group workers.

System and also re current changes in staff of WTOD, and record closed.

GIFT TO MIT

'RCA-Clark Radioana'

RADIO RECORDS documenting more than 50 years of wireless pioneering and development—equivalent, in books, to some 5,000 volumes—were presented to the Massachusetts Institute of Technology for its library by RCA last Wednesday.

The historical records, known as the "RCA-Clark Collection of Radioana," were amassed during his radio career by George H. Clark, MIT class of 1903 and, until his retirement in 1946, a member of RCA. It was presented to MIT President James R. Killian Jr. by Dr. Charles B. Jolliffe, vice president and technical director of RCA.

Referring to the MIT Library of Industrial Development, Dr. Jolliffe said in his presentation speech, "We here today cannot see with certainty all of the uses which this special library will have. But we can feel quite confident that scholars of the future, as they read through the yellowing pages of these documents, will be grateful for the foresight which brought this project into being."

The RCA-Clark Collection contains correspondence files of early radio companies, photographs, blueprints, specifications, research reports, records of litigation, log books, unpublished biographies of radio pioneers and scrapbooks of newspaper clippings tracing the growth of the radio industry, with emphasis on the 1900-1935 period.

WLW-Albers Pact

CROSLEY Broadcasting Corp., operator of WLW Cincinnati, WLWT (TV) Cincinnati, WLWD (TV) Dayton and WLWC (TV) Columbus, has arranged a year-long merchandising-promotion plan with Albers Super Markets Inc., 65-store midwest grocery chain. The stations will receive three displays each week in each store. In addition, the food firm will use a series of daily spots on the TV stations.

'COURIER'

Shares WLAC Nashville Frequency on Cruise

THE STATE Dept. currently is using the U. S. domestic frequency of 1510 kc to test its ship-borne relay station, the USCG *Courier*, now anchored in the Panama Canal Zone, it was revealed last week.

Before the *Courier* departed for South America on its projected shakedown cruise, State Dept. officials conferred with executives of WLAC Nashville, Tenn., a Class I-B 50 kw outlet operating on the Mexican clear channel, on a plan to share this frequency during the period April 10-28.

The arrangement, while not a legal necessity to permit the floating VOA relay transmitter to test its equipment, drew the wholehearted cooperation of the Nashville station, which praised the effort to pierce the armor of the Iron Curtain countries.

Both WLAC and the State Dept. acknowledged the agreement last week. It was understood that only the 1510 kc frequency would be involved in the tests and that the other signal stations on that channel—WMEX Boston, a 5 kw Class II outlet and KGA Spokane, Wash., a 50 kw Class I-B station—would not be disturbed.

The VOA vessel recently has "guested" on frequencies borrowed from Colombia, Venezuela and Panama proper. and early next May will conduct similar experiments at Vera Cruz in Mexico before heading out across the Atlantic to foreign countries. At no time, however, will it broadcast from the high seas in violation of the Atlantic City 1947 telecommunications convention [B•T, April 7]. The Voice ship will use frequencies under agreement with countries at whose ports it may anchor.

The 1510 frequency was chosen by the State Dept. because it is "less likely to disturb" local U. S. radio signals than other channels, it was explained. In the case of WLAC, only the station's secondary area coverage is affected to any degree.

According to Antonio Micocci, assistant administrator for the State Dept.'s broadcasting service, Spokane and Boston reception would not be affected and consequently KGA and WMEX were not consulted in advance.

Mr. Micocci conferred with J. T. Ward, owner, and F. C. Sowell, manager, of the Nashville 50 kw station, and got their ready acceptance of the plan which calls for *Courier* power reduction from 150 kw to 50 kw during the test period. The State Dept. official lauded the station for its cooperation. The full 150 kw is being utilized only during "off hours."

Under the agreement, the anchored Voice station closes each day's tests with a courtesy announcement advising listeners of WLAC's cooperation. (VOA programs are being piped to Latin America in Spanish.) In return, WLAC indicated it may air announcements advising listeners they are "eavesdropping on the Voice of America."

Mr. Sowell announced that the arrangement will "serve to materially increase our station's listening audience in Latin America." Mr. Micocci advised Mr. Sowell that WLAC is "free" to inform its listeners of this form of cooperation with VOA.

Docket Actions . . .

FINAL DECISIONS

WJBK Detroit—The Fort Industry Co. FCC granted CP to change frequency from 1490 kc, 250 w, fulltime, to 1500 kc, 10 kw day, 5 kw night, DA-DN, and change in transmitter location; engineering conditions. Announced April 16.

WABJ Adrian, Mich.—James Gerity Jr. FCC granted CP to change frequency and hours of operation from 1500 kc, 250 w daytime, to 1490 kc, 250 w fulltime; condition. Announced April 16.

WMRN Marion, Ohio — The Marion Bestg. Co. FCC granted CP to install new antenna, mount FM antenna on AM tower and install new ground system, with present frequency of 1490 kc and 250 w fulltime; condition. Announced April 16.

[Each of the above three actions was dependent and contingent on the other two.]

Non-Docket Actions . . .

ORDER

WHIL Medford, Mass.—Conant Bestg. Co. FCC terminated program tests on 1540 kc, 250 w day, effective April 25 (when authority expires) and granted application for special service authorization to operate on 1430 kc, 250 w day, for 30 days from April 26 or until modification of CP granted, whichever is sooner, provided that no protest or petition against 1430 kc operation is made prior to April 25. Order April 17.

New Applications . . .

TV APPLICATIONS

Chicago, Ill.—WHFC Inc., UHF Ch. 25 (536-542 mc), 200 kw visual, 100 kw aural, antenna height above average terrain 564 ft. (above ground 589 ft.). Estimated construction cost $304,300, first year operating cost $125,000, revenue $175,000. Applicant is licensee of WHFC and WEHS (FM). President of WHFC Inc. is Richard W. Hoffman who holds 302 shares (75.5%); Mr. Hoffman is vice president and 33⅓% stockholder of M. V. Klich Printing Co., owns 33⅓% of Life Printing & Publishing Co. (three tri-weekly newspapers in Cicero, Berwyn and Stickney, Ill.), is secretary-treasurer and 50% capital stock owner of Twenty-Fifth Building Corp., owns 25% capital stock in Community Reporter, and was elected November 1948 as member of U. S. House of Representatives (Republican). Filed April 11.

Centralia, Ill.—WCNT Inc., Ch. 2 (54-60 mc), 24.3 kw visual, 12.1 kw aural, antenna height above average terrain 440 ft. (above ground 499 ft.). Estimated construction cost $228,278, first year operating cost $135,000, revenue $150,000. Applicant is licensee of WCNT Centralia. President and treasurer of WCNT is George F. Isaac, 80% interest; secretary is Kathleen I. Isaac, 20% interest. Filed April 7.

[For TV applications filed since the FCC's Sixth Report and Order [B•T, April 14], see page 71.]

Deletions . . .

TOTAL deletions of licensed stations to date since Jan. 1: AM 5, FM 4, TV 0. New deletions:

KYBS (FM) Dallas, Tex., license. Licensee stated frequency (107.9 mc) was not receivable on many sets; station had been operated at a loss. Deleted April 14.

KHAD Delano, Calif., CP. Grantee said illness prevented him from performing work required to establish and operate new broadcast station. Deleted April 16.

TV Thaw Comments

(Continued from page 70)

California: "The addition of hundreds of markets should mean to the television industry what the addition of facilities would mean to any other industry which has been bursting at the seams since its beginning."

Wayne Tiss, vice president in charge of Batten, Barton, Durstine & Osborn Inc., Hollywood: "With opening of so many new television stations, even in smaller markets, it should bring about increased activity in putting programs on film."

Neil Reagan, vice president in charge, McCann - Erickson Inc., and president of Advertising Association of the West: "Considering the . . . time necessary to process applications and get stations operating, it will be perhaps a year or more before any impact on commercial telecasting will be felt."

Donn B. Tatum, TV director, ABC Western Division: "Lifting the freeze will unleash and set in motion the tremendous forces which have been gathering for the last three-and-a-half years and which will now bring television into full bloom as the greatest of all mass communications media."

Jerry Fairbanks, president, Jerry Fairbanks Inc., TV film producers: "I anticipate that there will be twice as many [TV] film programs on the air this fall as there are now, thanks to the ban lifting."

Frank Wisbar, producer-director, Wisbar Productions *Fireside Theatre* (sponsored by Procter & Gamble) and other film shows: "I anticipate that in the mad scramble for stations and programs only the best [TV film producers] will survive. The greater audience means to me greater demands and not a watering down of quality."

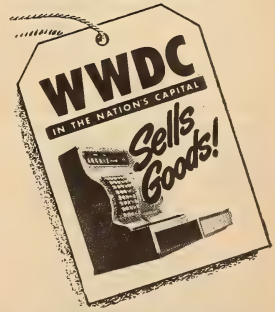
C. Burt Oliver, president and general manager, Foote, Cone & Belding, Hollywood: "Television as a major advertising medium, truly national in scope, can now become a reality and Hollywood's contribution to live and film production will inevitably increase."

Frank Samuels, western manager, radio-television department, William Morris Agency, Beverly Hills: "It now gives this medium the mass coverage that it should have and will bring a tremendous impact to many new cities. . . . It will also help alleviate the problem that networks and advertisers have faced in getting clearance for their shows in one or two-station cities."

Lee Ringer, president, Ringer & Assoc., Los Angeles, and president, Southern California chapter, American Assn. of Advertising Agencies: "The 'thaw' will enable smaller non-network advertisers to purchase profitable time slots, making television a more resultant medium."

Michael R. Hanna, general manager, WHCU-AM-FM Ithaca, N.Y., who announced April 15 that WHCU will file for UHF in Ithaca and plans to spend $250-500,000 to build: "I consider the FCC's educational phase of station allocations unrealistic."

Franklin M. Doolittle, president, WDRC Hartford, who has had an application for TV on file with the FCC since September 1947 stated WDRC will apply for Channel 3 in Hartford under the new allocations and will amend its application to conform with changed FCC conditions. (Hartford will have one VHF and one UHF channel for commercial use and one UHF educational channel.)



Edward E. Bishop, vice president of WGH-AM-FM Newport News, Va., whose owners applied for a TV construction permit in 1948, with the application caught in the freeze said WGH already has constructed a 417-ft. TV tower and that it is prepared to progress "with full steam" in constructing a TV station.

G. Richard Shafto, vice president and general manager of WIS Columbia, S. C. said his organization "will pursue with all possible speed its plans for a powerful new television station to be built in Columbia."

W. W. Warren, vice president and general manager, KOMO Seattle, Wash., who reports his station already has invested more than $750,000 in TV development, equipment and facilities and whose application has been on file since April 1948: "KOMO-TV can be in actual broadcast operation within a few months if construction permit is granted by the FCC."

SCHOOL TV

Methods of Financing Given Varied Study

METHODS of financing the construction and operation of noncommercial, educational TV stations are being investigated by educators in various parts of the country. They are being spurred by the end of the TV freeze [B•T, April 14].

In Kansas, state educators are understood to be proposing that the legislature authorize the setting aside of that portion of the personal property tax which represents the fee from TV receiver ownership.

The current Kansas personal property rate is $4.50 per $100 valuation. There are approximately 55,000 TV sets in the state, according to Radio-Television Mfrs. Assn. estimates of TV set shipments since Jan. 1, 1950. That would be a minimum of $247,500 of taxes paid on TV set ownership, if all set owners paid at least $4.50.

A subsidiary method of raising operating funds is also being investigated. On the assumption that educational TV stations will be on the air before commercial stations win out in contested hearings, educators have approached radio-TV dealers with this proposition: That they contribute a fixed amount to educational stations from each TV set sale made. The sum most mentioned is $5.

Since retailers are eager to see TV service in their cities, this idea has found them fairly sympathetic, it is reported.

Commission Set Up

New York's Gov. Thomas E. Dewey has signed legislation to set up a 15-man temporary commission to study the use of educational channels allotted the state. Spokesman for the governor last week indicated that a focal point of the study will be to ascertain to what extent, if any, the state government should operate stations and added that an alternate plan may also be considered: To leave administration of all channels to an association of the 87 colleges and universities within the state.

The commission would include eight legislative members and seven appointees of the governor, who will also designate the chairman and vice chairman.

Dr. Earl J. McGrath, U. S. Commissioner of Education, foresees a type of semi-commercialization which has not been broached before. Writing in the March 23 issue of *Parade*, the Sunday newspaper magazine, he suggested "noncommercial" sponsors. As he explained it, local civic organizations would pay for the production of shows in which they are interested. Since production would be done by college students, the costs would be low, Dr. McGrath pointed out. He also suggested that educational institutions could "can" a show on film and sell it to clubs and other civic organizations for airing on a non-commercial TV station.

In the 1951 annual report of the Office of Education just issued, Dr. McGrath suggested that educational stations might charge just the amount necessary to cover operational costs. He referred to the operations of Iowa State College's WOI-TV Ames, which accepts network commercials, but not local business.

"On the basis of past experience with commercial radio," Dr. McGrath said, "any idea that the educational needs of a school or college can be met satisfactorily by commercial television on a 'public service' basis must be flatly discouraged."

Formation of the Long Island (N. Y.) Radio-Television Council took place in March at a meeting in South Huntington, L. I., attended by representatives of over 400 schools, colleges, libraries, museums, etc. Council was established to act as the official agency to set up and run TV facilities in that area.

Officers elected were: Worthington A. Gregory, director of WSHS (FM) Floral Park, Sewankhaka High School radio station, and lecturer on educational radio and TV in Hofstra College, president; Dodd Craft, supervising principal, South Hunting schools, vice president; Charles E. Lawrence, audio-visual director, Riverhead High School, recording secretary; Horton Amidon, general educational department, Long Island Agricultural & Technical Institute, treasurer.

N.Y. STATE FILMS

Distributed to TV Stations

FILMED public service suggestions from various departments of the state government are to be distributed free to 13 television stations in New York by the State Dept. of Commerce, Commissioner Harold Keller has announced.

Produced by Radio, Television and Motion Picture Bureau of the department, the spots run about 20 seconds each with plans calling for production of further announcements from one to three minutes long. Three sample spots, now available, were made for the Motor Vehicle Bureau to advise that motorists heed "Slow—Children at Play" signs; for State Safety Division to stress need for preventing kitchen accidents, and for state police to explain school bus laws.

Program is extension of radio plan, adopted in 1946, under which 1,667 spot announcements were distributed to 152 stations in past year. The AM announcements represented some 40 state agencies who received an estimated $1 million worth of free broadcast time, allotted by stations as a public service.

Educators, JCET

(Continued from page 82)

in this field. Typical were these comments:

Laurence A. Kimpton, chancellor, U. of Chicago: "The FCC is to be commended for allocating a TV channel over which the educational institutions of Chicago can cooperate in using their resources to produce programs of significance and quality. I am sure the people of Chicago will want to assist the educators in their joint operation of a TV station, which we hope will become a part of a national education program service."

The Rev. James T. Hussey, S.J., president, Loyola U., Chicago: "This decision opens great vistas in the field of education. The question has been raised whether educational institutions can cooperate effectively in this type of enterprise. I am confident that such cooperation is not only possible but will bring a new dimension to American television."

Dr. John T. Rettaliata, president, Illinois Institute of Technology: "By reserving Channel 11 for a non-commercial educational television station in Chicago, the FCC offers this city a great opportunity. The educational and cultural impact of such a station can be a real civic asset. IIT has offered land and architectural assistance for the physical establishment of the proposed station."

Franklin Murphy, chancellor, Kansas U., and James A. McCain, president, Kansas State (joint statement): "We are gratified to have the FCC continue to express its faith in the future of TV for educational purposes."

AFM TRUST FUND

L. A. Local Asks Change

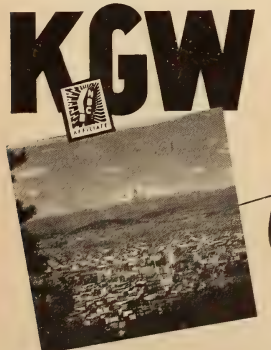
BECAUSE it blocks musicians from obtaining work, a change in the AFM 5% trust fund format setup to which TV film producers must contribute is urged in petitions being circulated among members of Los Angeles Musicians Mutual Protective Assn., Local 47.

More than 2,000 Los Angeles musicians already have signed petitions which are to be sent to James C. Petrillo, union president, for submission to AFM national executive board.

Aware of the campaign, Phil Fischer, vice president in charge of radio-TV, acknowledged there is considerable feeling among Local 47 members that format structure should be changed because under present setup rather than pay 5% royalty fee, TV producers by-pass live music in favor of foreign sound tracks which have no restrictions.

He found, too, that many band leaders and sidemen feel that 5% format is defeating its purpose by lessening job opportunities. However, he said, nothing can be done about it until a formula acceptable to all can be worked out.

It was suggested that another formula with a set fee for TV film producers rather than 5% might be considered by AFM.



Several musicians active in circulating petitions declared they would be willing to cut their own three-hour scale from $50 to $45 and donate the difference to the AFM trust fund. While realizing this would mean much less money for the trust fund, they maintain it would be more beneficial in the long run, since shelving the formula would mean more work. Increased activity among musicians would eventually more than make up for it as far as the welfare fund is concerned, it was maintained.

CIO TELEVISION

Series Debuts on WMAL-TV

FIRST venture of a labor organization into the TV film field on a national basis took place in Washington April 18 when the new CIO series began on WMAL-TV there. *Issues of the Day* will be televised for 13 weeks over that station at 10:30 p.m. Friday. Series is available to local CIO groups for sponsorship on stations in industrial communities where members of the union are employed.

Films are designed to explain attitudes of organized labor.

'Reservation' for Don Lee Cancelled in FCC Action

SAN FRANCISCO's Channel 2 was thrown back into the pot of available channels in that city last week when the FCC wiped the hearing status slate clean in the wake of its Sixth Report and Order [B•T, April 14].

Since 1948, Channel 2 in San Francisco was reserved for Don Lee. Don Lee failed to get a TV grant in the 1946 San Francisco hearing because it was up for FCC investigation on network practices. In 1950, all its licenses were renewed, but because the TV freeze was then in force, no action was taken on its Channel 2 application.

At the end of 1950, sale of Don Lee properties to General Tire & Rubber Co. (owner of Yankee Network and now WOR-AM-FM-TV New York) was approved by the FCC. Since 1950, Television California, TV applicant for San Francisco composed of oilmen Edwin W. Pauley, R. H. Chamberlain and C. L. McCarthy, had asked that Channel 2 be returned to the San Francisco list of available channels. It was turned down once, the Commission claiming that its petition was "premature."

Application Considered New

In last week's memorandum opinion, FCC declared that since Don Lee was now owned by General Tire & Rubber Co., its application for San Francisco should be considered as a new application. It, therefore, removed the reservation from that city's Channel 2.

In other actions last week, the Commission denied the following petitions:

Peoples Broadcasting Co. (WLAN) Lancaster, Pa. — Petitioned for comparative hearing with WGAL-TV for Channel 8 in Lancaster. WGAL-TV is required to move from Channel 4 to Channel 8 under the FCC's Sixth Report. Commission said, in denying the WLAN petition, that the request may be submitted again when and if WLAN resubmits the Channel 8 application in accordance with the new rules and standards.

Zenith Radio Corp. (WEFM (FM)), Chicago—Petitioned for ruling on question whether the Commission had the right to move WBKB (TV) from Channel 4 to Channel 2 in light of the fact that Zenith had applied for that channel and had used it for Phonevision experiments and tests. Commission said, in denying the Zenith petition, that the request may be raised again when and if Zenith resubmits its Channel 2 application in accordance with new rules and standards.

National Broadcasting Co. (WNBT (TV)), New York—Applied for increased power and change type of transmitter in 1948. Set for hearing then and maintained in hearing status during freeze. However, the FCC granted a change of transmitter in 1949, but forgot to remove the application from hearing status. Commission's action last week remedied that oversight.

In the list of cities whose TV applications were removed from hearing status [AT DEADLINE, April 14], the following cities were omitted: Lawrence, Mass.; Bellaire, Ohio; New Bedford, Mass.; Troy, N. Y.; Easton, Pa.; Oakland, Calif. All are part of other markets which were listed.

Joint TV Bids

(Continued from page 69)

might approximate the number of channels to be made available to the Denver area, television in a city long denied by an arbitrary freeze what other cities have long enjoyed would have its rights restored at an early date.

Accordingly, it would be most helpful if the Commission would clarify its policy concerning the filing of applications by two or more AM stations for a television license. I feel a straightforward reply to the questions which are set forth below would prove most helpful to a group of very sincere, experienced and cooperative radio operators anxious to bring television to a million people who are clamoring for the privilege of enjoying what has been available to their fellow Americans elsewhere.

a. Can the officers, directors, or stockholders of two or more AM radio stations serving the same city be granted a license to operate a TV station, and be permitted to retain their holdings in their individual radio stations if the radio stations continue to be operated as separate entities?

b. If two AM stations licensed to serve the same city join in an application for a television station, would such an application be at any disadvantage either by rule or Commission policy as against an application by parties not engaged in radio station operation?

c. Would there be any prejudice on the part of the Commission against the granting of such a joint application?

d. Would a joint application of two or more AM radio stations per se be in conflict with the public interest provided that the operation of said radio stations will continue to be operated as separate entities?

I would appreciate an early reply to these questions since a positive clear-cut answer to these questions might avoid long drawn-out hearings, endless litigation and years of delay in the granting of television licenses in Denver.

Chairman Walker's reply stated:

I am all for straightforward answers and that is just the kind of answers that I would like to supply to the inquiries you pose in your letter of March 12 concerning cooperative ownership of TV stations by AM operators. But I do not even have these answers myself.

As a matter of fact, Senator Johnson, although there have been inquiries of the staff and discussion by some staff members with outside lawyers, this problem has not yet been considered by the Commission itself.

I am sure that because of the financial burden of TV, the scarcity of channels and the desire to avoid the delays of hearings, this cooperative arrangement is going to occur to quite a number of AM operators. And it is a problem that the Commission is going to have to formulate a policy for. It would be helpful if we could explore this matter and chart our course right now, but as you know, we are bending all our efforts these days toward one objective—the lifting of the freeze.

Frankly, at this stage I have not even had time to study this problem and make up my own mind. I am for getting TV going as quickly as possible. On the other hand, during my 18 years on the Commission, I have been particularly concerned with the protection of the public against the dangers of excessive concentration of control over the mediums of mass communication. I would want to study that angle most carefully.

I feel sure that while the citizens of Denver are eager for television without further delay, they, too, in the long run, will be concerned with the type of control exerted over their channels of communication. Guarding freedom of speech must be balanced against the desire for quick action.

I will welcome any further information or inquiries which may come to your attention for they will help to sharpen this problem.

In view of these considerations I hope we may count upon your understanding and the continued patience of the citizens of Denver with whose desire for television I have the deepest sympathy.

izontal panning, long and continuous running dolly shots or any combination of these effects.

Handled by a two-man crew, the crane's principal feature is a counter-balanced boom mounted on the mobile chassis by means of a rotating center column. Camera and cameraman are supported on a rotating mount on boom's forward end. Boom, operated manually, can be raised or lowered or rotated fully 360°.

Crane is moved manually with a push-bar at the rear and rolls on eight dual-mounted hard rubber-tired wheels. The rear steering wheel allows both synchronous and differential steering.

Picture Tube Replacement To Top Million Mark

SURVEY conducted by General Electric Tube Dept., Syracuse, N. Y., to determine market for replacement tubes in TV sets and home and car radios, announced by J. T. Thompson, manager of GE replacement tube sales, shows that about 1,100,000 picture tubes worth $44,000,000 and 110,000,000 receiving tubes worth $220,000,000 will be sold this year for television and replacement purposes.

Study also reveals that the receiving tube industry is about to pass a major landmark. More than 950,000,000 receiving tubes are now in operation. Within the next few weeks, the figure is expected to pass the one billion mark.

In commenting on the value of the survey to individual distributors in sales campaigns, Mr. Thompson stated: "We have felt for quite some time that the replacement tube sales potential has been slighted in the surveys of electronics markets. Therefore, we felt an obligation to undertake a scientific analysis of the market open to distributors of replacement tubes for television and radio receivers."

Survey was conducted under the direction of Roger B. Yepsen, tube department manager of marketing research. It is expected that the study will be made annually.

TV SET GIFT

To Aid Instruction

A TELEVISION set is being used at Syracuse U. to aid in the training of journalism and advertising students.

The set, a 20-inch Sylvania model, was a gift of Baldwin-Hall Inc., Syracuse distributor, and the Sylvania Co. Caley E. Augustine, promotion manager, WSYR-AM-FM-TV Syracuse, helped make arrangements for the gift.

Acting Dean W. C. Clark, School of Journalism, commented that television permits an entire class to view news events in the making. News stories can then be written about the event by the students. In this way the professor may check the students' powers of observation and analysis.

WESTINGHOUSE STATIONS, EIGHT TV OUTLETS RENEWED

FCC cleaned up large number of pending temporary licenses Friday when it (1) renewed eight TV stations placed on temporary license last February for not showing religious and/or educational programming for composite week [B•T, Feb. 4]; (2) renewed all Westinghouse stations which had been on temporary for more than year pending FCC consideration of that company's anti-trust record; (3) renewed WJZ-TV New York which had been placed on temporary for carrying horse race programs [B•T, March 3].

After showing that composite week did not indicate true picture of religious and/or educational programs, or that stations had instituted or had planned to institute such programs, FCC renewed for regular period licenses of following TV stations: KING-TV Seattle, WGN-TV Chicago, WJAR-TV Providence, WLWC (TV) Columbus. WLWD (TV) Dayton, WLWT (TV) Cincinnati, WOR-TV New York, WOW-TV Omaha. Still on temporary, of the 26 originally cited. are KPHO-TV Phoenix and WNHC-TV New Haven. Only TV station also still on temporary is KTTV (TV) Los Angeles, involved in a question of privacy rights.

Renewed because FCC found that anti-trust involvements did not disqualify it as a licensee were licenses of the following Westinghouse stations: WBZ-AM-FM Boston; WBZA-AM-FM Springfield, Mass.; KDKA-AM-FM Pittsburgh; KYW-AM-FM Philadelphia; WOWO-AM-FM Fort Wayne; KEX-AM-FM Portland, Ore.

Still on temporary license while FCC looks into anti-trust cases against them are General Electric's WGY and WRGB (TV) Schenectady, Loew's Inc.'s WMGM New York, Paramount Pictures' KTLA (TV) Los Angeles. United Paramount's WBKB Chicago, KFBB Great Falls, Mont. (latter is also under scrutiny on the question of minority owner Anaconda Copper Mining Co. extending its holdings to control station).

WJZ-TV was first of 16 stations cited for carrying horserace programs to have license renewed. Renewal was granted after ABC station informed FCC it had ceased carrying broadcasts of horseracing.

Renewed also after several years were licenses of Wesley Dumm stations KSFO and KPIX (TV) San Francisco. They had been in temporary status while FCC looked into arrangements licensee had with previous church group owners.

Complete list of Friday renewals will be published in April 28 issue of BROADCASTING • TELECASTING.

GROUP ACQUIRES KEPO

CONTRACT has been signed for sale of KEPO El Paso, Tex., from Rawley-Brown Corp. to four Minneapolis-St. Paul businessmen for $207,500. Heading new owners is Miller C. Robertson, vice president and sales manager of KSTP-AM-TV Minneapolis-St. Paul. Associated with him are W. A. Porter Jr., W. B. Pratt and R. I. Richardson. Each will hold 25% of stock. Application for transfer will be filed with FCC shortly. Mr. Robertson will become general manager of station, as well as president of corporation in July, assuming FCC approval by then. KEPO is on 690 kc with 5 kw, holds a CP for 10 kw. It is affiliated with ABC.

AM SPEED-UP PLAN

SPEED-UP in AM processing line was proposed by FCC Friday. Scheme envisages setting up two lines, with preference given applicants proposing a station in a community not now with one or service to areas not now receiving broadcast signals.

Commission called for comments on proposal by May 12. It also specified that an application to be considered proposing to serve an unserved area must show that 25% of its coverage is to area not now getting primary service, day or night.

Proposal is in line with several petitions filed with FCC last six months asking that Commission give priority to applicants seeking to give their communities first local radio stations [B•T. Jan. 21; Nov. 12, 1951].

FCC FEARS CENSORSHIP IN CAMPAIGN CONTROL BILL

CENSORSHIP dangers are seen by FCC in proposed legislation requiring political speakers to post bond as protection to broadcasters against civil or criminal actions. Commenting Friday on bill (S-2539) pending in Senate Interstate & Foreign Commerce Committee, FCC told committee bond requirement might cause bonding firms to demand right to see and censor scripts before agreeing to issue any bond. (See election story page 26).

Instead, FCC proposes, legislation should specifically exempt licensees from liability for defamatory nature of any broadcast made pursuant to provisions of Section 315 of Communications Act.

Commission favored clause in S-2539 extending provisions of Section 315, covering equal time requirement for reply to candidate's talks, which would extend section's provisions to cover "any person authorized in writing by a candidate to speak on his behalf."

FCC recalled its Port Huron decision took the stand that Section 315 has the effect of exempting licensees from liability in courts because Congress specifically denied licensee the power of censorship over political material. However, FCC added, "this view has not received universal acceptance nor definitive judicial support." For this reason it has been urging revision of Section 315, the statement points out.

KUDOS FOR KLAUS

THEY'RE singing praises of Klaus Landsberg, vice president and general manager of KTLA (TV) Los Angeles in overcoming what appeared to be insuperable obstacles in arranging for first telecast of actual atomic blast scheduled sometime this week, at Yucca Basin, 80 miles from Las Vegas, Nev. (see story, page 74). Working for Television Assn. of Los Angeles, Mr. Landsberg last week reportedly completed setting up of relay system when others had given up. Task included dropping of equipment by helicopter on strategic peaks.

PEOPLE...

ROYAL V. HOWARD has taken leave of absence from KIKI Honolulu to be executive engineer of Radio Free Asia, of which John Elwood is director. He is in Washington for consultation. Bill Meyers, KIKI vice president and general manager, in charge during Mr. Howard's absence.

RUBEY COWAN, former head of radio-TV departments for Famous Artists Corp., Paramount Pictures, and before that NBC executive, named head of radio & television, Hamilburg Agency, Hollywood. Mr. Cowan will divide time between New York and Hollywood.

HARRIET HALSBAND, Kagron Corp., N. Y., to Town Hall of America as co-manager of radio and television department, effective today (Monday).

YOUNG HEADS NBC PRESS

APPOINTMENT of Frank Young as director of NBC press department announced today (Monday) by Sydney H. Eiges, vice president in charge of press and information. With NBC as public relations representative since February 1951, Mr. Young succeeds Josef C. Dine, who resigned to become public relations director of Ziv Television Programs Inc. [B•T, April 7]. Mr. Young is veteran of United Press, *New York Daily News*, and *News*-owned WPIX (TV) New York. Native New Yorker and 1934 graduate of Washington & Lee U., he joined UP in Washington, transferring to New York in 1935 as reporter, feature writer and editor specializing in coverage of entertainment field.

DuMONT SELLS TRANSMITTERS

DuMONT LABS. sold over $5½ million worth of TV broadcast equipment, including 32 TV transmitters in the two weeks between the NARTB Chicago convention March 31 and issuance of FCC's final TV report April 14, Herbert E. Taylor, manager of the TV Transmitter Division, announced Friday. Of the 32 transmitters, 23 were VHF and nine were 5 kw UHF. VHF transmitters can be delivered this year, Mr. Taylor said; UHF transmitters can be delivered beginning early in 1953.

CREAMER LEAVING WOR

JOSEPH CREAMER, advertising and promotion director WOR and WOR-TV New York, resigning effective May 1 after 16 years with station. Following short vacation he plans to open office as free-lance advertising and public relations consultant. Widely known, he has been frequent winner of Harvard Annual honors for advertising writing, as well as other awards. He joined WOR Feb. 3, 1936, as promotion director.

WALKER WARNS EDUCATORS

(Continued from page 5)

the late W. W. Charters, IERT co-founder. Attendance at the institute had reached 1,000 late Friday.

Comr. Frieda B. Hennock told educators that although they had won their point in obtaining TV station reservations, "I cannot advise you that the fight is over." She said "formidable obstacles" would have to be surmounted.

Aside from her scheduled talk, Comr. Hennock at a later session Friday night implied laxity on part of educators in pursuing TV facilities. She urged they get into television now, regardless of how limited initial effort might be.

FASTEST GROWING FOUR-YEAR-OLD IN RICHMOND

After four years, television has lost none of its magic in Richmond, though much of its mystery. From the moment WTVR, the South's first TV station, was unveiled it became the most sought-after guest in more homes than set makers could frequently supply.

Today, more than 118,000 homes in the WTVR area are television equipped and the number continues to grow in beanstalk-like fashion.

In Richmond your most important step for national sales is to get in step with the Havens & Martin stations, pioneers in AM, TV and FM. Ask your nearest Blair man for particulars.

Havens & Martin Stations are the only complete broadcasting institutions in Virginia.

People Fly

In 1903, man finally did it—invented flying machines. But nobody wanted a ride.

The early airlines, that sprang up all over America, died, merged, folded, and were forgotten because, to most people, flying was strictly for the birds.

Then Southern California got into the act. Maybe the sunshine, maybe the hankering to get places, maybe the consistent use of radio advertising—but Southern California *flew*. Southern California has the oldest airline in America—by tomorrow morning we'll probably have the newest.

Moral: Whether you sell airlines or aspirins—sell them *first* in Southern California where it will do the most good. Sell them best on the station that serves Southern California best—on KMPC. That's where so many things *really* start.

KMPC is the station that covers Southern California like a network. You *could* buy 38 stations, and not cover Southern California the way KMPC does. KMPC reaches more people, far more people, than any other independent radio station in the West. Whatever you sell, wherever you make it, use KMPC and get power where it really counts!

CLOSED CIRCUIT

WHILE Frank K. White, who retires as president of Mutual May 31 (see story page 23) has not announced future plans, it's known that he has received number of proposals from corporate entities in past year. And, while he's keeping his own counsel, it won't come as surprise if he joins another radio-TV connected company—probably network.

ENIGMA: Procter & Gamble, top radio-TV spender ($25,739,280 on network radio-TV in 1951) is concerned about cost of TV on nationwide coverage basis, now that freeze is lifted. Red Skelton program, for example, would figure at $10 million yearly for talent, time and cable cost based on present network cost-per-thousand.

LIGGETT & MYERS, N. Y. (Chesterfield cigarettes), over-extended its advertising budget in radio past season and as result is dropping sponsorship of $22,000 (for talent) Bob Hope radio show on NBC and $25,000 Bing Crosby show on CBS Radio, plus one quarter-hour of its half-hour daily segment of Arthur Godfrey on CBS Radio. Chesterfield will pick up sponsorship of Martin & Lewis on NBC Radio next fall (for about $10,000 for talent) and probably will expand its current Perry Como strip on NBC-TV. Among present Godfrey sponsors, it's understood, at least two or three are ready to add quarter-hour which Chesterfield drops.

U. S. RUBBER Co. and Coca Cola Co., both bidding for Bing Crosby's services on CBS Radio and possibly TV next season. Representatives from both firms in Hollywood last week talking deals with him and brother Everett Crosby, who agents for actor-singer.

FCC has supplied Senate Appropriations Committee with additional data to justify its $8 million fiscal 1953 budget from which House chopped $2 million [CLOSED CIRCUIT, April 21]. Details will be incorporated in release of hearings coincident with Appropriations Committee's report, probably several weeks away, according to committee sources.

THERE is indication that FCC may soon—within week or two—come up with starting date of thrice-postponed theatre TV hearings. Speculation now points to a fall beginning, most likely after September.

ADHERING closely to New Year's predictions on radio's financial health, is report from one network affiliated station in Class A market for first quarter showing local sales up 19.5%; national spot up 34.3%; network down 25.9%, figuring rate cut.

TELEVISION for Philippines is object of visit to United States of Pedro Belanca and Jose Lovina, mechanical engineer. Mr. Belanca's identified with large distillery in Manila.

FIRMING UP of plans for broadcast operations of Committee for Radio Free Asia Inc. was object of mission to Washington during

(Continued on page 6)

MBS FORMAT CONTINUES, O'NEIL TELLS AFFILIATES

MUTUAL Board Chairman Thomas F. O'Neil, who also assumes presidency when Frank White leaves May 31 (see story page 23), reportedly assured members of Mutual Affiliates Advisory Committee meeting in New York Friday that change in Mutual's type of network operation, which has long been speculated, is not now contemplated.

At closed meeting discussing Mr. White's resignation and his own election as president, it was reported unofficially afterward, Mr. O'Neil also stressed that MBS should continue as network predominantly composed of large number of relatively small stations mostly in non-metropolitan markets, with emphasis on acceptability and flexibility. He was understood to have reiterated view that continued co-existence of four networks is economically unfeasible but that Mutual intends to prosper.

He was also quoted as saying that Mutual plans to enter TV network field, probably on film basis.

Chairman O'Neil, who heads General Tire & Rubber Co.'s radio-TV interests, which since January includes control of Mutual stock (almost 60%, praised retiring president and his success as Mutual head and, in recognition of esteem in which Mr. White is held by affiliates, conceded that he himself was "on the spot" in Friday appearance before committee.

MAAC members afterward appeared impressed with Mr. O'Neil's talk, his grasp of station and network problems, and his plans for future.

Mr. O'Neil also was understood to have confirmed that employment of sportscaster Harry Wismer by Thomas S. Lee Enterprises, General Tire's radio-TV company, was primarily for promotional work on behalf of sporting goods products of Pennsylvania Rubber Co., General Tire subsidiary [CLOSED CIRCUIT, April 21].

Mr. White preceded Mr. O'Neil in brief talk to MAAC, expressing appreciation for support given him by affiliates throughout his tenure. It also was disclosed that MBS board had voted bonus for him.

William H. Fineshriber Jr., Mutual executive vice president and newly elected to board of directors, took charge of meeting for further discussions after Messrs. White and O'Neil completed their talks.

All MAAC members were present, headed by Chairman Gene Cagle, KFJZ Fort Worth.

Other MAAC members include: John Cleghorn, WHBQ Memphis; Victor Diehm, WAZL Hazleton, Pa.; Fred Fletcher, WRAL Raleigh, N. C.; George Hatch, KALL Salt Lake City; Rex Howell, KFXJ Grand Junction, Col.; E. J. McKellar, KVOX Moorhead, Minn.; Robert McRaney, WCBI Columbus, Miss.; Hugh Potter, WOMI Owensboro, Ky.; Porter Smith, WGRC Louisville, Ky.; Fred Wagenvoord, KORG Cedar Rapids, Iowa, and Jack Younts, WEEB Southern Pines, N. C.

BUSINESS BRIEFLY

DORMIN EXPANDS ● Dormin Sleeping Tablets, N. Y., currently using radio spots in such cities as New York and Boston, planning to expand into other radio markets. Agency, Dowd, Redfield & Johnstone, N. Y.

FARM AREA SPOTS ● Hercules Toxathene, Wilmington, Del., preparing radio spot announcement campaigns for farm areas in Southwest starting today (Monday) for 13 weeks. Agency, Fuller & Smith & Ross, N. Y.

DIAMOND SALT SPOTS ● Diamond Krystal Weather-Proof Salt, N. Y., starting radio spot campaign May 5 for 13 weeks. Agency, Benton & Bowles, N. Y.

AGENCY NAMED ● Chicago Office of Buchanan & Co. Inc. has been appointed by J-A. Corp., Chicago, to direct advertising for new product, Lemon Quick, powdered lemon concentrate. Initial plans include spot radio.

FALSTAFF PACKAGE ● Falstaff Brewing Corp., St. Louis, has bought CBS-TV's film package series *Cases of Eddie Drake* for placement on WKY-TV Oklahoma City, effective immediately, and on KMTV (TV) Omaha, effective May 2. Agency for Falstaff, Dancer-Fitzgerald-Sample, N. Y.

HOLLINGBERY NAMED

WHIO Dayton, Ohio, and WIOD Miami, Fla., have appointed George P. Hollingbery Co. as national representative effective May 1. Hollingbery firm has been representing WHIO-TV. Stations belong to James M. Cox group.

PROCTER & GAMBLE BUYS 2½ HOURS RADIO ON NBC

SIGNING by Procter & Gamble for purchase of 2½ additional hours of morning time per week on full NBC radio network [B•T, March 17] is being announced today (Monday) by John K. Herbert, NBC vice president in charge of radio network sales, who viewed "this major purchase by the country's largest advertiser" as "distinct affirmation of faith in the power of network radio."

Time period is 9:30-10 a.m., currently not programmed by NBC for network. Starting June 23, P&G (for products not yet specified) will sponsor *Young Dr. Malone* and *Brighter Day* in this segment, Monday through Friday. Contract was placed direct.

"We of the NBC radio network are heartened by this concrete evidence of Procter & Gamble's realization of the undeniable attributes of radio which make it an imperative buy for the advertiser who seeks to deliver his sales message to the greatest number of people, with maximum effectiveness, at lowest cost," Mr. Herbert said.

Sale brings P&G time on NBC radio to 12½ hours weekly, adding to *Welcome Travelers* (10-10:30 a.m.); *Life Can Be Beautiful, Road of Life, Pepper Young's Family, Right to Happiness,* and *Backstage Wife* (3-4:15 p.m.), and *Lorenzo Jones* (5-5:45 p.m.).

TV NETWORK TIME SALES TOPPED RADIO IN MARCH

TIME sales of television networks topped those of radio networks for March, again showing change in radio-TV relationship in past year, according to March report of Publishers Information Bureau.

Gross time sales of four radio networks in March totaled $14,520,393, more than million dollars under $15,835,973 combined gross time sales of four TV networks. This is considerably different picture than that given by figures for March 1951, when combined radio network gross was $16,418,947 and TV network gross was $9,645,246.

Network-by-network gross billings for March and for first quarter, with 1952 compared to 1951, follow, for both radio and TV:

NETWORK RADIO

	March 1952	March 1951	Jan.-Mar. 1952	Jan.-Mar. 1951
ABC	$ 3,355,715	$ 2,891,339	$ 9,835,164	$ 8,693,478
CBS	5,154,077	6,793,966	15,103,981	19,725,329
MBS	1,826,527	1,648,006	5,126,208	4,617,598
NBC	4,184,074	5,085,636	12,535,445	15,033,209
TOTAL:	$14,520,393	$16,418,947	$42,600,798	$48,069,614

NETWORK TELEVISION

ABC	$ 2,076,782	$ 1,539,470	$ 6,245,710	$ 4,123,040
CBS	5,643,123	2,993,902	15,820,809	8,195,406
DuMont	758,763	457,811	2,224,455	1,299,417
NBC	7,357,305	4,654,063	21,430,161	12,790,645
TOTAL:	$15,835,973	$9,645,246	$45,721,135	$26,408,508

CIVIL DEFENSE TESTS CONDUCTED BY TWO STATES

ANNUAL series of New York State civil defense tests, scheduled to have started Saturday on Long Island, were expected to follow more detailed and extensive procedure, with radio stations, braced for possible "communications paralysis," assigning some personnel to stand by for "emergency" assignments only.

WHLI Hempstead, located one mile from hypothetical atom bomb burst, was designated monitor station for others in Nassau County to relay confirming announcements—some by special transcription—primarily to C. D. workers. Although WHLI will remain on air, spokesmen said Friday that station was ready for program interruptions from time of blast, between 8-9 a. m., until C. D. workers receive dismissal some hours later. Outlet publicized impending test with special spot announcements throughout week plus reports on regular news shows and hoped, if allowed, to tape record progress at bomb scene during test.

New Jersey planned statewide air raid test this week, with WNJR Newark, as member of State C. D. Radio Network, ready to broadcast alert signal and official instructions to public. Station also scheduled exclusive live broadcast from C. D. information-communications center immediately following 10-15 minute test, with on-scene evalution of results by state and federal C. D. officials.

TV REPAIR FRAUDS PROBED

GRAND JURY in Chicago investigating TV set repair frauds in which firms reportedly get $1,000 a day after complaints by legitimate servicemen and public. Frank A. Moch, president, Television Installation Service Inc., told jury how repair men get initial call by advertising lower fees, remove good tube and replace with old one, sell old tubes as new and overcharge. He said fraud was prevalent in New York about two years ago.

In this Issue—

Thomas F. O'Neil, already chairman of the board, takes over MBS presidency as Frank White resigns. It's the first major realignment since General Tire & Rubber Co., of which Mr. O'Neil is vice president, took over control of MBS. *Page 23.*

Is there anything to the talk about sponsors cutting back on TV? Not much, according to a B•T roundup. The dozen that have cancelled TV network shows recently have or will put the money into other TV or radio campaigns. *Page 57.*

Two bogeymen show up at the annual American Newspaper Publishers Assn. meeting. They're spot radio, which is believed a threat to local newspaper revenues, and television, which has already taken some money from the daily press. *Page 23.*

Hamstrung by present political broadcasting laws, broadcasters need legislative relief immediately. Protection against libel is the biggest demand. *Page 25.*

Is anybody going to appeal the FCC thaw to the courts? If so, action is apt to come from Pennsylvania, New Jersey or any of the Gulf States where rigid adherence to the 170 mile VHF separation kept some cities from getting more VHF. *Page 58.*

Radio and TV are drafted by The Advertising Council to help raise emergency funds for Red Cross for rehabilitation of flooded Midwest. Broadcasting's flood coverage is extensive. *Page 27.*

Joint committee of broadcasters, aviation industry and government agencies formed to figure out how to place tall TV towers so they will give maximum benefit to telecasting at minimum hazard to flying. *Page 57.*

Here's a post-freeze problem for TV networks. Of the biggest 25 markets, only five will have as many as four VHF channels. The competition will gray the hair of station relations men. *Page 58.*

Comr. Hennock tells educators to apply for reserved TV channels even if the funds to build the stations aren't in sight. *Page 61.*

President Truman withdraws his inference of a week ago that he could seize radio-TV and newspapers at will in an emergency. That interpretation of his remark was hooey, he says. *Page 25.*

Upcoming

April 30-May 2: Assn. of Canadian Advertisers, Royal York Hotel, Toronto.

May 1-2: CBS-TV clinic on station operations, Waldorf-Astoria, New York.

May 1-2: NBC radio promotion workshop, Waldorf-Astoria, New York.

May 1-2: Ohio Assn. of Radio-TV Broadcasters, Deshler-Wallick Hotel, Columbus, Ohio.

May 2-3: American Council on Education, Chicago.

Closed Circuit

(Continued from page 5)

last fortnight by John W. Elwood, radio director, former head of NBC's San Francisco operations. With him was Royal V. Howard, owner of KIKI Honolulu and former NAB director of engineering, recently retained as executive engineer of Asia group.

HORACE N. STOVIN, president of his own station representation firm in Toronto, will be recipient of silver medal of the Assn. of Canadian Advertisers for his contributions to advertising, at ACA annual dinner at Toronto on May 2. Mr. Stovin has been a radio director of Canadian Bureau of Broadcast Measurement for some years.

WHILE negotiations with Screen Actors Guild continue for new collective bargaining contract, members of Alliance of Television Film Producers and some unaffiliated TV film producers May 8 start paying actors new minimum wage scale of $70 per day and $250 weekly. Rates are same SAG recently negotiated with major and independent motion picture producers. Residual rights, which SAG is demanding for actors from TV producers, and other major points covering working conditions yet to be worked out.

WHEN CBC Chairman David Dunton talks April 30 before Assn. of Canadian Advertisers, he'll have all of Canada's broadcasters (and advertisers and agencies) hanging on his every word. Expected is policy announcement on Canada's approach to TV. Generally, it's thought there'll be affirmation of report that first authorizations will go to CBC (state-owned) outlets. But there's hope that Canada's free enterprise commercial broadcasters will get shot, too.

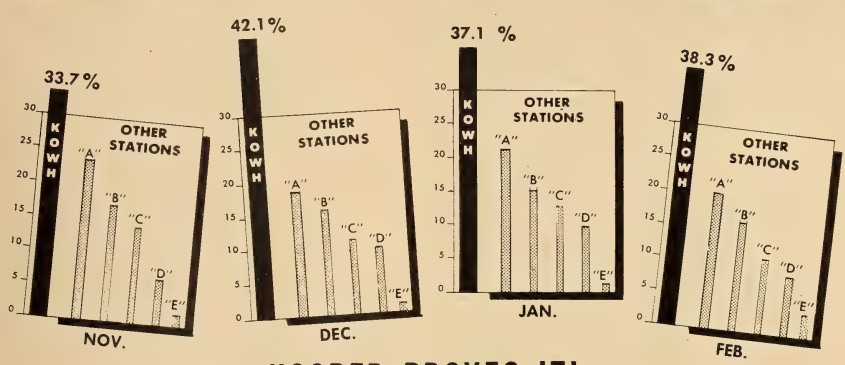
FCC EXPECTED TO ISSUE FORMAL AMATEUR ORDER

FORMAL issuance by FCC of order authorizing radio amateurs to use 21-21.45 mc band for A1 emission starting May 1 expected within day or two, Commission sources indicated Friday as widespread interest arose in danger of interference to TV reception. No protests against use of band made following issuance of proposed order March 17 (early story page 70).

Radio-Television Mfrs. Assn. unable to estimate number of TV sets having I. F. stage within amateur band and subject to potential interference. RTMA pointed out it had adopted 41.25 mc as recommended spot for I. F. stage in March 1950 action.

FCC noted it has no control over design of TV sets. American Radio Relay League spokesmen reminded that set makers had long ago been warned that 21 mc band was slated for amateur use when 14 mc spot was taken from hams.

Set-servicing interests pointed to possibility that interference would occur only within few blocks of amateurs, and then only if within beam. They said many sets with 21 mc I. F. stage are adequately shielded. Early sets using RCA circuit among those said to use 21 mc I. F. stage.



AVCO DECLARES DIVIDEND

AVCO MFG. CORP. declared quarterly dividend Friday of 15 cents on common stock payable June 20 to holders of record May 29. Another 15-cent quarterly dividend was paid March 20.

"Americas' Most Listened-To Independent Station"

Wherefore art thou, Radio?

There's been some talk lately about TV luring advertisers away from Radio. TV or not TV, that is the question! But not in Canada.

So far there is no TV in Canada to challenge Radio's established position as Canada's most popular entertainer and most effective advertising medium.

The reason for Radio's pre-eminence is partly geographical. Most of the 14 million people living in Canada are spread from coast to coast along a 200 mile wide belt just north of the US border—and the further north, the fewer people per square mile.

To serve all these people with news and entertainment is a problem which only Radio can overcome successfully. For most Canadians live in other than urban areas (only 38% in towns of 30,000 or over).

And *94%* of all Canadian homes have a radio!

These listeners, enjoying a standard of living almost as high as yours, are served by 112 independent radio stations strategically placed across the whole country.

Yes, millions of Canadians depend on Radio, and so do advertisers. For Radio is Canada's favorite entertainer and top salesman.

"In Canada you sell 'em when you tell 'em!"

A message from the 103 member stations of the Canadian Association of Broadcasters whose voices are invited into over 3 million homes every day.

Available!

FOR THE FIRST TIME IN OVER FIVE YEARS, "DUTCH" BERGMAN'S SPORTS SHOW, ON WRC, IS AVAILABLE FOR SPONSORSHIP.

6:35 p.m.—Monday through Friday

When Arthur J. "Dutch" Bergman takes to the air for his nightly sports show on WRC, he brings with him a background rich in athletic experience. Before joining the WRC sports staff eight years ago, "Dutch" had chalked up several years as head coach and scout for the Washington Redskins and ten years as athletic director and head football coach at Catholic University.

The flavor of Bergman's big-league contacts with sports luminaries across the country and down to the average fan provides a tightly edited ten minutes of radio sports reporting. Bergman's sports show is the highest-rated of its kind in the early evening hours.

This availability can't last long, so get on the phone right away and call your nearest NBC Spot Sales office or the WRC Sales Department, REpublic 4000.

feature of the week

EXAMPLE of sponsor-station teamwork promotion which has gone over big is the *Sleepy Joe* program on KVOR Colorado Springs, Col., sponsored by Sinton Dairy Co., that city.

The five-days-a-week year round show on KVOR features an Uncle Remus type named Sleepy Joe, who loves children and loves to tell them stories of Bre'r Rabbit and his friends, Bre'rs Fox, Snake and others.

So convincing are these characterizations, done by Jimmy Scribner of Hollywood in combination dialogue-narration and transcribed for syndication, that Meredith Williams of KVOR's advertising department says it has a strong adult following too. "For instance," he says, "my wife and many other mothers are ardent fans, and when I can, I listen myself, for it's a real delight."

The two-year-old KVOR show promotes Sinton's milk and ice cream. Commercials by the story characters also are transcribed by Mr. Scribner. Currently, the CBS affiliate station is promoting "The Sleepy Joe Club," which for no handling charges except a trademark from a carton of Sinton's ice cream, offers members a certificate in color, membership card and button with color picture of Ole Sleepy. Each week a new button of one of the "Bre'rs" is offered. Several weeks ago the successful *Sleepy Joe* contest featured completion of the sentence, "I like Sinton's milk because. . . ."

Mr. Williams gives credit for the promotion to the sponsor, who didn't "try to shave corners and scrimp" with prizes. First prize was a set of "Bre'r Rabbit's First Adventure" records and 10 gallons of ice cream; second, records and five gallons; third and fourth, records and one gallon. Clincher was that every child who responded was awarded a pint of ice cream and honorable mention of his name on the program.

Hospitalized veterans at Colorado Springs had fun themselves acting as judges and the winners were taken to the hospital to meet the judges, while Sinton's supplied enough ice cream to give the patients a treat throughout the whole hospital wing.

strictly business

NOW that the TV freeze is water over the dam, current and potential advertisers in the medium are, in the strictly business sense, concerned with costs.

A practical direction could be taken from Max Banzhaf, advertising and promotion director of the Armstrong Cork Co. He says:

"In radio and television, advertisers usually make a choice between two philosophies. They either adopted a low budget policy and resign themselves to a low rating; or they decide to pour in money on production, hire big-name stars, believing this to be the only way to build a rating.

"It's a much neater trick, if you can do it, to get a high rating with a modest budget. That way you're certain of a low cost per thousand.

"Proof that this latter approach can work is the currently high ratings of both our television and radio shows; and our costs per thousand, which are among the lowest on the air."

Mr. Banzhaf guides two Armstrong network shows, *Armstrong's Theatre of Today*, Sat. 12 p.m., CBS Radio, and *Armstrong's Circle Theatre*, Tues. 9:30 p.m., NBC television. Both are dramatic plays.

Mr. BANZHAF

The radio show is built around the everyday situations of people and is aimed at the mass market for Armstrong's Quaker Rugs and Floor Covering. The TV program is similar but aimed at a wider audience with commercials pegged to the firm's general line of linoleum and other floor coverings, wall cov-

IRVING S. UNDERHILL, Young & Rubicam, N. Y., to Lennen & Mitchell, same city, as assistant director of research.

on all accounts

THE growth of radio programming and advertising for the Negro market has been phenomenal since 1946, according to Leonard Evans, account executive at Arthur Meyerhoff Agency, Chicago, who is believed to be the only Negro account man in any AAAA agency.

The importance of the Negro market was accepted by only about 10 stations in 1946, while now 73 stations carry shows and advertising directed to Negroes, he reports. Most of these stations are in the south, and many of the sponsors are large national advertisers who do not use radio in northern metropolitan markets. While radio has grown, Negro newspaper circulation has dropped considerably, Mr. Evans says.

Radio, in his opinion, nevertheless has failed to keep pace with the growth and sales potential of the Negro market, which comprises 15 million persons. He sees a need for Negro agencies handling any product which is to be merchandised to Negroes; for well-informed and well-trained Negro media analysts in all large agencies; for continuing and detailed Negro market studies, and for a variety of entertainment in radio and television going beyond the usual disc jockey format and dramatic presentations with stereotyped Negro portrayals.

Mr. EVANS

Interested in the Negro market generally since attending high school in Chicago, Mr. Evans began concentrating on the economic and research aspects while attending school in Nashville and the U. of Illinois, where he majored in marketing, insurance and accounting. He surveyed the Negro population from the sociological angle and at the U. of Illinois he worked with his mother, a leading insurance saleswoman in Chicago since 1919, on a study of mortality rates among Negroes, long considered bad risks by insurance firms.

He subsequently acquired basic Negro data for incorporation into a general survey which later became the first official Negro market study, the Afro-American study conducted in Washington, Baltimore and Philadelphia in 1946.

Mr. Evans, after graduation from Illinois in 1935, worked in various industries and businesses most of which were directly concerned with Negro customers. He studied at night for a law degree and served two years in the Air Force as an instructor before handling his first specific agency assignment.

In New York, he handled promotion, counseled national manufacturers on merchandising, distribution and general marketing problems in Negro areas, and directed

More Merchandising

EDITOR:

. . . I can offer little in the way of suggestions for the improvement of your fine publication. It carries all the important information about the radio-TV industry, and we use it here often as authentic reference material.

If you were to ask me for my opinion on the problem that seems most important in the future success of the industry my answer would be merchandising support for the advertisers. Any case histories of successful radio or TV merchandising programs are well received here and you would be pleased with the number of advertising men and salesman who are converted from supporters of printed media to advocates of radio and television advertising when they see the sales results that radio and TV plus merchandising can produce.

Anything you can do to further this "cause" in BROADCASTING • TELECASTING will be most appreciated. . . .

H. H. Leland
Radio-TV Director
Armour and Co.
Chicago

open mike

Tainted Mail

EDITOR:

Mail has been coming to our station originally addressed to Seguin, Calif. After proper postal markings, it finally arrives at its Texas destination. If one letter would have been so addressed, we would believe it to be a mistake on the part of sender. But we get dozens so addressed, so we feel some mailing list, some radio station directory, has us listed KWED Seguin, Calif., instead of KWED Seguin, Tex.

Knowing that your publication reaches all media, we are asking that you help in locating this error. Imagine someone with gall to take Seguin out of Texas and give it to California.

Garfield Kiel
General Manager
KWED Seguin, Tex.

[EDITOR'S NOTE: The error has been located. For inexplicable reasons, KWED was listed both in California and Texas in the 1952 BROADCASTING YEARBOOK. KWED is herewith restored to Seguin, Texas, with apologies.]

Figure Fun

EDITOR:

I'm charmed by the item, "Bob and Ray Revised for Average Listener," [B•T, April 14, p. 74]. It gives us a real sense of solidarity to discover that ". . . the average listener is a housewife . . . married . . . for about 11 years . . . and with two children, six and 14 years old . . ."

After 23 years in the radio business, I've come to expect surveys to reveal some startling things. But this crying need for an intensification of Moral Rearmament is something else again.

Frank A. Seitz
Managing Director
WFAS-AM-FM
White Plains, N. Y.

[EDITOR'S NOTE: The statistical housewife is not necessarily discreet.]

* * *

Utter Confusion

EDITOR:

On pages 25 and 95 of your April 14 issue, you carry a story wherein the American Civil Liberties Union has cited four networks and two stations specifically for blacklisting in radio and television. On page 95 in the second column, third paragraph, WHAS-TV Louisville, Ky., is named as one of the stations airing a kinescope of a January 1950 *Toast of the Town* program. Completely apart from the issues involved in the article, I wish to point out that WHAS-Television did not go on the air until March 27, 1950. If the program indicated was aired in Louisville, it was not through the facilities of WHAS-Television.

Since you point out in your article that the complaint erroneously identified all seven stations except KTTV and KWTJ as CBS owned outlets, I feel that you would appreciate having the additional error pointed out.

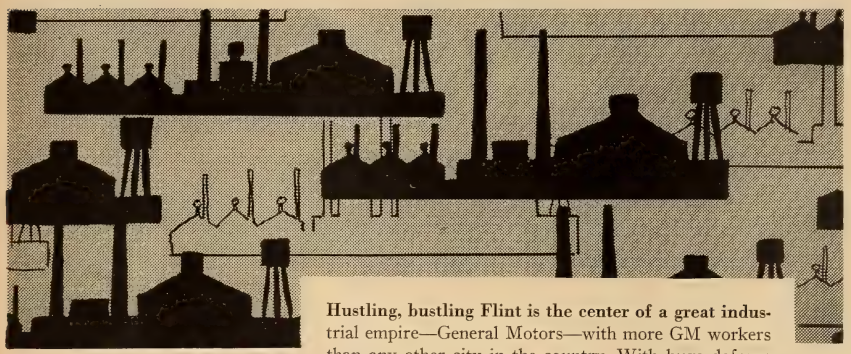
Bill Loader
Promotion Manager
WHAS Louisville

[EDITOR'S NOTE: Our story also pointed to the inaccurate call letters, "KWTJ," listed in the complaint and said presumably they referred to WTVJ Miami.]

* * *

Oops

EDITOR:



I must take issue with a paragraph in your "At Deadline" section of the April 7 issue. An item about coverage of the President's Jefferson-Jackson Day Dinner speech reads in part: "CBS, on the other hand, picked it up and scooped the world, though other networks had it minutes after the closing of the sensational address."

The Mutual Broadcasting System carried the speech "live" direct from the National Guard Armory along with other radio networks.

In addition, to the best of my

Service Director

Johnnie Holmes HAS!

You won't find Toadsuck on many maps. It used to be the ferry point for cattle and supplies to and from southcentral and north-central Arkansas. Nothing remains but its memories and a general store. But farm activities in that section are unusual, so our Johnnie Holmes made a trip there and reported the doin's to Arkansas farmers.

Johnnie has been traveling in Arkansas almost constantly the past year. The map shows the many towns he has visited. This doesn't represent all of John's traveling, though. Take Fayetteville, for example. This seat of the University of Arkansas has had many visits, as has Russellville, home of Arkansas Tech. The many branch Agricultural Experiment stations of the U. of A. have been visited frequently; they are not indicated on the map. Several of the towns have had more than one visit from KLRA's farm reporter.

All in all, Johnnie Holmes and KLRA cover the state for first-hand farm news. Johnnie is the only full-time farm service director in Arkansas. In addition to his radio duties, Johnnie squeezes in time to write a farm column for the ARKANSAS GAZETTE each Sunday.

Johnnie Holmes has become one of the best known personalities in Arkansas. He is in demand for talks to civic clubs, farm groups and others, in and out of Arkansas. His activities have made KLRA Arkansas's listening habit for farm families, just as it dominates the listening of most other Arkansas families! And all this makes KLRA your best buy in Arkansas!

VICTOR ELTING Jr. named advertising director of Quaker Oats Co., Chicago, with ROBERT S. MacDONALD as assistant director.

THOMAS G. PROSSER, director of sales and advertising, White Rock Corp., N. Y., elected vice president in charge of sales and advertising.

Selling Dallas' tv market . . .

IS AN INSIDE JOB!

Survey proves it takes a Dallas station to sell Dallas!

Here is conclusive evidence that a Dallas station sells Dallas best—as well as the rich Dallas-Fort Worth TV market—results of an impartial survey by Ira. G. Corn, Professor of Marketing at Southern Methodist University.

Area dominance of Dallas television was emphasized by figures on TV set saturation, set gain, and comparative set distribution within the Dallas and Fort Worth primary coverage areas. In every category, Dallas and WFAA-TV led Fort Worth by margins of from 29% to 179%!

Here is proof it takes a Dallas station to sell Dallas and the big Dallas-Fort Worth TV market—*and WFAA-TV, first in Dallas, offers most for your advertising dollar!*

TV SET SATURATION: DALLAS WFAA TV AREA HAS 82.1% MORE TV SETS THAN FORT WORTH AREA.

WFAA-TV covers 64.5% of the combined market compared to 35.5% by Fort Worth TV.

DALLAS WFAA TV PRIMARY COVERAGE AREA
97,376 SETS

FORT WORTH TV PRIMARY COVERAGE AREA
53,501 SETS

TV SET GAIN since April 1, 1951: DALLAS WFAA TV AREA HAS GAINED 179% MORE SETS THAN FORT WORTH AREA.

DALLAS WFAA TV PRIMARY AREA GAIN
25,888 SETS

FORT WORTH TV GAIN
9,292 SETS

POINTS AND CONCLUSIONS FROM THE CORN REPORT EMPHASIZING THE DOMINANCE OF DALLAS IN THE DALLAS-FT. WORTH TV MARKET:

Primary coverage area of WFAA-TV embraces seven North Texas counties. Fort Worth primary area covers five counties.

13,253 TV residences within the Dallas area with inside aerials cannot be reached from Fort Worth, whereas WFAA-TV comes in with a clear picture.

The primary coverage area of WFAA-TV included 97,376 TV sets as of Jan. 15, 1952—the Fort Worth primary area had 53,501 TV sets.

In the combined Dallas and Fort Worth primary areas, WFAA-TV's share is 64.5% of the total sets. The Fort Worth station's share is only 35.5%.

WFAA-TV primary area has gained 25,888 sets in the past 9½ months—a 36.2% increase over April 1, 1951. The Fort Worth area gain was 9,292 sets—a 21% increase.

Dallas County has 82,565 sets. Tarrant County (Fort Worth) has 47,786 sets.

41.2% of all family units in Dallas County are TV set-owners. Dallas County TV homes have 9.8% larger family size compared to non-TV homes. This means that the 41.2% Dallas County residences reached by TV actually accounts for 43.5% of the population.

WFAA-TV *first in Dallas*

VOL. 42, NO. 17 APRIL 28, 1952

O'NEIL MBS PRESIDENT

White Resigns, Fineshriber Director

By RUFUS CRATER

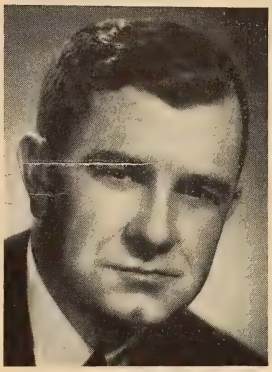
ACTIVE direction of Mutual was taken over by its new owners last week, with Frank White resigning the presidency and Board Chairman Thomas F. O'Neil assuming the presidential reins.

The top-level realignment, first since General Tire & Rubber Co. became controlling stockholder last January, came unaccompanied by any announcement of plans for changes in either Mutual's policies or its scope of operations, although it is known that entry into TV networking is planned and reports have circulated intermittently that MBS may be reorganized along conventional network lines.

The executive changes, to become effective May 31, obviously stemmed from inability of Messrs. O'Neil and White to come to terms, but both principals insisted there was no rancor. Each spoke highly of the other in announcing the changes to the Mutual staff Thursday afternoon, to the Mutual Affiliates Advisory Committee on Friday morning, and, by closed circuit, to the 553 MBS affiliates Friday noon.

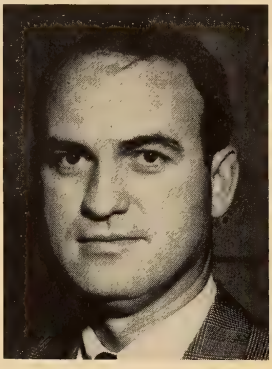
Mr. White said he would announce his future plans shortly.

His original three-year contract as president—at a salary estimated unofficially at about $85,000 a year, plus bonuses reportedly neighboring on $15,000—actually expires April 30. But he agreed to remain in office an additional month to assist Mr. O'Neil.



Continues as Chairman

Mr. O'Neil, vice president of General Tire and head of its radio and television enterprises, will continue as Mutual board chairman.



Through its ownership of Yankee and Don Lee networks and the WOR New York radio-TV properties, General Tire controls almost 61% of Mutual stock. The properties are in the name of Thomas S. Lee Enterprises, in which, as a result of the WOR-AM-FM-TV acquisition early this year, General Tire owns 90% and R. H. Macy & Co., former owner of the WOR interests, owns 10%.

Mr. White's resignation and Mr. O'Neil's election came at the annual stockholders - directors meeting, held Thursday in New York.

At the same time Executive Vice President William H. Fineshriber Jr. was elevated to the board of directors. He will continue as executive vice president, in the No. 2 spot he assumed last December.

Mr. WHITE

Mr. O'NEIL

All other members of the board and all executive officers were re-elected at the meeting.

News of Mr. White's resignation brought expressions of dismay from the first of the members of the Mutual Affiliates Advisory Committee arriving in New York Thursday for their meeting with the network officials on Friday morning. They said they harbored no criticism of Mr. O'Neil as network president, but stressed the loyalty which Mr. White has developed among affiliates as well as his progress in building MBS.

Mr. O'Neil himself was highly laudatory of both Mr. White and his work, describing his service as having been "truly monumental."

There was no open sign of other imminent changes in top personnel. In his closed circuit talk to affiliates on Friday, Mr. O'Neil said that "some of Frank White's value to us will survive his departure"—one of the "most important" ways being "that the capable and outstanding organization he has built so ex-

SPOT RADIO

Held Threat to Newspapers

By WILLIAM RUCHTI

SPOT RADIO is a real threat to local newspaper revenues and television has already siphoned off some money, Harold S. Barnes, director of the Bureau of Advertising, told delegates to the 1952 convention of the American Newspaper Publishers Assn. in New York last week.

Other speakers at the Wednesday afternoon Bureau of Advertising session predicted tough selling years ahead, to be made tougher by increased competition from television and warned that newspapers still can not survive any real decline in advertising revenue.

The three-way convention, which started Tuesday in the Waldorf-Astoria, was the 66th at which newspapermen across the nation met to discuss mutual problems, and, although the estimated 1,600 in attendance did not give as much time to broadcasting media as initial agendas had indicated, the pressure of radio-TV competition seemed so taken for granted that literal statements did not have to be made.

The most specific warning of broadcasting competition was issued by Mr. Barnes Wednesday afternoon, when he evaluated competitive media. Reporting that network radio contracts had fallen off 11.3% during the first two months of the current year, he assured his audience not to worry about network radio, but underlined the fact that "spot business has increased substantially and constitutes a very real threat to local newspaper revenue."

Mr. Barnes asserted that the most important effect of television, which he conceded had "siphoned off some money, especially in food and cigarettes," was that it produces an unsettled frame of mind in the user and non-user alike. He explained:

"One group of advertisers is either itching to get in or is afraid of what will happen if they *don't* get in. The group that's already in TV are appalled by the mounting costs and straining their eyes for sales results that justify the mounting costs."

He warned that TV costs will grow with the medium, that share-of-audience will decrease in one-station towns now that the freeze has been lifted, and advised: "The soundest strategy is to resist the temptation to make an all-out frontal attack on TV. Logic has little effect upon a person who is going through an emotional crisis. Our plans are to hammer away at TV's weak spots."

In spite of broadcasting competition, Mr. Barnes predicted that 1952 will nevertheless bring an all-time high in national advertising expenditures.

Stuart M. Chambers, vice chairman of the bureau's board, foresaw "tough selling years ahead" when he spoke at the same Wednesday meeting which, unlike opening day discussions, was an open session. The real challenge is yet to come, he warned, and will come as a result of the end of the TV freeze.

"In the next two, three or five years, we are going to be confronted not with 108 television stations, but with 10 or 15 or 20 times that number—all clamoring for the advertiser's dollar for their support and very existence."

Publishers, like other businessmen, may be forced to give more

(Continued on page 93)

CO-OP BUSINESS

ABC Reports Increase

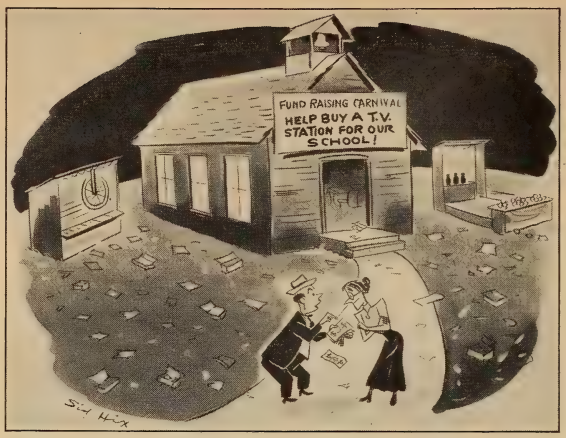
ABC radio co-op business has increased 9% since the start of the year and 4% over the comparable 1951 period, Frank Atkinson, manager of cooperative program sales, announced last week in reporting that a recent network survey showed 18 cooperative ABC radio programs are currently backed by a total of 926 sponsors.

Some 546 sponsors participate in the top five ABC co-op programs: *No School Today*, with a total of 130 sponsors on 95 stations; *Paul Harvey*, 124 sponsors over 105 ABC affiliates; *Martin Agronsky*, 121 advertisers on 95 outlets; *Headline Edition*, 89 sponsors on 76 stations, and *Elmer Davis*, 82 backers on 80 ABC stations.

Sponsors represent a cross section of American business, Mr. Atkinson said, with the list ranging from bakeries and bottling companies, through banks and grocers, to plumbers and jewelers, and some have purchased the same program since its inception on the ABC radio network, a period of ten years in occasional instances.

Advertiser satisfaction has been very high, the sales manager reported, citing as typical a letter from an Illinois specialty shop owner: "For the month of September (1951), we turned in an overall increase of 35%. Incidentally, it was the biggest September and also the biggest in sales that the shop has ever had."

A Texas clothier reported: "We made a special purchase of sport shirts and planned to use radio only as the advertising medium to sell them . . . By 3 p.m. on the day we made the on-the-air announcement (a 15-minute, noontime *Paul Harvey* broadcast), we had to remove stock from our window display to strengthen the store assortment which practically vanished that same afternoon.



RWG STRIKE THREAT

ALA to Set Up Committee

AUTHORS League of America, parent body of Radio Writers Guild, was reported last week as stepping into the strike proposed against NBC, ABC and CBS in order to set up a three-man committee which would request that all TV and radio scripts be withheld from the three networks.

Action, said to exclude writers with contractural commitments, was to be taken by the three ALA appointees: President Rex Stout, Erik Barneow, and John Hersey. Attorney Arthur Garfield Hays was named consultant for the committee.

A freelance committee, headed by scriptwriter Hector Chevigny, was also being organized to collect voluntary contributions from writers on both coasts for an RWG strike fund, intended to augment a compulsory assessment currently being voted on by mail.

Drawn for BROADCASTING • TELECASTING by Sid Hix

"As near as I can figure it, we have only four-hundred and ninety-nine thousand, nine-hundred and eighty-five dollars and twenty-six cents to go."

LETHEN APPOINTED

To CBS Radio Sales Post

EDWARD F. LETHEN Jr., who joined CBS Radio in September as an account executive on the network sales staff, has been named to the new post of director of sales extension, CBS Radio Network, W. Eldon Hazard, network sales manager, announced Thursday.

Before joining CBS Radio, Mr. Lethen had been with MacFadden publications for 16 years, serving as advertising director of True Story women's group of six magazines, in the same capacity for a five-magazine group, and as western manager of the Chicago office. The new director of sales extension had also been western manager for Dell Publishing Co. and space salesman for several newspapers and magazines.

Plans Spot Radio

KATHLEEN COURT Ltd., Hampton, Middlesex, England (Cooltan suntan cream), names Will Burgess & Co., New York, as its advertising agency. Plans for advertising schedule not definite as yet, but spot radio will be used, probably in four or five metropolitan markets beginning within 10 days and continuing through summer months.

Names Emil Mogul

RAYCO Mfg. Co., Paterson, N. J. (automobile seat cover manufacturer), has named Emil Mogul Co., New York, as its advertising agency. A budget of over $500,000 will be allocated for the rest of 1952. Radio, television and newspapers in key cities are currently being used in a copy and media test.

SINGER TO GREY

Federal to Dissolve

JULES B. SINGER, major stockholder and vice president of Federal Adv., New York, joins Grey Adv., New York, as vice president and member of the executive group, effective June 1, it has been announced.

Mr. Singer

Federal Adv. meanwhile will dissolve before that date. Gordon E. Hyde, president, and about half of the Federal employes have joined D'Arcy Adv. [B•T, April 21].

Mr. Singer, who handled The American Safety Razor Corp., Gem Razor and Blade and Every Ready Shaving Brush divisions, and Doeskin Inc., will bring the first account to Grey Adv. with him. The decision as to which agency will handle Doeskin is still pending but is expected to be announced soon.

Leaves FC&B Post

J. HUGH E. DAVIS, vice president and director of Foote, Cone & Belding, Chicago, joins Oakes & Co., Chicago hardware brokerage firm, today (Monday) in a general executive capacity to assist President L. L. Oakes. Mr. Davis was with FC&B eight years, joining the company as account executive on Pepsodent in 1944. Two years later he was elected executive vice president. During the past six years, he has handled much of the radio and television business, working with such accounts as Hallmark cards, Toni Co., Armour, International Cellucotton products, Frigidaire and Libby, McNeill & Libby. His work will be divided among several directors.

ANTELL BUYS

MGM Programs on MBS

CHARLES ANTELL Inc. last week undertook sponsorship of three hours of nighttime programs a week on MBS, with an additional two and a half hours of morning programs slated to start under its sponsorship today [B•T, March 31].

For its hair preparations, the company is sponsoring all of the MGM Radio Attractions programs which Mutual has offered to network advertisers, with the contract to run until these programs go off the air for a summer hiatus on June 28.

Starting today (Monday), Antell also is sponsoring two quarter-hour strips a day, from 9:30-9:45 a.m. and 9:45-10 a.m., Monday through Friday, also on behalf of its hair preparations. Agency is Television Production Assoc., New York and Baltimore.

It could not yet be determined, as of late last week, how many Mutual affiliates were carrying the Antell business. At gross rates for the complete network, billings on the entire package would approximate $80,000 a week, network spokesmen estimated.

FTC ORDER MODIFIED

Singles Out Tobacco Firm

AN ORDER by the Federal Trade Commission citing allegedly false advertising claims by American Tobacco Co. for Lucky Strike cigarettes has been modified to exclude the firm's advertising agency and others as party respondents.

The FTC announced last Tuesday that the order will be directed solely at American Tobacco in accordance with a stipulation filed in the U. S. Circuit Court of Appeals, Chicago. Company had asked the court to review the order but the petition was dismissed per the stipulation.

FTC's action in excluding the company's "officers, representatives, agents and employes" followed that of a similar case involving R. J. Reynolds Tobacco Co. (Camel cigarettes). The same court had ruled the commission has no authority to cite unnamed individuals without appropriate evidence [B•T, Feb. 11].

The advertising agency was not involved in any proceedings or identified in the complaint or order, an FTC spokesman said. Nor were any respondents named as such. Current agency for Lucky Strike is BBDO, New York.

Liquinet Plans

LIQUINET Corp., Chicago (hair preparation), has named Sherwin Robert Rodgers Agency to handle its advertising. Television will probably be used and radio is being considered. Mr. Rodgers is account executive.

POLITICAL LIBEL

THE BROADCASTER needs immediate protection from liability that he is in danger of incurring when his station airs a political talk.

This was emphasized before the Senate Subcommittee on Privileges and Elections last Thursday as it wound up its second and presumably final day of hearings on the radio-TV aspect in political campaign expenditures [B•T, April 21].

The subcommittee is looking into ways of streamlining election laws, including lifting of ceilings placed on the candidate or the party expenditure in a political campaign.

At the hearing's conclusion, Chairman Guy M. Gillette (D-Iowa) and Sen. Thomas C. Henning Jr. (D-Mo.) agreed with NARTB President Harold E. Fellows that the broadcaster is desperately in need of temporary legislation tailored for this election year.

Mr. Fellows noted that it would clear the decks for the broadcaster, who at the moment is concerned with an obligation to give equal opportunity to candidates, can not censor what the candidate might say, and yet can be held liable for what may be said.

Chairman Gillette thought this was "an intolerable situation. . . . It's becoming more so by a tendency of speakers to indulge in inflammatory and scurrilous attack."

Hennings Appointed

He appointed Sen. Hennings to head an investigation into what corrective legislation may be necessary to place both communications and printing media on the same par in regard to handling of defamatory political speeches.

Neither Mr. Fellows nor Col. William A. Roberts, of Roberts & McInnis, who represents the DuMont Television Network, thought it practical for a network to set aside time periods for political broadcasts only. Such a suggestion had been made a fortnight ago by subcommittee members.

Col. Roberts outlined the high costs of choice time periods on networks which are faced with the problems of clearing time with affiliates. Arrangements by networks must be made well in advance, he cautioned. But few candidates know until well nigh broadcast time just how much money they are going to spend, for what time and on how many stations, he explained.

He noted that the candidate is usually unable to tell just when his campaign may be getting "hot"—a time when he would need broadcast facilities—nor when it may cool—a time when he would be inclined toward cancelling commitments.

The well-financed party or candidate got in for some attention by Col. Roberts, who noted that the party that can buy the network with most prime affiliates gets the most coverage at the least per capita cost.

Another indeterminable factor is "bidding" by networks for time where cable availabilities are limited, the DuMont attorney said. The network which has control of "legs" on the cable gets the advantage and "the candidate is at a disadvantage," he said.

This points up, he said, that a network must be rich enough to sustain time for political broadcasts or must be able to get sponsorship. He said it would be impractical to set up a "straight jacket" over campaign expenditures—since an expensive campaign would have to be "supported with somebody's money."

DuMont tried so-called "block" prime time periods but it didn't work out satisfactorily, because (1) if time is given to one candidate it must be given to another, and (2) demand did not always come from the same people for the same period. Mr. Fellows agreed with this analysis, particularly in the local contest.

Also coming under attack by both Col. Roberts and the Senators present at the hearing was the radio or TV forum program. Implication was that it could be manipulated or rigged in favor of one political participant as against another. But all agreed that the forum device was more effective than a political campaign speech bought outright by the candidate or his party.

The libel dilemma has become so important in the broadcast industry, Mr. Fellows said, that "a majority of stations are scared to death of political broadcasts" because they might face libel suits for candidates' remarks.

Mr. Fellows said that a bill offering immediate relief for the broadcaster is that introduced in the House by Rep. Walt Horan (R-Wash.). The bill (HR 7062) would free the broadcaster from liability for material over which he has no control.

The NARTB president said his organization believed adoption of the measure "will make broadcasters in many states more ready to accept political broadcasts and to accept them at the usual rates of sponsored time." Thus the subcommittee's objective of "a more informed electorate" would be served, he said. At present, the Horan legislation pends before the House Interstate & Foreign Commerce Committee. Hearings have not been scheduled as yet.

Possibility of reserving time in advance for political campaigns, Mr. Fellows said, is more feasible in national campaigns than on the local level—he pointed to difficulty in forecasting advance program requirements, issues or personalities with demands for broadcast time varying as the campaign progresses.

He reminded the subcommittee that NARTB through its membership is promoting proper registration by eligible voters, to be followed by a "get out the vote" campaign before and on election day and calling on Congress to pass legislation to provide for a national election-day half holiday.

Majority of the stations in the nation charge the same rate for political time as they charge for regular sponsored time, with those stations charging special rates doing so because of increased ex-

(Continued on page 92)

Broadcaster Relief Urged at Hill Hearing

SEIZURE POWER

Truman Issues Denial

PRESIDENT TRUMAN last Thursday disclaimed the inference that he believes he has power to seize newspapers as well as radio stations.

The seizure threat had been made April 17 during a joint news conference with White House correspondents and members of the American Society of Newspaper Editors [B•T, April 21]. It followed a question by Col. J. Hale Steinman, co-publisher of the Steinman newspapers and co-owner of the Steinman radio and TV stations in Pennsylvania and Delaware.

At that time Col. Steinman had asked the President if he felt he could seize newspapers and radio stations, having already seized steel mills. The President had replied that under certain circumstances the President must act in the best interest of the country.

The statement led to widespread comment, mostly dealing with a new danger to freedom of expression. It led the American Newspaper Publishers Assn. to condemn the apparent threat to basic liberties (see ANPA story page 23).

At his April 24 news conference, the President denounced as a lot of hooey any idea that he believes he could seize newspapers and radio stations in an emergency. Asked if he had by statement or implication said he had any intention of seizing press and radio, Mr. Truman replied with a flat denial. In his April 17 statement, he said, he was speaking of the welfare of the country which is at stake in the steel strike. He added that the President actually has very great and inherent powers to meet a national emergency, but cannot tell what he is going to do until an emergency arises.

In congressional comment, Rep. George H. Bender (R-Ohio) said that the President's April 21 statement shows "he obviously has become aware of the apprehension throughout the country" created by the April 17 comment. Rep. Bender has introduced a resolution seeking impeachment of the President.

Fear that President Truman's government information policy, adopted last Sept. 24, was a threat to freedom of information and a form of censorship, continued last week to disturb editors and reporters.

On the other hand, Edward J. Trapnell, executive secretary of the Interdepartmental Subcommittee on Internal Security, said his agency requires federal agencies to prove that news they withhold would hurt national security. He said only one complaint had been received since his agency was set up Jan. 12. It came from Fairchild Publications and involved refusal by the Office of Price Stabilization to make available the minutes of industry advisory group meetings. Mr. Trapnell said he believed all information about the government must be "free and open" unless it would help the enemy and said the OPS had been overruled in its secrecy attempt.

Resolution proposing a Senate investigation to learn if censorship "is depriving the public of information to which it is entitled" was introduced Thursday by Sen. Blair Moody (D-Mich.), ex-newspaperman and radio commentator.

Sen. Moody proposed the Senate Committee on Government Operations name a subcommittee to study government information activities and effect of President Truman's security order. An advisory council of newsmen would be authorized.

ANPA Would Fight

DESPITE the President's assertion of Thursday morning that he had no intention of seizing broadcasting or the press, the American Newspaper Publishers Assn. Thursday night passed a sizzling resolution to "resist and defeat any attempted seizure by any President of the United States of the press or any member of the press."

The ANPA resolution was introduced by Maj. Gen. Julius Ochs Adler, general manager of the *New York Times*, which owns WQXR-AM-FM New York. Only four dissenting votes were cast, one of them by Mrs. Dorothy Schiff, owner of KLAC-AM-TV Los Angeles and publisher of the *New York Post*, who said she considered the President's original remark on the subject "facetious."

AP MEMBERSHIP

Full Status For Radio, TV Argued

FULL membership of radio and TV stations in the Associated Press was a debated subject at the annual AP membership meeting held in New York Monday. However, no definite decision was reached.

California AP members had resolved the previous week, it was disclosed, that stations be given regular instead of associate membership since many were fulfilling the board requirement of supplying as well as receiving news service, and that radio members be allotted a special representative on the board.

Annual board report, issued at the meeting and prepared by AP General Manager Frank J. Starzel, had indicated that news-supplying stations had increased to 537 during 1951, of which 239 outlets were located in communities where there are no newspaper AP members [B•T, April 14]. Association President Robert McLean further reported that two stations had declined membership until radio is represented on the board and stations have voting privileges.

One objection to radio membership was raised by C. E. Palmer, head of *The Texarkana* (Ark.-Tex.) *Gazette* and *News* and owner of KCMC-AM-FM Texarkana, who said that, although he owns stations, he believes the AP could make no greater mistake than by accepting them as full members.

"The number of newspapers is decreasing and the number of radio stations is increasing," he was quoted as saying, "and we would wind up with a radio organization."

The AP president reported that radio stations could not be accepted as full members by the board without a change in by-laws and that the association officers were hesitating until the best interests of the AP are known. The report, in fact, had said, "the board authorized the general manager to invite a group of news representatives of radio stations to meet with him to explore all matters that might contribute to the continuing improvement of the news report of the Associated Press."

Lauded Member Stations

Commending member radio stations for their aid in supplying news, the report also noted that some outlets provide news on a regular basis, some supply tips on fast-breaking events, and some cover news during hours when local newspaper members do not operate, notably important, it was said, for weekend coverage. The associate member radio stations were cited also as broadening the AP reach particularly for state news.

Radio stations mentioned individually for outstanding cooperation were KWIK Pocatello, Ida., which furnished 408 news stories used in the report; WDAY Fargo, N. D., which supplied 236; WWCA Gary, Ind., 217; WAVE Louisville, 150, and KDIX Dickinson, N. D., 119.

Election of AP officers resulted in the renaming of Mr. McLean of *The Philadelphia Bulletin* as president, a post he has held since 1938. Harold A. Fitzgerald of *The Pontiac* (Mich.) *Daily Press* was re-elected first vice president, and Clarence B. Hanson Jr. of *The Birmingham* (Ala.) *Sunday News* was named second vice president. Lloyd Stratton and Robert Booth were returned to their offices of secretary and treasurer, respectively.

Four new board members were named: John R. Reitemeyer, *Hartford* (Conn.) *Courant;* Richard W. Clarke, *New York Daily News;* W. H. Cowles, *Spokane* (Wash.) *Spokesman-Review,* and Nathaniel R. Howard, *Cleveland* (Ohio) *News.* Two board members re-elected were Benjamin M. McKelway of *The Washington Star* and Raymond L. Spangler of *Redwood City* (Calif.) *Tribune.*

Retiring directors are J. R. Knowland, *Oakland* (Calif.) *Tribune;* Paul Bellamy, *Cleveland* (Ohio) *Plain Dealer;* Arthur Hays Sulzberger, *New York Times,* and James E. Chappel, *Birmingham* (Ala.) *News.*

Guest speaker at the AP annual luncheon was Gen. Alfred M. Gruenther, chief of staff to Gen. Eisenhower at SHAPE headquarters.

STROMBERG-CARLSON

Station Sales, Earnings Up

BROADCASTING division of the Stromberg-Carlson Co. continues to increase overall sales and net earnings and "is now paying off handsomely," President R. C. Tait said in reporting on WHAM, WHFM (FM) and WHAM-TV Rochester at the company's annual stockholders' meeting Wednesday.

Stromberg-Carlson overall sales for the first quarter of this year were listed as $9,000,809, an increase of about 10% over the comparable period last year. First quarter earnings amounted to $248,191 or 65 cents a share on common stock, as compared to $243,113 or 63 cents a share for the same 1951 period.

Identifying the radio-TV situation as "still not good," Mr. Tait reported it as "far better" than it was at the corresponding time last year. A better fall market is anticipated by the company, with extra impetus expected from lifting of the TV freeze as well as public interest to be aroused by TV coverage of national elections. Stromberg-Carlson finished inventories, like those of its distributors and dealers, were reported as much lower.

Story on radio-TV aspects of ANPA Convention on page 23

WHEN Tighe Woods, director of rent stabilization, Washington, visited Kansas, he was interviewed by newsmen of KCMO Kansas City, Mo. Shown during interview are (l to r) Larry Whyte, KCMO; Mr. Woods; Harold Mack, KCMO, and Jim Monroe, KCMO news director.

INS' EXPANSION

Annual Report Outlines

INTERNATIONAL News Service has added 201 new clients in the past 12 months, "a banner year for INS and the greatest overall growth scored in any similar period," Seymour Berkson, INS general manager, said last week in his annual report to business executives of the news agency, in New York for the ANPA meetings.

With the addition of these new subscribers, Mr. Berkson noted, INS services now reach more than 2,700 outlets throughout the world, including radio and TV stations, newspapers, magazines and others. Citing the progress of the INS-Telenews newsreel, photo and wire coverage for television, he said: "We hold the dominant position as purveyor of newsreels and related news material for TV stations. Our TV coverage now reaches 81% of the nation's TV markets."

Recalling that INS and its newsreel associate, Telenews Productions, have held the top position in the TV news field since 1948, Mr. Berkson reported that "last July, INS inaugurated a new wire service for TV stations, tied in with the INS-Telenews daily newsreel film service. Together, the wire and newsreel film provided the first complete basic news service for television.

Scripts With Film

"The new teletype circuit transmits up-to-the-minute scripts for use with the newsreel film, giving it the impact of late pertinent news developments. It also provides summaries of the latest news to round out complete 15-minute newscasts for voice-casting by the local commentator on TV."

Mr. Berkson lauded Herbert Scheftel, Telenews president, "for his great vision and pioneering foresight which have played such an important part in launching and propelling the joint TV enterprise of Telenews and INS."

Attributing INS growth during the last year to a growing desire for "improved coverage of the news —and the news behind the news," Mr. Berkson said that in keeping with this "stimulating global expansion and increased demand for our news products, INS has steadily expanded and improved its news-gathering facilities.

"We have inaugurated a variety of new techniques of interpretive reporting designed to provide a background and significance of complex news events at home and abroad. We have also launched a highly successful new department called "For Better Living" which furnishes a steady flow of special items and articles of particular value to the typical American family, including food and household hints, home economics, mental hygiene, public health guidance, etc.

"In line with a policy of long standing, INS has continued to implement its regular news report with important news-features and circulation-building columnists. Of course, our great advantage in this respect is that we have under the INS banner some of the greatest writers and reporters of our time. This has enabled us to deliver to our clients not only distinctive coverage of world news but dramatic, exclusive feature material of prime public service interest and reader appeal."

International News Photos, INS' photo affiliate, has one of the most modern news photo plants in the world in its New York headquarters, recently completed at a cost of many thousands of dollars, Mr. Berkson said, adding: "INS is now in its 40th consecutive year of daily operation and it is still setting the pace for enterprise in the news photo field."

INP's Speedphoto Division, launched in 1950 for the transmission of police data by law enforcement agencies, now serves 24 city, state and federal organizations, including the FBI, Mr. Berkson reported. He said that the Speedphoto Transceiver developed by INP technicians especially for this use, was praised by the International Assn. for Identification as "the greatest advance in police communication since the advent of the teletype."

FLOOD FUNDS

Ad Council, Radio-TV Aid Red Cross in Emergency

ADVERTISING Council has enlisted the support of radio and television to help the Red Cross raise emergency funds to speed rehabilitation in the flooded Midwest.

Project was initiated by a telegram from E. Roland Harriman, American National Red Cross president, to all network presidents and to the Advertising Council. The wire outlined extent of the damage and the needs of Red Cross to aid flood victims.

Radio and TV networks responded immediately with pleas by media stars and by special announcements.

To spur emergency appeals, the Red Cross through the Advertising Council released 150 one-minute trailers and 150 sets of four flip cards for TV networks and individual stations.

Listed by the Red Cross as outstanding examples of cooperation were the April 16 CBS Radio broadcast by James T. Nicholson, Red Cross executive vice president, who discussed his tour of flooded regions and the April 17 John Edwards news broadcast on ABC radio.

Another programming highlight listed by Red Cross was its evacuation episode filmed in and around Omaha by *We the People* and telecast over NBC April 23.

Many Reports Received

Further reports of individual station efforts [B•T, April 21], the following have been received at deadline by BROADCASTING • TELECASTING.

KMTV (TV) WOW (TV) KBON KOIL KFAB KOWH, all Omaha outlets and KSWI Council Bluffs reported their coverage as follows:

KMTV (TV) issued flood reports on three regular daily newscasts, adding two extra shows per day. Two still-picture crews worked with four motion picture and TV camera crews at the Civil Defense station where dikes were weakest, at the bridge connecting the two cities, at the public power plant where there was danger of a flood-out, in Council Bluffs and in the air above the flood scene.

The station fed three remotes with Douglas Edwards to the CBS-TV network, and shot film for use on Edward R. Murrow's Omaha story feature on his *See It Now* telecast April 20.

WOW-TV sent out camera crews to shoot movie film and used most of its news time on three daily shows to air flood reports. The station set up a remote relay system from the top of the city's tallest downtown building, and made feeds to NBC-TV for *Today*, as well as for local shows.

KBON broadcast flood bulletins from three remote units. Most regular newscasts concentrated on flood news. KOIL spotted taped-interviews throughout its round-the-clock schedule, working closely with the sheriff's office.

KFAB foresaw the flood danger and began its reporting from the day the snow-swollen waters began their threat in Montana. At the flood's height, KFAB fed three stations and CBS Radio network at one time. When not on the air or sleeping, KFAB staffers aided the Red Cross and Salvation Army. The station also set up a temporary studio at Council Bluffs.

KOWN, an independent daytimer, went on the air 24 hours daily with special FCC permission, using tape interviews and live remotes to bring its listeners flood coverage. KSWI, another independent located across the river in Council Bluffs, maintained a broadcasting crew at the Mayor's office and fed news bulletins continually. Staff at the station was doubled to meet the emergency. KSWI reports that station's request for volunteer help brought people from within a radius of more than 70 miles.

Seven news and special events men from KMA Shenandoah, Iowa, reported flood conditions in a large non-metropolitan area not serviced by local radio stations or newspapers, station reports. Night and day warning system for residents of the stricken area was maintained by the station.

KELO Sioux Falls, S. D., news personnel spent April 4-6 on 24-hour duty during an overflow of the Big Sioux River to give descriptions of the scene and interviews on tape recorders, alert flood-threatened residents and relay instructions from the Red Cross and other agencies. In the following flood of the Missouri River, KELO newsmen described the scene from the air, made three network feeds April 11 and participated in a special NBC flood program April 14 [B•T, April 21].

KCOM Sioux City, Iowa, carried an exclusive broadcast in its region of the talk by President Truman from Offut Air Force Base, Omaha, during the President's aerial tour of the flood area. The station broadcast from the scene a story of the rescue of 37 persons in Woodbury County, Iowa, and halted by radio a perilous rescue mission for a pilot who crash-landed safely.

KCOM was forced to build a dike to save its transmitter and broadcast continuous flood information and messages for 34-hour period.

Sylvania Offer

Sylvania Electric Products offered last week to test and repackage tubes for its midwestern dealers and distributors whose stocks were affected by floods, with new cartons and sleeves for water-soaked tube stocks supplied free.

A 30-hour appeal beginning April 16 by WKRC-AM-FM-TV Cincinnati sent 50 tons of flood relief supplies and more than $3,000 to the adopted city of South Sioux City, Neb., one of the flood's hardest hit communities.

Station personnel flew by chartered plane to the flood scene and returned with pictures, reports, taped interviews and movies for Cincinnati airing.

WPTR Albany, N. Y., reported coverage of the flood as in two previous disasters, including two-way "beep" telephone recorded interviews with News Editor Carl

(Continued on page 93)

UP'S GROWTH

Reported at N. Y. Annual Meeting

UNITED PRESS is now serving more newspapers, more radio stations and more TV stations than at any time since its founding in 1907, Jack Bisco, UP vice president and business manager, stated last week at the annual meeting of UP executives, held in New York in conjunction with the ANPA convention.

★

An increase of 61 in the number of UP newspaper, radio and TV clients during the past year brings the total to 3,533, Mr. Bisco said, with about 300 additional special clients, 200 ships served by the UP subsidiary, *Ocean News*, and hundreds of foreign stations and papers getting up dispatches indirectly through their local news agencies.

"The new method of news distribution which has had its greatest development in the past year is the production of a daily newsfilm for television," Mr. Bisco stated. "This new live pictorial coverage of the news has just been well launched. By present standards, the cameramen and the newsmen who create this service are doing a remarkable job. Yet we are only at the beginning of this art. In time to come we expect to bring the TV screen and the spontaneous news event closer and closer together."

Earl J. Johnson, vice president and general news manager, noted that "the recent addition of a coast-to-coast news service for television [United Press Movietone News] and the acquisition of a newspicture service for newspapers [Acme newspictures, purchased Jan. 1 from NEA] means that we are now supplying the basic ingredients—news, still pictures and sound-tracked film—for every news medium that exists."

Pointing out that the "brisk volleying of ideas and viewpoints" among the various branches of UP service "enriches them all," Mr. Johnson said that this is now seen daily in major news centers. "At the national conventions this summer our news editors, still picture cameramen, writers for radio, UP Movietone camera crews and even those dispatching teletypesetter tape to newspapers will all operate from one headquarters in Chicago's Ampitheater."

LeRoy Keller, vice president and general sales manager, reported that UP now serves 51 of the 108 U.S. TV stations, up from 37 a year ago, including UP news service, newspictures and UP Movietone News.

Commenting on UP Movietone News, joint venture of UP and 20th Century-Fox Movietone, UP television manager William C. Payette said that this service was begun last October with seven clients, now has 25—23 in this country, one each in Cuba and Mexico. He estimated that UP's daily TV news film footage—averaging between 600 and 800 feet, 16mm, five days a week, enough for three quarter-hour news shows a day—is twice that of any other service.

Leased Wire For TV

In addition, he said, "UP operates a leased wire teletype network expressly for television. This assures stations of the latest possible developments in any story they are presenting. A second advantage is UP's way of delivering film news story by story. Each take of film is sent out as soon as processed. We do not wait to combine stories on a reel. This makes for the greatest possible speed."

Mr. Payette reported that a new film-processing center in Washington has been added to the original one in New York and that a third one will be opened in Chicago in July to develop and print the film taken by the ten UP Movietone News cameramen who are to cover the conventions for the service's TV station clients.

Reporting on the foreign situation, Joseph L. Jones, UP vice president and foreign manager, said that Japan's ten new commercial radio stations now get UP news. UP's Latin American subscribers now total 338 newspapers and radio stations, he said.

To circumvent the censorship imposed in Russia and the Soviet satellite countries, UP "maintains departments in Vienna, Frankfurt and London, manned by translators and editors, who monitor the radiocasts and comb the newspapers of the countries to which we are denied reportorial access," Mr. Johnson said. "Careful study of the press and radio of these countries frequently is a surprisingly useful source of information."

IN REVIEW . . .

THANKS to television, an estimated five million Americans saw at 12:30 p.m. last Tuesday the first public explosion of an atom bomb, dropped by an Air Force plane over the desert land of Yucca Flat, near Las Vegas, Nev.

Without the aid of the special dark glasses worn by newsmen and other spectators gathered at "News Knob," a mere 10 miles from the blast point, the home audience heard the call of "bomb away," listened to the counting of the seconds and saw the flash that, for a few seconds, blackened TV screens with a dark penumbra around the central point of light that was the blast.

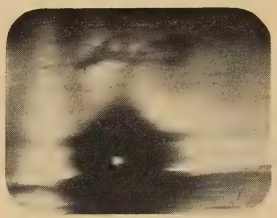
Like the TV engineers and construction men who performed a modern miracle in erecting a chain of mountain top relay towers to Los Angeles and AT&T's permanent radio relay system for cross-country transmission, the home viewers sweated out the minutes preceding the blast, when the pictures alternately disintegrated and became whole again.

The "bomb away" signal, clearly heard over the sound circuit, was illustrated on the country's TV screen by what might have been an abstract artist's portrayal of atomic warfare's horrors. Succeeding seconds intensified the anxiety. Then, a scant quarter-minute before the blast, the scene appeared with better clarity which held through the historic moment.

The picture of the atomic explosion itself was picked up by a TV camera atop Mt. Charleston, 9,000-foot peak about 40 miles from the blast site. The brilliant flash of atomic energy momentarily blackened the $1,500 camera tube, but did not destroy it, and a few minutes later the same camera covered for home viewers the atomic mushroom cloud as it rose into the sky.

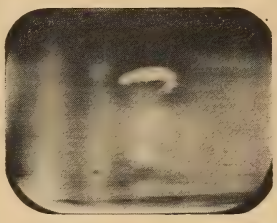
As soon as the flash was over, cameras at "News Knob" were brought into play for closer inspection of the target area as the radiological trucks went in to check the area's atomic "heat" and the infantrymen and paratroopers prepared to follow up the bomb as soon as the ground was safe.

Grant Holcomb, on Mt. Charleston, and Fred Henry, at Yucca Flat, announced the hour-long telecast, from 9 a.m. to 10 a.m. Pacific time (noon to 1 p.m. EST). The pooled program was carried by both the NBC and CBS TV networks, which also fed it to a number of non-affiliates such as WOR-TV New York. NBC also had newsreel films of the event on the air in a special late evening program starting at 11:15 p.m. EST, Tuesday.



The spectacular success of the telecast was due, in no small measure, to the efforts of all seven Los Angeles TV stations (KECA-TV KNBH (TV) KTLA (TV) KLAC-TV KNXT (TV) KTTV (TV) KHJ-TV) which pooled resources, including manpower and equipment.

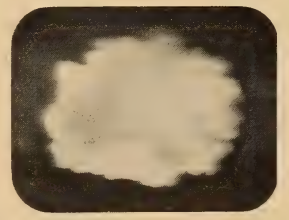
In an arrangement worked out by the Television Broadcasters of Southern California, Klaus Landsberg, vice-president and general manager KTLA, set up the technical facilities and completely supervised operations which networks accepted.



A special relay system, parts of which were flown into mountain tops by helicopter, were set up between bomb site at Yucca Flat and the stations' transmitters on Mt. Wilson overlooking Pasadena. The system had the longest relay points ever attempted in TV, two of them being 140 miles apart.

The "shot point" was covered by six TV cameras. Four were approximately 11 miles distant and two 40 miles from blast. Generators on four closest cameras burned out just prior to explosion, thus necessitating use of one of the other two for actual blast.

Immediately following detonation, lenses of the other cameras by then in working order, were uncapped to photograph and telecast clouds from blast and whatever else followed. Actual explosion, however, was covered by only one camera in case tube, burned out. All types of lenses, from 50 millimeter to 40 inches in size, including zoomars, were used.



The instant of the blast . . .

. . . a mushroom rises . . .

. . . the dust below . . .

. . . and a cloud rises.

* * *

Engineers Flown Food

Four pairs of engineers, with food flown to them by helicopter, camped atop the various snow-capped mountain relay points for several days prior to the explosion, guarding equipment to keep it in condition for moment's use.

Commentators for test, selected on pool basis, included aside from Mr. Holcomb, KNXT newscaster, and Mr. Henry, KLAC-TV program and special events director, Gil Martyn, KTLA newscaster, who handled audio narration for TV film coverage. Bob Ellison's KTTV newsreel crew, filming detonation for pool telecast, rushed reels to Los Angeles by jet plane for quick developing and release to stations that same evening.

Plans for live radio coverage of the explosion were hampered by the inability of Pacific Telephone & Telegraph Co. to connect its radio network circuits with the special Signal Corps communications hookup from "News Knob." NBC radio picked up the TV sound channel voice description of the dropping and explosion of the bomb, 12:28-12:33 p.m., preceded and followed by commentary from W. W. Chaplin, who was watching the TV picture of the event in a New York studio. Merrill Mueller at 1:30-1:45 p.m. broadcast a report of the bomb explosion utilizing taped excerpts of the earlier broadcast on NBC radio and at 2:15-2:30 p.m. NBC broadcast a special tape repeat of its noontime program.

MBS did a special advance program, midnight to 12:15 a.m., with Maj. George Fielding Eliot describing preparations for the atomic experiment. At 6:15-6:30 p.m., MBS broadcast a description of the actual blast, which was repeated on *Mutual Newsreel*, 7:45-7:55 p.m.

Dallas Townsend, CBS Radio special events man, taped his eye-witness description of the blast, which was broadcast from Las Vegas on the network, 4:15-4:30 p.m. Lowell Thomas, also an on-the-scene observer, did his 6:45-7 p.m. CBS Radio broadcast from Las Vegas. ABC radio broadcast a taped description of the bomb blast at 4:45-5 p.m.

Another TV atomic first was scheduled for yesterday (Sunday) at 1:30 p.m. when *American Inventory*, American Medical Assn. series on NBC-TV, was to originate at Brookhaven National Lab. atomic energy plant at Upton, Long Island. Telecast, done "live" from the medical division of the laboratory, was designed to show the use of radioactive isotopes in medicine.

Program: First public atomic bomb explosion: on NBC-TV and CBS-TV, and non-network TV affiliates, taped broadcasts by radio networks TV newsreel coverage; Tuesday, 9-10 a.m. (PST); from Yucca Flat, Las Vegas, Nev.
Technical Supervisor: Klaus Landsberg, KTLA (TV) Los Angeles; arrangements by Television Broadcasters of Southern California.
Facilities: Pooled by seven Los Angeles TV stations.
Commentary: By Grant Holcomb, KNXT (TV); Fred Henry, KLAC-TV; Gil Martyn, KTLA (TV) Los Angeles.

LOYALTY PLAQUES

VFW Honors Radio-TV Shows

SIX loyalty award plaques for "commendable public service" were announced for radio and television programs last week, with the awards to be made for the first time this year by the Veterans of Foreign Wars in conjunction with their Loyalty Day Celebrations May 1.

Tales of Tomorrow on ABC-TV, produced by Foley & Gordon and sponsored by Jacques Kreisler Mfg. Corp. through Hirshon-Garfield and by C. H. Masland, through Anderson & Cairns. Award for helping to broaden knowledge and understanding of modern science.

Forward America, World Broadcasting System series produced by Herbert Gordon and currently playing in 476 markets. Honored for instilling a deeper pride in the American heritage.

Sunrise Serenade, WOR New York, produced by Bill Taylor, sponsored by Junex and Radio Bargain Guild through Harold Kay, by Littleton Stamp Co. through Schwab & Beatty; and—once weekly by ideal film, through Ted Nelson Assoc. Cited for building understanding of American way of life through music, news and prayers.

Life Can Be Beautiful, NBC radio, produced by Art Richards, sponsored by Procter & Gamble through Benton & Bowles. Honored for showing true picture of American Life, based on fair play, mutual respect and understanding.

Perry Mason, CBS Radio, produced by Carl Eastman, sponsored by Procter & Gamble through Benton & Bowles. Awarded for depicting problems menacing the nation and showing how citizens can combat them.

Magic Cottage, WABD (TV) New York, key station of DuMont network, producer of the program which is sponsored Mondays by Good Humor through Grey Adv. Honored for instilling in children an appreciation of the basic American principles of truth, unselfishness and mutual respect.

Stuart K. MacNiven

STUART K. MacNIVEN, 57, administrative assistant to President James H. S. Ellis, Kudner Agency, New York, died last Wednesday in New York after a long illness. He had been with Kudner for 17 years, beginning at the time the late Arthur Kudner founded the agency. Surviving are his wife, Mrs. Ruth Fitch MacNiven and two sons, Thomas and Richard.

1951 Iowa Radio Audience Survey reveals important trends in PROGRAM PREFERENCES!

In comparing Iowa's "best-liked" types of radio programs in 1951 with those of 1947, 1948, 1949 and 1950, the 1951 Iowa Radio Audience Survey* highlights several important trends which might well influence your radio plans.

Here, in capsule form, is the five-year comparison for 16 program types:

MEN	1947 Survey	1951 Survey	WOMEN	1947 Survey	1951 Survey
News broadcasts	80.4%	87.1%	News broadcasts	72.1%	79.9%
Featured comedians	71.5	62.0	Featured comedians	66.3	57.6
Popular music	39.9	48.5	Popular music	44.7	51.4
Sports broadcasts	38.7	47.4	Audience participation	47.4	49.4
Audience participation	41.7	41.0	Complete drama	43.1	38.4
Market reports	25.2	30.6	Religious music or devotionals	28.5	28.2
Oldtime music	23.2	29.7	Sports broadcasts	16.6	27.4
Complete drama	32.7	28.2	Serial drama	30.5	26.7
Variety programs	29.5	20.6	Oldtime music	19.5	21.9
Religious music or devotionals	17.4	18.4	Variety programs	32.3	21.3
Talks, comment	20.5	16.4	Homemaking programs	18.2	18.8
Band music (brass)	14.5	15.3	Market reports	12.8	16.1
Talks on farming	17.0	14.3	Talks, comment	15.0	15.0
Serial drama	15.2	12.3	Classical music	20.7	14.6
Classical music	16.1	9.5	Band music (brass)	13.2	13.4
Homemaking programs	4.3	5.4	Talks on farming	8.8	8.3

Note the growing popularity among both men and women of news and sports broadcasts, popular music, market reports and oldtime music. And notice the substantial decline in popularity of featured comedians, complete and serial drama shows, classical music and variety programs. In almost every case the trend is consistent, year after year, indicating a definite pattern rather than a temporary shift in preference.

You'll find the 1951 Iowa Radio Audience Survey one of your most valuable reference books. It's packed with authentic, up-to-date information. It is one of America's most dependable radio studies. *Write us for your copy, today! — or ask Free & Peters!*

The 1951 Survey proves again that WHO continues to be your best radio approach to the Iowa market. With its 50,000-watt, Clear Channel voice, its top-grade programming and its enlightened Public Service attitude, WHO is Iowa's greatest radio outlet — listened to by more Iowans night and day than any other station in the State.

National Representatives

*The 1951 Iowa Radio Audience Survey is the fourteenth annual study of radio listening habits in Iowa. It was conducted by Dr. F. L. Whan of Wichita University and his staff. It is based on personal interviews during March and April, 1951, with 9,180 Iowa families—all scientifically selected from Iowa's cities, towns, villages and farms, to present a true and accurate picture of the radio audience in Iowa.

CONVENTIONS

ABC, MBS Set Coverage

EXCLUSIVE services of news and editorial personnel of *Newsweek* magazine in covering political conventions this summer have been contracted for by ABC network, Thomas Velotta, network vice president supervising the political reports, announced Thursday.

Newsweek editors will present their own reports, making individual as well as panel appearances on both ABC radio and television networks during the Republican and Democratic conclaves, to be sponsored on the network by the Admiral Corp. Participating in what Mr. Velotta described as "the most comprehensive, colorful and authoritative coverage of the conventions possible" will be the following:

Ernest K. Lindley, chief of *Newsweek's* Washington Bureau and the news magazine's political authority; Kenneth Crawford, editor of national affairs; Chet Shaw, executive editor; Raymond Moley, contributing editor who specializes in political analyses, and Sam Shaffer and Vera Clay of the *Newsweek* Washington Bureau.

Entire news staff for ABC-AM-TV convention coverage, to include almost all of the network's top men and women reporters, commentators and analysts, will be headed by Paul W. White as managing editor.

Mutual also announced last week that all its commentators will be in Chicago as part of the extensive, special broadcasts emanating from the convention scene.

Plans and procedures are under the direction of William H. Fineshriber Jr., MBS executive vice president, with Milton Burgh and Arthur Feldman, network directors of news and special events, respectively, working out program details.

MBS reporters on the convention floor will use shortwave transmitters as they did in 1944 and 1948. A mobile unit with additional equipment will be used for programs just outside the convention amphitheatre. Installations are being supervised by Carl Meyers, MBS chief engineer in the midwest.

NPA Names Jordan

APPOINTMENT of Paul H. Jordan as deputy assistant administrator for public information at the National Production Authority was announced by Assistant Administrator Edward K. Moss. Mr. Jordan, former regional director of the Office of War Information, joined NPA in January 1951 as director of its field information division. He has been serving as acting deputy administrator for four months and is responsible for making information available on defense production for NPA and the Dept. of Commerce.

IN APPRECIATION for WFIL Philadelphia's "three decades of broadcast service," the city's Chamber of Commerce presented an achievement award to the station. Attending ceremonies were (l to r): Fred Webber, WFIL promotion department; Kenneth W. Stowman, TV sales manager; Louis E. Littlejohn, chief engineer; Roger W. Clipp, general manager of WFIL-AM-FM-TV; Brig. Gen. Hugh B. Hester, C. of C. executive director; Col. J. Harry LaBrum, C. of C. president; Harold Simonds, local sale manager for WFIL; Jack Steck, manager of programs and production, WFIL-TV, and Jack Schantz, radio engineering supervisor. Combined experience of WFIL staffers totals 217 years.

AM SPEED-UP

Nearly 100 Applications Fall in Line I List

SPEEDUP plan for AM processing line, proposed by the FCC two weeks ago [B•T, April 21], should not raise false hopes in the breasts of AM applicants eligible for Line I listing, according to FCC sources conversant with the plan.

Although the Commission's plan is based on preferential treatment for those AM applicants proposing to bring AM service to a community which does not now have a station, or to cover areas not now receiving primary service, nearly half of the current 200 applications on the AM processing line would fall into that category, it was learned.

Thus, if an applicant is No. 100 on the present processing line, he would become No. 50 on the new Line I list, it was pointed out.

Commission's plan, which was given impetus by a number of petitions for some such priority treatment filed during the past six months [B•T, Jan. 21; Nov. 12, 1951], proposes to set up two processing lines for AM applications.

Components in Lines

Line I would include applications proposing first service to cities or towns, or first service for "white" areas (i.e., unserved areas). Unserved area was specified in the Commission plan as one in which 25% of the territory is not now getting primary AM service, day or night.

Line II would include all other applications—mainly those for stations in communities already having such facilities, or improvements of existing facilities which would not bring service to unserved areas. There would be no activity on Line II applications until Line I was completed, or current, the plan proposed.

Commission asked for comments on plan by May 12.

Most AM applications are considered simple cases, according to FCC sources. Therefore, Line I applications should move along fairly speedily, it was thought.

In an endeavor to cope with the avalanche of AM applications filed with the FCC following the end of World War II, the Commission established a temporary expediting procedure in 1947. The Commission refused to accept any application filed after Feb. 7, and did not reopen its processing lines to new applications until after May 1 of that year. During that three-month period, the FCC staff was solely engrossed in processing those applications on file prior to Feb. 7.

When the Commission's May 1 deadline was reached, it found itself current on AM application processing.

At one time, several years ago, the Commission's AM processing line was divided into two: applications with simple engineering problems and those with more complicated engineering factors.

However, for the past year or more there has been only one processing line.

One of the problems with the present processing of AM applications is the number of times some applications have to be reprocessed. Some applications are filed, designated for hearing, amended out of hearing, reprocessed, found to involve interference with other stations and reset for hearing, it was explained. "It's a regular merry-go-round," sighed one FCC attorney who works on AM applications.

Back in 1950, AM applications were being processed in 45 to 60 days, it was pointed out. Today it takes about a year.

The average age of the most recent applications studied in November 1951 was eight months, in December nine months, in January nine months, in February 10 months, in March 10½ months.

U.S. AGENCIES

Defense Role Ordered

PRESIDENTIAL executive order has set in motion wheels of civil defense activities of federal agencies—including the FCC.

Order issued April 18 requests each federal agency to prepare plans for (1) providing its personnel and services in the civil defense program, and (2) maintaining the "continuity" of its functions "at the seat of the government and elsewhere" if needed.

Meaning to the FCC is this, according to best information: (1) FCC is now officially a coordinating agency respecting the use of the radio spectrum, (2) use of its monitoring services by the military services and other government agencies is now legalized.

Plans for the continuance of FCC functions in Washington have been drawn up, as have specifications in case of forced government decentralization. Whereabouts of FCC's location in case it has to move out of Washington is classified information.

Among other activities, the Commission started this week with first aid instruction for some of its personnel. They are to be trained as instructors and will teach other groups subsequently.

Acting as civil defense coordinator is Harland R. Morris, assistant chief, Accounting System Division, Office of the Chief Accountant.

SWG WAGE BOOST

WSB Approves New Contract

INCREASES in minimum rates recently negotiated between Screen Writers Guild and major film producers were approved last Monday by the Wage Stabilization Board. Under terms approved, minimum compensation for writers will be retroactive to Feb. 26, 1951, effective date of SWG's eight-year agreement with the producers.

Weekly minimum salary has been established at $250, with flat deals set at $2,000 for pictures budgeted under $100,000 and $3,000 for those with budget over that sum.

WQXR BUSINESS

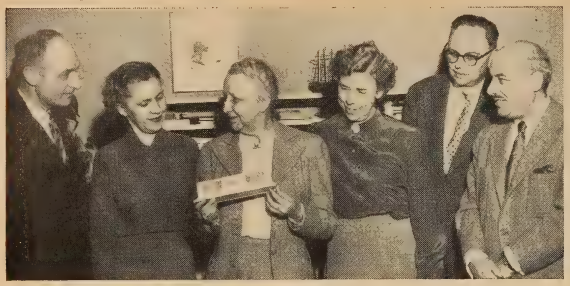
Sales 8% Higher in March

INCREASE in radio time sales in an upward spring trend was tabulated for WQXR New York last week by Norman S. McGee, vice president in charge of sales. He explained sales were 8% higher during March of this year than for the corresponding 1951 period.

The trend has continued through the first half of April, Mr. McGee said, with long-term advertisers returning to the air, new clients signing, and current advertisers extending spot campaigns to full program sponsorship. These accounts are in addition to the new clients added to WQXR participation programs designed as weekday broadcasts for theatres, restaurants and clubs.

Election Extra for Station Managers

GALLUP POLL PROGRAM ON RADIO!



■ A syndicated radio series featuring Dr. George Gallup, Director of the famous Gallup Poll, interpreting day-by-day opinion trends on the election and conventions is available on a market-to-market basis.

■ Five minutes a day, six days a week, starting May 5th for 26 weeks. Recordings on tape or acetate.

■ Will be carried by WCBS New York; WCAU Philadelphia; WTOP Washington, etc.

■ Wire today for prices and availability in your market.

GEORGE F. FOLEY, JR.
Foley and Gordon, Inc.
9 East 45th Street,
NEW YORK 17, N. Y. ■ MU 7-5354-7

JUDITH WALLER, NBC Chicago director of education and public service (third from l), receives a watch on her 30th anniversary in radio which coincided with 30th birthday for WMAQ Chicago. Miss Waller was station's first manager. Six NBC employes pictured whose tenure with the network is 146 years of service are: (l to r) T. E. Schreyer, engineering operations supervisor, 26 years; Mary Kelly, talent sales secretary, 21 years; Miss Waller; Lillian Mack, radio spot sales secretary, 22 years; M. W. Rife, field engineering supervisor, 23 years, and Joseph Gallicchio, music conductor, 24 years.

BMI CLINICS

Spring Series Begins; Speakers Listed

BMI spring series of field program clinics—43 meetings in 38 U. S. and five Canadian cities—got started last Thursday in Calgary and will conclude May 16 in Toronto, giving Canada the distinction of both opening and closing the 1952 series.

Covering every aspect of station programming, each clinic will feature talks by members of 11 traveling teams of speakers chosen from a pool of 37 broadcasting executives. Local broadcasters also will address the clinics and BMI officials will accompany the traveling units, which will be joined by BMI field representatives in their respective territories.

A total attendance of some 5,000 radio men and women is expected for the 1952 clinic series. More than 3,000 attended the 1951 series of 37 meetings.

BMI officials accompanying the teams include: Carl Haverlin, Sydney M. Kaye, Robert J. Burton, Charles E. Wall, Roy Harlow, Glenn Dolberg. BMI field representatives who will attend meetings in their areas include: Al Marlin, James Cox, Ken Sparnon, Lin Pattee, Burt Squire, Dorsey Owings, Ralph Wentworth, Bob Fuller.

Clinic schedule follows:

Phoenix, Ariz., and Owensboro, Ky., April 28; Hollywood, Nashville, Tenn., and Charleston, W. Va., April 29; Battle Creek, Mich., and Sioux Falls, S. D. April 30; Omaha, Salt Lake City and Richmond, Va., May 1; Little Rock Ark., Denver, Boise, Ida., Raleigh, N. C., and Columbus Ohio, May 2; Jackson, Miss., May 3; Wichita, Kan., Alexandria, La., Baltimore, Milwaukee and Vancouver, May 5; St. Louis, Atlantic City, Columbia, S. C., and Seattle, May 6.

Des Moines, Minneapolis, Oklahoma City and Portland, Ore., May 7; Gainesville, Fla., and Syracuse, May 8; San Antonio, San Francisco, Chicago, Boston and Regina, Sask., May 9; Athens, Ga., May 10; Montgomery, Ala., and Augusta, Me., May 12; St. John, N. B., May 14, and Toronto, Ont., May 16.

COLUMBIA INSTITUTE, Philadelphia, announces inclusion of Theatre Arts Institute into its School of Radio Broadcasting. Charles Cooper will head new unit, assisted by Doris Jacobson, dean of Columbia Radio School.

GUILD THREAT

WMCA Sponsors Notified

NEWSPAPER GUILD, on behalf of its unit at WMCA New York, last week sent letters to station advertisers asserting that imminence of a strike, over a contract sought since last July, might warrant discontinuance of advertising there.

Explaining "the pressing situation," the guild said that the WMCA unit had strike authorization, plus "all-out support of officers and 7,000 guild members in New York to obtain a satisfactory contract." The WMCA unit, composed of off-mike employes, initially sought a 10% wage increase across-the-board and subsequently lowered their demand to 5%.

The labor organization urged WMCA advertisers to make themselves acquainted with the situation, to urge the station to deal fairly with its employes, and, in case of a strike, cancel advertising.

"WMCA, since the inception of negotiations, has consistently held to the point that we're prepared to meet salary inequities as compared to pay scales at competing stations," M. M. Fleischl, vice president and general manager, said Wednesday.

Declaring that WMCA is ahead of competitors in wage scales, Mr. Fleischl said his station's policy had long been not to give an across-the-board increase, since it took no consideration of various job functions.

Mr. Fleischl said that the Newspaper Guild has repeatedly asserted that WQXR pays more. But, he noted, WQXR is owned by *The New York Times,* which can be affected by the Newspaper Guild on other bases.

FCDA

Annual Report Lauds Aid Of Radio, Television

EXPERIMENTS in closed circuit theatre TV by federal civil defense planners have proven "eminently practical, psychologically powerful and limited in utility only by the number of properly equipped theatres," President Truman and Congress were told last week.

★

In its annual report to the Chief Executive and Capitol Hill, released Thursday, the Federal Civil Defense Administration praised theatre TV as well as regular television and radio for their roles in educating the public on civil defense.

Plans now are underway to conduct a third closed circuit video demonstration on the Eastern Seaboard and eventually to extend this medium to 15 key cities. Two tests already have been held, covering selected theatre audiences in New York, Philadelphia, Washington, Baltimore and Boston. A survey of reactions will soon be released.

"The purpose of the project was to ascertain whether this new medium could be effective in the training or orientation of civil defense volunteers," FCDA explained. Since the first of the year, agency officials have acknowledged efficacy of the tests.

Harold Azine, TV chief, FCDA Audio-Visual Division, estimates the agency can train some 35,000 people in a one-hour program involving two-way communication for $7,000—or roughly 20¢ per seat. Cost of producing the program (buying creative and director services) runs between $1,200 and $1,500. Some 75 theatres in 35 communities are now equipped with closed circuit facilities.

Radio, TV Praised

Regular radio and television also came in for a kind word in FCDA's annual report, as did newspapers and magazines.

NBC was lauded for contributing $100,000 in air time to the seven-program series *Survival* last summer, with government cost of only $1,607 covering production. Kinescopes of the series were also shown to NBC affiliates in 40 cities. Last December, 19 units of the series were distributed for routing to 64 TV cities, reaching 40 by December 1951.

"This distribution was a pioneer undertaking, having for its goal maximum coverage of critical cities serviced by television," the report said.

FCDA also cited preparation of short films and slides and appearances of leading agency officials on NBC-TV's *Meet the Press* and *Battle Report—Washington;* DuMont's *Pentagon—Washington,* and CBS- TV's *Facts We Face.*

A voluntary recruiting kit containing radio-TV scripts was prepared for FCDA by the Advertising Council and distributed early this year.

"Radio provided an important channel for dissemination of civil defense information to the American people," the report acknowledged. This cooperation took the form of radio script kits, totaling 32 pages each of spot announcements, dramatic vignettes and background data, plus three transcriptions. These were sent to 2,900 radio stations.

The report also noted other cooperation by the Advertising Council, with FCDA working through its network and regional radio spot allocation plan. FCDA also arranged for announcements on four major networks, with this breakdown: NBC, 28 programs; MBS, 22; CBS, 27, and ABC, 23. CBS also aired a five-program series on civil defense publications.

Additionally, officials appeared on 28 programs of those networks plus LBS and regional hookups. Commentators and newsmen also were commended for using material in their broadcasts.

Added the report: ". . . civil defense has continued to get unparalleled cooperation from all mass information media—newspapers and magazines, radio, television, advertising and motion pictures. As a result, the American people are today far better informed about civil defense and self-protection than they were a year ago . . ."

It was estimated that 87% of the people in major cities have basic knowledge of self-protection.

RCA FELLOWSHIPS

Eight Receive Grants

EIGHT pre-doctoral graduate students of outstanding ability in studies related to radio, television and electronics have received fellowship grants ranging from $1,600 to $2,700 from RCA, Dr. C. B. Jolliffe, vice president and technical director, announced Wednesday.

Fellows are Theodore M. Sanders Jr., New York, a Columbia student; Arthur E. Wennstrom, Los Angeles, Princeton; Edward W. Schwarz, Springfield, Ill., graduate at the U. of Illinois; Charles C. Peterson, Summit, N. J.; Cornell, and Hardy C. Martel, Pasadena, CIT. Engineering employes selected for fellowships are Leslie L. Burns Jr., Princeton, graduate studies; Bernard A. Coler, Rahway, N. J., for Harvard, winning for the second consecutive year, and Kenneth R. Deremer, Princeton Junction, N. J., for further studies at Princeton.

WCUE Asks Fulltime

WCUE Akron last week filed an application with the FCC requesting permission to change from daytime to fulltime operation on its present frequency of 1150 kc. It asked for 1 kw day, 500 w night. Edwin T. Elliot, station president, said the decision to go fulltime is "based on a firm belief in the vitality of AM broadcasting and a healthy confidence in its future."

Summer time an' the listning is easy - - -

*Fish are jumpin', an' the cotton is high!"**

All up and down the Gulf Coast of Texas and Louisiana millions (the '50 census says four millions) of folks take to the out-of-doors for their work or play. On the highways and byways millions of cars and trucks travel all hours of the day for business or pleasure—big boats and little boats ply the bays and the bayous —parties gather on the beaches and in the ranch cabins—AND *EVERYWHERE* YOU GO THERE'S *RADIO*.

Yes, the list'ning is easy and they all have money to spend. Let KTRH Radio sell your products or services in this big market. Just call a John Blair man unless you live in Houston, in which case we'd be delighted to visit with you in person.

*with apologies and thanks to Gershwin's "Porgy and Bess"

O'Neil MBS President

(Continued from page 23)

pertly during his time with us remains intact."

Mr. Fineshriber, Sales Vice President Adolf N. Hult; Station Relations and Engineering Vice President E. M. Johnson; Advertising, Public Relations and Research Vice President Robert A. Schmid; Secretary and Treasurer James E. Wallen; Controller George R. Ruppel, Assistant Secretary Elisha Goldfarb "and their capable staff," he said will "all remain."

Mr. White, in his closed circuit talk to affiliates, said his decision to resign "was a most difficult and trying one." There were "considerations on both sides," he continued, "which have blocked Tom and me in our many friendly talks."

He did not specify, other than to say that "my decision was based in no part upon any lack of confidence in the future of Mutual or dissatisfaction with the people for whom and with whom I have worked."

There were continuing reports, despite lack of explicit confirmation, that Mr. White had been offered a subordinate post in the organization under Mr. O'Neil.

Mr. O'Neil told the affiliates that "I would have liked nothing better than to tell you Frank White was staying with us," but that "a man's choice of his work to me is just about as personal as his choice of a wife, and while I regret Frank's decision I can't quarrel with it." He said that "in his leaving I feel the loss of a top operating officer" who fortunately . . . remains a friend of all of us, and I wish to take this opportunity of expressing complete confidence in, and best wishes for, his continued success."

Mr. O'Neil continued:

"It is a tribute to Frank White's effective ability as an organizer that the competence of the staff is so great that changes at the top will not dull their effectiveness. As hard as this event was to accept, I assure you that Mutual will continue its advance—we hope without substantial loss of the momentum that Frank has given it.

"This unexpected change doubles me into the position of chairman and president. I hope that I may have your continued support, cooperation and indulgence."

In his final report to the board, Mr. White noted that Mutual's gross billings for the first three months of this year were at the highest point in three years, showing an 11.1% increase over those for the first quarter last year. He also cited latest Nielsen measurements as showing that Mutual's share of audience is up this year over last, reversing the general industry trend.

He said his "tenure at Mutual has been an immensely happy and gratifying one, and it is particularly pleasing to me to know from Tom that the basic policies under which we have worked will be continued." He also told the affiliates:

"The full measure of the satisfaction that I have experienced in my work for the last three years can only be realized if Mutual continued its solid progress in the future. I know intimately the members of the board, Tom O'Neil and the whole Mutual staff. I know that they have the high competence and the desire necessary to continue progress. I hope that they may have from all of you complete cooperation and support. If I am entitled to any favors or good wishes from you, that is the way I would like them expressed."

Mr. White praised the cooperation of MBS affiliates, and, asserting that "the basic operating plan which has been developed at Mutual is receiving widespread recognition throughout the industry," declared that "I am confident that Mutual's role in the network picture will be an increasingly important one."

Mutual officers re-elected were Messrs. O'Neil, Fineshriber, Hult, Johnson, Schmid, Wallen, Ruppel, and Goldfarb and Emanuel Dannett, assistant secretary.

Board members re-elected, all of whom attended the meeting, were Mr. O'Neil, chairman; Elbert M. Antrim, WGN Chicago, vice chairman; Willet H. Brown, Don Lee; H. K. Carpenter, WHK Cleveland; Benedict Gimbel Jr., WIP Philadelphia; J. R. Poppele, WOR; Frank P. Schreiber, WGN; Theodore C. Streibert, WOR; Linus Travers, Yankee Network, and Mr. Wallen, Mutual.

Principals in Mutual Top Executive Changes

Thomas Francis O'Neil

ALTHOUGH a comparative newcomer to the broadcasting industry, Thomas Francis O'Neil brings to the MBS presidency a sound business background. Without previous radio experience, Mr. O'Neil joined the Yankee Network in December 1947 as vice president and director. His ascent has been rapid.

Youngish Mr. O'Neil (who was 37 on April 18), was born in Kansas City, Mo. After 1937 graduation from Holy Cross, he joined the General Tire & Rubber Co., which had been founded by his father.

Wanting to be more than simply the boss' son, Mr. O'Neil began his business career near the bottom rung of the ladder. After working for General Tire & Rubber in sales, he was sent to Washington to handle government contracts. Thereafter followed four years in the U. S. Coast Guard.

Mr. O'Neil also is president of Thomas S. Lee Enterprises Inc., which is owned 90% by General Tire and 10% by Macy's. Lee Enterprises is composed of the Don Lee Network, the Yankee Network and WOR-AM-FM-TV New York. In addition, Lee Enterprises owns 58% of MBS.

Back from the war, he rejoined General Tire & Rubber in Boston. It was while there that he entered the radio industry in 1947. In February 1948, he became a member of the MBS board of directors, subsequently becoming chairman. In addition, he is a vice president of General Tire & Rubber.

* * *

Frank Kiggins White

FRANK KIGGINS WHITE succeeded Edgar Kobak in the MBS presidency May 1, 1949, almost exactly three years ago. Today, at 52, he can look back on his 15 years in radio with a sense of pride.

Born in Washington, D. C., Mr. White attended George Washington U. there until he enlisted as an aviation cadet in World War I. After the war, he began a business career which took him steadily toward the top.

From 1929 to 1935, Mr. White was treasurer of the Literary Guild of America. He joined CBS in 1937 as treasurer, was made a vice president and treasurer in 1942, and became a director in 1944.

In addition to his reputation as an excellent administrator, Mr. White has won acclaim as a mediator. For seven years at CBS, he handled important labor negotiations. He has also served on the NAB (NARTB) Employer-Employe Relations Committee.

In January 1948, he became president of Columbia Records Inc. Probably his most celebrated accomplishment in this post was as spokesman for the industry in the settlement of the AFM record strike that year. Mr. White remained with Columbia records until he joined Mutual.

* * *

William H. Fineshriber Jr.

WILLIAM H. FINESHRIBER Jr., 42, who last December was elected MBS executive vice president, will make his presence felt as a member of Mutual's board of directors. He has spent 20 years in various fields of the broadcasting industry.

Mr. Fineshriber

A native of Davenport, Iowa, Mr. Fineshriber was graduated *summa cum laude* from Princeton U. in 1931. After a trip to Europe, he turned down an offer of French instructor's post at his alma mater in favor of accepting a publicity post with CBS. He left CBS in 1949 to join MBS. He is well-known in the industry for his work with the Program Executive Committee of NARTB (then NAB).

SEC Sets Panel

TED COTT, NBC vice president; Douglas Leigh, president, Douglas Leigh Inc.; Frank Mansfield, sales research director, Sylvania Electric Products, and Arthur H. (Red) Motley, president, Parade Publications, make up a four-expert panel which will discuss "Fact-Finding and Merchandising That Make More Sales" at tomorrow's (Tuesday) luncheon of the Sales Executives Club of New York at that city's Roosevelt Hotel.

"FREEZE" OR "THAW"

YOU CAN ALWAYS CROSS NETWORK LINES

WITH SPOT PROGRAM TELEVISION

Right now, there are 23 markets with two or more television stations. In each of these markets, the Spot Program advertiser can and does cross network lines—to clear more stations . . . to get a preferred time period . . . to make a better buy. For in television, just as in radio, no one network has a monopoly on the best stations, in all markets, at all times.

And when newly-authorized station construction takes place, the prime beneficiary will be the Spot Program advertiser.

The thaw will create *more* multiple-station markets where the Spot Program advertiser can pick the "best" station, regardless of network status or affiliation.

And there will still be markets where 2, 3 or 4 networks share the same station—where network advertisers will have many of the same problems on time clearances and kinescope picture quality which now exist.

Spot Program advertisers will still be free to select as many or as few markets as they wish—unhampered by any network-imposed minimum station requirements.

Yes, any way you look at it, any time you look at it . . .

YOU CAN DO BETTER WITH SPOT . . . MUCH BETTER

THE KATZ AGENCY, INC.

NATIONAL ADVERTISING REPRESENTATIVES

488 MADISON AVENUE · NEW YORK 22, NEW YORK · CHICAGO · DETROIT · LOS ANGELES · SAN FRANCISCO · ATLANTA · DALLAS · KANSAS CITY

To a time buyer with no time on his hands

Your crowded day consists of crowded hours . . . and if the day isn't long enough you crowd some night hours. All day long you run into characters talking off the top of their heads, throwing it on the table for what it's worth, willing to pool their brains, thinking out loud, but who won't buy it. When you get the bugs ironed out after suitable woodshedding, the ball is back in court, money-wise, and you're tuned in on the right antenna. But before plans are finalized, the thing comes unwrapped and, copy-wise, has to be updated. It figures.

No matter how many gimmicks there are in the hopper, you don't need a survey to prove that a day has only so many hours. That troubles us too . . . we also have little time on our hands. We're sold out Mon. thru Sat., 5:30 AM to midnight, except for a couple of good half-hours on Friday & Saturday evenings. Sundays are sold, or not for sale, 6:45 AM to 11:30 PM, except for a popular hour in the morning. (Details on request.)

We used to dream of the day when the schedule would be filled like this and we could go fishing. But the dream was better than reality. It's not easy to fight off two good customers who want the same thing. And we're not cocky about having little time to sell. Seasons come and go. Changes occur and it's just a matter of time until we can handle any good account.

Please spot-check us anytime. Or tune in on our antenna via our national reps, The Katz Agency.

WBT BIRTHDAY

Marks 30th Anniversary With All-Day Fete

ALL-DAY celebration was staged Friday by WBT Charlotte, N. C., marking its 30th anniversary on the air as "the first commercial radio station licensed in the South."

Directing the fete were Joseph M. Bryan, president; Charles H. Crutchfield, executive vice president and general manager, and Larry Walker, assistant general manager.

Every live program Friday included a guest speaker from a city in the WBT service area. Mayor Victor Shaw, of Charlotte, was first to honor WBT. He appeared on the Grady Cole show early in the morning. In addition, salutes were heard on CBS network programs.

Climaxing the celebration was a 7:45 p.m. program, first AM-TV studio simulcast in which members of the WBT family participated. The program featured Grady Cole, Jack Knell, Fred Kirby and Arthur Smith, along with management spokesmen. WBT is owned by Jefferson Standard Broadcasting Co. which bought it from CBS in 1945.

Speakers recalled that shortly after WBT was licensed in 1922, it would send a boy up and down the streets advising the public that the transmitter had been turned on and advising them to tune in the station.

A 28-page souvenir booklet was published by WBT in honor of the anniversary. It carries a history of the station, picture of all 125 staff employes and historical photos. The booklet was offered listeners on the air and 2,500 copies were mailed to agencies, clients, local public opinion leaders and members of civic organizations. It is titled "Colossus of the Carolinas," theme of WBT promotion.

Ed Mellon Co., leading Charlotte clothier, used WBT anniversary window displays. Full-page advertisements were carried in local newspapers along with tie-in ads.

WBT received its license as a 100 w outlet in 1922. Power was increased to 1 kw in 1927, 25 kw in 1929 and 50 kw in 1933. It operates on 1110 kc.

WISCONSIN ASSN.

Fellows to Address

HAROLD FELLOWS, NARTB president, will be feature speaker at the meeting of the Wisconsin Broadcasters Assn. in Milwaukee next Monday and Tuesday. He will appear at the luncheon Tuesday, the day on which business sessions will take place, to discuss the structure of state broadcasting associations. Luncheon guest will be Gov. Walter Kohler.

Presidents of other state associations have been invited to the meeting by WBA President Ben Laird, WDUZ Green Bay. The Monday session will be a clinic sponsored by BMI. Speakers and their subjects include: Gus Hagenah, Standard Radio Transcription Services, "Music Hath Charms"; Milt Slater, WNEW New York, "It Takes Three to Make a Sale"; George Frechette, WFHR Wisconsin Rapids, "Local News Builds Local Interest in Sales."

Charles Severson, WHAM Rochester, "Hither and Dither and Wither"; Harold Safford, WLS Chicago, "Building Farm Audiences"; Norm Heyne, Ruthrauff & Ryan, "What the Agency Expects From Radio"; Jim Hanlon, WGN Chicago, "Good Public Service Broadcasts Should Be Sponsored"; Emerson Smith, KDYL Salt Lake City, "I Lead Two Lives —AM and TV."

Dan Jayne, WELL Battle Creek, chairman of the state association president's group, will be a special guest. Clinic chairman is Burt Squire of BMI Chicago.

RIVERS' SUIT

Ga. High Court Dismisses

SUIT for damages against five Savannah, Ga., radio stations by E. D. Rivers Jr., has been dismissed by the Georgia Supreme Court, it was learned last week.

The Georgia high court reversed itself when it held that the Savannah stations' plea that Mr. Rivers had no cause of action was correct.

The case began in 1950 after Mr. Rivers received a grant from the FCC for what is now WJIV Savannah (on 900 kc, with 1 kw, daytime only). Group of Savannah radio stations, calling themselves the Savannah Radio Council, petitioned FCC for reconsideration of the grant on the ground that Mr. Rivers' program proposals were suspect. The Commission denied the petition.

Early in 1951, Mr. Rivers sued the five stations comprising the Council (WDAR WCCP WFRP WSAV WTOC) for malicious opposition to his Savannah application. He asked for $242,500 in damages.

The Savannah stations entered a demurrer, claiming that Mr. Rivers had suffered no damages, therefore had no cause of action.

The Fulton Superior Court denied the demurrer. The denial was appealed to the state supreme court which sustained the lower court. The Savannah station asked the state supreme court for a rehearing and the 4-3 decision two weeks ago was the result.

Morris M. Musselman

MORRIS McNEIL MUSSELMAN, 52, Hollywood radio writer, died Tuesday in Santa Barbara, Calif. A former Chicago newspaperman, he later worked in the wholesale radio business with his father, and moved west to write radio and movie scripts in Hollywood.

Watch for "Revolution on the Farm" in the May 30 issue of Printers' Ink

Advertisers and agencies (our readers) will find in this 20 page article, complete with maps, charts, and statistical data, the most authoritative report yet issued about this 22 billion dollar market.

In 1940, the value of farm products sold in the United States was $6,681,581,292. In 1950, American farmers sold $22,052,484,865 worth of farm products. These United States Census figures, just now becoming available, show that the past ten years have witnessed a *Revolution on the Farm.*

Months ago the editors of Printers' Ink recognized the vital importance of this U.S. Bureau of Census information. They commissioned Wroe Alderson, nationally known marketing and research consultant, to make an analysis and appraisal of the data as they were released.

Highlights from this report:

1. Farm income has expanded faster than any of the other major segments of the population.

2. Electrification has leaped to 78.3%. In four of the nine census regions almost 90% of all farm homes today have electricity.

3. Mechanization has increased at an amazing pace. In 1940, 23% of our farms had tractors. Today, it is almost 47%. In 1940, 15.48% of farms had motor trucks. Today, more than 34% have them.

4. Home appliances, such as washing machines, home freezers and telephones are in greater use than ever.

5. The value of farm products has tripled in ten years. It rose from 6⅜ billion dollars in 1940 to more than 22 billion dollars in 1950.

Farmers are good prospects for anything, NOW

Because of the modernization of millions of farms in this country, our excellent roads, and farm ownership of millions of automobiles and trucks, every farmer in your market is a prospect for just about all the goods or services offered by advertisers.

They are top prospects from three counts: 1. They have the income. 2. Distance is no longer a problem with them. They can shop anywhere. 3. They are interested in top quality, whether it be a sewing machine or a silo.

BOB KENYON

Tell the buyers of advertising about your market. In our audience of 23,475 are the buyers of advertising — the marketing executives at the decision-making level, and their agencies who prepare and release the advertising for their clients.

The May 30 issue of Printers' Ink will be used as a standard reference for a long time, so your advertisement in this issue will get added value, at no additional cost, for the advertising of your market.

The closing date is May 20, so plan now to be represented when your best customers and prospects will be studying this momentous report on today's farm market. It will go to the right people, in the right place, at the right time.

SAFETY AWARDS

Radio, TV Stations Cited

ANNUAL public interest awards given by the National Safety Council, Chicago, went last week to 57 radio and 8 television stations in recognition of their "exceptional service to safety." In addition, the Rocky Mountain Radio Council and United Film Service were cited for their efforts.

TV stations included KPRC-TV Houston, WAAM (TV) Baltimore, WCPO-TV Cincinnati, WFBM-TV Indianapolis, WFIL-TV Philadelphia, WKY-TV Oklahoma City, WMAL-TV Washington, WMAR (TV) Baltimore and WWJ-TV Detroit.

Radio station winners: CHUM Toronto, Ont.; CJBC Toronto; KCKN Kansas City; KCVN Stockton, Calif.; KELD El Dorado, Ark.; KELO Sioux Falls; KFEL Denver; KFI Los Angeles; KFMJ Tulsa; KING Seattle; KITE San Antonio; KLRA Little Rock; KNX Los Angeles; KOA Denver; KOIL Omaha; KQV Pittsburgh; KRKD Los Angeles; KRNT Des Moines.

KTFI Twin Falls, Ida.; KUSD Vermillion, S. D.; WAKE Greenville, S. C.; WBEN Buffalo; WBRE Wilkes-Barre; WBUD Trenton; WCAE Pittsburgh; WCHS Charleston; WDOD Chattanooga; WFIL Philadelphia; WFPG Atlantic City; WGAA Cedartown, Ga.

WGH Newport News, Va.; WHBC Canton, Ohio; WHFB Benton Harbor, Mich.; WHIM Providence; WING Dayton; WISN Milwaukee; WJDA Quincy, Mass.; WJDX Jackson, Miss.; WKRC Cincinnati; WMAL Washington; WMAQ Chicago; WOSU Columbus, Ohio; WOWO Ft. Wayne, Ind.; WPDX Clarksburg, W. Va.; WPIC Sharon, Pa.; WPRO Providence.

WRNL and WRVA Richmond, Va.; WSAM Saginaw, Mich.; WSB Atlanta; WSNY Schnectady; WTDS (FM) Toledo; WTIC Hartford; WTTM Trenton; WWDC Washington; WWJ Detroit; WWL New Orleans.

Among advertisers cited were Atlantic Refining Co., Borden Co. (midwest district), Electric Auto-Lite Co., DeSoto-Plymouth Dealers of America, Firestone Tire and Rubber Co., Prudential Insurance Co. of America, Esso Standard Oil and Standard Oil of Indiana.

Judges included Arthur F. Harre, general manager, WCFL Chicago; Wesley I. Nunn, advertising manager, Standard Oil of Indiana; Robert K. Richards, director of public affairs, NARTB, and Judith Waller, director of public affairs and education at NBC Chicago.

ARBI Studies

MERITS of the Advertising Research Bureau Inc. (ARBI) studies, point-of-sale surveys which consistently have shown radio superior to newspapers as a producer of sales, will be debated by representatives of radio's BAB and newspapers' Bureau of Advertising at a meeting of the Radio-TV discussion group of American Marketing Assn. in New York on May 22, it was reported last week. Participants were not definitely set.

RADIO SELLS MORE
to MORE PEOPLE FOR LESS

. . . and WGN is your bargain buy in the Middle West—delivering the greatest coverage and reaching the largest number of homes per week—260,100 **more** homes per week in the daytime and 302,750 **more** homes in the nighttime than the second Chicago station.*

Get the most out of your advertising dollar—BUY RADIO—and make WGN your basic buy in the Middle West.

BAB SCHEDULE

Announced for Clinics

FULL schedule of BAB's 1952 sales clinics, launched in Hollywood a fortnight ago [B•T, April 21], was announced last week by President William B. Ryan.

Three were slated last week—in San Francisco on Monday, Portland, Ore., on Wednesday and Seattle on Thursday—and the series continues today (Monday) with a clinic in New York. President Ryan, Vice President Kevin B. Sweeney and Local Promotion Director John E. Hardesty are rotating assignments to form two-man crews conducting the one-day sessions.

The San Francisco clinic drew an attendance of 87 managers and sales personnel from BAB member stations in the Northern California area. Stanley G. Breyer, KJBS San Francisco, presided.

The schedule of meetings after the New York session this week was announced as follows:

May 5, St. Louis; May 7, Kansas City; May 9, Des Moines; May 12, Omaha; May 14, Wichita; May 16, Oklahoma City; June 2, Portland, Me.; June 4, Boston; June 5, Providence, R. I.; June 6, Hartford; June 16, Philadelphia; June 18, Baltimore; June 19, Washington; June 20, Richmond; June 30, Syracuse. July 1, Buffalo; July 3, Pittsburgh; July 14, Detroit; July 16, Cleveland; July 18, Indianapolis; July 21, Chicago; July 23, Milwaukee; July 25, Minneapolis; July 28, Denver; July 30, Salt Lake City; Aug. 15, Dallas; Aug. 18, San Antonio; Aug. 20, Houston; Aug. 22, New Orleans; Aug. 25, Miami; Aug. 27, Winston-Salem, N. C.; Sept. 8, Cincinnati; Sept. 10, Louisville; Sept. 12, Nashville; Sept. 15, Little Rock; Sept. 17, Birmingham; and Sept. 19, Atlanta.

GET-OUT-VOTE DRIVE

NARTB Will Direct Promotion

RADIO and television stations will conduct an all-industry campaign to bring out a record vote in the 1952 elections, Robert K. Richards, NARTB public affairs director, told the conference of the Assn. of Junior Leagues Wednesday at Lake Placid Club, Essex County, N. Y.

NARTB will direct the drive, he said, explaining the association membership had ordered the project at the recent Chicago convention. Spot announcements and programs will be carried in all states, urging eligible voters to register properly. This will be followed by a get-out-the-vote drive.

Tennessee Meet

TENNESSEE Assn. of Broadcasters will meet in Nashville tomorrow (Tuesday) at the Andrew Jackson Hotel for a business session and a Broadcast Music Inc. clinic. President J. P. Sheftall, WJZM Clarksville, will preside. Dinner speaker will be Ralph W. Hardy, director of government relations for NARTB.

The audience walked out!

In the last few years, many people witnessed a miracle.

Once doomed to lives as invalids, they walked out into lives of usefulness and activity—by the miracle of the "wonder drugs!"

Wonderful as science's new drugs may be, one factor is still vital to their success. They must be used *in time* to be effective!

That's why, when shipping drugs, serums, and vaccines to all parts of the country, the orders call for the world's fastest shipping service—Air Express!

Air Express speed saves lives — and dollars, too. Whatever your business, you can profit from regular use of Air Express. Here's why:

IT'S FASTEST — Air Express gets *top priority* of all commercial shipping services — gives the fastest, most complete door-to-door pickup and delivery service in all cities and principal towns at *no extra cost.*

IT'S DEPENDABLE — Air Express provides one-carrier responsibility all the way and gets a *receipt upon delivery.*

IT'S PROFITABLE—Air Express service costs less than you think, gives you many profit-making opportunities.

New parcel post regulations affect you? Call your local agent of Air Express Division, Railway Express Agency.

KTOK, WEEK SALE

Swap Plan Cancelled

SWAP of KTOK Oklahoma City for WEEK Peoria, Ill., has been called off, it became known last week when the FCC granted petitions of the respective owners for dismissal of the transfer applications.

Exchange of stations—KTOK is owned by O. L. Taylor, radio-TV station representative, and WEEK is owned by Sen. Robert S. Kerr-Dean McGee interests—was set for hearing on overlap and trafficking in licenses issues by FCC last month [B•T, March 10].

The overlap issue involved KRMG Tulsa, already owned by the Kerr-McGee group. Tulsa is 98 miles from Oklahoma City.

The trafficking in license issue apparently was due to the fact that Mr. Taylor intended selling WEEK, after it was transferred to his ownership, to Fred L. Vance and family for $225,000. Mr Vance, Dallas manager of the O. L. Taylor Co., is a one-time Peoria resident.

Purpose of the trade, rather than sale, between KTOK and WEEK was attributed to tax reasons, it was reported.

Reason for dropping the plan, according to the petition to dismiss the applications, was the inability to furnish the FCC with any additional information regarding overlap of KTOK and KRMG which might persuade it to approve the transfer. The petition also stated that there was no question that the trafficking in licenses issue could be resolved in favor of the applicants.

KTOK operates on 1000 kc with 5 kw day, 1 kw night, directional, holds a CP for 5 kw fulltime, with directional at night. It is affiliated with ABC. WEEK operates on 1350 kc with 1 kw, and is affiliated with NBC. Part of the agreement was that the Kerr-McGee group would maintain its 30% interest in a separate company which has filed for TV in Peoria. Same agreement bound Mr. Taylor to a 15% interest and Mr. Vance to 55% interest in the TV applicant.

Mr. Taylor owns in addition to KTOK, KANS Wichita, Kans., and KRGV Weslaco, Tex.

Sen. Kerr is prominently mentioned as a possible Democratic party candidate for the Presidential nomination.

U.S. Pop.: 156,197,000

TOTAL population of the United States as of March 1, 1952, was about 156,197,000, according to Roy V. Peel, Director of the Census. The figure includes armed forces overseas. Official count of population in April 1, 1950, when the decennial census was taken, was 150,697,361 with an estimate of armed forces overseas bringing the total to 151,132,000. The March estimate represents a 3.4% increase in population since the decennial census was taken.

'Wherever You Go . . .'

ANGELS may fly over prison walls, but radio beams fly in, and officials at Rahway (N. J.) State Prison took advantage of that fact last week to persuade 230 convicts to stop their rioting. To convince local inmates that other prisoners at Trenton State Prison had ended their 77-hour siege, Rahway officials beamed a 6:15 p.m. news report of the event over the loud-speaker system. WNJR Newark considered it just another Friday night newscast.

PEABODY AWARDS

Networks Plan Telecast

THREE of the four television networks — ABC-TV, CBS-TV and NBC-TV—last week were planning to telecast the annual Peabody Awards luncheon, to be held Thursday in conjunction with the regular luncheon meeting of the Radio Executives Club of New York.

Although complete broadcasting plans appeared uncertain late last week, it was known that CBS Radio intended to record and broadcast, later in the afternoon, an address by its Edward R. Murrow, who was scheduled as a principal speaker at the luncheon, while WQXR New York announced it would cover the presentation of awards live from 1:15 to 2 p. m. The CBS Radio broadcast is 4:15-4:30 p.m.

Telecast coverage of the presentations will be originated by ABC-TV and fed to CBS-TV and NBC-TV, from 1:15 to 1:45 p.m.

The Peabody Awards, handled through the U. of Georgia, are designed to recognize "the most disinterested and meritorious public service" rendered each year by radio and television. Winners of this year's honors have not been disclosed. The luncheon will be held at the Waldorf-Astoria, with Edward Weeks, editor of *Atlantic Monthly*, presiding over presentations.

'Forum' Landmark

TED GRANIK, Washington attorney, and his American Forum of the Air, which he founded and moderates, celebrated their 24th anniversary in broadcasting yesterday (Sunday) with a simulcast of the discussion program, 2:30-3 p.m. on NBC radio, sustaining, and NBC-TV, sponsored by Bohn Aluminum & Brass Co. Oldest discussion program on the air, the program originates in Washington and concentrates on political issues of the day. It has played host to a substantial number of members of Congress. President Truman was a guest when Senator from Missouri, and President Roosevelt when governor of New York.

TOMORROW'S NEIGHBORS

Making friends with the coming generation is essential to good community relations. Radio is an effective aid.

Take another look at the kids in the picture.

Today they're schoolchildren, but tomorrow they'll be employees, customers, suppliers.. neighbors that any company should cultivate.

What's the best way to make friends with them? The most efficient and economical way is *radio*. No other medium gets into so many homes, at hours when children are accessible. No other local medium reaches so much of the areas that companies want to influence.

Moreover, radio is superbly flexible. You can tell your story in terms that appeal to the special audience you seek.. at any time from early morning to late night!

In six important industrial areas.. Boston, Springfield, Philadelphia, Pittsburgh, Fort Wayne and Portland, Oregon.. you can get the benefit of 32 years' experience in helping industry make friends with its neighbors. You can get this benefit from any one of the Westinghouse radio stations.. whose skill and facilities are at the call of company management, advertising agencies, and public relations counselors.

TELECASTING
April 28, 1952 Copyright 1952

TOP COVERAGE

...to deliver your sales pitch in the Far West!

You cover all the bases when you buy NBC Pacific Coast Network—the only network that delivers top coverage—83.5% of all radio homes in this great mass market!

Soap . . . soup . . . insurance . . . automobiles—whatever your product or service—if it has *mass* appeal, your most effective advertising medium for reaching the great Western market is NBC Pacific Coast Network.

In this rich, fast-growing area where 98% of all homes are radio homes, 83.5% of these homes listen regularly to NBC Pacific Coast Network, and costs-per-thousand are lower than those of any other network serving the Far West.

The great states of Oregon, Washington and California now have the highest per capita income of any region of the U. S. A. Estimated retail sales for 1952 will run over 16 *billion* dollars! To get your share of these dollars—buy time now on NBC Pacific Coast Network. Consult your NBC Sales Office for details.

WESTERN NETWORK
NATIONAL BROADCASTING COMPANY

HOLLYWOOD • SAN FRANCISCO • CHICAGO • NEW YORK

Open Mike

(Continued from page 18)

knowledge, Mutual was the first radio network to return to the scene for reactions approximately six minutes after the historic announcement.

Where was the scoop?

Hollis Seavey
Washington Representative
MBS

[EDITOR'S NOTE: Mr. Seavey caught us in an unfortunate error—the omission of "TV" from the network identifications in a CLOSED CIRCUIT intended to refer only to television coverage of the event.]

* * *

Rural Listener

EDITOR:

Enclosed is a piece of fan mail from one of the ardent listeners of the *Ernie and Arnie Show*, an 8 to 9 feature on WBVP that is more than holding its own against TV because it's programmed by two local boys at the local level. . . .

We thought that this would make a good cartoon and should be passed on to you. . . .

Thomas B. Price
Station Manager
WBVP Beaver Falls, Pa.

* * *

Man the Pumps

EDITOR:

Words cannot express my appreciation for the terrific story you carried in the April 14 issue of BROADCASTING • TELECASTING on my "TV Station Operating Expense" analysis.

As a result of your story, we are swamped with requests for copies of the analysis . . . .

Joe Herold
Broadcast Equipment Sales
RCA Victor
Camden, N. J.

The Missing McGinnis

EDITOR:

I was quite shocked and rather violently disturbed when I read OPEN MIKE in the April 7 issue of BROADCASTING.

By publishing the letter from the disgruntled Mr. King you have probably cost me several thousand dollars and damaged my reputation in this industry beyond repair. . . .

The person referred to by Mr. King, Lee McGinnis, is in no way connected with this company. At one time he did, and when his dishonesty and disregard for ethics was found out he was immediately dismissed. . . .

Now by printing this letter without bringing out the true facts of the matter or McGinnis' name will undoubtedly cause many broadcasters whom we have done business with to think we have completely turned dishonest. The implication is there, inasmuch as the words, "Bond a Week Club," have been brought out. . . .

George R. Turpin
Owner and Manager
George R. Turpin Assoc.
Fort Worth

[EDITOR'S NOTE: The original letter was written by Victor King, station manager of KERB Kermit, Tex., who reported that Lee McGinnis, representing himself as connected with a "Bond a Week Club," had disappeared after collecting cash payments belonging to the station. Though Mr. Turpin was not mentioned in the original letter, we are glad to publish Mr. Turpin's comments as emphasis that Mr. McGinnis was not associated with Mr. Turpin at the time of the Texas escapade.]

Allocations Report

EDITOR:

Of all the jobs BROADCASTING • TELECASTING has done in its illustrious history, your April 14 issue, together with the supplement, was the best in my judgment. Getting the supplement out under such tremendous pressure would have killed anyone else but you and your staff.

I would like to write each member who participated in the fine job, but I hope you will save me that by passing my letter around as a sincere token of my appreciation.

Howard L. Chernoff
General Manager
KFMB-AM-TV San Diego

* * *

EDITOR:

I think you did the broadcasting industry a tremendous service in publishing the full text of the FCC's TV allocation plan. It served to clear up a lot of misinformation and gave us, and many other stations, too, I am sure, a welcome source of official reference for what is actually going to happen.

I also noticed in one of your recent issues that you have compiled a series of radio success stories. Would you be good enough to send us a copy?

Thank you.

Paul Martin
Station Manager
WCCC Hartford, Conn.

TREND back to radio buying has been reported by WBAL Baltimore. According to station sales executives, more new business has been booked in April than at any time in recent years.

by Joe Marsh

Whitey Sure "Rang the Bell"

Telephone woke me out of a sound sleep last Friday night about eleven-thirty. "This is Whitey Fisher out on River Road," says a voice. "I just wanted to tell you how much I like this week's *Clarion*."

"Thanks, but why call to tell me at this time of night?" "Simple," he says, "your paper boy just delivered it a short while ago. Been waiting for it all evening."

Next day, Buzzy Wilson tells me he delivered Whitey's paper that late because he stayed in town for the high school dance—thinking it would be O.K. to drop it off on his way home.

From where I sit, I can't blame Whitey for his little joke. He was just reminding me we owe other people the same consideration we expect from them. Since I'm always talking about respecting the other fellow's rights—including his right to enjoy a friendly glass of beer if he chooses, it was only fair that Whitey should "wake me *up" to his right to get his copy of the* Clarion *when he expects it—on time. Thanks again, Whitey!*

WINSTON-SALEM

KOB AM-TV SALE

Application Filed at FCC

APPLICATION for approval of the sale of KOB-AM-TV Albuquerque from T. M. Pepperday *(Albuquerque Journal)* to Time Inc. and former FCC Chairman Wayne Coy for $900,000 [B•T, March 3] was filed with the FCC last week.

Stations will be sold first to Time Inc. After a series of reorganizations, which will transfer the physical assets to a Time Inc. subsidiary, the stations will be owned jointly by the Henry Luce firm and Mr. Coy [B•T, March 10].

Although Time Inc. will pay $900,000 for the properties, the application revealed that it would declare a dividend equal to $300,000 net quick assets immediately after the FCC approves the sale. This would bring the purchase price down to $600,000.

A partial liquidation of the licensee will then be effected, the application explained, which would place all fixed assets (including land but not the TV building) in the name of Michigan Square Building Corp., a Time Inc. subsidiary.

Michigan Square company would lease the fixed assets and land back to Albuquerque Broadcasting Co., licensee of KOB-AM-TV, for eight years at the appraised value of $450,000. Worth of licensee will thus be $150,000, it was explained.

Coy Receives Interest

Subsequently, Time Inc. will sell 50% interest in the licensee to Mr. Coy for $75,000. Mr. Coy will put up $37,500 out of his personal funds, borrow the other $37,500 from the Chase National Bank of New York, it was indicated. At the same time, Mr. Coy will be signed as general manager of the stations at $26,000 per year with an eight year contract. In addition, Mr. Coy will remain as radio-TV consultant to Time Inc. at a yearly fee of $24,000. The consultant contract began April 1 and runs to the end of March 1955. Time has an option to extend that contract to 1957.

Mr. Coy represented his net worth as $62,973.79. Assets included his Washington house, to be sold June 15 for $43,000; furnishings, $3,000; 1951 Lincoln automobile, $2,000; jewelry and pictures, $400; bonds, $7,000; cash, $3,829.01; paid up retirement, U. S. Civil Service, $5,050.96; cash value of life insurance policies, $5,038.31. Liabilities comprised mortgage on Washington house, $3,919.49; fee for sale of house, $2,150; bills payable, $275.

Income for Mr. Coy was put at $12,685 in 1950, $12,148 in 1951. This was after deductions for taxes, the application stated. Mr. Coy was chairman of the FCC from 1947 to Feb. 21 of this year [B•T, Feb. 25].

Mr. Coy went to the FCC from the position of vice president and general manager of WINX-AM-FM Washington, then owned by the *Washington Post*. Before that he was assistant to publisher (now chairman) Eugene Meyer.

Before joining the *Washington Post*, Mr. Coy served in various government posts. At one time he was one of President Roosevelt's "anonymous" assistants and assistant director of the Bureau of the Budget.

Mr. Coy will be president and treasurer of Albuquerque Broadcasting Co. when the sale of the stations is approved by the FCC. Arthur R. Murphy Jr., manager of Time Inc.'s March of Time division, will be vice president. Mrs. Grace Cody Coy, wife of the former FCC chairman, will be secretary. In addition to the officers, the new board of directors of the licensee will include Charles L. Stillman, Time Inc. vice president.

Total assets of Albuquerque Broadcasting Co. as of Jan. 31, 1952 were put at $588,311.74. Of this, $383,721.23 was in cash. Included in the assets was a depreciated value of $26,470.59 for AM and $74,542.79 for TV.

Current liabilities of the licensee were put at $100,669.62. Balance sheet also showed surplus of $429,188.29. Profit for the month of January was put at $9,692.35.

Balance sheet estimated replacement costs of the 31-year-old KOB (NBC affiliate operating on 770 kc with 50 wk day, 25 kw night under special FCC authority) at $260,500. It also estimated replacement costs of four-year-old KOB-TV (on Channel 4) at $226,500. KOB-TV is affiliated with all four TV networks, via kinescope recordings.

'Time's' Past Radio Interests

From 1943 to 1945, Time Inc. owned 12½% of ABC. From 1942 to 1944, the *Time, Life, Fortune* publisher owned a substantial amount of preferred stock in WQXR New York (now owned by the *New York Times*).

Consolidated balance sheet as of the end of 1951 showed Time Inc. with total current assets of $60,901,281, of which $20,270,825 was in cash. Total current liabilities

ONE ANNOUNCEMENT -- BETTENDORF AND DAVENPORT IN IOWA

TWO OUT-OF-TOWN CUSTOMERS

ROCK ISLAND MOLINE AND EAST MOLINE IN ILLINOIS

$2,450 in Sales

Davenport's Burkeholder Custom Kitchens has had schedule of advertising on WOC for 2½ years. Store owner J. K. Burkeholder knows this schedule builds sales volume. Has many specific instances proving this fact.

For example, in January '52, a Clinton, Iowa, man driving near Davenport on his way to Burlington, heard a Burkeholder announcement. Stopped in Davenport store; told them to get in touch with his wife about remodelling their kitchen.

Within week, Burkeholder had a $1,350 order from this Clinton family. *But more,* Clinton man's brother contacted Burkeholder; purchased a $1,100 custom-built steel kitchen. Result of one WOC announcement—$2,450 in sales. Said the Clinton man: "Credit WOC with this sale, for until I heard the announcement, I didn't know about the Burkeholder firm."

Proof that when you want sales volume in the Quint-Cities—nation's 71st retail market—*you want WOC.* Contact us direct, or your nearest F & P man.

CHURCH NAMED

Succeeds Chester at CBS

APPOINTMENT of Wells Church as acting director of news and public affairs for CBS Radio, to take over the duties handled by Edmund A. Chester before he resigned to become part owner and general manager of the RHC Cadena Azul network in Cuba [B•T, April 14], was announced last week by CBS Radio President Adrian Murphy.

Mr. Church, who initially joined CBS in 1931 in Washington, has been editor-in-chief of CBS Radio news since July 1949.

Mr. Church, a veteran newsman, after joining CBS in 1931, became program manager and assistant to the vice president of WTOP Washington and in 1936 became director of radio for the Republican National Committee. In 1941, Mr. Church went to England as advisor to the BBC. The following year he returned to the U. S. to become special events and talks director for the Coordinator of Inter-American Affairs. In 1945, he returned to CBS and the next year became director of news broadcasts. He was named editor-in-chief in July 1949 when radio and TV news activities were merged. Mr. Church received the title for CBS Radio following the divorcement of radio and TV activities of CBS last July.

ACNY NOMINATIONS

Officers Slate Announced

NOMINATIONS committee of the Advertising Club of New York announced its 1952 slate April 18, with George S. McMillan, vice president of Bristol-Myers Product Div., named for president. Stanley Resor, J. Walter Thompson president, was listed for vice president and James A. Brewer, board chairman of Brewer-Cantelmo Co. was suggested for treasurer.

Nominations for directors, to serve for one, two and three-year terms, included Elon G. Borton, Advertising Federation of America president; George A. Phillips, advertising manager of Cluett, Peabody & Co.; George A. Nelson, president and general manager, Stevens-Nelson Paper Corp.; C. B. Larrabee, president of Printer's Ink; Robert M. Feemster, executive committee chairman, Wall Street Journal; Gene Flack, advertising director for Sunshine Biscuits; Hugh R. Jackson, president, Better Business Bureau of New York; and David B. Starrett, vice president, Royal Typewriter Co.

Additional nominations are to be accepted only in writing several weeks in advance of the voting, scheduled for Club's annual meeting May 13. Top three nominees, assisted by continuing officers, are to serve until next annual meeting.

WSYR's Local Radio Sales

UP 46%

WSYR---Message Form

To Caley Augustine
From W. R. Alford, Jr.
Date March 24, 1952
Subject RADIO PROMOTION

Up to March 15th, WSYR's local radio sales for 1952 are 46% more than 1951!

Local advertisers who are responsible for this increase are in the best position to test the real pulling power of all media. They know, day by day, which advertising is ringing the cash register.

And when they use WSYR almost 50% more than they did a year ago; when they prefer WSYR over any other local station — that's our best testimonial.

Same 'Freedom' Boat

FOR THE past fortnight there has been sound and fury over President Truman's remark implying that he had the authority to seize newspapers and radio in a national emergency. The White House has done little to amplify or explain the President's startling utterance—the top topic at the series of newspaper annual conventions held during the past 10 days.

Newspaper editors cannot fathom the kind of emergency that would lead the chief executive to commandeer newspapers, the freedom of which has been traditionally protected by the First Amendment.

That has not been the case with radio—a licensed medium. Section 606 (c) of the Communications Act provides that in a national emergency, the President may take over communications. This provision was amplified with the passage last year of a law authorizing the President to close down any station emitting "electro-magnetic" waves when there exists war or a threat of war. This was designed to take into account the use of modern implements of warfare, such as guided missiles and pilotless planes, which presumably can use radio beams to "home" to targets.

There was no outcry from the nation's press when this legislation was pending. Only radio was involved.

Yet, one has but to look at the record to determine that, with President Truman and with his predecessor, Franklin D. Roosevelt, radio and the press were regarded as synonymous. President Roosevelt often called for "freedom of radio on a parity with the press."

Twice, in letters to this journal, President Truman has stated that radio "must be maintained as free as the press" and that "a free radio is as indispensable as a free press."

It is apparently also his belief that both should be equally treated if the freedom were to be taken away. His cryptic answer to a question put by J. Hale Steinman, publisher and station owner, during a Presidential conference with the American Society of Newspaper Editors, leads to no other conclusion.

The incident drives home, as nothing else would, the inseparability of broadcasting and the press as news media. They are both in the same "freedom" boat, and the boat is rocking.

Longer Licenses

THERE'S agitation anew to authorize government agencies to assess charges for services rendered, as a means of offsetting cost of government. This is a variation of the proposal that there be levied a franchise tax or "license" fee. Such agencies as the FCC, SEC, CAA and ICC are mentioned as providing service to particular segments of industry for which Uncle Sam gets no immediate return.

All industry pays substantial taxes to the government, direct and indirect. If it were not for the broadcast services, the hundreds of millions in excise taxes on radio and television receivers wouldn't reach the Treasury. And broadcasters themselves pay corporate taxes on revenues in excess of a half-billion.

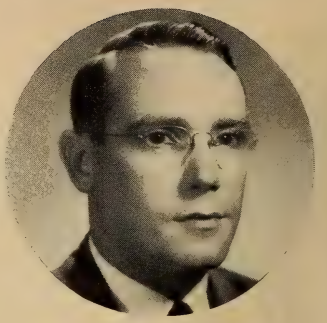
Radio broadcasters receive licenses from the FCC for a three-year tenure. Television broadcasters get only one-year licenses now, though the law permits three-year authorizations. Until now, the FCC has maintained that TV licenses should be short-term to keep allocations flexible. Now that we have an allocations plan, this argument no longer seems valid.

We doubt whether radio or television broadcasters would object to a nominal license fee, to help defray costs of administration, if there were no discrimination against their business. But they then would be entitled to longer license terms, and they would acquire certain rights in return for the payment for the "franchise." In Mexico, licenses are issued for 30 years. We think that in the U. S. they ought to be issued in perpetuity, since the licensing authority is always in the position to cite stations for violations of the law.

Television is a far more expensive business than radio broadcasting. A glimpse at applications filed since the April 14 freeze-lift shows that a less-than-one-million investment for the first year is rare indeed. Certainly it's too much to ask venture capital to invest such sums on the slender thread of a one-year license. We hope the FCC will see fit promptly to increase the TV tenure to the full statutory limit of three years, and that legislation will be sought to extend license terms at least to 30 years.

AGAINST appalling odds, including the skepticism of AT&T and the television networks, Klaus Landsberg of KTLA (TV) Los Angeles and a small band of fervent engineers last week brought a telecast of an atom bomb explosion to the American public. It wasn't a very good telecast, and we can't help feeling that if some of the larger entities in this business had shared Mr. Landsberg's enthusiasm—and the work—it would have been a better one. The job of throwing up a relay system across high mountains was really too much to ask of any group smaller than one commanding the resources of the entire telecasting industry. Mr. Landsberg deserves the utmost praise, not only for heroically prevailing with his ambitious plan but also for giving a lasting lesson in how television can serve the public.

The 'Duopoly' Answer



IT WILL take weeks to clear up all of the questions that have arisen as a result of the TV Allocations Report, but there's one that should receive a prompt answer. It is how the FCC will construe the merging of two or more radio broadcasters in a given market for the purpose of applying for a single TV assignment.

The exchange of correspondence between Sen. Edwin C. Johnson and FCC Chairman Paul A. Walker, published in TELECASTING last week, clarified nothing except the fact that an issue exists. Mr. Walker did observe that the FCC would have to meet the problem.

The time to do this, it is evident, is *now*. The "waiting period" runs out July 1. In the interim broadcasters must make their plans. Under existing regulations, the operation of two stations of the same class in the same coverage area constitutes "duopoly". If radio owners pooled their interests for a single TV operation, manifestly that would not constitute "duopoly" in TV. But the problem is whether the Commission would construe this to be "duopoly" in radio, because of the new mutuality of interest that would evolve.

The FCC, it seems to us, could well say that, in the light of the scarcity factor in TV and of the desire promptly to get more stations on the air, it would not construe such radio mergers as falling within the prohibition of the "duopoly" rule. From that point on, however, the merging broadcasters would take a calculated risk. The FCC could not give assurance that the joint applicant would have any better chance for a grant than any other applicants. To do so would be to prejudge applications not yet filed or considered.

our respects to:

JOHN THOMAS GELDER JR.

JACK GELDER, vice president-general manager of WCHS Charleston, W. Va., made his entrance into radio with a bang—literally.

Twenty years ago, Mr. Gelder portrayed the role of Alexander Hamilton in a high school play. Unfortunately for Mr. Gelder, the play included the pistol duel scene between Mr. Hamilton and Aaron Burr. So Mr. Gelder's role in the play was short-lived.

Fortunately for him, however, the play was broadcast and his ambition to enter the radio industry as an announcer was born.

A native of Chicago, Mr. Gelder went to the U. of Michigan in 1936 with the sole intent of preparing himself to become a radio announcer.

At college, he broadcast over WJR Detroit and WCAR Pontiac, but discovered he simply wasn't cut out to be an announcer. Still interested in radio, he turned to sales. In retrospect, Mr. Gelder believes this the smartest move he ever made.

Upon graduation from college in 1940, Mr. Gelder found a sales position at WJLS Beckley, W. Va. Hardly out of the fledgling class, his ready smile made up for lack of experience.

Quick at building a firm foundation in radio sales, Mr. Gelder in 1942 was named commercial manager at WKWK Wheeling. While there, his zeal resulted also in appointment as assistant station manager.

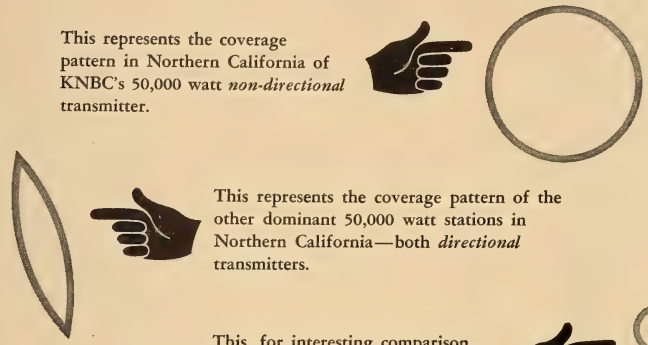
After four years at WKWK, in 1946, he went to Charleston, W. Va., to become general manager of new WKNA there and put the station on the air. At that time the state's capital was blossoming from a two-station to a five-station city.

In 1948, he shifted to WCHS Charleston as general manager and in 1950, when the station was purchased by the Tierney Co., Mr. Gelder became vice president and general manager.

His community devotion, reflected by participation in local affairs, is helping make WCHS a local institution.

A definite approach on how to operate a radio station successfully has guided Mr. Gelder's activities. He believes in departmentalizing the operation completely, then encouraging the departments to work together as a team.

He has established an "executive advisory" panel of top-level WCHS personnel, which meets with him regularly to formulate policy, outline procedure and plan the future.



These plans include television. Mr. Gelder feels that under proper guidance, the future WCHS video operation can become as much

(Continued on page 80)

WHY . . . in Northern California

KNBC *reaches more people . . . more often . . . than any other radio OR TV station*

This represents the coverage pattern in Northern California of KNBC's 50,000 watt *non-directional* transmitter.

This represents the coverage pattern of the other dominant 50,000 watt stations in Northern California—both *directional* transmitters.

This, for interesting comparison, represents television coverage in Northern California.

Put them all together—and you get a *complete* picture of radio and TV coverage in the great Northern California market, like this:—

TELEVISION, covering a sixty mile radius with only about one-third of the families in the narrow TV circle owning sets.

Radio, dominated by three stations: — two with 50,000 watt directional coverage taking in a limited elliptical area —

— and the other, KNBC, with 50,000 watts, non-directional, giving a *wide circle* of coverage that includes not only the San Francisco-Oakland Metropolitan Market, but *all* the thriving PLUS-Markets of Northern California.

Yes, in Northern California, more people are reached by—and listen more often to—KNBC than any other radio station. More people tune in to KNBC radio than to any television station in the area.

Wide circle coverage plus program popularity make . . .

ABC AFFILIATES

Additions Up Total to 323

SIGNING of five new affiliates for the ABC radio network, bringing the network total to 323, was announced last week by William Wylie, director of radio stations.

The stations are WGGG Gainesville, Fla., whose affiliation was slated to become effective yesterday (Sunday); the Granite State Broadcasting Co.'s WTSL Hanover-Lebanon, N. H., WTSV Claremont, N. H. and WTSA Brattleboro, Vt., all effective May 5, and WHOB Gardner, Mass., also May 5.

WGGG, which has been affiliated with Liberty, operates on 1230 kc with 250 w and is owned by Alachua County Broadcasting Co. with R. M. Chamberlin, president and general manager.

The three Granite State Broadcasting Co. stations are operated under the presidency of W. J. Barkley and the general managership of William F. Rust Jr. WTSL operates on 1400 kc with 250 w; WTSV on 1230 with 250 w, and WTSA on 1450 kc with 250 w.

WHOB, licensed to Gardner Broadcasting Co., also is headed by Mr. Barkley and operated under the general managership of Mr. Rust. It operates with 250 w on 1490 kc.

ABC radio *Bill Tusher in Hollywood*, features unrehearsed interviews with movie personalities.

GEORGE GOLDMAN, copy chief, Zibman Adv., Phila., to WCAU that city, as assistant director of radio promotion. **HOWARD REIFSNYDER,** writer, WALL Middletown, N. Y., to promotion staff, WCAU to handle publicity for station's new radio-TV center.

IRA BLUE, San Francisco sportscaster, to KNBC there for nightly show Monday through Saturday.

ELMER PETERSON, NBC radio-TV commentator assigned role of commentator in Universal-International feature film, *It Grows on Trees.*

PAT KELLY, music librarian, Don Lee Network, to KBIG Hollywood headquarters in similar capacity.

WILLIAM FROUG, director of program writing, Columbia Pacific Network, named program supervisor CBS Radio, Hollywood.

Mr. Froug

ROBERT R. TUFTS, executive staff personnel director, Lever Bros., N. Y., to NBC that city, in personnel department as manager of organization planning.

ALICE FREER, vice president of American Newspaper Women's Club, to substitute for two week period daily for **HAZEL MARKEL,** WWDC Washington women's commentator who is visiting Europe under auspices of Defense Dept.

JACK VALENTINE, vocalist, WBAP-AM-TV Fort Worth, Tex., join WCAU-TV Philadelphia.

ED BROWN, announcer, WSYR Syracuse, called to active duty with U. S. Navy aboard *U. S. S. Storms.*

THOMAS NAEGELE, WATV (TV) Newark art director, named head of art department, WOR-TV New York.

FRANK ATWOOD, farm program director, WTIC Hartford, Conn., to deliver Founder's Day address at U. of Vermont, Burlington, May 1.

BOB MURPHY, WMOA Marietta, Ohio, to announcing staff, WHIZ Zanesville.

GLENN ELLIOTT, WPEO Peoria, Ill., to WANE Fort Wayne, Ind., as disc jockey and promotion director.

HOOPER WHITE resigns as producer at WBBM Chicago to free lance in that city and New York.

STAN DALE, WSRS Cleveland, to WXYZ Detroit.

LEN EAST, KVRN Lexington, Neb., to KMMJ Grand Island, as disc jockey.

ALLAN CURTIS to WWNH Rochester, N. H.

KIT FOX, director of special broadcasting services for WLW and WLWT (TV) Cincinnati, leaves May 9 for month's vacation in Europe.

BILL VOGEL, inventor of trick effects, to CBS-TV New York, as manager of special effects.

BETTY BOWMAN named program director, KDFC-FM San Francisco.

GEORGE McLINN, WIP Philadelphia sports director, presented award by Junior Chamber of Commerce for his contribution to sports.

J. ROBERT HERR, traffic manager, WGAY Silver Spring, Md., has resigned to make extended trip to Australia.

RALPH ROSE, radio program packager, rejoins CBS Radio Pacific Network as writer-director.

HARVEY OLSON, program manager, WDRC Hartford, Conn., elected president of 1952 graduating class of evening division of Hillyer College, Hartford, of which he is a member.

JOHN GAUNT, director, NBC-TV *Red Skelton Show,* received first Behind-the Scenes award from Hollywood Actors Council for technical excellence.

LEE J. HORNBACK, producer-director, *Paul Dixon Show,* ABC-WCPO-TV Cincinnati, to WLWT (TV) that city, as TV producer.

HAL O'HALLORAN, sports editor, KFH Wichita, Kan., father of girl, Kathleen Mary, April 14.

SOX TIFFAULT, pianist arranger, WSYR Syracuse, father of boy, April 16.

GENE WEBSTER, writer-director, Columbia Pacific Network, married Joyce Brown, stockbroker, Shearson Hammill & Co., April 20.

TED NATHANSON, staff director, ABC-TV New York, and **EDITH LANDIS,** writer, ABC-TV that city, were married April 20. Mr. Nathanson is son of **BENEDICT GIMBEL Jr.,** president-general, WIP Philadelphia.

STEPHEN "HAPPY" ISON, director of folk music, WVOW Logan, W. Va., father of girl, Deborah, April 14.

FM

30 years of public service

WGAL — one of the pioneer stations in the nation — grew rapidly into a community public service bulwark. After World War II, FM was added to its facilities. And, in 1949, WGAL brought the thrill of television to its viewers.

WGAL, in the future as in the past, is pledged to operate in the best interests of its listeners and viewers. It is pledged to present the best in entertainment; bring news and sports as they happen; place public service first and always.

WGAL, one of America's complete broadcasting services, will keep faith with its thirty years' heritage.

TV HOLDS ITS ACCOUNTS

Cancellers Merely Reshuffle

By FLORENCE SMALL

OF the approximately one dozen television advertisers who cancelled network programs at the end of the past season, at least 10, in direct contradiction to the ensuing chorus of doom-shouters, have or will put their money back into TV or radio in one form or another. That was the finding of a spot check conducted by BROADCASTING • TELECASTING last week.

Reports have circulated widely suggesting the cyclical program cuts represented a symptomatic disenchantment by advertisers with the new visual medium, but an analysis indicates the actions were more in the nature of a realistic reshuffling founded on a firm faith in the selling powers of TV and radio.

Admiral Corp., Chicago, which dropped sponsorship of *Lights Out* (Monday, 9-9:30 p.m. on NBC-TV) is diverting that money into radio-TV coverage of the national political conventions. As a matter of fact, Admiral Corp. will spend $2,500,000 on network TV this year, nearly doubling last year's figure, according to Seymour Mintz, advertising director.

Mr. Mintz said the company dropped *Lights Out* only after contracting for the radio-TV political coverage and election night returns on ABC radio and TV. The company, incidentally, spent $1,322,504 last year on television. Erwin, Wasey & Co., New York, is the agency for Admiral.

Meanwhile *Lights Out* was picked up for sponsorship by Pearson Pharmacal Co., through Harry B. Cohen Adv.

Kaiser-Frazer Sales Corp., Willow Run, Mich., dropped sponsorship of *Ellery Queen* (Sunday, 7:30-8 p.m. on ABC-TV) but has increased its overall TV budget by approximately 25%, according to one executive.

The mystery show was sponsored by both the dealers' and factory money. When the program was dropped, the dealers put their budget into an increased spot radio and television campaign. The factory undertook sponsorship of a segment of *Your Show of Shows* on NBC-TV, along with its spot radio-TV activity. William H. Weintraub Co., New York, is the agency.

Meanwhile, Kaiser-Frazer last week bought participations five times a week in NBC-TV's *Today* morning program (see story page 72).

Bavuk Cigar Co., New York (Phillies cigars), picked up sponsorship of *Ellery Queen* on ABC-TV. Ellington & Co., New York, is the agency.

Esso Standard Oil Co., which dropped sponsorship of its *Alan Young Show* (Thursday, 9-9:30 p.m., CBS-TV), switched its TV budget into sponsorship of local news programs, five quarter-hours a week, in seven markets. Currently, its agency, Marschalk & Pratt, New York, is looking for additional TV local news shows. As a result of the local news coverage in television, Esso is spending more money in television now than it did with the *Alan Young Show* on a limited number of stations.

The 9-9:30 p.m. Thursday night period formerly held by *Alan Young* on CBS-TV has been optioned to American Tobacco Co. for next fall, but the company has not yet decided what show it will place in the time. BBDO, New York, is the agency.

General Foods, New York, which will drop the *Mr. Bobbin* show (Sunday, 7:30-8 p.m. on NBC-TV), is currently deciding on its fall agenda. One plan under consideration is the possibility of increasing sponsorship of its Bert Parks daytime TV show on CBS-TV from its present three times weekly to a possible five times weekly on a quarter-hour basis, or extending the program to half-hours. In addition, GF is considering another evening TV network show for the fall and is looking over program formats, although no time has been bought, for Jell-o.

Meanwhile, General Foods' Swansdown and Sanka coffee are about to sign contracts for sponsorship of TV version of *Our Miss Brooks* which will replace its *It's News to Me* (Friday, 9:30-10 p.m. on CBS-TV). Young & Rubicam New York, will handle the $32,000 *Our Miss Brooks* show for GF while Benton & Bowles, New York, will service the company's *Claudia* program when it resumes in the fall (Monday, 9:30-10 p.m., CBS-TV).

Toni Co., Chicago, which dropped its portion of *Stop the Music* on ABC-TV, put part of that money into the Friday portion of the Kate Smith daytime program on NBC-TV. The move, according to an agency representative, was one of economy and none of the money went into any other medium. Agency: Foote, Cone & Belding.

Hazel Bishop Inc. (Raymond Spector agency) and Regent Cigarettes (Hilton & Riggio agency) cancelled their alternate sponsorships of *Cameo Theatre* on NBC-TV but both advertisers have returned to TV. Hazel Bishop (lipstick) has picked up the Wednesday night, 10-10:30 p.m. period on NBC-TV with its own show, *What Shall I Do*, while Regent switched to daytime TV by sponsoring a portion of NBC-TV's *Today* morning show, three times weekly.

Ekco Products Corp., Chicago, which had dropped part sponsorship of the *Frank Sinatra Show* on CBS-TV, has poured its TV budget

(Continued on page 72)

TOWERS

Joint Meeting Held at FCC

AVIATION, radio-TV, military and government people sat down Friday at an informal meeting to discuss the problems of high TV antennas and their possible effects on aviation safety [B•T, April 7, March 31, 17] and concluded to set up a representative committee to look into the whole subject.

Called by FCC Comr. Edward M. Webster, the meeting attracted more than 40 representatives of the several fields.

General tone was one of amity and expression of hope for continued cooperation between aviation and broadcasting. It was also obvious that aviation people had a number of misconceptions regarding 1,000 and 2,000-ft. TV antennas popping up all over the landscape.

Committee chosen to explore the situation further is comprised of John R. Evans, FCC, and D. D. Thomas, CAA, co-chairman, and the following:

J. J. Quinn, CAB; Col. J. J. McCabe, Air Force; Capt. R. G. Armstrong, Navy; Richard G. Dinning, Air Transport Assn.; Larry Cates, Air Line Pilots Assn.; Max Karant, Aircraft Owners & Pilots Assn.; A. B. McMullen, National Assn. of State Aviation Officials; Thad Brown and Neal McNaughten, NARTB; Arthur Scharfeld and Fred Albertson, Federal Communications Bar Assn.; Robert L. Kennedy, Assn. of Federal Communications Consulting Engineers.

Theme of meeting was set by F. B. Lee, deputy administrator of the CAA, who shared the chairmanship of the meeting with Comr. Webster. TV, he said, constitutes potentially the greatest hazard to air navigation. TV towers and aircraft are competitors for airspace, he said. There, he concluded, it is necessary to work out criteria for the guidance of regional airspace subcommittee which would be "mutually acceptable" to both the aviation and the TV industries.

Same attitude was expressed by retired Air Force Gen. M. W. Arnold, vice president of the Air Transport Assn. The aviation industry, he said, had no thought of inspiring legislation to discriminate against the radio-TV industry. Present method of evaluation by airspace subcommittee must be continued, he declared. He also expressed the opinion that 99% of the cases going to subcommittees would be settled to the satisfaction of both parties.

However, major problems were these, according to Gen. Arnold: High towers in (1) control zones near airports, (2) at or near airways, (3) off airways.

He emphasized that it is up to the airspace subcommittees to make a finding whether a tall tower is a hazard to air navigation, then to determine who should suffer—aviation or TV. Subcommittee finding of a tower as a hazard is not meant to be a flat objection to the tower, he asserted.

Emphasized at the outset by Comr. Webster was the fact that a high TV tower was one of the "keys" for getting nationwide coverage in the FCC's allocations plan issued three weeks ago [B•T,

(Continued on page 72)

ALLOCATIONS

Chances of Appeal Possible

WATCH Pennsylvania, New Jersey, or any of the Gulf States if you want to know where appeals to the courts against the FCC's final allocation assignments are going to be based.

That is the word of legal observers who have studied the bulky "Sixth Report and Order," issued three weeks ago [B•T, April 14].

In each of those states, some major cities failed to get additional VHF assignments because the Commission adhered rigidly to the mileage separation criteria—170 miles.

In one instance, Pittsburgh, another VHF channel would have been 169.39 miles from its co-channel in Columbus, Ohio, these observers point out. In another instance, Jackson, Miss., assignment of a VHF channel could have been made if the Commission was willing to accept 218 mile separation with Pensacola, Fla. Gulf state separation minimums were set at 220 miles by FCC.

Fact that the FCC assigned no VHF channels to the whole state of New Jersey is pointed to by some as cause for a good case against the assignment table. They don't count Newark, whose WATV (TV) is now operating on Channel 13, considering that city part of the New York metropolitan area.

Another court case may be in the works for Madison, Wis., it was learned. There the Commission refused to accept unopposed recommendations that the single VHF channels be reserved for education and the three UHF be made commercial. The Commission reserved one of the UHF channels for education.

Might Add VHF Stations

Commission attitude was summed up by one Commissioner in this manner: Admittedly, the table makes no compromise with the 170-mile separation figure. But, after a year or so if experience shows that stations could be closer together, then the FCC might entertain a petition to add VHF channels to some cities even though the separations might be less than the 170-mile minimums.

The same Commissioner also pointed out that in many situations, the addition of one more VHF channel to a city still would not make much of a dent in satisfying the expected large number of applicants.

Most Washington lawyers and consulting engineers seem to be resigned to the assignment table, and are busy preparing applications and readying for hearings.

Meanwhile, the Commission staff was busy last week preparing the 700-page document for publication in the *Federal Register*, scheduled for sometime between May 1 and 3.

The order becomes effective 30 days after such publication.

Errors found in the document are almost entirely typographical, it is understood. No major errors have been found.

Big question worrying FCC legal experts is whether it would be possible to seal off a city whose assignments were in litigation. Off-the-cuff opinion is that it might be possible to do so for cities in Zones II or III, but almost impossible in Zone I. Any injunction obtained against the assignments in a Zone I city would necessarily require the "freezing" of that whole northern area, it is felt.

That the end result of a court action could rip up the Commission's table of assignments is considered to be improbable, in the view of some Commission attorneys.

They point out that the most a court usually does in cases of this nature is to remand the order back for further FCC action to remedy a legal oversight or error.

In that case, they point out, the Commission can—and usually does—accomplish what the court orders, but still comes out with the same end result.

'Weak' U. S. Stations

SOVIETS are now claiming that television, which they "invented," is far superior there to that shown in the U. S. "Since November 1948," said commentator I. Gribov, "the Moscow television center has been transmitting images divided into 624 lines. This is the highest standard in the world!" U. S. video pictures have only 525 lines, he added. Also, the Moscow station is able to broadcast more than 100 miles, while the poor, weak American stations do no better than 50 miles, boasted Gribov.

EXAMINER TEAMS

FCC Said to Need 20

TALK of the FCC requiring "20 examiner team," to handle the expected TV hearing mountain, mentioned by Senator Edwin C. Johnson (D-Col.) last week [B•T, April 21], adds up to the need for an extra $750,000 to $850,000 in the FCC budget, according to an informal check at the Commission.

Senator Johnson made his comment following the issuance of the end-of-freeze final TV report, issued by the FCC three weeks ago [B•T, April 14].

A team consists of an examiner (yearly pay about $10,100), an attorney, an engineer and an accountant (each of whom makes about $7,500 yearly). In addition, each examiner has a secretary ($3,900), and each attorney and engineer rates a clerk-stenographer (at $3,500 each).

That adds up at full value to $43,500 per team—or $870,000 for 20 additional "examiner teams."

However, FCC officials are worried that the Senate might just add that amount to the $6,100,000 approved by the House for the Commission's 1953 budget, and assume that it would take care of TV. They point out that the House-approved sum is already $500,000 below the requirements for present operations of the Commission—without taking into account additions for TV.

What the Commission needs, they explain, is at least $13 million above the $6,100,000—to take care of current level of operations and to add 20 "examiner teams" for TV. That still would leave the Commission without extra finances for increasing the field monitoring activities, they say.

NETWORK COMPETITION

Cite VHF Need

IN THE MINDS of network officials, the shortage of cities with four or more VHF channels is going to play hob with the TV network competitive picture.

Analysis of FCC assignments to the top 25 markets, based on the Commission's final TV report issued April 14 [B•T, April 14] shows that only five of those cities have at least four VHF channels: New York, Chicago, Los Angeles, San Francisco and Washington.

The other 20 markets seemingly are shut out from having comparable network affiliates, in the view of observers. They are: Philadelphia, Detroit, Boston, Pittsburgh, St. Louis, Cleveland, Baltimore, Minneapolis-St. Paul, Buffalo, Cincinnati, Milwaukee, Kansas City, Houston, Providence, Seattle, Portland (Ore.), New Orleans, Atlanta, Dallas and Hartford.

Worth of VHF stems not only from the fact that in those cities as of April 21 there are 13,051,219 out of a total of 16,887,589 existing TV sets equipped only for VHF, but also the high powers and antenna height maximums permitted mean extra-wide coverage—at least for many years or until UHF technique is developed to permit equality of coverage with VHF.

Attitude of the FCC on VHF and UHF inequality is this, as stated in the Sixth Report and Order: "Healthy economic competition in the TV field will exist within the framework of the assignment plan."

In a study of the 162 major U. S. markets, as specified by J. Walter Thompson Co. (down to Laredo, Tex., pop. 14,135 families), only six cities have four or more VHF channels (Denver is the sixth city to the five listed above).

Cities among the top 162 markets which have at least three VHF commercial channels number 26, according to a study by one network. There are 53 cities with at least two VHF channels, 45 with one, and 32 with none.

One warning was sounded in the study: VHF in one market may provide VHF service in neighboring cities. Thus, the single VHF assignments in Hartford and in New Haven could provide two VHF services to each of those cities. Likewise, the assignment of a VHF channel to Petersburg, Va., really means a third VHF service to Richmond. Another situation is Dallas-Fort Worth. Dallas is assigned three VHF channels, but one is reserved for an educational station. Fort Worth is assigned two VHF channels. Therefore, the Dallas-Fort Worth market will actually be getting four VHF signals.

A comparative study of the first 25 markets is listed at left.

* * *

ASSIGNMENTS TO TOP 25 MARKETS
(According to J. Walter Thompson Co. Market Listing)

City	Assigned VHF	Assigned UHF	In Use (all VHF)	Available VHF	Available UHF	No. of TV Sets (as of 4/21/52)
1. New York	7	2	7	..	2*	3,059,400

25. Hartford	1	2	..	1	2*	.....
Total	90	74	58	32	72	13,051,219

* One channel reserved for noncommercial, educational station.
† Total for Dallas-Fort Worth. Fort Worth is assigned two VHF and two UHF channels, with one UHF assignment reserved for education. There is one VHF channel in use in Fort Worth.

SPONSORS

Should Re-Focus on Commercials

IF ADVERTISERS and their agencies paid more attention to the commercials on their TV shows and less to the entertainment, program ratings might decline but sales would almost certainly improve, according to Jack Boyle, director of television research for Daniel Starch and Staff.

Citing studies of sales effectiveness of video commercials made by the Starch organization, Mr. Boyle told BROADCASTING • TELECASTING that the range in the number of new buyers created by telecast advertisement for competing products is far wider than is true for ads in printed media.

There is little correlation between size of audience and sales effectiveness for TV programs, he reported, with some relatively low rated programs producing many more customers for their sponsors' products than other programs with higher ratings.

Cites Comparisons

To demonstrate his thesis, Mr. Boyle cited comparisons of the sales effectiveness of TV commercials for various brands of toilet soaps, deodorants, refrigerators, toothpastes and beers. Sales effectiveness, he explained, is measured by asking all persons interviewed whether they would buy the particular product. If 40% of those who had seen the TV commercial said they would buy the product but only 10% of those who had not seen the TV commercial said they would, the difference (30% in this case) can be attributed for the most part to the sales effectiveness of the commercial.

Projecting the sales effectiveness figures to the total number of TV families gives the number of additional people who said they would buy the product, presumably because of the influence of its video advertising. The following table shows the product with the highest and lowest sales effectiveness figure in each product group, accompanied by the rating (size of audience) of the network TV show on which each product was advertised.

Ratings are Hooper TV figures, averaged for New York, Philadelphia, Boston and Chicago, the cities in which the Starch interviews were made.

TV Advertised Product	TV Program Rating (#)	TV Commercial Effectiveness (##)
Toilet Soap		
Brand A	20	65
Brand Z	26	19
Deodorant		
Brand A	22	118
Brand Z	39	6
Refrigerator		
Brand A	23	59
Brand Z	16	6
Toothpaste		
Brand A	20	65
Brand Z	13	12
Beer		
Brand A	24	75
Brand Z	21	6

(#) Percent of all TV homes tuned to the program.
(##) Additional people per thousand TV homes who said they would buy product after seeing TV advertising.

"The explanation," Mr. Boyle said, "is largely a matter of attitude on the part of the advertiser and the agency. In newspaper and magazine advertising the client and his agency have traditionally focused their efforts on producing advertising copy. Circulation and the editorial contents of the publication that attracted the readers comprising that circulation were important, but they were not the responsibility of the advertiser and agency.

"With the development of broadcast media—first in radio and now in television as well—that focus has changed. The program sponsor is concerned not merely with the sales message—the advertising matter—but with the program content—the circulation-building editorial material—as well. In many cases, the copywriter, traditionally the star of the agency's creative team, is relegated to the sidelines while the program people monopolize the spotlight.

"This concentration on program content—on circulation, if you please—is demonstrated by the attention that has been lavished on program ratings by advertiser, agency and broadcaster alike. 'How many people saw or heard my program' has frequently been made more important than 'how many people bought my product as a result of seeing or hearing my program.'

"I don't mean to say that circulation is not important and that program ratings which measure that circulation are not also important. Obviously, the best commercial in the world would have no effect if no one saw it or heard it.

"But sales are important, too. And, in these days when costs must be measured in terms of results, a shift of attention back to the advertising message, which after all is the first responsibility of advertising personnel, might be profitable all 'round. The advertiser would get sales commensurate with his expenditures for TV time; the agency would not have to worry about holding the account and could concentrate on making the broadcast commercials even more effective; the station or network could concentrate on building audience without worrying about losing the advertiser's business."

TRANSMITTERS

DuMont Models Reported

TWO NEW DuMont high power TV VHF transmitters, one a 25-kw model for Channels 2-6, the other a 50-kw unit for Channels 7-13, providing the maximum TV station coverage under the new FCC rules, were announced Wednesday by James B. Tharpe, national sales manager for the TV transmitter division of DuMont Labs.

The announcement was made at the opening of the division's New York sales office in the Empire State Bldg., where the transmitter salesmen were host to newspaper executives in the city for the annual ANPA convention.

Mr. Tharpe said the price of the 25-kw transmitter, less than $100,000, "will make maximum power TV stations available to smaller markets than had heretofore been expected." He also pointed out that this transmitter requires only about half as much floor space as competitive models, simplifying station planning and reducing costs further. Mr. Tharpe indicated the new transmitters will be timed for delivery to follow FCC grants of higher power as specified in the final allocation report [B•T, April 14].

Loughren To Speak

A. V. LOUGHREN, director of research, Hazeltine Corp., is to discuss the status of the National Television System Committee's "composite" compatible color television system at a meeting of the New York section of Institute of Radio Engineers on Wednesday evening. Meeting will be in the Engineering Societies Bldg., 33 W. 39th St., New York.

Schlitz Signs PSI-TV

CONTRACTS have been signed with Paul White, president of PSI-TV, production and distribution company in television film programming, for that firm to supervise and distribute the Schlitz *Playhouse of Stars* for Lennen & Mitchell, advertising agency, it was announced last week by Edwin B. Self, director of advertising of Joseph Schlitz Brewing Co., Milwaukee. The program will be cut to a half hour (CBS-TV, Fridays, 9-9:30 p.m.) effective May 30.

WSAZ-TV BID

Asks Channel Change

FIRST application for a change of frequency by one of the 30 existing stations required to do so under the FCC's final TV allocation report [B•T, April 14] was filed last week by WSAZ-TV Huntington, W. Va.

WSAZ-TV requested permission to move from present Channel 5 to Channel 3, boost effective radiated power from 16.8 kw to 84 kw. It reported that the move will cost $91,000 and also said that 1951 earnings after taxes were $183,185. In 1950, station had net after taxes of $3,089.70, application disclosed.

New equipment has been ordered for July 15 delivery, and the West Virginia station hopes to be on its new channel with new power thirty days thereafter.

Single new application was by New York's WNYC. Municipal station filed for commercial UHF Channel 31, specifying that it would operate non-commercial (see story page 70).

Among those announcing plans to file was WSIX Nashville, which proposes to seek Channel 8 with 316 kw, spend more than $500,000, it reported. KFWB Los Angeles has told its Washington counsel to file for a UHF channel in Los Angeles. Lone Washington commercial UHF channel got its second contestant when WEAM in suburban Arlington, Va., announced it would seek the Washington channel in order to "serve a northern Virginia area separate and distinct from the service now available in the District." Previously, WGMS Washington had announced it was filing.

WGAR Cleveland announced that it was preparing an application for UHF Channel 65 with an ERP of 100 kw. The transmitter location would be on the 50 acres of land owned by WGAR in Broadview Heights, Ohio. There would be an additional studio in the Hotel Statler. Estimated cost is $700,000.

television applications

Digest of Those Filed With the FCC April 18 through 24

Boxscore	VHF	UHF	Total
Applications filed since April 14.....	11	5	16

NEW YORK, N. Y.—City of New York Municipal Bcstg. System, UHF Ch. 31 (572-578 mc), ERP 186 kw visual; antenna height above average terrain 587.2 ft., above ground 625 ft. Estimated construction cost $335,000, first year operating cost $200,000, no revenue because station will be operated as non-commercial. Studio-transmitter location Municipal Bldg., 40° 42′ 47″ N. Lat., 74° 00′ 14″ W. Long. Studio equipment RCA, transmitter RCA, antenna RCA. Legal counsel Cohn & Marks, Washington, D. C. Applicant is licensee of WNYC-AM-FM New York. **Seymour N. Siegel**, director; **William H. Pitkin**, chief engineer.

Existing Station
Change in Channel

WSAZ HUNTINGTON, W. Va. — **WSAZ Inc.**, Ch. 3 (60-66 mc), ERP 84 kw visual; antenna height above average terrain 593 ft., above ground 349 ft. Estimated construction cost $91,000, first year operating cost $650,000, revenue $850,000. Studio equipment RCA, transmitter RCA, antenna RCA. Legal counsel Cohn & Marks, Washington. Engineer Leroy Kilpatrick, WSAZ-TV. Applicant is licensee of WSAZ. Application is for change in frequency from Ch. 5 (76-82 mc), as required under provisions of FCC Sixth Report & Order [B•T, April 14].

'FABULOUS' PROFITS

TELEVISION will be installed in every motion picture theatre in the country, and profits on the hiked-admission events will be "fabulous."

This was the prediction of Nathen L. Halpern, president of Theatre Network Television Inc., as he spoke to members of the Society of Motion Picture and Television Engineers meeting for its four-day 71st semi-annual convention in Chicago's Drake Hotel last week.

Mr. Halpern, speaking Monday evening after the opening sessions, discussed theatre TV from four viewpoints—(1) industrial development, (2) programming, (3) public reaction and (4) program distribution.

Envisioning a future with TV installations in some 20,000 more theatres, contrasted with the present 75 houses in 37 cities which are equipped for TV, Mr. Halpern said one of the greatest limitations to growth of the medium has been a lack of telephone relay facilities for networking.

Summarizing a plan of his company, Theatre Network Television, to telecast nine special features from March 3 to April 13, Mr. Halpern said the proposed schedule was cancelled because American Telephone and Telegraph was unable to clear lines to 23 metropolitan areas. Total number of clearance requests was 207, with AT&T able to furnish only 56 or 27%, Mr. Halpern said. He added that the phone companies "have shown increasing understanding of the theatre TV facilities needs" and he anticipates AT&T will "free more facilities" in the future.

Discussing potential profits to theatre owners, the speaker outlined the case of one motion picture house in New York which was among a group carrying six fights exclusively last summer. The house had 3,000 seats. Net receipts at $1, $2.40 gross admission and a sellout with 473 buying standing room came to $7,500 after taxes. Of this, total TV costs were $4,000—considered high because of the small number of theatres in the network—leaving a $3,500 profit for the exhibitor. "The deduction of normal house expenses and film distributor costs still left this exhibitor with a whopping profit for a single theatre TV show," Mr. Halpern said.

Theatre TV Costs

Discussing theatre TV costs, he noted that exhibitors have upped their box office charges considerably since the advent of the medium, in one case from 54 cents to more than $2.00. He said there was one instance of concession sales during a telecast going up 400%.

Success of theatre TV depends to a large degree, he said, on superior events which are "(1) exclusive, (2) promoted well and (3) telecast regularly."

Profits will be high for theatres with TV installations because the investment as well as operating losses are relatively small, even with a few theatres participating in the plan. Costs will drop even lower with addition of more outlets. He contrasted costs of commercial telecasting to some sets, saying networks and stations "made large-scale investments and sustained high losses for years" before making any money.

The "relatively small losses" recorded thus far in theatre TV are attributable to (1) few theatres sustaining costs of big-time attractions, (2) absence of a regular year-round flow of programs and promotion, and (3) pricing policies followed by theatre men.

All speeches and technical sessions on opening day of the convention concerned television, beginning with a luncheon address by W. R. G. Baker, vice president of General Electric Co. and general manager of the electronics division. Mr. Baker outlined work of the Radio - Television Manufacturers Assn. National Television System Committee, saying the color TV standards report of the committee will be released this fall after completion of field tests during the summer.

Eleven technical sessions of television engineering matters took place Monday afternoon and evening.

Seen in Theatre TV

SET SHIPMENTS

February Total 434,808

TELEVISION receiver shipments to dealers totaled 434,808 sets in February compared to 619,122 in the same month of 1951, according to Radio-Television Mfrs. Assn. The figure compared to 371,689 sets shipped in January.

RTMA's breakdown shows that TV sets were shipped to all 48 states during February, the largest total, 100,996, going to New York and the lowest, two, going to North Dakota.

GLOBAL TV PLAN

Sen. Capehart Supports

FOREIGN countries should hitch their wagon to the American electronics star by adopting U. S. TV standards as a prerequisite to any global television plan, according to Sen. Homer E. Capehart (R-Ind.).

In an article appearing in the April 15 issue of *Television Opportunities* magazine, Sen. Capehart declared "there should be no question in any nation's mind as to the adoption of our standards." He commended Japan for accepting U. S. video standards (525 lines, 60 fields, 6 mc) and expressed hope other countries would follow suit [B•T, April 7].

Further in the article, which was reprinted in the April 17 *Congressional Record* on Capitol Hill, Sen. Capehart is quoted as stating:

"We have wasted a lot of money on the Voice of America. It can never be as effective as television as a medium for message and information. . . . The American people have spent more than $4 billion in the purchase of sets as proof of their confidence in our [TV] standards."

TECHNICIAN NEED

Seen for Servicing, Stations

A NEED for 170,000 new TV technicians was predicted by Leonard C. Lane, president of the Radio-Television Training Assn., last week when he spoke before a meeting of the association held to appraise the TV freeze end.

"Estimating five or six service calls per set per year—a reasonable figure in view of use of the lesser known UHF band—as many as 100,000 new servicemen may be required for repair of the 30-40 million new TV sets Americans will be buying in the next four or five years," Mr. Lane said.

In addition, he anticipated that 10-40 technicians, exclusive of graduate engineers, will be needed to man each of the 2,000 possible new transmitters, plus 20,000 extra technical personnel for expanded TV manufacturing operations.

BOB FINKLE, staff director of ABC-TV Hollywood *Personal Appearance Theatre* and *The Ruggles*, has been signed to seven year contract by the network.

N. Y. FILM ASSN.

16 Set Up Organization

FORMATION of the Film Producers Assn., consisting of 16 of the top non-theatrical film producers in the New York area, was announced last week by Peter J. Mooney, who was elected president.

Other officers are David Pincus, vice president; Edward Lamm, treasurer, and Walter Lowendahl, secretary.

Purpose of the association initially will be to halt the movement to the West Coast of work normally of a non-Hollywood nature, and to provide an authority for identifying reputable film producers as bona fide business organizations. Members of the association, currently producing educational and business films and TV commercials, also plan studies on producing complete TV programs, on labor problems involved in eastern film production, and on development of TV financing through banks.

Member companies are Audio Productions, Pathescope Co. of America, Willard Pictures, Video Varieties, Transfilm Incorporated, Leslie Roush Productions, John Bransby, Caravel Films, Sound Masters, Films for Industry, Paul Hance Productions, Murphy-Lillis, Herbert Kerkow, Affiliated Film Producers, William J. Ganz Co., and Film Graphics.

THEATRE TV

Channel Requirements Presented to AT&T

REQUIREMENTS for a theatre TV transmission system were submitted to AT&T last week by the National Exhibitors Theatre Television Committee and the Motion Picture Assn. of America.

The specifications, some of them more stringent than now used in commercial TV networking, were submitted to AT&T in conjunction with the request of the FCC for data on the availability of common carrier facilities for theatre TV earlier this month [B•T, April 7].

Theatre TV hearings were postponed from May 5 several weeks ago by the FCC due to the "pressure of other business" [B•T, April 14]. It is expected the Commission will set another date in the near future.

Specifications submitted to AT&T last week cover performance standards, pricing basis and typical system requirements. Among the requirements are:

1. A 10 mc bandwidth video signal, compared to commercial TV's 4.5 mc.

2. Amplitude and phase response of the video signal much stiffer than those used in commercial TV.

3. Signal-to-noise ratio of the video signal not less than 46 db for black-and-white signals and 42 db for field sequential (CBS) color signals. Commercial TV signal-to-noise ratios for networking run about 40 db for monochrome, it is understood. For periods of fading, minimums of 41 db for monochrome and 37 db for color are specified.

4. Linearity shall not exceed 10% of the difference between black and white levels. Commercial TV networking has no such requirement, it is understood.

5. Audio signal shall be equivalent of Class AA intercity lines (up to 8 kc) and signal-to-noise ratio of 50 db shall be maintained.

Document suggests that a tariff for theatre TV program transmission should provide for a minimum of three hours consecutive use during any period of the day.

New York to Washington theatre TV system is used as an example of how an intercity system might work. Theoretical system includes six reversible channels running from New York through Trenton-Philadelphia-Wilmington-Baltimore to Washington. Single reversible feeder channels run from Philadelphia to Atlantic City, Allentown and Reading.

Needs in Washington

Example was amplified to show what distribution requirements would be in Washington. Six groups of theatres are listed, comprising roughly 15-20 in each group, and the necessary links are specified for each group.

Document, which asked for answers in 60 days, was prepared by the Toeppen Co., Beverly Hills, Calif., in conjunction with Washington consulting engineers McIntosh & Inglis and Jansky & Bailey.

RESERVATIONS

Walker Warns Educators

"THERE is sometimes only a very fine line between deliberation and procrastination," FCC Chairman Paul A. Walker warned educators attending the first educational TV program institute at Pennsylvania State College last week.

Chairman Walker was one of the speakers at the conference, attended by 80 educators, which ran April 21-24. His talk was much along the same line as the position he and Comr. Frieda B. Hennock took at the convention of the Institute for Education by Radio-Television in Columbus [B•T, April 21].

Urging educators not to delay too long in applying for one of the 242 non-commercial, educational TV channels reserved for them, Chairman Walker warned:

"These precious television assignments cannot be reserved for you indefinitely. They may not even be reserved for you beyond one year unless you can give the Commission concrete, convincing evidence of the validity of your intent. . . .

"Yes, at the end of one year from the effective date of this report [the final TV report issued by the FCC April 14], anyone may request the Commission to change the educational assignment in your community to a commercial assignment."

Cooperation on an area-wide basis among educational institutions for the establishment and operation of an educational TV station was hailed by the FCC chairman.

"In the first place, cooperation between all the educational institutions in the 40- to 70-mile radius of your television station should certainly go a long way toward solving your financial problem," he said.

"In the second place, such cooperation in and of itself may bring a new concept of the greater sharing and utilization of all the educational resources of the area—even beyond the field of television," he added.

The four-day seminar was sponsored by the American Council on Education, with financial support provided by the Fund for Adult Education of the Payne Fund, and by the Alfred P. Sloan Foundation.

Purpose of the conference was not only to explore the use of the reserved educational channels but also methods of using time on commercial TV stations.

Various types of educational programs were shown the educators—kinescopes, films and live. RCA provided a mobile crew which assisted in presenting the demonstrations.

Among suggestions which cropped up during the spirited discussions was the creation of a National Commission for Educational Television.

Dr. Arthur S. Adams, president, American Council of Education said that such a commission "could be of great help to colleges planning television stations.

"It would be particularly helpful in programming, in obtaining the opinions of the general public and in arranging means of financing." No formal action was taken on this suggestion.

A major impression was made by Dr. John S. Millis, president of Western Reserve U., who related his experience in educational programs—for college credit — on WEWS (TV) Cleveland.

Educators were impressed with Dr. Millis' findings that courses presented via TV in Cleveland have an audience of 50,000. They also found significance in the large number taking the courses for credit, paying fees and actually finishing the course. The proportion was said to be much higher than the average in the more conventional university extension courses.

Among other speakers were Dr. Allen B. DuMont, who reviewed the history of TV and expressed confidence in the future of UHF; and A. S. Dunton, chairman of the board of governors of the Canadian Broadcasting Corp., who said that CBC's first two TV stations—in Montreal and Toronto—would begin operation this fall.

Consensus of those present was that finances for building TV stations are not nearly as important as the large sums necessary to operate.

WISCONSIN GROUP

Studies TV Allocations

WISCONSIN State Radio Council has been asked to study the FCC allocation of 51 television channels, 12 of them educational reservations, in 31 state communities and has examined an engineering plan which could provide state-wide TV series, Prof. H. L. Ewbank of U. of Wisconsin, director, said last week.

Whether Wisconsin is to have a television service under educational auspices is a matter for the people to decide, Mr. Ewbank said. "Without a mandate from the people we cannot act." He said the council would welcome expressions from state groups and individuals concerning their wishes.

KANSAS SCHOOL TV

Planned by Institutions

KANSAS will have an educational television service if the plans of joint committee representing two state educational institutions are realized, according to Chancellor Franklin D. Murphy of Kansas U. and President James A. McCain of Kansas State College.

The Kansas educators said the committees for several months have been exploring "ways and means for efficiently, intelligently and economically bringing a first class television service to . . . Kansas."

Kansas State College has telecast experimentally for years, with a low-cost unit, and Kansas U. Medical Center's permanent day-by-day closed circuit TV system was first used in September 1949.

D. C. EDUCATORS

Weigh UHF Channel Use

WASHINGTON, D. C., educators gathered last week to examine the prospect of cooperative use of the one reserved UHF channel allotted to Washington.

Representatives of 15 Washington educational institutions lunched at George Washington U., at the invitation of Dr. Cloyd Heck Marvin, GWU president. Dr. Marvin, who presided at the meeting, felt that a TV station could be made into a definite educational instrument which could best be shared by all, instead of being the teaching instrument of one.

Such a station, he suggested, might be more free to undertake experiments in the educational use of TV.

Summarizing arguments against the venture, Dr. Marvin pointed out that cost of operation of this kind of station has been estimated at a minimum of $600,000 a year and would require an initial outlay for construction of $400,000 to $800,000.

Henry N. Peterson, chief librarian, D. C. Public Library, said that the opportunity to obtain a TV station should not be ignored but also called for study of the possibility of purchasing time on existing commercial TV stations.

A committee was appointed to set up subcommittees to investigate particular phases of the problem.

IERT SESSION

Educators Fret Over Funds

By JOHN OSBON

. . . The Commission has placed a heavy burden of responsibility upon educators throughout the country. Educators now have the primary duty to see to it that this golden opportunity of TV is taken advantage of and that . . . stations are built as soon as possible. . . . Their failure to meet the challenge of these television assignments will be a huge "black eye" which they will be forced to wear, without honor, for a long time to come. . . .—FCC Comr. Frieda Hennock before the Institute for Education by Radio-Television April 18.

* * *

WITH this somber note of warning and evident concern over the one-year time limit on applications for educational TV reservations, Comr. Frieda Hennock raised the storm flag for educators at the 22d annual Institute for Education by Radio-Television in Columbus, Ohio.

Whether educational groups would rally around the flag appeared questionable as the four-day conference closed April 20.

"The most important thing now is to get applications to the Commission for construction permits," Comr. Hennock told a ballroom-packed audience. "Therefore, educators in every city affected must, as soon as possible, begin the work necessary for the filing of such applications. But first, the decision to build the stations must immediately be made and some enlightened public-spirited and enterprising person in each city must take the lead in getting the necessary preparatory staff work completed."

Comr. Hennock dominated two sessions on educational TV April 18—one a clinic on utilization of channels, for which she gave a prepared talk, and a second general meeting in which she was active from the floor. Additionally, she reportedly was closeted with several educators in side discussions to offer advice on their particular problems.

At one point, Comr. Hennock said: "Don't worry about money too much—just get in those applications." She also told IERT members, in response to a question, there would be sufficient dual-band VHF-UHF receivers available for educators to start operations, just as with commercial telecasters.

In this connection, Comr. Hennock blurted out: "We seem to have no jurisdiction over set manufacturers, which perhaps is a grave defect." She urged educators to apply in any event even if their funds situations haven't firmed up yet and even if they could program only short periods each day. This also was the position taken by the Joint Committee on Educational Television and Ralph Steetle, its executive director.

Comr. Hennock stressed the urgency of filing for the 242 educational reservations, of which 80 are for VHF, and at times directed implied criticisms at educators for their failure to get down to grass-roots level in their thinking. Her warnings were coupled somberly with references to "those who

(Continued on page 64)

SARNOFF

Honored With First RTMA Award

BRIG. GEN. David Sarnoff, RCA chairman of the board, has been selected by the Awards Committee of Radio-Television Mfrs. Assn. to receive the first RTMA award for outstanding service to radio and television.

Designation of Gen. Sarnoff as recipient of the industry's award was announced Thursday at a meeting of the RTMA board of directors, held in Niagara Falls, Ont. The board met again Friday in joint session with the Canadian RTMA board.

Gen. Sarnoff

Leslie F. Muter of Muter Co., Chicago, is chairman of the Awards Committee as well as RTMA treasurer. Mr. Muter announced that Gen. Sarnoff was the unanimous choice of his group.

The awards project was set up by the RTMA board at its New York meeting last February as a means of recognizing exceptional contribution to the electronic industries. Presentation will be made to Gen. Sarnoff June 24 at the annual summer meeting of RTMA, to be held in Chicago.

RTMA's board heard a series of reports from committee and division heads. Joseph B. Elliott, RCA Victor, chairman of the Sports Committee, said the committee had recommended expansion of the program designed to promote attendance at athletic events.

Thus far the committee has conducted special seasonal promotions for such major sports as baseball and football. The committee feels the program should be enlarged and put on a year-round basis. Promotion of sports events will be worked into industry advertising on a more permanent basis.

Mr. Elliott reported that the recent Jordan report, showing TV actually helps rather than hurts attendance at sports events, had received widespread and favorable reception [B•T, April 21, 7].

Dr. W. R. G. Baker, General Electric Co., on behalf of National Television System Committee, reported that the committee's field testing of a proposed set of color TV standards was proceding satisfactorily. Field testing has been conducted in Philadelphia, New York and Syracuse.

The RTMA Advertising Committee reported that test promotion campaigns designed to stimulate FM listening and set sales were proceding satisfactorily. The committee reviewed tests conducted in North Carolina, Wisconsin and District of Columbia.

Next promotion will start in early May, covering Upper New York State. It will include AM as well as FM promotion. John H. Smith Jr., NARTB FM director, met with the committee in New York last Tuesday.

Future tests are to be confined to localized areas where FM "offers something that AM doesn't." This was believed to mean the promotions will cover areas where reception is bad or FM offers program service not available on AM stations.

A score of areas have requested FM promotion campaigns under joint RTMA-NARTB-distributor-dealer auspices but they will be required to show a special need for FM service. FM broadcasters will be expected to take the initiative and set up their own specialized promotion committees.

Group Members Announced

Mr. Muter, chairman of the RTMA Convention Committee, announced membership of the group as follows: Charles Hofman, Belmont Radio Corp., co-chairman in charge of entertainment; A. D. Plamondon Jr., Indiana Steel Products Co.; J. J. Kahn, Standard Transformer Corp., and Robert S. Alexander, Wells-Gardner & Co.

A nominating committee was named to submit nominees for RTMA officers other than the presidency. Glen McDaniel, RTMA president, is serving a three-year term. The committee comprises Max Balcom, Sylvania Electric Products, chairman; Paul Galvin, Motorola Co.; Mr. Muter. All three are ex-presidents of RTMA.

The Canadian RTMA board was invited to join the U. S. board at a joint meeting to be held April 16-17, 1953, at the Ambassador Hotel, Los Angeles.

NEWS RIGHTS

Don't Telecast Suspects

POLICE should not permit suspects to be telecast, in the opinion of Milton E. Winslow, superintendent, Bureau of Identification, Minneapolis Police Dept. Superintendent Winslow's views were cited in the April *Vermont State Trooper.*

The state legal department was quoted by Mr. Winslow as stating that it is the duty of the police to refuse to permit any prisoner in custody to be telecast, prior to conviction.

Doing so, the state authority continued, would subject police to damage suit action by the prisoner.

Discussing background which brought forth the opinion, Mr. Winslow said, "Lately, and I presume many other (police) departments are faced with the same situation, I have been pestered by the television stations wanting to, and sometimes demanding that sensational arrests be televised."

RAYBURN BAN

Press and Broadcaster In Same Boat—Koop

EFFORT to rescind House Speaker Sam Rayburn's ban on telecasting of Congressional sessions, and prevention of similar future rulings from either federal or local government officials, is the concern of the newspaper editor as well as the telecaster.

That is the opinion of Theodore F. Koop, associate director of news and public affairs for CBS, Washington. Mr. Koop made his statement during a panel discussion on "The Impact of Television on News Reporting," one of five subjects explored at the American Society of Newspaper Editors convention in Washington April 17-19.

Mr. Koop said bright lights at congressional hearings are not TV lights, and reiterated the cry of telecasters that TV cameras need no extra light with which to satisfactorily operate. The radio microphone should not bother witnesses, he said, since it is already there for the PA system.

"Freedom is your fight, too," he told the editors.

Appearing with Mr. Koop on the panel were Dr. Ralph Casey, head of the Journalism Dept., U. of Minnesota; Davidson Taylor, NBC and Wallace Lomoe, managing editor of the *Milwaukee Journal.* Moderator was George Cornish, managing editor of the *New York Herald Tribune.*

Mr. Taylor agreed with Mr. Koop by asserting that television should have the right to cover a news event which is covered by any other media.

"It is no longer freedom of the press, but freedom of news," Mr. Taylor declared.

★

In addition to describing some of the preparations for TV coverage of the Chicago political conventions, Mr. Taylor listed the needs of a TV station's news department.

"Television is looking to experienced newsmen from established news media," he said. "TV needs men who have the skill to integrate the picture and the sound; who can look for, and point out, the significant gesture, facial expression or portion of a speech."

He said the presentation of news on-the-spot makes the viewer a reporter. Unfortunately, most viewers are not trained as reporters and don't know what to watch for, he said.

Dr. Casey presented findings of various surveys which purported to show that readership of newspapers does not differ significantly between television homes and non-TV homes. He said readership declined least among morning papers in TV homes.

TV owners of more than a year return to their papers, Dr. Casey claimed.

But he asserted that the longer a newspaper reader has a TV set, the less he listens to the radio.

During the discussion period open to comments from the floor, James S. Pope of the Louisville *Courier-Journal* and the *Times,* and chairman of ASNE's Freedom of Information Committee, replied to Messrs. Koop and Taylor's plea for coverage of news events by all media.

Mr. Pope said his committee had decided that the important thing was the elimination and prevention of closed, secret meetings, and not whether TV should be allowed now. He predicted that the problem of restricted TV coverage would resolve itself within two years.

HONORS NBC-TV SHOW

Steelman Cites 'Battle Report'

NBC-TV program, *Battle Report—Washington,* intended to keep the public better informed on the Korean war and the world-wide fight against communism, was commended by Presidential Assistant John R. Steelman last week.

"Before *Battle Report* becomes a part of the tradition of a free people," Mr. Steelman said, "let me say once again how greatly indebted we, who have had a share in it, feel toward NBC. At no cost to the government whatsoever, and at great expense to itself, NBC brought you [the public] programs simply because it saw them as a service to you, the people."

The series, which started Aug. 13, 1950, and ran for 86 programs, ending April 20, was produced by Theodore Ayers, written by Lou Hazam, and narrated by David Brinkley.

'COMEDY HOUR'

C-P-P May Film Series

IF COSTS can be held to the same level as live telecasts Colgate-Palmolive-Peet will film the weekly NBC-TV *Comedy Hour* next fall, eliminating kinescoped West Coast repeat.

Leslie Harris, C-P-P radio-television director in Hollywood, is exploring facilities and costs. He said he was certain filming would be done if the required AFM 5% trust fund formula setup for live music on TV film is eliminated.

The budget has been set at $5,500,000 for 39 *Comedy Hour* shows starting Sept. 21, it was said. With Bob Hope added to the comedy line-up and Donald O'Connor and Eddie Cantor receiving increased salaries, production and time costs per show will be about $125,000 next season as compared to the current $97,000. Mr. Hope is to receive $40,000 per telecast and supply added talent and writers.

Under the schedule setup for next fall on a rotating basis, Mr. Hope is to do 10 telecasts, with Martin & Lewis, Abbott & Costello and Donald O'Connor doing six each and Eddie Cantor 11.

An Open Letter to WWL Concerning Television In the New Orleans Market

We believe that you have done a commendable service for the development of television in New Orleans by clearly stating your position with respect to your request for the assignment of Channel 4.

Community Television Corporation also believes that additional television stations on both VHF and UHF should be established as soon as possible in New Orleans thereby giving New Orleans the widest possible choice of television programming.

Community Television Corporation, which consists of 75 local stockholders including many business men active in the civic, financial and social life of New Orleans, is filing an application for TV in New Orleans and will specify Channel 26.

As you did, we also want to let everyone interested in filing an application for TV in New Orleans know of our plans in advance. Our belief is that by so doing others who may be preparing applications for a television station in New Orleans will have sufficient notice and will see fit to file their applications specifying the remaining, unapplied for channels in this community, thereby avoiding bickering, and long drawn-out hearings and delays.

We, too, are going on record in not trying to outguess other applicants. Our decision to file on Channel 26 is made and it is our intention to adhere to this request.

We are joining with you in the spirit expressed in your forthright position in announcing your intentions with respect to television, and we do so with the same desire of expediting the processing of television applications for New Orleans and the bringing of additional TV service as soon as possible in its full measure of enjoyment to our fellow citizens.

COMMUNITY TELEVISION CORPORATION

505 BARONNE STREET NEW ORLEANS, LOUISIANA

JULES J. PAGLIN, PRESIDENT — STANLEY W. RAY, JR., V. PRES. AND GEN. MGR.

IERT Session

(Continued from page 61)

would profit by education's failure here."

Comr. Hennock stressed that if educators don't use their VHF assignments, "commercial interests will soon find out how valuable they are and they'll apply." She noted non-commercial educational TV efforts of certain universities, (Syracuse U., etc.).

Seymour Krieger, counsel for the Joint Committee on Educational Television, emphasized urgency, too, but strongly advised educators to consult FCC's rules before organizing and starting stations. Other facets he urged in referring to applications, were data on time, programming and engineering. Closed circuit TV also cropped up.

JCET has estimated that more than 15 organizations may file this year for educational outlets and that "half will get in substantial readiness to file within the year's grace." There was one unofficial estimate that of the 800-plus institutions indicating interest in TV, only a score or more have funds. Mr. Steetle said none would be on the air by year's end.

When the smoke had cleared, BROADCASTING • TELECASTING sounded out at random university and college representatives on their TV planning to date. Most were unaware how far their own courses had been charted or declined to have their reactions quoted by name.

They said actual steps must be announced by the presidents and boards of trustees of their respective institutions and noted the importance of the Educational Television Programs Institute conference which was held last week at Pennsylvania State College. It reportedly was the first time presidents of universities actually had been called together to discuss video's educational future (see separate story).

Need Questions Answered

What bothered educators was the lack of answers to these questions: (1) How can we file applications and order equipment when we're not sure we will have sufficient funds? (2) Will not the Commission's rejection of partial commercialization redound to a major disadvantage for us?

One educator said pointedly that FCC's ban on partial profit operation would "bankrupt" educators who go into television. Another questioned whether prospective stations could obtain equipment from manfacturers without reasonable assurances of financial backing. Still another complaint by some IERT members was that they knew nothing about the one-year time limit on educational reservations.

One educational station representative (from Minneapolis-St. Paul) asked: "How can you apply to the Commission for a TV station and list estimated costs if you don't know the amount of your funds and where they're coming from?"

There also were grumblings over the 162 UHF assignments, which some educators, notably those of Ohio State U., felt were meaningless in the light of present TV development and lack of audience.

As William G. Wilcox, OSU public relations director, put it: "Television (here) is still dependent on the cooperation of the three local commercial stations for any live program time. The FCC announcement . . . makes available to the university a channel (UHF Channel 34) that now is of no practical value. There are few if any receiving sets in the Columbus area equipped to receive broadcasts in the ultra high frequency range." OSU was rejected in a bid for VHF Channel 12.

No Immediate UHF Plans

The Ohio university thus has no immediate plans for UHF and "we must continue to seek time as it is made available to us on the three Columbus stations," Mr. Wilcox said.

Also rejected for VHF were East Lansing, New York, Los Angeles. While VHF Channel 7 was set aside for non-commercial educational use in Salt Lake City, plans of the U. of Utah and other groups were not revealed during the conference. Numerous groups in Chicago will apply for VHF Channel 11. Organizations in other cities are readying applications, according to JCET [B•T, April 21].

As one concrete step, educators were urged to concentrate at the outset on purchasing kinescope equipment and film studio facilities. Programming would be limited in nature, of course, with stations taking advantage of FCC's leniency with respect to hours of operation. As little as a half-hour or two hours a day at the outset of operation was mentioned more than once during the sessions. As an alternative to "non-profit" status, educators were told they could compete for commercial stations.

Minimum programming was an advantage of which some educators were quick to apprise their uninformed TV-minded colleagues. It also was explained that stations may sell programs but not time. The Commission's rules, accompanying the Assignment Table, lift provisions for time-operation from FM regulations and apply them to non-commercial educational TV broadcasting:

Appearing under "General Operating Requirements, Sec. 3.651 (b), the rules state:

Non-commercial educational television broadcast stations are not required to operate on a regular schedule and no minimum number of hours of operation is specified; but the hours of actual operation during a license period shall be taken into consideration in considering the renewal of non-commercial educational television broadcast licenses.

With respect to the latter reservation, some panelists at the IERT convention professed belief the Commission would go easy on educators on the premise that the operation is substantially "in the public interest" and because of acknowledged difficulties school groups will face in programming, production and engineering.

While a handful of educators were privately inclined to brand cooperation by commercial broadcasters as inadequate on educational programs, by far the majority praised the industry for its efforts. The JCET also is on record as lauding private operators.

Utilization of commercial TV and radio stations for presenting educational fare also was explored during the convention. Arnold L. Wilkes, public affairs director, WBAL-TV Baltimore (Hearst Radio Corp.), presided over a panel including James Hanrahan, WEWS (TV) Cleveland, and JCET's Mr. Steetle. Examples of TV programming on commercial outlets in Baltimore, Cleveland, Columbus and other cities were cited.

Similarly, concrete examples were mentioned. Franklin P. Dunham, radio-TV chief, U. S. Office of Education, noted various instances in which local stations have cooperated on educational features (see story page 75).

AFA TV SESSION

Thaw Effect on Agenda

TELEVISION will be examined by authorities from the advertiser, agency, network and production fields during the TV session of the 48th annual convention of the Advertising Federation of America, slated June 8-11 in New York, it was announced last week.

Robert M. Gray, director of advertising and sales promotion for Esso Standard Oil Co. and general chairman of the convention, said speakers for the television session, under the chairmanship of TV Vice President Eugene S. Thomas of the George P. Hollingbery station representation firm, would include the following:

Raymond F. Guy, manager of radio and allocations engineering of NBC, speaking on "Taking the Mystery out of UHF Telecasting"; Henry Schachte, Borden Co. advertising director, on "What the Television Thaw Means to the Advertiser"; Charles E. Midgley Jr., manager of broadcast media for Ted Bates Inc., "What the Television Thaw Means to the Advertising Agency"; Fred M. Thrower, CBS-TV vice president in charge of network sales, "What the Television Thaw Means to the Networks"; Walter Craig, Benton & Bowles vice president in charge of radio and television, "There's No Business Like TV Show Business"; George T. Shupert, vice president of Peerless Television Productions, "Films May Answer TV Problems of the Future," and John E. Fetzer, WKZO-TV Kalamazoo, chairman of the NARTB Television Code Review Board, "Television Belongs to the Public."

The TV session, scheduled the morning of June 11, also will include initial announcement of results of a nation-wide survey, now in progress, on "Where TV Produces the Most Sales." Spokesmen said this survey "is expected to reveal new and basic marketing information of value to all advertisers."

CBS-TV RATES

New Card Shows by Groups

FULL CBS-TV network of 62 stations has a base rate for one hour of evening time on a one-time basis of $51,200, according to rate card No. 7, effective April 15, 1952.

Card shows these stations broken down into a basic interconnected group of 29 stations available only as a group, at $30,625 per evening hour; a northwest supplementary group of three stations, available only as a group with the basic group, at $1,650; a supplementary interconnected group of 26 stations, available individually with the basic group, at $17,425; and a supplementary non-interconnected group of four stations, available individually with the basic group, at $1,500.

Card contains no station rate increases not previously announced, but the basic CBS-TV network has been increased from 21 to 29 stations, a minimum requirement for all new business or on contract renewal for current business. Additional members of the basic network are: Minneapolis, Omaha, Salt Lake City, San Diego, San Francisco, Dallas, San Antonio and Tulsa.

Join Network July 1

Three of those cities—Dallas, San Antonio and Tulsa—will not join the interconnected network until about July 1, when Houston, Miami, New Orleans and Oklahoma City will also become interconnected with the CBS-TV network.

Los Angeles, Salt Lake City, San Diego and San Francisco are subject to transcontinental cable charges of $1,200 an hour for a westbound channel, $2,400 for an eastbound channel. Unlike the station rates, set at 80% of the hour rate for 45 minutes, 60% for 30 minutes, 50% for 20 minutes, 40% for 15 minutes, 33⅓% for 10 minutes and 30% for 5 minutes, the cable charges are figured on a straight time-proportion basis, 50% of the hour charge for a half-hour, 25% for 15 minutes. CBS is absorbing the extra cable charges for St. Louis ($130) and Memphis ($260) formerly passed along to the TV network clients.

Advertisers using the CBS-TV network on an alternate-week basis are now allowed half of the annual discount if they complete 26 broadcasts within a 52-week contract year. That is, they get a discount of 5% of the largest amount of weekly gross billing, where the every-week clients get 10%.

CBS Television now permits the combining of two or more concurrent contracts in figuring station-hour discounts to give the advertiser the benefit of the most advantageous rate.

PARAMOUNT

Theatre Acquisitions Probed

EARLY history of Paramount theatre acquisitions was probed by FCC counsel last week during the protracted ABC-UPT merger hearing [B•T, April 21].

Appearing were Leonard H. Goldenson, UPT president, Robert B. Wilby, UPT director, and Barney Balaban, president of Paramount Pictures.

FCC counsel appeared to be trying to show that Paramount had attempted to restrain trade by limiting the number of theatres in some cities and by requesting that other film companies hold back reruns of films from certain theatres. For its case, the Commission counsel produced more than 100 exhibits, most of which were copies of letters.

Most of the letters were dated from 1925 to 1926, but none of them were brought out by the Justice Department in its investigation of the motion picture companies before the consent decree in 1945, it was explained.

Introduction of the correspondence was the subject of protracted wrangling between Paramount Counsel Paul A. Porter, former FCC Chairman, and FCC Counsel James O. Juntilla. Mr. Porter's point was expressed at one point in this way:

"Efforts to reconstruct events of a quarter-century ago doesn't offer much value to the examiner and the Commission as to the qualifications" of Paramount to be a broadcast station licensee today.

Among the FCC exhibits was a letter from M. A. Lightman, president of Malco Theatres Inc., Memphis, Tenn., who wrote to Mr. Goldenson about the acquisition of a building in a choice location at Owensboro, Ky.

Mr. Lightman wrote:

. . . We have not been hurt and we did—at least temporarily—stem the tide of a new theatre by some outsider by [our] having made the purchase. . . . We can convert the present Malco or Seville [theatres] into a store and in that manner we would not increase the number of theatres.

Other letters, between various Paramount officials or executives of affiliated or subsidiary companies, concerned theatre acquisition and Paramount trade practices in Detroit, Chicago, upper Michigan state, northern Illinois and Indiana.

One letter was written by M. M. Rubens, director and secretary of Great States Theatres Inc., which in 1926 was owned 30% by Balaban & Katz. Mr. Rubens was writing to A. L. Mayer, and described in his letter the structural condition of two theatres. He wrote:

. . . . If Streater, Ill., is strategically located and it looks as if there is money to be made in it, obtain a new choice location for a theatre and have two . . . [theatres] condemned and turned back to their owners.

If you boys are really clever connivers, why not sell the . . . [theatres] back to the owners after you get a location, and then have the . . . [theatres] condemned.

Mr. Balaban called the letter "silly." He could not recall ever having written or received some of the letters and notes.

At one point Mr. Balaban said that some of the letters were immaterial and he could see no point in their being offered to FCC.

A. H. Blank, another UPT director, is due to be cross-examined today (Monday).

WNHC-TV RENEWAL

Is Granted by FCC

FCC renewed the license of WNHC-TV New Haven last week, cleaning up with one exception the 26 TV stations it placed on temporary license last February because of lack of religious and educational programs as listed in composite week logs [B•T, Feb. 4]. Only station still remaining on temporary license for that reason is KPHO-TV Phoenix.

In a burst of activity two weeks ago, the Commission renewed the licenses of eight TV stations which had been cited for lack of religious and educational programs [AT DEADLINE, April 21]. Only other TV station remaining on temporary license is KTTV (TV) Los Angeles. Commission has been looking into complaints concerning direct sales commercials, medical advice and what is alleged to be an invasion of privacy.

RF Coaxial Switch

TEST of a new RF coaxial switch by WBAL-TV Baltimore was to take place during a broadcast last Friday night. John Wilner, station engineering chief, said an alternate 500 w transmitter has been installed to guarantee TV reception in case of a breakdown of the main 5 kw transmitter. The new RF switch, reported as the first of its kind designed for high band broadcasting, would permit the change-over in a matter of seconds. Switch was designed by station's engineers.

UPT REPORT

TV Effect on Movies 'Not Permanent'

TELEVISION'S mark on movie box offices tends to dwindle as the TV set ages, Leonard H. Goldenson, president of United Paramount Theatres, said in his report to stockholders.

Repeating the UPT stand last year that the "box office is off more in TV areas than in non-TV areas," Mr. Goldenson noted nevertheless that "the inroads of television moderate after the novelty and installment-payment period of set ownership have passed. There are some indications that after a lapse of time, set owners resume the habit of more frequent attendance at motion picture theatres, but on a more selective basis. . . ."

Mr. Goldenson

This impact of television, according to the president of the company, which subject to FCC approval is merging with ABC radio and television networks (see story, this page), will be felt most strongly by the B picture market and by marginal theatres which sprang into being during the public's wartime entertainment famine.

Balance sheets in the annual report indicated consolidated UPT earnings for 1951 totaled $10,790,011, of which $4,002,590 was listed as capital gains. Provision for federal incomes taxes amounted to $6,764,890, as compared to $5,496,302 set aside in 1950 when earnings totalled $12,351,000, of which $2,144,000 was capital gains. Net profit in 1951 amounted to $3.27 on 3,300,859 outstanding shares, as compared to the previous year's $3.79 per share on 3,261,287 shares.

The decrease in the UPT net, Mr. Goldenson explained, was due to increased federal taxes and an estimated 7% decrease in theatre attendance through the year.

The company listed assets at the end of 1951 of $34,215,000, including $30,356,000 in cash and government securities. This is an increase of $6,873,000 over 1950 assets, Mr. Goldenson pointed out. Working capital, increasing $9,500,000 to reach $24,551,000, reflects additional long-term loans plus net proceeds from federally ordered sales of UPT theatre properties, the president reported. Liabilities decreased from $12,291,000 to $9,664,000.

Report said that on April 19, 1951, a standby credit of $10 million was added to general corporate funds "in anticipation of increased capital requirements for the acquisition and operation of television facilities." If the merger with ABC is consummated, it was noted that a "substantial portion" of ABC's debt, which UPT figured at $10,576,000 at year's end, will be paid off.

Indicating that two civil defense tests of theatre TV had fomented further CD plans to use the medium for public information and training programs, Mr. Goldenson predicted a wider use of theatre-TV for coverage of conventions, sales meetings and to introduce new product lines, in addition to training and educational presentations.

To keep abreast of electronic developments which may apply to UPT's field of activities, the corporation purchased 50% of Microwave Associates Inc., Boston, through a common stock purchase amounting to $97,500 on Jan. 15, 1952. UPT also agreed to lend Microwave $62,500, to be subordinated to other Microwave working capital loans in the succeeding years.

AT&T Plans to Fill Network Needs

(Report 213)

AT & T plans to provide adequate intercity network TV facilities as they are needed to fill requirements of TV station and network broadcasters arising from the lifting of the ban on new station construction. A spokesman for the telephone company's Long Lines Dept. pointed out Thursday that "the present construction program includes the provision of TV channels over certain main routes in anticipation of the industry's requirements."

"Further expansion of the Bell System's network," he said, "will be governed by the rate at which new stations are constructed and the clarification of the needs of individual stations and the network broadcasters. Future steps also may be influenced by the availability" of critical material.

Stressing the importance of AT&T receiving adequate advance notice of plans of TV construction so that it may schedule its own facilities construction program accordingly, he said: "We are keeping in close touch with the network broadcasters and hope that individual station owners will let us know promptly of their plans."

N. Y. Set Survey Reported by Pulse

SURVEY of some 1,500 families throughout the metropolitan New York area indicates that 63.8% of the homes are equipped with television sets, 23.4% of them RCA models.

Conducted in January by The Pulse Inc. for Joseph Jacobs Advertising and Merchandising and announced last week, results indicate that while RCA dominates the market, its lead is diminishing from the 27.2% reported for January 1951.

Second and third places in 1952, as in the earlier study, were held by Philco—found in 12.3% of the homes—and Admiral—in 11.6%—both standings showing an increase during the year. Gains also were reported for DuMont receivers, now found in 6.5% of the homes, Motorola, in 5.5%, and General Electric, 4.6%. Zenith, which ranked fifth in 1951, was in seventh place for January 1952.

* * *

Drama Study Shows Adults Like Comedy

TV DRAMA survey of 758 adults in the New York metropolitan area among 15 dramatic programs indicates 71% favor the one-hour program over shorter dramas and that comedy is preferred to other presentations, according to the March 1952 issue of *The Television Audience of Today.*

The interviews, conducted March 7-16, indicate 86% of adults in these TV homes watch at least one TV dramatic program regularly, although they rank variety and musical programs above drama.

The drama program, *Studio One,* was rated excellent by more than 58% of those who have seen it; other "excellents" were *Robert Montgomery Presents,* 46%, and *Philco Playhouse,* 42%. Preferences in order are comedy, adventure, mystery, true and factual stories, romance and crime. Viewing was lightest in upper and lower economic groups and heaviest in middle economic groups. About 56% were willing to accept a middle commercial on a one-hour program, but only 12% on a half-hour drama.

* * *

Newspaper Reading In TV Homes Studied

THERE is significant difference in newspaper readership for homes equipped with television as contrasted to non-TV homes, according to the report of J. P. McKinney & Son and Ward-Griffith Co., New York, newspaper representatives which co-sponsored a Daniel Starch study of the problem.

Page observation by women averaged almost 7% higher in television homes for three of the four separate newspaper issues studied and only 3% lower

DuMONT REPORT

'51 Net Under '50 Figure

ALLEN B. DuMont Labs sustained a net loss on 1951 operations of $583,000, compared to a profit of $6,900,788, or $2.87 per share of common stock in 1950, Dr. Allen B. DuMont, company president, reported in the firm's annual report, mailed to stockholders last week.

Gross income of the DuMont organization in 1951 was $50,741,596, compared to a 1950 gross of $76,362,665. Decline was attributed to losses suffered by the receiver division, caught with excessive inventories at a time when consumer demand dropped sharply. "However," Dr. DuMont stated, the company "has made substantial technical progress and improved its management and production techniques. Adjustments were made to the unfavorable market and economic conditions which affected the whole industry. Plant facilities were converted to defense production and made ready for more favorable conditions which should follow the thaw of television's freeze."

The DuMont transmitter, instrument and cathode-ray tube divisions all showed operating profits for the year and the broadcast division "made substantial progress," Dr. DuMont reported. "We made management changes and brought to fruition broadcast policies which resulted in a profit during the last quarter of the calendar year. We hope the same type of results will be present in the future."

In a section of the DuMont TV network, the report noted that management policy "has been aimed at putting our television broadcasting activities on a profitable basis as soon as possible. To this end, while our 1951 network operations produced a total income very much higher than in the previous year, operating expenses were not permitted to rise in the same proportion.

"Our efforts will continue along this line in 1952," the report stated, "building sales volume while holding expenses within reasonable limits, and, because the network is a major integral operating division of the company, it should produce important revenue in the year ahead."

During 1951, the network's key station, WABD (TV) New York, moved its transmitter to the Empire State Bldg., adding 3 million persons to its potential audience, the report noted. It also cited work during the year on a new DuMont Television Center in New York City and at the DuMont-owned WTTG (TV) Washington.

I. F. TROUBLE

ARRL Issues Warning

SET manufacturers were warned last week by American Radio Relay League that amateur code transmissions may cause interference with some TV receivers.

Starting May 1, amateurs are provisionally authorized to use the 21-21.45 mc band in the United States and possessions, under terms of the International Telecommunications Conference. A. R. Budlong, ARRL general manager, notified manufacturers Thursday that viewers with sets using the 21 mc band for IF amplification might suffer interference.

ARRF has conducted tests showing the danger of interference, Mr. Budlong said. Remedies can be applied only at the receiver, he added, contending it is the manufacturers' duty to make these changes since they knew well in advance that amateurs would be using the 21 mc band. Most set companies using the 21 mc band for IF amplification are understood to have moved the IF stage to other bands.

FCC has formally proposed that the new amateur transmissions be permitted to start May 1 but final authorization has not been issued. Similar starting date has been set by Canada and other nations.

N.Y. UHF FIGHT

Many Seek Channel 31

THREE-WAY fight loomed last week for the sole additional commercial television channel earmarked for New York City by the FCC in its freeze-lift allocations [B•T, April 14].

Municipally owned WNYC filed an application for the channel—No. 31—on Tuesday, while WHOM and WOV, independents which specialize in foreign-language programming, announced that they, too, would compete for the assignment.

WOV, which maintains studios in Rome as well as New York, reported its TV plans "well advanced," saying it would apply for Channel 31 "in due time" and proposing to render a service that "is . . . not now available to New York audiences"—a reference that was construed to mean that foreign-language programming, at least in part, would be proposed.

"We have made steady progress in our television preparations over the past two years," WOV said in its formal statement. "We are now interested in film production in Italy and Germany, and these activities are being expanded. We expect to have substantial quantities of unusual film products available for broadcast by the time operations will be due to start, along with other program material of diverse kinds.

"The organizational and financial aspects of television operation have been given equal attention and we will be equally ready on these counts."

WHOM's plan to apply for Channel 31 was announced by Fortune Pope, president of the station and WHOM-FM as well as publisher of *Il Progresso Italo-Americano*, daily newspaper.

He indicated, however, that it had not been decided whether WHOM's television program proposals would include foreign-language shows.

WNYC officials have said that, although Channel 31 is a commercial frequency, they would operate non-commercially—as WNYC is operated—in event the municipality receives the FCC grant. They pointed out they had intended to apply for Channel 25, allocated to New York City as a non-commercial educational channel, but were blocked by FCC's ruling that such channels may be awarded only to applicants connected with an educational institution.

NCAA '52 PLAN

May Be Revealed May

TELEVISION Committee of the National Collegiate Athletic Assn. is expected to announce its operational procedure for the 1952 football season shortly, Asa Bushnell, director of the NCAA TV program, said Thursday after a two-day meeting of the committee.

Details of the plan are expected to be made public at the same time, possibly May 1. It is submitted to member colleges for approval, he explained, with little opposition expected from the colleges since representatives from each regional athletic association have participated in its development. All major networks have also been asked for suggestions, and each of them has sent representatives to a number of TV committee conferences, Mr. Bushnell reported.

"I think it's safe to say that the networks would prefer no plan at all," he added, "but I also think they will find this one as satisfactory to them as is possible."

SET SALES FUTURE

No Prompt TV Thaw Aid

LIFTING of the TV freeze by the FCC will have little "substantial" effect on set sales until late this year, according to Comdr. Eugene F. McDonald Jr., president of Zenith Radio Corp., Chicago, who spoke at the annual shareholders meeting last week.

Zenith Radio Corp. profit is down but the lower earnings reflect a more normal operation than that of 1951's first quarter when wholesalers were building inventories against threat of shortages, Comdr. McDonald stated. Net consolidated profits for Zenith and its subsidiaries for three months ending March 31 amounted to $1,083,242, or $2.20 per share after deductions. These results compared with $2,228,709, or $4.53 per share for the same quarter a year ago.

Extension of networks to areas not now on the cable and interest in the Presidential conventions will, however, "assist greatly in leveling out the normal summertime seasonal drop in radio and television production and sales," he said, adding that the latest available market surveys show there is "little danger of a repetition of the highly volatile inventory situation" which took place last year.

NEW CHANNELS FOR IMAGINATION

• With each new channel added, or increase in station power, the number of people in front of television screens *goes up.* • With each increase in the use of film pick-up—together with the acceptance of new technics, materials, and equipment—the number becomes more *solidly sold.* • For film programming opens new channels for imagination. Shows no longer are limited by the four walls of a studio, nor held within the time zone of a particular show's origination. Creatively . . . geographically . . . the sky's the limit. • Complete technical information concerning film selection and processing is available . . . together with details concerning special Eastman services, equipment, and materials. TV Holds Accounts

(Continued from page 57)

back into television by participation in *The Goldbergs* on NBC-TV.

Manhattan Soap Co., New York, which has dropped *One Man's Family* (Saturday, NBC-TV), reportedly was unhappy with the time period. But the firm has started a radio spot campaign for the spring and summer and is expected to return in the fall with another TV show. Scheideler, Beck & Werner, New York, is the agency.

Warner-Hudnut Co., which dropped participation sponsorship of the Langford-Ameche show on ABC-TV when the network cancelled the program because of excess talent costs, is expected to buy a fall TV show. Kenyon & Eckhardt, New York, is the agency.

Of the two advertisers surveyed who have made no recommittment to TV, Cluett, Peabody & Co., New York, was said to have exhausted its advertising budget for the present. The advertising director, George Phillips, told B•T that the show—Herb Shriner, on ABC-TV—was dropped because "cost was exceeding limitation of advertising budget." Mr. Phillips also said that they were very "pleased" with the Shriner show on ABC-TV and thought it "great."

The second advertiser, Johns-Manville, has not yet made up its mind, but was understood to be contemplating return in the fall. Its *Fairmeadows, U.S.A.* (Sunday, 3-3:30 p.m. on CBS-TV) was dropped because of the advertiser's unhappiness over the time period. J. Walter Thompson, Co., New York, is the agency.

GREEN GIANT

Buys CBS-TV Show

GREEN GIANT Co., Le Sueur, Minn. (canned vegetables), will sponsor *Art Linkletter House Party* on CBS-TV, 3-3:15 p.m. [B•T, March 31], effective with the debut of the show on Sept. 1.

"The purchase of this time segment on the new *House Party* series gives the program a solid Monday - through - Friday sponsorship in that period," Fred Thrower, vice president in charge of CBS-TV network sales, said Thursday. "At the same time, with the Green Giant Co. joining the growing list of CBS TV sponsors, we have another strong indication of the healthy condition of our network business. Time sales at CBS are currently at an all time high. . . . We are moving closer to the coveted 'sold out' position of our daytime network period."

Other advertisers sponsoring *Linkletter* are Pillsbury Mills and Lever Brothers. N. W. Ayer & Son, New York, is the agency for Lever, while Leo Burnett Co., Chicago, is the agency for both Green Giant and Pillsbury Mills.

Towers Joint Meeting

(Continued from page 57)

April 14]. "We here can do nothing about that," he admonished.

Question regarding the plans of the "TV industry" was answered by Arthur Scharfeld, president of FCBA, in this way: There is no such thing as a "TV industry." Exactly what the proposals are for high TV towers won't be known until all the 1,000 or more TV applications are filed with the FCC.

Neal McNaughten, engineering director of NARTB, suggested the use of radio warning beacons on towers—as aids to air navigation. He also recounted the status of centralized location of TV antennas (one of the proposals advanced by aviation industry)—referring to Mt. Wilson in Los Angeles and Empire State Bldg. in New York as examples.

Radio-TV consulting engineer Glenn D. Gillett recounted his experiences in Des Moines. The airport there, he cited, used to have four airways; it now has eight. Mr. Gillett and consultant Robert L. Kennedy also furnished some statistics on what a 2,000-ft. tower would look like. They reported that the guy wires of a triangular tower of that height would extend about 65% up the tower and require 1,250-1,500 foot-square plot on the ground. They also disclosed that towers of that height would probably have simple elevators for maintenance of aircraft warning lights.

Air Force Col. J. J. McCabe said the Air Force recognized the need for high TV towers, acknowledged that TV was necessary and useful as a medium for the dissemination of information, even envisaged use of TV as an air navigation aid to the point where some day all planes would fly "visually" with a TV receiver showing the pilot where he is going.

Other ideas expressed by aviation representatives were similar to those already advanced by the same interests previously (see below).

In a pre-conference memorandum, prepared in Comr. Webster's office, the purpose of Friday's conference was set out as:

Determination of a method of achieving uniform treatment by the nine Regional Airspace Subcommittees of applications for radio and television antenna towers over 500 ft. in height located off presently existing airways.

After recounting the current regulations on the subject and what was called the maintenance of "excellent cooperative relationships in these matters," the report indicated that there is no desire to change these relationships, but that with the advent of faster aircraft and higher towers, it is necessary to achieve more uniformity.

As one proposal, explicitly labeled "for discussion purposes," the memorandum suggested that towers more than 500 ft. high and located outside civil airways should not be considered obstructions to air navigation if they are "below a plane with a slope of 50:1 measured upward and outward in a vertical plane at right angles to the boundary of an airway or control area or the five-mile boundary from the center of a direct off-airway route."

The suggestion also embodied the principle that any object over 500 ft. high more than five miles from the boundary of the airway or direct route should normally not be considered a hazardous obstruction to air navigation.

[For text of pre-conference memorandum, see end of this story.]

During the last month, aviation interests have made a number of proposals concerning what they believe is the forthcoming plethora of 1,000 and 2,000 ft. TV towers. A summary of those proposals is as follows:

1. **Request that Congress legislate an amendment to the Communications Act which specifically would give the FCC authority to deny applications whose antenna sites or heights are found to be air hazards.**
2. **Requirement that all TV antennas be installed on a single tower.**
3. **Requirement that all TV towers be localized in city sections already considered an air hazard area.**
4. **Requirement that the height of TV towers be limited—through FCC ruling or Congressional action.**
5. **Requirement that a radio warning device be installed at each antenna site.**
6. **Establishment of a national set of standards that all CAA regional airspace subcommittees would be required to adhere to when considering TV tower applications.**
7. **Requirement that TV coverage be obtained through the use of booster stations so that high towers would be unnecessary.**

The recommendation by the Air Transport Assn. that an additional provision be added to the McFarland bill (S-658) still rests with the House Committee on Interstate & Foreign Commerce. ATA recommended that a new provision be added to the Communications Act which would give the FCC specific authority to deny an application which proposes an antenna site or height found a hazard to air navigation by the CAA [B•T, April 7].

The McFarland bill is awaiting clearance for House debate. It was reported out of committee two

'Today' Adds Sponsors

THREE new participating sponsors for NBC-TV's morning *Today* show (Monday through Friday, 7-9 a.m.) were reported last week. Kaiser-Frazer and Bauer & Black scheduled participations five times a week, adding at least $25,000 to the show's weekly billings. Armour & Co. also was scheduled to sponsor a portion of the show, but details were still pending. Agencies: Foote, Cone & Belding, Chicago, for Armour; William H. Weintraub, New York, for Kaiser-Frazer, and Leo Burnett Co., Chicago, for Bauer & Black.

weeks ago [B•T, April 21].

A request for comments by the FCC has not yet been answered, but it is understood that the Commission is drawing up a reply giving its position on the matter. What that position is could not be determined.

The recommended amendment would amend Section 303 of the Act by adding this new subsection:

That the FCC shall "(s) Have authority and be required to refuse to issue or modify any license or construction permit when such license or permit would authorize the operation or construction of radio or television towers which in its judgment, after consultation with the Civil Aeronautics Administration, the Civil Aeronautics Board, the Department of Defense, and the Treasury Department, constitute, or there is a reasonable possibility that they may constitute, a hazard to air navigation."

Other suggestions have been made by ATA, as well as by the Air Line Pilots Assn. During a CAA-sponsored meeting early in March, a number of suggestions were made [B•T, March 31, 17]. The meeting culminated in the appointment of D. D. Thomas, CAA planning officer, as coordinator to work up recommended criteria to guide regional airspace subcommittees.

See Stations Mushrooming

Certain observers feel that at the root of the aviation industry's activity in the matter of TV towers is a belief there will be 2,000 TV stations under construction shortly after July 1 when FCC starts processing applications again—all with 1,000 and 2,000 ft. antenna towers.

Among the cities where such tower heights are being considered are Boston, Chicago, Norfolk, Oklahoma City, Buffalo, Nashville and Cincinnati. Aviation interests also are said to believe such towers are being considered as well in the flatlands of such states as Florida, Kansas and Texas.

Applications proposing towers over 500 ft. have to be submitted to regional airspace subcommittees under Part 17 of the FCC's rules. Part 17 lists the criteria which govern automatic approval of tower heights and locations less than 500 ft. in height. Variances from the criteria or heights above 500 ft. have to secure CAA sanction.

Under CAA regulations, planes must fly at least 1,000 ft. above the highest structure in its flight path. Consequently, erection of 1,000 and 2,000 ft. TV towers might necessitate changes in flight instructions in those areas.

According to best information, 2,000-ft. towers cost $815,000—including steel, construction, lighting and marking. Fifteen hundred foot towers are estimated to cost $400,000.

Highest TV tower at present is that of WSB-TV Atlanta. It is 1,062 ft. high. Next highest is KFMB-TV San Diego—1,017 ft. in height. Empire State Bldg. antennas for all but two New York City market TV stations are from 1,450 to 1,465 ft. above street level. Most TV antennas are from 500 to 700 ft. above ground. Tallest tower is U. S. Air Force control station at Rome, N. Y., air base. It is 1,250 ft. above ground and cost $256,000 to put up.

RCA Diode Tube

PENCIL-TYPE diode tube designed for use in UHF measuring equipment has been announced by RCA Victor Div.'s tube department. Tiny diode (RCA-6173) is an adaptation of the firm's pencil-type construction that had been restricted to triode types. It's smaller in length and diameter than a cigarette, and weighs less than one-fifth of an ounce. For use with coaxial and wave guide type transmission lines, this new tube can be employed in pulse-detection and pulse power measuring service at frequencies up to 3,300 mc per second, RCA claims.

CEREBRAL PALSY DRIVE

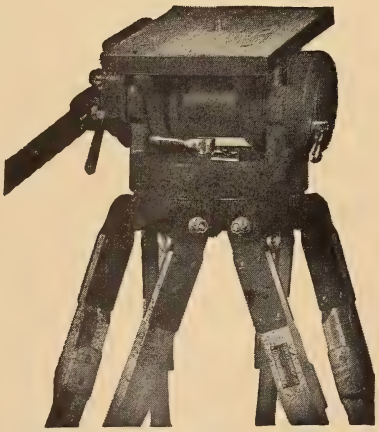
Whole Industry to Aid

UNITED Cerebral Palsy's 1952 May campaign to raise funds for treatment of over 550,000 afflicted with the disease will be launched with the help of "the entire broadcasting industry," UCP officials announced last week.

All networks will carry announcements and special station breaks in two-day opening drive April 30-May 1 heralding the campaign, which will continue throughout May. Volunteer agency handling West Coast broadcasting campaign will be Leonard Shane Agency under supervision of William Crago, radio-TV director, and William J. Stout, UCP West Coast representative.

"Advertising agencies and their clients, package producers and networks are being very cooperative in this special two-day coverage to announce UCP's national drive," commented Leonard H. Goldenson, UCP national president and president of United Paramount Theatres, which is in process of merger with ABC, subject to FCC approval.

WCBS-TV Spot Up



MORE than $400,000 in local and national spot business was signed by CBS-owned WCBS-TV New York in the two-week period which ended April 18, General Sales Manager George R. Dunham announced last week. The contracts, he said, included 13 new scheduled and several major renewals.

Summer Show Set

COLGATE - PALMOLIVE - PEET Co. will sponsor *Big Payoff* as summer replacement for its *Colgate Comedy Hour* on NBC-TV (Sun., 8-9 p.m.), effective June 22. Agencies are Ted Bates Inc. and Sherman & Marquette, both New York.

Floating Action! **for all TV Cameras**

"BALANCED" TV TRIPOD

This tripod was engineered and designed expressly to meet all video camera requirements.

Previous concepts of gyro and friction type design have been discarded to achieve absolute balance, effortless operation, super-smooth tilt and pan action, dependability, ruggedness and efficiency.

Below:

3 wheel portable dolly with balanced TV Tripod mounted.

Complete 360° pan without ragged or jerky movement is accomplished with effortless control. It is impossible to get anything but perfectly smooth pan and tilt action with the "BALANCED" TV Tripod.

Quick-release pan handle adjustment locks into position desired by operator with no "play" between pan handle and tripod head. Tripod head mechanism is rustproof, completely enclosed, never requires adjustments, cleaning or lubrication. Built-in spirit level. Telescoping extension pan handle.

TELEPHONE TV NEWS PROGRAM

Aired by Four Non-Interconnected Stations

NEATEST TRICK of the week at Gardner Adv., St. Louis, is its simultaneous production of a 15-minute live news show on four non-interconnected television stations. The scheme calls for airing *Televiews of the Week's News* for Southwestern Bell Telephone Co. each Sunday on KSD-TV St. Louis, KRLD-TV Dallas, KPRC-TV Houston and WOAI-TV San Antonio.

Al Chance, agency radio-TV production manager and executive producer on the news show, set up the complex traffic scheme suggested by Douglas Williams, vice president in charge of public relations for the client. Mr. Chance arranged for International News Service to send its weekly news roundup on film to each of the stations Sunday morning. On the previous Thursday, he prepares a master script from an INS synopsis of the news matter. The master script and accompanying film run about 25 minutes, with both subsequently cut to 15.

The telephone company's program is produced via telephone, with May Kohler outlining splicing, audio cues and commercials as well as general production details to each of the four newscasters Sunday morning. No film titles are used, and each newsman appears at his desk, following the same script as his colleagues. The show is edited and on the air less than five hours after the film is received.

The St. Louis film serves as the agency's pattern for editing. After telephone instructions on film and script are given the newsman, he works with a director on film cutting and camera rehearsal. Alan Post, former announcer and now an attorney, handles the KSD-TV show. In Houston, Bob Dundas Jr. is the newsman, while John Harper, who is also a folk singer, does the job in Dallas at KRLD-TV. The San Antonio man is Bud Vinson.

Mr. Chance, who produces the *Mary Lee Taylor Show* for Pet Milk on NBC, works with Bill Fisher, radio-television director for Gardner. Client supervisors are E. F. Weekley, advertising manager for Southwestern Bell, J. M. Freeman, information manager for the Missouri area, and Frank Witten, for the Texas area. Account executives are Jack Leach and Dean Pennington.

TELEPHONE NEWS MAP

KPRC-TV Houston newsman Mr. Dundas represents one of non-interconnected video outlets in four cities narrating unique telephone news roundup sponsored by Southwestern Bell Telephone Co.

GRAND UNION TV

Opening Gets Coverage

PORTABLE TV units will be set up to provide New York audiences with one of the first telecasts of a supermarket opening when a new Grand Union store opens its doors in East Paterson, N. J., Wednesday.

Opening day will be taken over by WNBT (TV) as part of the station's "Operation Chain Lightning," a mutual promotion plan between WNBT and some 1,000 retail outlets in the Manhattan area. WNBT will program three remotes from East Paterson at 11-11:30 a.m., 1-2 p.m., and from 6:30-6:45 p.m., to be conducted by Herb Sheldon, Morey Amsterdam, Josephine McCarthy and Jinx Falkenberg.

WJZ-TV New York, flag station of ABC-TV network, will telecast from the market site Friday, both indoors and out, with such performers as Tiny Ruffner, Karen Sage, The Fitzgeralds, and Dione Lucas.

On hand from time to time throughout the rest of the week-long celebration will be Jack Sterling, ringmaster of Sealtest's *Big Top*, seen on CBS-TV, and Eloise MacElhone, Barbara Welles, Bobby Benson and Eddie Dunn and his Grand Union Caravan.

JULY CONVENTIONS

To Be Shown In Denver

KLZ-AM-FM and KOA-AM-FM Denver jointly announced last week that complete coverage by closed circuit television of the Republican and Democratic conventions in Chicago in July will be brought to Denver.

Hugh B. Terry, vice president-general manager of KLZ, and Charles B. Bevis Jr., KOA general manager, said that the public will be able to watch nominations on video sets in Denver's Shirley Savoy Hotel.

KECA-TV Vote

CIO'S NABET won 3-2 over AFL's IATSE the right to represent make-up department employes of KECA-TV Los Angeles after IATSE last Monday withdrew charges against ABC management of discriminatory interference in an election ordered last month by NLRB.

POLITICAL DEBATE

Aired on ABC-TV, NBC Radio

ABC-TV network, announcing last week its 8-9 p.m. EDT coverage of speeches by Presidential candidates before the national convention of the League of Women Voters in Cincinnati Thursday, said the telecast will be sponsored as a public service by P. Lorillard Co. for Old Gold cigarettes.

Time spot is currently occupied by *Stop the Music* with last half hour sponsored by Lorillard, which will back same segment of *Chance of a Lifetime*, to be seen from 8-9 p.m. starting May 8 [B•T, April 14].

Unsponsored radio coverage of the event will be carried by NBC network which cooperated with *Life* magazine and the League of Women Voters to set up pre-convention forums at which questions for the candidates were prepared.

The Thursday meeting, described as a counterpart of the Lincoln-Douglas debates in which opposing candidates met to present their views to a single audience, will present Sen. Estes Kefauver (D-Tenn.), Harold Stassen, Gov. Earl Warren and, speaking for Gen. Eisenhower, Paul Hoffman. Invitations have also been issued to Sens. Robert Taft (R-Ohio) and Richard Russell (D-Ga.).

FILM FIRE AT JWT

Extent of Loss Unknown

A LARGE quantity of film used for television commercials was destroyed and some photographic equipment damaged last Tuesday when fire broke out in a film-storage booth in the tenth-floor offices of J. Walter Thompson Co., 420 Lexington Ave., New York.

No estimate had been made late last week of the loss incurred in the blaze, which started at approximately 10:30 a.m., forcing nearly 100 employes out of the offices. Unusual density of smoke required an extra call for emergency gas masks.

WBKB (TV) Offers Time

THE FIVE Chicago-area colleges which are airing educational programs on WBIK (FM) have been offered free time by WBKB (TV) to outline their educational objectives for their own video outlet. WBKB, which is affiliated with WBIK, has set aside a quarter-hour each weekday afternoon for representatives of the U. of Illinois, Lake Forest College, Illinois Institute of Technology, Roosevelt College and Loyola U. to discuss the needs of educational television, what viewers would like to watch and what the schools plan for TV.

Houston Telethon

SIMULCAST by Houston KPRC and KPRC-TV for 16 hours April 19-20 raised $120,000 plus or 90 cents per TV set in the area during a telethon drive for cerebral palsy treatment funds.

EDUCATION ON COMMERCIAL TV

Dunham Data Refutes Educators' Claim

ARE commercial telecasters—networks and independent operators—cooperating adequately with educational institutions by contributing their time and facilities to noncommercial fare in the public interest?

And are educators doing all they can to promote their own cause on commercial television outlets on the scale they approached this task in radio?

Franklin P. Dunham, radio-TV director for the U. S. Office of Education, has mixed opinions on these two questions. To throw some light on the subject, Dr. Dunham came armed with a fist full of statistics to the 22d annual Institute for Education by Radio-Television at Columbus, Ohio, where the accent was on educational TV reservations (see separate story).

Dr. Dunham feels commercial radio-TV broadcasters are making important contributions but urged educators to take the initiative in their own communities as they have in connection with radio on which some 78 programs are aired each week by the networks.

"If we move this thinking into television which we are about to do . . . we will probably be able to present an equal number of educational television programs," he told IERT delegates. But what of possible overlap between prospective non-commercial educational stations and commercial broadcasters in the area of obligation?

"Those who will venture to own and operate their own station . . . will find ready cooperation from people who have pioneered in commercial television and soon types of programs which are better fitted to university and school production will find themselves the responsibility of education's own stations," he asserted.

Dr. Dunham observed a conviction held by some educators that "television is not following the example of radio" in offering time to institutions. Ingenuity and enticing fare is the answer, he said.

Dr. Dunham recalled that years ago he and Dr. I. Keith Tyler, institute director, agreed that "an educational program was one that was put on for the *purpose* of education regardless of whether it succeeded in that purpose or not." But now, he noted, FCC "deliberately and arbitrarily has judged the program on the strict criteria of its source."

Today well over half of commercial stations are in the field.

Here is a breakdown of educational programs presented by commercial TV stations as compiled by Dr. Dunham:

WBZ-TV Boston—*The Living Wonders*, from the Museum of Science.

WPIX (TV) New York—*Operation Blackboard*, planned by Ed Stasheff, TV director of New York City Schools.

WCAU-TV, WFIL-TV, WPTZ (TV) Philadelphia—At least 16 TV programs during any single week in cooperation with Board of Education. Mentioned were WFIL-TV's *College of the Air* and Dr. Roy Marshall's *Nature of Things* on NBC-TV.

WMAR (TV), WAAM (TV), WBAL-TV Baltimore—Numerous educational shows. Home of the famous *Johns Hopkins Science Review* on DuMont TV Network.

WMAL-TV, WNBW (TV) Washington—Science and music fare. Georgetown, Catholic, George Washington, American and Howard universities and public schools, as well as Arlington, Va., schools utilizing TV.

WDTV (TV) Pittsburgh—". . . Although crowded with the offerings of four networks, has had time to develop educational programs with U. of Pittsburgh, Carnegie Tech and Duquesne U."

WAGA-TV, WSB-TV, WLTV (TV), Atlanta, Ga., and WDSU-TV New Orleans—Have begun experimental series with local universities and school system.

WTVJ (TV) Miami—Many series of programs already produced by U. of Miami—public discussion, drama and science.

KPRC-TV Houston, KRLD-TV, WFAA-TV, WBAP-TV Dallas-Ft. Worth; KEYL (TV), WOAI-TV San Antonio—Programs originated at Radio House on U. of Texas' campus and produced on individual stations.

WKY-TV Oklahoma City and KOTV (TV) Tulsa—Cooperating with universities on experimental TV shows.

KOB-TV Albuquerque, N. M. and KPHO-TV Phoenix, Ariz.—Both carrying educational shows.

All seven Los Angeles stations—U. of Southern California, U. of California (L. A.) and Loyola U. produce shows.

KGO-TV, KPIX (TV), KRON-TV San Francisco—Voluntarily provide time.

KING-TV Seattle—". . . Has carried some of the most exciting experiments in children's programs"—*Telaventures for Children.*

KDYL-TV, KSL-TV Salt Lake City—Done programs with U. of Utah.

WOW-TV, KMTV (TV) Omaha—Cooperated with Creighton U. WOW-TV ". . . one of the pioneers in educational television." U. of Omaha gives credit for courses over WMTV.

WOI-TV Ames, Iowa—". . . One of the most notable of all centers in the country." A commercial TV outlet of Iowa State College served by all four networks.

KSTP-TV, WTCN-TV Minneapolis-St. Paul—A janitor's strike a year ago started the ball rolling here educationwise.

WTMJ-TV Milwaukee and WBKB (TV), WENR-TV, WGN-TV, WNBQ (TV) Chicago—Programs successful here "despite fact that "demands on the time of the stations in these cities have been overpoweringly great."

KSD-TV St. Louis—Carries many programs with public school system and cooperates with other institutions on feature programs.

WCPO-TV, WKRC-TV, WLWT (TV) Cincinnati—Shows put on by U. of Cincinnati and Xavier U. Also tested effectiveness of shows in project with WLWT.

WEWS (TV) Cleveland—Western Reserve U. produces four regular college courses for credit.

WWJ-TV, WJBK-TV, WXYZ-TV Detroit—Successful telecourses with Wayne U., U. of Detroit, U. of Michigan and public schools. WWJ-TV and U. of Michigan cited particularly.

WBEN-TV Buffalo—Early experimenter with programs, under aegis of Mount St. Joseph's Teacher's College and U. of Buffalo, with former center of TV training as well.

WHAM-TV Rochester—Pioneer in programming from start with cooperation of U. of Rochester and Eastman School of Music.

WSYR-TV, WHEN (TV) Syracuse—Former operates downtown and U. of Syracuse studios; later produces programs for School of Forestry. Both have experimented in drama, art, news and music.

Among the "outstanding" network programs cited by Dr. Dunham are ABC-TV's *Town Meeting of the Air*, NBC-TV's *Inside Our Schools* (with *Time* magazine) and the opera, *Amahl and the Night Visitors;* CBS-TV's *See it Now* with Ed Murrow, *Mr. I. Magination* and New York Philharmonic Orchestra; and DuMont TV Network's *Keep Posted* and *Life is Worth Living* with Bishop Fulton J. Sheen.

HILL CAMERAMAN

Proposed by Sen. Hayden

WHAT do Senators think of television as a medium through which they can express themselves?

The answer came during debate on an appropriations bill April 17. Sen. Carl Hayden (R-Ariz.) proposed the voting of a $3,600 salary for a newly-created TV cameraman post in the Joint Congressional Recording Facility, U. S. Capitol. This is the studio which records (or films) reports by congressmen for home station consumption.

Sen. Hayden's request was included in the Third Supplemental Appropriation without objection.

COLLEGE FOOTBALL

TV Threat Is Cited

TELEVISION represents "a $10 million threat" to college football, according to Robert A. Hall, Yale, chairman of the National Collegiate Athletic Assn.'s special TV committee.

Speaking on a WTIC Hartford program, *Yale Interprets the News*, Mr. Hall argued that colleges should share receipts of televised football, otherwise a financial premium on winning teams will be created and it will kill amateur football.

Washington Watches | *Women's Shows*

"INGA'S FIGURE FORMULA"
9:45 - 10 a.m.

film report

Production . . .

National Repertory Theatre Inc., Hollywood, has been formed with headquarters at Motion Picture Center for production of half-hour TV film series. Cooperating with the Arthur Kennedy Theatre Workshop, officers in the new set-up include **Tony Owen,** president; **Donald Hyde, Jay Hyde** and **Arthur Kennedy,** vice-presidents; **William Kozlenko,** secretary-treasurer.

Already completed are *The Victim,* co-starring **Edward Arnold,** written by Mr. Kozlenko, and directed by **Robert Florey**; *This Is Villa,* co-starring **Akim Tamiroff,** film actor, written by **Josephine Niggli,** and directed by **Ray Enright.**

Group will share profits on participation basis. Rotating directors will be chosen from pool of interested motion picture directors including **King Vidor, Tay Garnett, David Miller, Ray Enright** and **Robert Florey.**

Interstate Television Corp., Hollywood, subsidiary of Monogram, will finance production and distribute completed series.

* * *

Jerry Fairbanks Productions, Hollywood, is to produce a half-hour TV film, *The Greatest Mother,* for Family Theatre which will be offered to all stations without charge for Mother's Day telecasts. Making her TV debut **Loretta Young,** film star, will enact leading role. **Gene Lockhart,** stage and film actor, will be featured as will a 32-voice choir. **Arthur Pierson,** will direct with Father Patrick Peyton, CSC, founder of group, producing. **Fred Niblo, Jr.,** has completed script.

* * *

Edward Lewis Productions, Hollywood, is starting a 26 half-hour TV adventure film series, *The Affairs of China Smith,* packaged by **Tableau Television Ltd.,** Beverly Hills. **Dan Duryea,** stage and film star, will enact leading role with **Edgar Barrier,** film actor, featured. Series, dealing with intrigue in Far East, will be distributed by **Prockter Syndication International** and already is sold in 23 markets. **Arthur Person** will direct from scripts by **Robert C. Dennis.**

* * *

Leon Fromkess and **Harry S. Rothschild** of **Arrow Productions** announce the completion of set lead for their TV series, *Ramar of the Jungle,* which stars **Jon Hall,** with the signing of **M'Liss McClure, Ray Montgomery** and **James Fairfax.** Series rolls May 15. **Rudy Flothow** produces and **Lew Landers** directs.

* * *

Casting of the first three *Craig Kennedy Criminologist* TV film shows in the second series has been completed, producer-director **Adrian Weiss** has announced. A total of 13 shows will be filmed. Shooting started last week at KTTV (TV) Los Angeles studios. Heading the cast is **Donald Woods** in the title role.

* * *

The Thrill of Your Life series of 13 half-hour shows produced by **Thrills Unlimited** is now ready for distribution by **Louis Weiss & Co.,** Los Angeles.

* * *

Clete Roberts, commentator of KLAC-TV Hollywood's *World Report,* has gone to Japan, Korea and Hong Kong for three months of reporting on the Korean situation. Series of 260 quarter-hour films will be distributed nationally by **United Artists Television.**

* * *

Television Screen Productions Inc., New York, has announced completion of 39 episodes of five-minute animated film series for children, **Jim and Judy in Tele-land.** Series is offered for sponsorship on two- or three-times-a-week basis, with 52-week program contracts accepted on twice-a-week schedules.

* * *

Roy Rogers Productions is shooting four new half-hour films for NBC-TV series, titled *Phantom Wrestlers, Bad Man's Brother, Death Medicine* and *Violence in Paradise,* on location at Walker's Ranch, Newhall, Calif. **Bob Walker** directs with **Jack Lacey** producing.

* * *

Transfilm Inc. is to start production Tuesday of the second program of its series with **Burgess Meredith** in Edgar Allen Poe's "The Tell-Tale Heart." Series is supervised by **Joel Hammil,** formerly in charge of NBC program development, and "Tell-Tale Heart" will be directed by **Alex Hammid,** co-director of Gian Carlo Menotti's film, "The Medium." First program in series features **Basil Rathbone** reading Robert Louis Stevenson's "Le Sieur DeMaletroit's Door."

* * *

Werner Janssen, composer-conductor, has formed **Werner Janssen Productions,** Hollywood, headquartered at California Studios, to produce series of 100 three-minute color films for TV and theatrical release. Based on combination of classical music selections and their visual dramatizations, programs will feature Mr. Janssen and 70-piece Janssen Symphony Orchestra of Los Angeles. **Jean Bonacorsi** and **Carl Palanzi,** (singers) San Francisco Symphony Orchestra, have signed for the first 10 films. **Sobey Martin,** director Grant-Real Productions, *Your Show Time* (series produced for American Tobacco Co.), and **Stanley Neal,** industrial film producer, will serve in their respective capacities.

* * *

Bing Crosby Enterprises, Culver City, is finalizing plans for a new half-hour TV film series, as yet untitled, based on short stories of **Louis Bromfield,** 1929 Pulitizer Prize winner. **Richard Llewelyn,** author of *How Green Was My Valley,* is adapting script for pilot film, *Up Ferguson's Way,* and Mr. Bromfield will narrate from his farm in Ohio. **Bernard Girard,** currently producer-director company's *Rebound* series, will serve in similar capacity.

* * *

Official Films will distribute two new half-hour TV film series, *Secret File U. S. A.* and *Rocky Jones, Space Ranger.* Former, featuring **Robert Alda,** stage star, is based on OSS files and will be

(Continued on page 78)

JACL PROTESTS

Says Japanese 'Typed' on TV

LETTERS are to be mailed to the FCC, NARTB and radio and television broadcasters by the Japanese American Citizens League, Chicago, protesting discrimination and "inequities" in television programming to American citizens of Japanese descent.

Specifics of the protest involve telecasting of old films, particularly those dated in the World War II period, depicting Japanese and Japanese-Americans as "vicious and traitorous," according to League President Dr. Randolph Sakada. The group is asking also that FCC intervene "as far as possible" with Japanese wrestlers on TV, who encourage the stereotype of a Japanese which prejudices viewers, the president said. Movies he cited included "Let's Get Tough," "Little Tokyo U. S. A." and "Betrayal From the East."

Although the league is concerned primarily with TV at this time, it has a committee which studies all entertainment and allied fields for discrimination, he said. He described telecasts of the kinds cited as "injurious to the concept of fair play, an impediment to understanding and tolerance, and capable of fomenting prejudice which can be easily translated into action."

COMMERCIALS AND NEWS COVERAGE

611 S. WHEATLAND AVE. COLUMBUS 4, OHIO

"HEART OF THE TEST MARKET"

RICHARD ROBBINS—PRODUCER-DIR.

UNDER REVIEW

'Objectional' Shows Listed

TWO shows, *The Continental* and *Stork Club*, were attacked in the National Television Review Board's March report on network programs. This Chicago organization found them objectionable for the family and noted *Continental* is being taken seriously by some elderly women.

Another program, *Juvenile Jury*, placed low on the list as "frivolous regarding family authority and customs . . . why doesn't somebody spank the moderator." In the "variable" category was wrestling and Milton Berle's *Texaco Star Theatre*. Wrestling shows depict "false values . . . excite savage instincts . . . create unstable emotions," while Mr. Berle's program, although improved, needs "more imagination to eliminate off-color situations and portrayals of perverted individuals," the board concluded.

LAAW TROPHIES

Presented to Ad Women

HELEN MURRAY HALL, advertising and promotion manager of NBC Western Division, received the Los Angeles Advertising Women Inc. "Lulu" award for "best research project" at the group's sixth annual Frances Holmes Achievements Awards presentation at Los Angeles April 20.

Others receiving trophies were were Doria Balli of TV Ads Inc., for best TV commercial spot campaign (Metropolitan Savings & Loan Assn.), and Betty Mears of Betty Mears Teleshows, for Max Factor & Co. campaign; Jeanne Gray, KNXT (TV) Los Angeles, best sponsored TV program series, with Monty Margetts, KNBH (TV) Los Angeles, second place.

Mary Lou Gordon, public relations director of Orthopedic Hospital, Los Angeles, received an award as "outstanding woman in advertising in 11 western states and Canada." She also received a "Lulu" for the best public relations campaign.

Miss Holmes, in whose honor awards are made annually, was given a perpetuating trophy. Helen Edwards, LAAW president, opened the meeting, with Norman Jean Wright, awards coordinator, presiding. Barbara Stanwyck, film actress, made presentations.

WBEN-TV Tower

NEW triangular tower to be erected for WBEN-TV Buffalo by Ideco Division of Dresser-Stacey Co., Columbus, Ohio, is 1000-feet high, not 100 feet as incorrectly listed in the March 31 BROADCASTING • TELECASTING. Ideco displayed a section of its "Tall Tower" at the NARTB Chicago convention.

FORD FOUNDATION

Income Above Expenditures

FORD FOUNDATION'S income outstripped its grants and expenditures by $8,135,504 in 1951 and the fund's balance at the end of the year stood at $502,587,957, according to the annual financial statement released last Friday.

Income consisted of $30,909,798 in dividends, $1,012,749 in interest, and $39,243 from "other" sources, for a total of $31,961,790. Grants approved during the year totaled $22,286,214, while expenditures for furniture, equipment, leasehold improvements, and general operations amounted to $1,540,072 for a total of $23,826,286 in grants and expenditures. This $8,135,504 excess of income over grants and expenditures, coupled with $1,774,198 derived through the sale of certain real estate and personal property, left the fund balance at the end of 1951 $9,909,702 ahead of the $492,-678,255 balance at the end of 1950.

Grants approved during the year included $1.2 million to the Fund for Adult Education for establishment of the TV-Radio Workshop, plus $3.6 million to the Fund for other adult education projects; $50,-000 to the Advertising Council for a restatement of the principles of American Society"; $150,000 to the National Committee for a Free Europe Inc. "to support humanitarian activities in Germany," and $35,000 to World Wide Broadcasting Foundation Inc. "to support shortwave international broadcasts."

CBS-TV CLINIC

Agenda Taking Shape

GLENN MARSHALL Jr., general manager of WMBR-TV Jacksonville, Fla., will discuss TV station operation at CBS-TV's clinic in New York May 1-2 [B•T, April 21], network officials announced last week.

Mr. Marshall also will take part in a panel of station managers, CBS-TV executives, and other industry leaders who will answer questions from the 500 or more representatives of CBS Radio and CBS-TV affiliates expected to attend the sessions. Other panel members, it was announced, will include George B. Storer, president, Fort Industry Co.; D. Lennox Murdoch, manager, KSL-TV Salt Lake City, and Clyde W. Rembert, general manager, KRLD-TV Dallas.

NAM TV Shorts

AFTER 79 weeks, National Assn. of Manufacturers weekly TV short series, *Industry on Parade*, has been pronounced a success, according to an article in *Business Week* magazine's April 19 issue. The "non-propaganda" 13-minute series of two to four minute shorts depicts American industry in newsreel style and is offered free to TV stations by NAM, which says 55 stations have accepted the series.

Film Report

(Continued from page 76)

filmed both in New York and Hollywood. Producer-director **Arthur Dreifuss** will use semi-documentary technique with **Frank Gallop** narrating.

Tying in with this *Rocky Jones, Space Ranger* is Space Ranger Enterprises, headed by **Jack Danov**, with 25 licensees contracted for delivery of various articles of wearing apparel. Mr. Danov will be in New York for Boys' Apparel Show, May 4, for screenings of films and display of merchandise.

* * *

Herman Hack, announces that **Scripture Films**, which he heads, is now releasing a series of three *Frontier Parson* films for television. Films are titled "Humble Heart", "Reads the Bible" and "God's Animals"; they are available in either black and white or color. Mr. Hack, who is producer and stars in the series, asserts that each story has been selected so that there are no scenes which might tend to shock children. Films have 26-minute running time.

* * *

Sales . . .

Four-market sponsorships of *Double Play With Durocher and Day*, film program distributed by **United Television Productions**, were scheduled by **Aaron Beckwith**, UTP sales director, who announced that **Harts' Sales Corp.**, manufacturers of auto polish, had added Dallas and Houston to their earlier contracts for Phoenix and San Antonio. Deal brings total markets for the series to 20, Mr. Beckwith said, with negotiations also under way for sales in New York and Chicago. Same program was bought by **McCann-Erickson** for **Fehr Brewing Co.**, Indianapolis, to start May 1 on WFBM, same city.

* * *

Peerless Television Productions, New York, added three stations last week to those carrying its group of 26 feature films, bringing to 16 the total of markets now served. New subscribers include WDTV (TV) Pittsburgh, WFAA-TV Dallas, and WMAR-TV Baltimore.

* * *

CBS-TV's new film series, *Files of Jeffrey Jones*, has been bought by **Felber Biscuit Co.**, Columbus, Ohio, through **Harry M. Miller Inc.**, that city, for distribution in two markets: WLWC (TV) Columbus, effective immediately, and WHAS-TV Louisville, beginning May 1. Series also has been sold to **Household Finance Corp.**, Chicago, through **Needham, Louis & Brorby**, same city, for placement on WBKB (TV) Chicago, time and date to be announced later, bringing total sales to six.

* * *

Alexander Film Co., Colorado Springs, announces the recent TV commercial productions for the following organizations:

Adolph Coors Co., Golden, Col., one 20-second film through **MacGruder-Bakewell-Kostka Inc.**, featuring **Coors Beer. Frigidaire Division**, General Motors Corp., Dayton, Ohio, eight 20-second, eight 26-second, eight 60-second, and eight 90-second films through **Foote, Cone & Belding. The Gruen Watch Co.**, Cincinnati, two 60-second films through **McCann-Erickson Inc. Continental Airlines**, two 60-second and one 20-second films through **Galen E. Broyles Co.**, Denver. **The Borden Company**, Houston, Tex., three 20-second films through **Tracy-Locke Co. James Manufacturing Co.**, Independence, Kan., two 26-second, two 46-second, and one 13-second films through **Galen E. Broyles Co. Coron, Inc.**, Danville, Ill., one 60-second film. **Merchant's Biscuit Co.**, Omaha, Neb., four 20-second and one 10-second films through **Allen & Reynolds. C. J. Hug Co.**, one 20-second film featuring Imperial Clocks.

TELENEWS EXPANSION

Set at L. A., Chicago

TELENEWS Productions Inc., New York, last week announced expansion of its Los Angeles and Chicago bureaus "to meet the growing demands of . . . TV newsreel operations."

Telenews General Manager Charles Burris said increase in TV newsreel activity has placed "a heavier load on all Telenews-INS bureaus around the world."

Staff camermen Fred Dieterich anl Bob Hess of the New York offices have been transferred to West Coast and middlewest bureaus, respectively, in line with the expansion policy.

'Passing Interest'

FCC CHAIRMAN Paul A. Walker received minute-long standing ovations before and after his luncheon address to National Assn. of Educational Broadcasters in Columbus April 18. He also drew a chuckle from IERT audience when he cited a $9 million bequest willed to Ohio State U. by an alumnus. "I will not identify this educational institution," he said, "beyond noting it is a leading state university which has expressed more than a passing interest in noncommercial educational television — and that it is located in the capital city of an up-and-coming mid-western state." OSU's "more than passing interest" was, of course, in a VHF channel on which it was rejected.

UTP ELECTIONS

Blink, King Re-Named

MILTON M. BLINK, executive director of United Television Programs, has been named executive vice president.

Gerald King was re-elected president of the film distributing company and will continue to head the Hollywood offices. Mr. Blink is in charge of Chicago headquarters, while the New York offices are managed by Aaron Beckwith, director of sales.

UTP was founded in January 1951 by Messrs. King and Blink, president and vice president, respectively, of Standard Radio Transcriptions, parent organization for UTP. The subsidiary distributing company handles film programs exclusively for Bing Crosby Enterprises, Marion Parsonnet Studios, Walter Schwimmer Productions, Gross-Krasne and Kling-United Studios.

Rorabaugh Adds Six

SIX more advertising agencies have begun reporting their monthly spot radio schedules to the Rorabaugh Report on Spot Radio Advertising, the research firm announced last week. Agencies are: Bo Bernstein & Co., Providence; Farquhar & Co., Utica, N. Y.; Gregory & House, Cleveland; Henderson Adv. Agency, Greenville, S. C.; Moser & Cotins, Utica, and Stockton - West - Burkhart, Cincinnati.

THEATRE TV

Johnston Gives Views

PROSPECTIVE "marriage" of television and movies promises the birth of "a new and prosperous age for the motion picture industry," Eric A. Johnston, president of the Motion Picture Assn. of America, predicted April 15 at a Los Angeles Chamber of Commerce banquet celebrating the 50th anniversary of the first American motion picture theatre.

Scoffing at opinions that home television and movies "can thrive only at the expense of each other," Mr. Johnston declared that large audience theatre television "opens a broad new avenue of opportunity for the motion picture industry."

Terming large audience television a "sleeping giant" today, he predicted it is destined to be a major factor in the operation of every motion picture theatre tomorrow. Enlarging on his prediction, Mr. Johnston explained that his industry has asked FCC to allot frequencies for operation of theatre television. Hearing on the petition begins in the fall.

If the frequencies are allotted, Mr. Johnston said, "far-sighted men in our industry see in this marriage of motion pictures and electronics the birth of a new era in the world of entertainment."

HILL TELECASTS

Favored in Veteran Survey

OVERWHELMING vote among the membership of the American Veterans of World War II favors telecasting sessions of Congress on either a selective or general basis.

According to a poll taken of AMVETS members, 79% balloted for telecasting of Congress and committee meetings when necessary. Only 15% voted against the proposal and 6% had no opinion. Majority of those in favor said they wanted to be sure Uncle Sam would not have to foot the bill for congressional TV.

Results were noted April 21 in the *Congressional Record* by Rep. Jacob K. Javits (R-N.Y.).

XHTV (TV) to CBS-TV

CBS Television last week announced signing of XHTV (TV) Mexico City as its 63d network affiliate. Owned by Television de Mexico, S. A. with Romulo O'Farril Jr. as president and Monte Kleban as general manager, XHTV operates on Channel 4. Service will be by television recording.

CONTEMPT TRIAL
Is Set for D. C. May 20

TRIAL date has been set for May 20 in the Senate contempt case of Clevelanders Morris Kleinman and Louis Rothkopf, it was learned last week. The trial will be held in District Court, Washington, D. C.

The men are alleged king-pins in the gambling world who refused to testify at the Kefauver Crime Committee hearing last year. They cited sound recording and newsreel cameras, and TV cameras as well, in their refusal.

Messrs. Rothkopf and Kleinman were indicted by a Washington grand jury last month [B•T, March 17]. They are expected to bring up the media question in their defense argument.

If the judge, as yet unassigned to the case, should rule on the media aspect, Assistant U. S. Attorney William Hitz, who is handling the case for the government, feels it may be a "complete test" of radio and newsreel presence at Congressional investigating committee hearings. At the same time, it should serve as a "partial" test for TV.

The Kefauver committee was a Senate unit. As such, it had no relationship to the House where an overall ban has been placed on radio-TV coverage of committee hearings.

However, any ruling which touches on the right of broadcast media to be present during an investigating committee's hearing may be cited as a precedent and probably would affect all Congressional procedure.

$30 UHF Adapter

UHF adapter for less than $30 which the set owner can install was announced last week by Harvey L. Pokrass, president of Tele King Corp., who said the device will be in mass production by fall. Shaped like a midget radio, the adapter can be plugged in and the antenna connected to the antenna terminals and the receiver to the receiver terminals. It will receive all UHF channels, he said.

U.S. SHOWS GO SOUTH OF BORDER
New Sub-Title Process to Aid Mexican TV

MEXICAN audiences promise to be a new source of income to help reduce high programming costs of U.S. commercial TV shows with the development of an inexpensive method of super-imposing Spanish sub-titles on English language video shows.

After six months of experiments and negotiations, a mechanical method has been developed which is said to cost less than 10% of usual film sub-titling process and contracts with U.S. networks have been drawn by Romulo O'Farril Jr., operator of XHTV (TV) Mexico City and XELD-TV Matamoros, according to Monte Kleban, head of the O'Farril international interests, who helped Mr. O'Farril in developing the new process.

Mr. Kleban said the program to be used will advertise products sold both north and south of the border. Since 70% of U.S. network TV users sell products in Latin American markets, they are expected to open up a huge potential field for sponsors.

Foreign branches of U.S. manufacturers who have ordered these programs for broadcast in Mexico represent drug, automotive, accessory and appliance accounts and practically every category of advertiser, according to Mr. Kleban.

Mr. O'Farril Jr., who with his father holds 18 licenses for stations in Mexico, predicted an eventual network in Mexico which will receive U.S. TV programs and transpose them at one central point. He added, "There is no reason why we should not be feeding these programs throughout Central and South America." He said he believed "many programs which we originate here will be of interest to U.S. audiences."

Mr. Kleban said branches of U.S. advertising agencies who have seen the shows in Mexico City demonstrations endorse the use of the transposition programming and feel it not only will supplement present U.S. shows financially, but will co-ordinate advertising on an international plane.

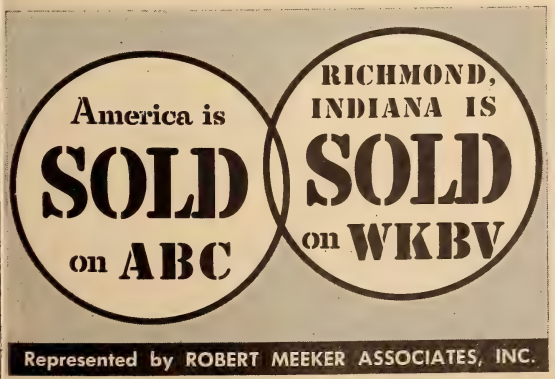
AIR CONDITIONING
TV Thaw Should Aid Sales

TV THAW is expected to re-open a broad field where air conditioning is a must, according to Lawrence K. Macrow, director of application engineering for Carrier Corp., Syracuse, N. Y.

An overriding problem in video studios is heat, Mr. Macrow explained. Carrier Corp., he added, has made a special study of TV studio problems and has distributed information to its sales offices so that dealers could provide expert assistance.

PRESSURE GROUPS
Working on TV—Rice

TELEVISION, "probably the most important medium for dissemination of ideas, theories and information," is being weakened by pressure groups acting as censors and by the industry itself with its TV code. This was charged by playwright Elmer Rice in a Chicago address April 15 to representatives of agencies, stations, networks and packaging firms.



He said the argument that voluntary regulation is needed to avoid government regulation is "nonsensical." There are no such restrictions on content imposed by newspapers and magazines, he said, referring to the success of certain pressure groups in controlling program content and performers indirectly by boycott. He asked "what would happen to the free press if paper printed nothing that was offensive to anyone? If everything in them was suited, . . . to children?"

PRICE PROTECTION
Given by DuMont, Emerson

PRICE protection policies, insuring dealers and distributors against depreciation in value of their radio-TV set inventories, have been announced by Allen B. DuMont Labs and Emerson Radio and Phonograph Corp. The policies cover varying periods for each firm.

Distributors are guaranteed for a 12-week period—from April 21 through July 13—by DuMont's receiver sales division, Walter L. Stickel, national sales manager, announced. Guarantee insures them against any reductions which may be made by DuMont in prices below the published price schedule. Distributors will receive a merchandise credit equal to the excess they paid over reduced prices if they also extend the same figure to dealers.

Under a similar policy, announced by Benjamin Abrams, Emerson president, distributors are authorized to give dealers a guarantee against depreciation of Emerson inventories from now until Oct. 1.

PROOF✓ POSITIVE

THAT K-NUZ BRINGS RESULTS

Kronberger Jewelers Speaks Out for K-NUZ Pulling Power . . .

Here is a letter K-NUZ received from F. G. Kronberger, owner of F. G. Kronberger Jewelry Store:

Gentlemen:

It is only now that I get around to commenting on the service which your station rendered recently during my sale.

I am very pleased with the way your station pulled in the customers. Since I had never before used radio as a means of advertising, I was a little apprehensive. But as it turned out, that was the most productive advertising money I ever spent.

If, in the future, I should reenter the retail field again, radio would be the first thought in my mind for advertising purposes.

Thanks for a job well done!

Yours sincerely,
F. G. Kronberger

HOUSTON'S LEADING INDEPENDENT

Our Respects to

(Continued from page 50)

a local institution as its AM operation.

During his six years in Charleston, Mr. Gelder's civic activities have put him on the board of directors of the Red Cross, the Charleston Symphony Orchestra, Community Theatre, Community Chest and Family Service.

Two years ago he was campaign chairman for the Community Chest. His enthusiasm plus his every possible use of radio publicity, put the campaign over its goal there for the first time in local history.

He currently is president of the West Virginia State Broadcasters Assn., a member of the Charleston Rotary Club and the public affairs committee of the Chamber of Commerce and is chairman of the communications division, of the West Virginia Civil Defense Organization.

Mr. Gelder was born Jan. 9, 1919, attended grade school in Grand Rapids, Mich., junior and senior high school in Marion, Ind., and got his university training at Ann Arbor.

In 1941, Mr. Gelder married the former Elizabeth Stairs of Beckley, W. Va. They have two children, Carolyn, 7, and Tommy, 3. Whenever there are a few hours away from station and civic activities, his family, golfing and fishing take over.

In golf, his technical ability has not quite overtaken his buoyant enthusiasm with the result that his scores are erratic.

In fishing, friends say he is much more consistent—he seldom catches anything.

At WCHS, staff members believe Mr. Gelder is "perhaps" the only radio station vice president in the United States with a trotting horse named for him.

Lewis C. Tierney, president of Tierney Co., licensee of WCHS, owns a horse breeding farm. He needed a name for a colt which was to be entered in the Futurities. He came up with the name—"Jack Gelder."

Friends say if the colt moves as fast in the trotting races as Mr. Gelder has in the radio industry, put your money on him.

Ayers Forms Firm

JAMES S. AYERS, general manager of WAKE Greenville, S. C., announced last week that he will open a representation firm to serve southeastern radio and television stations starting June 1. The firm, James S. Ayers Co., will have headquarters at 77 W. Paces Ferry Rd., Atlanta, and will cover Virginia, North Carolina, Tennessee, Mississippi, Louisiana, Alabama, Georgia, Florida and South Carolina. Mr. Ayers has resigned the WAKE general managership effective May 1.

allied arts

FRANK S. BORST, vice president of A. C. Nielsen Co., to Industrial Surveys Co., Chicago, as vice president in sales and client service department.

SAM KAPLAN, vice president-controller of Zenith Radio Corp., Chicago, elected to serve also as treasurer.

STANLEY R. ANDREWS elected vice president in charge of production facilities, Standard Coil Products Co., Chicago.

Mr. Andrews

MATHEW F. BARNES appointed regional sales manager for Zenith Radio Corp., in Southwest with headquarters in Dallas, Tex.

EDWARD GENOCK, associate editor of Paramount News, named editor-in-chief of Telenews Productions.

DOUGLAS J. SULLIVAN appointed manager of employe and plant community relations for General Electric Co.'s tube department, Schenectady, N. Y.

JOHN FENSTER, spot sales staff, ABC-TV New York, to Reeves Sound Studios, that city, in sales capacity.

VICTOR ELECTRIC PRODUCTS Inc., Chicago, appoints Al Middleman, N. Y., as national sales representative.

A. H. JACKSON, assistant manager of tower department, Blaw-Knox Co., Pittsburgh, Pa., appointed manager succeeding **E. J. STAUBITZ** who has retired.

Mr. Jackson

KENNETH C. De WALT, manager, General Electric Co. Cathode Ray Tube Dept., named department's manager of engineering with headquarters in Schenectady, N. Y., succeeded by his assistant, **ROBERT E. LEE.**

PAUL SMALL and **FELIX FERRY,** Beverly Hills talent agents, have severed partnership and will resume independent firms of **PAUL SMALL ARTISTS Ltd.,** Beverly Hills, and **FERRY & PICKMAN,** Hollywood.

GEORGE G. SCOTT, formerly assistant sales manager of Federal Telephone & Radio Corp., to television transmitter division of Allen B. DuMont Labs as regional sales representative in New York state and New England territory. **CHARLES E. BELL,** TV director, WBTV (TV) Charlotte, N. C., named regional sales representative in eastern and southeastern territory. **WILLIAM C. COTHRON** joins DuMont as sales engineer with headquarters in Clifton, N. J.

IERT MEMBERSHIP

Life Certificates Granted

LIFE memberships in IERT for FCC Chairman Paul A. Walker, Comr. Frieda Hennock and Judith Waller, NBC Central Div., were announced at the annual dinner banquet of the Institute for Education by Radio-Television April 19.

Chairman Walker was cited as a "long-time friend of the co-founder of the Institute (W. W. Charters)," for his stand "for highest ideals of public service," and his consistent support of education. Comr. Hennock was described as the "outstanding exponent of educational television . . . a fighter and a zealous advocate."

Miss Waller was lauded as an "outstanding citizen, broadcaster and educator"; for her dedication to "the ideals of better broadcasting" and devotion to educator, and her "wise guidance" to IERT through its 22 years. Miss Waller is director of education for NBC in Chicago.

Certificates of lifetime membership in IERT will be presented to the FCC Chairman and Commissioner in Washington, since both were not present for the dinner.

EXPANDED news coverage has been announced at WFIN Findlay, Ohio, with addition April 14 of Associated Press radio wire.

PROGRAMMING

Audience Promotion Tops IERT Meet

BUILDING and holding audiences from the viewpoint of the agency timebuyer and station manager highlighted a weekend session of the 22d annual Institute for Education by Radio-Television at Columbus April 19. Attendance reached 1,000 for the four day conference.

Morris S. Novik, public service radio consultant and former director of the Municipal Broadcasting System (WNYC New York), told members that educational and commercial independent stations "must find the neglected audience" in their community and stress specialized programming. Such operation, he said, attracts steady listeners and can operate "with the least fear of television."

In a talk prepared by Elizabeth Black, media director, Joseph Katz Co., New York, it was explained that while audience ratings are an "important tool," the character of the audience "is often a weightier factor." She compared network broadcasting to magazine circulation and spot radio to local newspapers, noting the flexibility of the spot broadcasting.

Work of U. S. government agencies and national organizations also drew discussion in the waning sessions, as did international broadcasting and organized listener groups. A number of radio-TV workshops also were held.

In addition to a speech on international broadcasting by Comr. E. M. Webster [B•T, April 21], Gilmore Nunn, president of WLAP Lexington, Ky., reviewed work of the Inter-American Assn. of Broadcasters, of which he is a member, in preserving principles of free radio. Other talks were given by Leo Lowenthal, State Dept. Office of International Broadcasting, on program evaluations overseas for the Voice of America, and by Pierre Crenesse, director, French Broadcasting System.

Robert K. Richards, NARTB public affairs director, presided over a panel on broadcasting by national organizations April 19, with stress on public service fare. Jerome Reeves, program director, WBNS (TV) Columbus, was a panelist.

Role played by agriculture in broadcasting commanded attention of delegates in separate radio-TV meetings, with Paul Visser, NBC Chicago; Richard Cech, Iowa State College; and Mal Hansen, WOW-TV Omaha, exploring various topics. Maynard Speece, U. S. Dept. of Agriculture TV specialist, represented the government.

Mr. Cech described a program series he claims as the largest single "teaching - by - television" project ever attempted by one station (WOI-TV Ames). Preliminary reports indicate an audience of 20,000 women who enrolled for certain courses. Mr. Speece reviewed USDA video developments. Television also was suggested in another panel as a means of relieving the teacher shortage.

Various educational subjects, including public relations, education through commercial radio outlets, TV techniques, and professional training, also were reviewed in the closing days of the institute.

Sunday panels touched on school broadcasting, health and adult education, religious programming, religious broadcasting and government agency activities.

Presiding at closing government panel on educational programs was John Meagher, acting chief, Radio-TV-Visual Media, Dept. of State. Panelists included Kenneth M. Gapen, assistant director of Information for radio-TV, Dept. of Agriculture, and Lt. Comdr. Herman A. Spindt, chief, Armed Forces Radio Information Section, who reviewed Army Dept. activities.

Comr. Webster also addressed a luncheon session of the Assn. for Education by Radio-Television on Saturday.

Air Walker Forum

WHEN FCC Chairman Paul A. Walker appeared as guest of the *New York Times'* Youth Forum in Columbus April 18, the entire proceeding was recorded by the Liberty network for broadcast at a later date. Forum was held in connection with the Institute for Education by Radio - Television meeting. Chairman Walker appeared at Columbus' Central High School Auditorium after an address at the National Assn. of Educational Broadcasters' luncheon session.

FIRST Ontario program clinic of BMI Canada Ltd., will be held at King Edward Hotel, Toronto, May 16 under the chairmanship of Murray Brown, president of Central Canada Broadcasters Assn. and manager of CFPL London.

CITY ZONE STATE

programs promotion premiums

NEWSPAPER's name and goodwill are being promoted via the TV screen in Salt Lake City. The *Tribune-Telegram* is using facilities of KDYL-TV, both located there, for *Inquiring Editor* program. Format is informative and entertaining quiz show. Two teams compete to answer questions on current news. Quizmaster is Herb F. Kretchman, editor of the paper.

COLLEGE SCHOLARSHIPS

CONTEST for three college scholarships is being conducted by WIDE Biddeford, Me., in cooperation with Nasson College, Springvale. Contestants submit letters stating reasons they wish to attend college. Semi-finalists will be interviewed by faculty members at the school and three winners will be selected from the group.

WHHH AIRS DOCUMENTARY

ORIGINAL narrative documentary was presented by WHHH Warren, Ohio, last week in celebration of city's 153rd anniversary. *The City Named for Moses,* which ran for fifty minutes, related the history of the city through recreations of everyday shows heard on the station projected into the past. Every member of the staff took part in the production.

BOWLING TOURNAMENT

FOR third consecutive year, WNAX Yankton-Sioux City, S. D., has sponsored what station reports is largest sports event ever conducted by an American radio outlet—the WNAX 5-state bowling tournament in which 7,791 midwest bowlers competed this year. More than $25,000 in cash, $5,000 in merchandise and 36 trophies were awarded district and final bowlers.

PALATABLE PROMOTION

STORY of WIBW Topeka, Kan., which is "well seasoned in *effective* Kansas selling" is illustrated in promotion piece sent out by the station. Set of salt and pepper shakers accompanies the folder which points "your way to more palatable sales results" in the station's market.

TV CLUB ORGANIZED

CLUB devoted to teaching respect for law and order has been organized for young viewers in Milwaukee centering around *Foreman Tom B-Square Ranch* on WTMJ-TV Milwaukee. Membership cards and buttons are being sent to children who write in and pledge to club's set of rules which are "Be Happy, Be Healthy, Be Friendly, Be Fair, Be Helpful, Be Handy, Be Trusty and Be Square."

YEAR-ROUND MARKET

"SELL the most where the most is sold" is theme of folder released by KNX Los Angeles promoting its coverage area as an all-year-round good buy. Accent is placed on selling "the happy-go-wealthy" Southern California market in the summertime. Station reassures reader that summer or winter radio—especially KNX—attracts same big audience.

AVERAGE CITIZEN ON TV

QUARTER-hour weekly, *Camera on You,* has begun at KING-TV Seattle. Filmed show features the average citizen rather than known personalities. Five or six items are covered each week. Program produced by American Adv., Seattle, is sponsored by Olympic Engineering, Automatic Wash, both Seattle, and Veloz and Yolanda dancing studios of Seattle, Takoma and Bremerton.

EDUCATIONAL PROGRAMS

NEGOTIATIONS have been completed between WJIM-TV Lansing, Mich., and U. of Michigan for telecast of hour long educational series every Sunday. Station is already carrying *March Through Time,* Saturday show produced in cooperation with Wayne U. Station reports audience response to educational programming has been gratifying as is evidenced by scores of congratulatory letters received at WJIM

NEWSPAPER PROMOTION

SPECIAL promotion plans have been devised by WLIB New York for Sachs Quality stores since latter purchased *Up Town Coffee Club,* part of station's programming for the Negro market. All shows will originate on alternate basis from two of Sachs' stores in the Harlem area. WLIB has made its air personalities available for stores' ads in *The Amsterdam News* explaining why each performer enjoys shopping at Sachs.

CAR RADIO PROMOTION

PROMOTION piece highlighting radio dial and spot occupied on it by WFIN Findlay, Ohio, has been mailed to 250 new car dealers in station's coverage area. Copy suggests dealers set a push button on all car radios for WFIN reception, the "1330 spot where good programs are."

STAR STATION BREAKS

STATION breaks aired each hour at KLAC Hollywood are being done these days by motion picture personalities. Station reciprocates by mentioning star's latest movie. Included in the group are Linda Darnell, Cary Grant, Frankie Laine, Bob Crosby and the Andrew Sisters.

WIP USES TRAILERS

ARRANGEMENTS have been made by WIP Philadelphia with 15 motion picture theatres to show animated as well as live subjects promoting station's new line-up of programs. Approximately 250 showings of the trailers which are scored with music are seen each week. Station will feature one program per week on trailers.

WMAL-TV'S 'MODEL SHOW'

SIX aspirant high school models will appear with professional manikins in the Washington, D. C. area on new show, *Meet the Models,* aired weekly by WMAL-TV in that city. Panel of five models and a male guest will be featured on each telecast with Marjabelle Young as moderator. High school girl selected to appear on the show will receive a modeling course and "a promise of a 'helping hand' from the 'old hands' in the field in Washington."

QUEEN'S VISIT

BLANKET coverage was given Queen Juliana of the Netherlands' visit to western Michigan by WOOD-AM-TV Grand Rapids. City is the center of nation's largest concentration of people of Dutch descent. On the occasion of her visit, the TV outlet originated first live outdoor remote telecast in the area covering the parade of the Queen's entourage through the city and her speech to the crowd who gathered to greet her.

DETAILS ON VANCOUVER

ILLUSTRATED brochure has been released by CKWX Vancouver, featuring views of Vancouver, its homes, scenic beauty spots and tourist attractions, Vancouver's industries and pictures of the men and women who operate and produce programs on CKWX. Direct advertising consists of listing of most popular programs on the station, listed on inside back cover.

CROSS PROMOTION

CROSS tie-in with news stands has been arranged by WGAR Cleveland to call attention to Hudson Dealers' show, *Damon Runyon Theatre.* Special placards distributed to the stands are plugging broadcast as well as books by Damon Runyon which news dealers have on sale.

ENGLISH UNION

Award Winners Named

HUBERT W. KREGELOH, WSPR Springfield, Mass.; George Cushing, WJR Detroit, and Mrs. Evadna Hammersley, KOA Denver, have been selected to receive the 1951 Better Understanding Awards of the English-Speaking Union for contributions to greater understanding of mutual problems and interests of the United States and countries of the British Commonwealth.

In addition to regional awards to individuals on the air, ESU also will present a special award for program direction to Katherine Fox, director of special services of WLW Cincinnati.

Comparable awards for journalistic performance will go to Marguerite Higgins, *New York Herald Tribune;* Julie Medlock, *Wichita Beacon;* James Reston and Robert Trumbull, *New York Times.* Erwin D. Canham, editor of the *Christian Science Monitor,* will receive a special award for editorial direction, and Irving DeWitt Talmadge, foreign affairs editor of *Scholastic* magazine, a special award for special audience.

Judges were: Merrill Denison, author; Charles W. Ferguson, *Reader's Digest;* Mrs. Ritchard A. Kimball; Miss Amy Loveman, *Saturday Review;* Mrs. Harold V. Milligan; Bruce Robertson, BROADCASTING • TELECASTING. Date of presentation will be announced shortly.

'Dragnet' Honored

NBC's *Dragnet* for the second time was judged the best radio mystery program of the year when Mystery Writers of America Wednesday presented their annual Edgar Allan Poe Awards to winners in seven fields of writing. First award to be presented a television program was voted to CBS-TV's *The Web.* Runner-up in the radio group was Mutual's *Mysterious Traveler. Dragnet* is sponsored by Liggett & Myers (Fatima cigarettes) through Cunningham & Walsh. *The Web* is for Embassy cigarettes through Geyer, Newell & Ganger. *Mysterious Traveler* currently is not sponsored.

Strictly Business

(Continued from page 12)

erings and building materials. Thus *Circle Theatre* often ventures into "experimental theatre."

"For both our radio and television shows we want regular, loyal, week-after-week audiences, and, of course, we want to keep adding to these audiences," Mr. Banzhaf relates.

Armstrong trys to find plays "to please the millions, rather than the critics. Our *Theatre of Today* has had a top rating in daytime radio for years, and our *Circle Theatre* now stands about 15th among all network television programs," he notes.

Mr. Banzhaf can be considered an Armstrong career man. He began preparing himself for Armstrong in 1937 when he was about to be graduated from Iowa State College. Unsuccessful at first, Mr. Banzhaf persisted and in a year's time was accepted in the 1938 training class and was summoned to Lancaster, Pa., home of Armstrong, to bone up for a sales position with the building materials division.

Double Success

His persistence and spunk won him a job with Armstrong and an ability to make a quick decision won him the hand of a Lancaster girl who became Mrs. Banzhaf a few months after he started on his career.

First assignment with Armstrong was in Milwaukee where he called on flooring accounts, lumber dealers and acoustical contractors. His high marks in aptitude tests proved accurate for Mr. Banzhaf was a good salesman. So good, in fact, that when he suggested a method for promoting good business, his manager told him to send a memorandum. Instead of a few notes, the sales manager received a presentation of a complete merchandising and promotion plan, including suggested ads and sales letters.

Word about this extraordinary salesman traveled as high as the president of the company and Mr. Banzhaf in 1944 became manager of the building materials section of the advertising and promotion department when the man who had held the post was commissioned into the Navy.

Mr. Banzhaf's subsequent outflow of ideas based on his selling experiences earned him a promotion to assistant director of the advertising and promotion department assuming some responsibility for all of the firm's advertising. He became acting director of the department and director the first of this year.

Armstrong is a veteran advertiser. It uses newspapers and consumer magazines in addition to its radio-TV billings. Its agency, BBDO, has been with the firm since 1917.

The Banzhafs have two children. They live in a country home near Lancaster which shows evidence of his craftsmanship as a home woodworker and handyman. Outside activity, away from his residence, rests on golf—and the advertising campaigner has started a personal campaign to improve it.

OUT-OF-HOME

Radio Listening Is Up

REPORT on special out-of-home radio listening survey conducted in 12 markets during January and February by Pulse Inc., New York, was released by the firm last week and shows an average addition of 15% to the radio audience in markets surveyed—ranging from 10.4% in Seattle to 18% in Philadelphia.

Comparisons made in the summer of 1951 show a seasonal decline of in-and-out-of-home ratings, but present survey indicates a 1.5% increase over ratings of February 1951, when Pulse's survey covered only seven cities.

Surveys were made during period between 6 a.m. and 12 midnight, Sunday through Saturday, and figures indicate percentage of all homes surveyed. Data for each market are shown below:

	Homes Using Radio	Homes With "Out of Home" Listening
Philadelphia	18.3	3.3
New York	21.3	3.5
Boston	21.5	3.3
Detroit	20.2	3.0
Washington	21.3	3.1
Atlanta	21.2	3.1
Cincinnati	19.6	2.6
Minn.-St. Paul	22.9	2.9
Chicago	20.7	2.6
Birmingham	24.4	3.0
St. Louis	20.3	2.4
Seattle	25.0	2.6

Newsmen Join NABET

NBC and ABC Hollywood radio news writers, in an NLRB election, unanimously voted to withdraw from Radio Writers Guild and affiliate with National Association of Broadcast Engineers and Technicians. Four writers at each network chose NABET, which also represents engineers and technicians of ABC and NBC. CBS Hollywood newswriters continue with RWG. IBEW represents engineers and technicians of that network.

NEWS AWARDS

AP Honors Virginians

VIRGINIA Associated Press Broadcasters presented certificates of merit to 39 persons in radio representing 17 Virginia stations at the annual awards banquet in the Washington's National Press Club last Monday.

The awards, in six categories of radio news, are sponsored by the VAPB "to encourage better presentation of news" by the 33 member stations in Virginia.

Recordings, from actual broadcasts, were made during the year ending Feb. 1, 1952, and submitted to committees of judges from Maryland stations.

Awards were made for two divisions: Metropolitan, for cities with two or more stations; non-metropolitan, for cities with only one station.

Judges were listed as: (metropolitan division), John Alderson, WFBR; Al Stevens, WWIN and Galen Fromme, WBAL, all Baltimore; (non-metropolitan division), William J. Paulsgrove, WJEJ Hagerstown; Alan Long, WFMD Frederick, and Ernie Tannen, WGAY Silver Spring.

Maynard Dillaber, news editor of WMVA Martinsville and vice president of VAPB, was awards committee chairman. News committee is headed by Howard Hamrick, WRNL Richmond. Don Murray, WDBJ Roanoke, heads the sports committee.

Award winners were:

COMMENTARY

Metropolitan division: Superior—Dr. Douglas Southall Freeman, WRNL Richmond; Excellent—Michael Blancard, WCYB Bristol; Meritorious—Calvin Robinson, WWOD Lynchburg; Honorable Mention—Carl Andrews, WDBJ Roanoke.

Non-Metropolitan: Superior — Bob Bradford, WREL Lexington.

COMPREHENSIVE NEWS

Metropolitan division: Superior — Howard Hamrick, WRNL Richmond; Excellent—Tom Hughes, WSLS Roanoke; Meritorious—WTAR Norfolk, combination work of Gilbert McLeod, John Patterson and Clayton Edwards; Honorable mention — Don Murray, WDBJ Roanoke.

Non-Metropolitan division: Superior —John W. Shultz, WMVA Martinsville; Excellent—Fred L. Hart, WLPM Suffolk; Meritorious — Wendell Siler, WRAD Radford; Honorable Mention—Tom Browne, WMEV Marion.

SPORTS

Metropolitan division: Superior — Norman Simpson, WWOD Lynchburg; Excellent — Harry Wiseman, WSLS Roanoke; Meritorious—Cris Cramer, WCHV Charlottesville; Honorable Mention—Joe Mason, WLEE Richmond.

Non-Metropolitan division: Superior —Paul Zimmerman, WMVA Martinsville; Excellent—Duff Kliewer, WVEC Hampton; Meritorious — Fred Oginz, WSVS Crewe; Honorable mention—Roy Marsh, WHLF South Boston.

WOMEN'S NEWS

Metropolitan division: Superior — Alice Brewer White, WTAR Norfolk; Excellent—Amy Jo Glenn, WSLS Roanoke; Meritorious — Polly Daffron, WRNL Richmond; Honorable mention —Lyn Roberts, WWOD Lynchburg, and John Eure, WDBJ Roanoke.

Non-Metropolitan division: Superior —Lynn George, WSVS Crewe; Excellent — Barbara Harding, WMVA Martinsville; Meritorious—Leslie Esgate, WRAD Radford.

FARM NEWS

Metropolitan division: Superior—Tie between Ira Hull, WRNL Richmond, and Glenn Howell, WSLS Roanoke; Meritorious—Jerry Donovan, WCYB Bristol; Honorable mention — Bill Howard, WBTM Danville.

Non-Metropolitan: Superior—L. E. Pettyjohn, WLPM Suffolk; Excellent—H. V. Eller, WMEV Marion.

LOCAL AND STATE NEWS

Metropolitan division: Superior—Tie between John Eure, WDBJ Roanoke, and Michael Blancard, WCYB Bristol; Meritorious—Howard Hamrick, WRNL Richmond; Honorable mention—WTAR Norfolk, combination work of Gilbert McLeod, John Patterson and Clayton Edwards.

Non-Metropolitan division: Superior —Pres Young, WHLF South Boston; Excellent—Maynard Dillaber, WMVA Martinsville; Meritorious—George Phillips, WSVS Crewe; Honorable mention —Bob Bradford, WREL Lexington.

A cup, for the best protection of the AP on news by a radio member, went to Wally Douglas of WNVA Norton, with honorable mentions for the staffs of WRNL Richmond, and WLPM Suffolk. This cup, donated by Junius P. Fishburn, owner of WDBJ Roanoke, and publisher of the *Roanoke Times & World-News*, goes annually to a winner determined by a vote of staff men in the Richmond AP bureau.

Dr. Freeman, and Messrs. Robinson, Hamrick, Simpson, Zimmerman, Eure, Howell and Pettyjohn won top awards in both the 1951 and 1952 contests.

Mr. Ken Titus
Advertising Manager
Tidy House Products
Shenandoah, Iowa

Dear Ken:

This hyar Edith Hansen gal which is talkin' about Tidy House products to th' wimmen of West Virginny iz really a fine one to hev on WCHS. My Mrs. sez Miss Hansen knoz what she iz talkin' about when she tells her listeners to use Shina Dish, Perfex Super Cleaner, Dexol Bleach and Glost-Tex Starch. Edith Hansen's mornin' show on WCHS with 5,000 on 580 shore iz in good company with Arthur Godfrey, Dr. George Crane and th' Clock-watcher. Th' boss here sez that more people in the state listen to WCHS than to any other stashun.

Yrs,
Algy

WCHS

ROBERTSON NAMED

To Be KTHS Manager

B. G. ROBERTSON, assistant manager, KWKH Shreveport, La., will become manager of KTHS when that station, now at Hot Springs, Ark., is moved to Little Rock, Ark., it was announced last week.

Mr. Robertson

KTHS has been granted a permit for 50 kw by FCC and is now in the process of being moved to Little Rock. Station will retain its present frequency, 1090 kc. Announcement of Mr. Robertson's promotion was made to coincide with his 20th anniversary of service with *The Shreveport Times'* radio interests.

GEORGE BLUMENSTOCK

WSKB Founder Dies April 14

GEORGE BLUMENSTOCK, 75, who founded WSKB McComb, Miss. (now in bankruptcy), died unexpectedly April 14 following a heart attack at his home in Summit, Miss. Mr. Blumenstock founded WSKB in 1939 and was part-owner and station director for more than 12 years. The station went into bankruptcy several months ago [B•T, Oct. 15, 1951].

Survivors include his wife, Mrs. Julia Davieson Blumenstock; three sons, Gene, David and George Jr., and two daughters, Mrs. Dorothy B. Jones and Mrs. Isabel B. Sampson.

Slayer Hangs Self

A FORMER Texas deputy sheriff convicted of killing KBKI Alice, Tex., crusading radio newsman W. H. (Bill) Mason, 51, in 1949 [B•T, Aug. 1, 1949] hanged himself in his cell at Texas State Penitentiary on April 15. Sam Smithwick, 63, was sentenced to life imprisonment on Dec. 12, 1950, for the July 29, 1949, slaying after Mr. Mason accused him over KBKI of owning a house of prostitution.

Duane H. Gaither

DUANE HOLLAND GAITHER, 45, who retired six years ago as program director for KOIL Omaha because of illness, died April 12 in the VA hospital at Wilmington, Del. A Navy veteran, he lived in Philadelphia. Survivors are a daughter, his mother, four sisters and three brothers.

WEVD 117-119 West 46th St., New York 19

1910 J. Allen Brown 1952

J. ALLEN BROWN, 42, vice president and general manager of WLOF Orlando, Fla., was fatally injured April 19 while motoring from Alabama to Orlando.

Mr. Brown

The injury was suffered at Sylvester, Ga., in a collision with a truck. Mr. Brown was taken to a hospital in Albany, Ga., then transferred to Atlanta for surgery. He died of head injuries.

Mr. Brown had been in advertising and broadcasting a quarter-century and was widely known in the industry. A native of Birmingham, he had entered radio and advertising in that city. At 19, he was manager of an A&P supermarket and was known as the youngest man in the country to hold such a post. Later he became a department head at Sears, Roebuck & Co. stores.

Though he had broadcast in 1929, his first fulltime radio job was at WJBY Gadsden, Ala., where he was producer and announcer. From Gadsden he went to WAPI Birmingham. After managing KNOX Sweetwater, Tex., he became sales manager of WHMA Anniston, Ala., when that outlet took the air in 1938. He opened another new station in 1942, WHIT New Bern, N. C.

Later in 1942, Mr. Brown became general manager and sales manager of WFOY St. Augustine, Fla. His public relations and community activities attracted attention and he was appointed small market stations director of NAB (now NARTB) in Washington. From NARTB he moved to WPIK Alexandria, Va., and then to the post he held at the time of his death.

He was author of numerous sales and advertising publications. In 1948, he conducted for NAB a nationwide study titled "Radio Advertising for Public and Employe Relations." This study was credited with producing hundreds of new clients for radio in industry, retail and association circles. He lectured on sales and advertising at American U. during his NAB service and conducted summer radio clinics at U. of Denver.

Mr. Brown was a director of the Orlando Rotary Club, member of the Greater Orlando Chamber of Commerce and member of Orlando First Baptist Church.

Surviving are his wife, the former Eloise Sigrest; two children, Nancy, 11, and Randy, 8; a brother, Argyle Brown, of Gadsden, Ala., and his mother, a resident of Anniston, Ala.

RUSSELL CAMPAIGN

Radio-TV Appearances Set

WASHINGTON campaign headquarters of Sen. Richard B. Russell (D-Ga.), candidate for the Democratic Presidential nomination, says the Senator is mapping a number of radio and television appearances during his 10-day swing through Florida.

Dates and appearances scheduled include: WTVJ (TV) Miami news show, 6:45 p.m., April 29; Participation on Junior Chamber of Commerce TV panel show, 7 p.m., May 2; WGBS Miami broadcast on the Alan Courtney show, 11:30 p.m., May 4, and WTVJ panel with Sen. Estes Kefauver (D-Tenn.), also a candidate for the Democratic nomination, 9-10 p.m., May 5. Preferential primary election in Florida is May 6.

'VOTE' DRIVE

Radio-TV To Aid Campaign

ADVERTISING campaign designed to get 63 million Americans to the polls in the 1952 elections will include radio-TV aids, it was indicated when the campaign was introduced in New York Tuesday by The Advertising Council in cooperation with the American Heritage Foundation.

Keyed to both national and local advertising, force of the drive will be exerted through advertisers, agencies, media-owners—including broadcasters—and some 276 cooperating organizations, all of which will be instructed and helped to promote "register and vote" messages.

Radio and television materials will be made available for public service use, including a set of TV films prepared by Five Star Productions. Initial guide books and catalogues of these and other available materials will be issued within the next two weeks, according to Leo Burnett, president of Leo Burnett Co., volunteer agency handling the campaign.

Program will fall into three major phases: First emphasizes when, where and how to register; second educational - informational phase urges people to keep informed and qualify as intelligent voters, and third stresses a get-out-the-vote message.

NAVY SEMINAR

Held on Public Relations

NAVY'S sixth volunteer public relations seminar was held by its Office of Information April 13-26 in the Pensacola-Key West, Fla., areas, with about 60 public relations officers attending, all holding posts in civilian media.

Navy Secretary Dan A. Kimball addressed the group. William F. Fitzgerald, account executive with Robert J. Enders Adv., Washington, who is a Marine reserve first lieutenant, was among those present.

KFJZ AWARDS

Grants Six Scholarships

SCHOLARSHIPS of $150 each have been awarded to six high school seniors by KFJZ Fort Worth, which for five years already has made annual awards to Texas Christian U. students in the speech-drama-radio department at Fort Worth.

The scholarships are awarded to attract promising students into the radio field, according to KFJZ President Gene L. Cagle and Dr. E. L. Pross, department chairman. Winners are Drucilla Jane Greenhaw, Jackie McClellar, Nancy Utley, John Parsley and John Robert Simer, all of Fort Worth, and Randall Dee White, Alpine, Tex. Judges were Bobbye Russell, station manager of TCUs KTCU; Hal Thompson, KFJZ program director, and Dick Osborne, TCU graduate student and assistant program director of KXOL Fort Worth.

GE Tube Warehouse

GENERAL ELECTRIC Tube Dept. has announced plans for operation in Chicago of what is expected to be the largest electronic tube warehouse ever built. Now under construction, the new $875,000 building will serve as sales headquarters, warehouse center and commercial service headquarters for the G-E Tube Dept. central regional operations.

There's no escaping the fact...

KWK is the radio buy in St. Louis!

It's heads up for KWK, the station that serves the St. Louis Market at the LOW, low cost per 1000 radio homes delivered.

Unearth the facts! Your Katz man has the figures—based on Pulse reports!

April 18 Decisions . . .

THE COMMISSION EN BANC

Denied Petition

WALT Tampa, Fla.—By order denied petition requesting reconsideration and grant without hearing of application for CP to change frequency from 1110 kc to 920 kc, increase hours from D to unl., increase D power from 1 kw to 5 kw, with 1 kw-N, change trans. and install DA-DN (Comr. Hyde dissented). Further ordered issues regarding applicant's qualifications and proposed program service, included in order of Feb. 1, 1950, in this proceeding, be deleted on Commission's own motion.

Set for Hearing

McLennan Bcstg. Co., Waco, Tex.—Designated for hearing application for new AM station on 920 kc with 500 w-D, DA. Made KRRV Sherman, Tex., KTLW Texas City and KCLW Hamilton, Tex., parties to proceeding.

The Israel Putnam Bcstg. Co., Putnam, Conn.—Designated for hearing application for new AM station on 1340 kc, 250 w unl.; made WNBH New Bedford, Mass., party to proceeding.

Sussex County Bcstrs., Newton, N. J.—Designated for hearing application for new AM station on 1230 kc with 100 w unl.; made WCDL Carbondale, Pa., and WFAS White Plains, N. Y., parties to proceeding.

Knoxville Ra-Tel Inc., Knoxville, Tenn., and Dick Bcstg. Co., Knoxville, Tenn. — Designated for consolidated hearing application of Knoxville Ra-Tel Inc. and that of Dick Bcstg. Co., both for new AM stations on 860 kc, 1 kw D.

Denied Application

KMLW Marlin, Tex.—Denied application for extension of completion date under CP which authorized new AM station on 1010 kc 250 w D. If request for hearing is filed within 20 days, denial will be set aside and application designated for hearing, otherwise it will be presumed that applicant does not desire to prosecute application and permit will be cancelled.

Authority Extended

Church of Universal Triumph, The Dominion of God Inc., Detroit, Mich.—Granted extension of authority to transmit programs by wire from its church in Detroit to CKLW Windsor, Ontario, Canada.

WJZ-TV New York, WPIX New York and WBNX New York—By memorandum opinion and order, and on explanation of WJZ-TV that it has terminated broadcasts of horse racing information, removed WJZ-TV application for license from consolidated hearing and granted same.

(Continued from page 16)

media buying in advertising agencies. In one instance, he developed advertising techniques which altered buying practices of an entire industry—the hair attachment business. Previously a mail order industry, Mr. Evans used black and white and radio. He increased one company's advertising budget "100 times over," and that of the entire industry from about $10,000 to $400,000 yearly in only 18 months.

As partner in Evans & Durham Agency, New York, he conducted media studies for such clients as Schenley Distillers, Alexander Smith Carpets, Ex-lax and Vaseline. He believes the selection of Negro media and its personnel is done haphazardly with unorganized and incomplete methods in most instances.

The basis for Negro media selection, he believes, is usually the recommendation of a maid in the home of the company president. "The man in the agency who has walked through Harlem twice becomes the Negro expert," he charges.

The agency, rather than the client, is reluctant to raise the level of Negro advertising, Mr. Evans claims, and many campaigns in Negro media are compromise campaigns bought at the insistence of the client. The Negro, he says, buys brand names and is not a price-bargainer. He gets psychological satisfaction out of having the best because of his status as a member of a minority group.

These concepts are used by Mr. Evans in his general account duties at the Meyerhoff Agency, where he has worked since 1949. His accounts, most of which use radio, include Supreme Liberty Life Insurance Co., Universal Life Insurance Co., Jackson Mutual Life Insurance Co., Service Federal Savings and Loan bank, Metropolitan Mutual Assurance Co., Dearborn Supply Co., M & W Manufacturing Co. He also counsels Illinois Meat Co., Jim Beam Distillers and Kyron Foundation.

Thirty-seven years old, Mr. Evans was born in Louisville but has lived most of his life in Chicago. His wife is the former Maudelle Bousfield. They have two children, Leonard Jr., 6, and Midian, 3½.

DECISION

Emporia, Va.—Stone Bcstg. Co. FCC granted 1400 kc, 250 w fulltime. Condition. Granted April 23.

DECISION AND ORDER

Fostoria, Ohio—Seneca Radio Corp. FCC granted petition of Seneca for severance of its application from the application of Ionia Bcstg Co., Iona, Mich., and granted Seneca 1430 kc, 1 kw fulltime, DA-2. Conditions. Estimated construction cost $44,903, first year operating cost (with existing FM station) $38,000, revenue (from AM-FM operations) $58,000. Grantee is licensee of WFOB Fostoria. Granted April 23.

New Applications . . .

AM APPLICATIONS

High Point, N. C.—North State Bcstg. Co., 1590 kc, 1 kw day. Estimated construction cost $18,100, first year operating cost $30,000, revenue $36,000. Principal is R. Glenn Hendrix & Sons Inc. (75%), representatives for Lincoln Industries, Burton Upholstering Co., Bur-Mon Upholstery Co., and others. Filed April 22.

Sedalia, Mo.—Carl Wesley Yates Jr. and Christine Yates, d/b as Yates Bcstg. Co., 1050 kc, 1 kw day. Estimated construction cost $22,542.57, first year operating cost $32,000, revenue $45,000. Son and mother are applicants for station: Mr. Yates was announcer and student engineer for KMMO Marshall, Mo., and Mrs. Yates is owner of gift store and confectionery. Filed April 22.

Greenville, N. C.—Interstate Bcstg. Co., 1290 kc, 1 kw day. Estimated construction cost $12,750, first year operating cost $24,000, revenue $36,000. Equal partners are John C. Greene Jr., commercial manager of WRHI Rock Hills, S. C., and S. Vasco Yonce, automobile dealer. Filed April 23.

Greensboro, N. C.—Interstate Bcstg. Co., 920 kc, 1 kw day. Estimated construction cost $12,750, first year operating cost $24,000, revenue $36,000. Equal partners are John C. Greene Jr., commercial manager of WRHI Rock Hills, S. C., and S. Vasco Yonce, automobile dealer. Filed April 23.

TRANSFER REQUESTS

WDOS Oneonta, New York—Assignment of license from Oneonta Star Inc. to Ottaway Stations Inc. for amount equal to depreciated value of assets less liabilities (about $43,824.33). Principals in Ottaway Stations Inc. are president James H. Ottaway (40%) and Treasurer-Secretary Ruth B. Ottaway (30%), who are controlling officers, directors and stockholders of Empire Newspapers Inc., licensee of WENE Endicott, N. Y., and WVPO Stroudsburg, Pa. Filed April 7.

WENE Endicott, N. Y.—Assignment of license from Empire Newspapers Inc. to Ottaway Stations Inc. for amount equal to depreciated value of assets less liabilities (about $103,884.55). Principals in Ottaway Stations Inc. are President James H. Ottaway (40%) and Treasurer-Secretary Ruth B. Ottaway (30%), who are controlling officers, directors and stockholders of Empire Newspapers Inc., licensee of WVPO Stroudsburg, Pa. Filed April 8.

WRGA Rome, Ga.—Transfer of control from Mrs. Annie C. Quarles, administratrix of estate of John W. Quarles, deceased, to Charles Smithgall through transfer of 74% of stock for $40,000. Mr. Smithgall is owner of WGGA Gainesville, Ga., and president, treasurer and 28% owner of *The Daily Times*, Gainesville, Ga. Filed April 8.

KOBK Owatonna, Minn.—Transfer of control from William F. Johns Jr. to Myles H. Johns for $6,880.50. Myles H. Johns is president and 58% owner of Broadcasting Service Inc., St. Paul, Minn. Filed April 8.

WDBL Springfield, Tenn.—Transfer of control from Springfield Bcstg. Co. Inc. to Springfield Bcstg. Co., a partnership, with each partner to hold same percentage of interest as he now holds in percentage of stock (each hold ½). Change from corporation to partnership; no monetary consideration. No actual change of ownership or control. Filed April 8.

WPLH-AM-FM Huntington, W. Va.—Transfer of control from W. J. Newton to partners E. A. Marshall, J. N. Huddleston, Paul B. Bailey, Flem J. Evans and Edwin G. Polan through sale of stock and indebtedness for $40,000. Mr. Evans was president and general manager WPLM until last month; he is now general manager only of corporation. Other principals are West Virginia business and professional men. Filed April 19.

KPFM (FM) Portland, Ore.—Involuntary assignment of license from Robert T. Zabelle, deceased, limited partner with 25% interest, to Dolores E. Zabelle, executrix of estate of Mr. Zabelle. Other three partners retain their holding. No monetary consideration. Filed April 21.

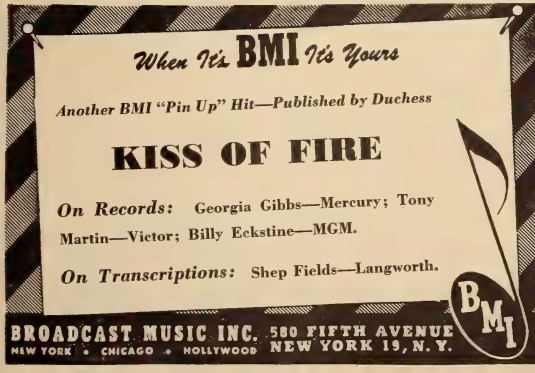
KTLN Denver, Col.—Assignment of license from Leonard Coe to Radio Station KTLN Inc., in which Mr. Coe will own 100% of the stock. No actual change of ownership or control. Filed April 23.

Telestatus

(Continued from page 68)

in the other issue, it was reported. Observation of advertisements showed the same comparative equality, except that retail advertising was noticed almost 10% more often among women whose homes included television sets.

Time spent was averaged for all advertisements studied, with the figure indicating not only those who saw the page, noticed the advertisement and identified the product, but also "read most" of that ad. Among women, readership of national advertisements was slightly higher in TV homes for three of the issues studied, slightly lower in the remaining one. Among men, the comparison was 2% higher in TV homes. For retail advertisements the "read most" figure was almost 10% higher for women with TV, but for men, about ½% lower.



The report was made after analysis of 1,208 interviews conducted as part of the last four readership studies regularly made on behalf of the *Hartford Times* and the *Providence Bulletin*. Tests were made of heavy Thursday issues, the largest daily editions of the week, and were conducted during February when TV programs are stabilized and there is no holiday stimulus for shopping.

* * *

WICU (TV) to Telecast From Erie Classrooms

WICU (TV) Erie today (Monday) is to begin a series of telecasts showing classroom activities in Erie public schools. The series, entitled *Erie Schools at Work*, will present 30-minute telecasts thrice weekly through June 6.

The announcement of the series was made by Herbert Stewart, station general manager, who explained that the programs were being presented as a public service.

ALERT TEST

1,200 AM Stations Practice Conelrad

ABOUT 1,200 AM stations subscribing to the Conelrad alert plan were scheduled to participate this past weekend in nationwide simulated air attack exercises involving emergency control of radio broadcasts.

The special test early Saturday morning, conducted jointly by the FCC and the U. S. Air Force, was called to give broadcasters an opportunity to check their emergency equipment and Air Force pilots "experience in navigating without the aid of the radio compass," it was announced.

The exercise was scheduled for the period 1:30-5 a.m. April 26, with stations operating as they would during an actual enemy attack—airing emergency civil defense instructions. It was designed to test the system devised by the FCC and three air defense forces of the Continental Air Defense Command.

Participating stations in Saturday's exercise were not previously identified, but the broadcasts were planned over two prescribed frequencies—640 kc, a clear channel, and 1240 kc, a Class IV local frequency. Stations which operate 24 hours a day were not affected.

Early morning listeners were unaware of the exercise unless they tuned to those channels and caught, before and after each test, every half hour, the announcement of the FCC-USAF project. They would have heard the entire broadcast with the belief that it were emanating from the same station throughout that period.

The plan called for each group of stations within a metropolitan area —those each on 640 kc and 1240 kc—to carry a common program originated from a single control point in each city. The broadcasts were to be alternated without interruption at certain intervals, with only one station on the air at any one time. Another requirement was reduced power.

In the smaller cities with only one or two outlets, each station was to generally transmit its own program over one of the two common frequencies, with a silent period between each transmission.

Political Libel

(Continued from page 25)

penses arising from record-keeping, administrative costs and extra precautions due to libel risks. Only a fortnight ago, Rep. Mike Mansfield (D-Mont.) warned that he was considering introduction of legislation to prohibit what he called "double charging" by stations for political time.

Sen. Gillette indicated that he was inclined to go along with the Horan bill and hinted the subcommittee might recommend its passage.

Col. Roberts said it was an "unfair burden on the broadcaster" to force him to make a private decision (on parties, candidates, their remarks, etc.) which rightfully should be made by the public.

The DuMont representative said his network would not permit the Communist party, though a legal political party, to buy time on its facility. Mr. Fellows questioned this, noting that the calculated risk would be in possible wilful violation of the law. Col. Roberts said DuMont was ready to accept that risk. Both men agreed, however, that the broadcaster ought not be required to assume the burden.

Col. Roberts said that a vicious attack can be made against a candidate without being libelous. Sen. Hennings discussed generously what is "fair comment" and what is "libel or slander."

Cardinal principle of radio-TV station operation on political broadcasting today is "fairness," Mr. Fellows emphasized.

The subcommittee is concurrently drafting language for a bill on the election laws, BROADCASTING • TELECASTING was told by the subcommittee counsel, John Moore.

However, nothing specific on the governing of the broadcast industry is expected to be included in the bill. And while the subcommittee is concerned with libel and liability, it probably will not include the subject in its legislation.

'MOON-DOG HOUSE'

WJW's Freed Packs 'em In

OVERWHELMING response to a disc jockey's two-week promotion over WJW Cleveland of a coronation ball for fans of his 11:15 p.m. to 1 a.m. *Moon-Dog House* brought a crowd of 25,000 to the ball and 70 extra firemen and policemen to handle the throng, station notes.

The huge group in Cleveland was reason enough for WJW to add an additional segment from 5-6 p.m. to the *Moon-Dog House* show and marked a fitting climax to the efforts of Alan Freed, the show's star since it started six months ago.

The late night show started with the title, *The Freeditorium*, and changed its name to *Moon-Dog House* when a record shop bought part of the show across the board. Fan clubs and mail followed and advance balls were held a few weeks ago in Akron and Canton, with 4,000 attending each event.

Mr. Freed's two weeks of promoting the Cleveland "Moon-Dog House Ball" was done on his own program and not a word of promotion was used through other media. Although advance ticket sales reached 6,000 and the crowd began to gather almost an hour before the ball, not even Mr. Freed was prepared for the crowd of 25,000 at the Cleveland dance.

Needless to say, the two original *Moon-Dog House* sponsors are continuing the Monday through Saturday broadcasts.

WMAQ LOCAL BUSINESS

Volume Up, Kopf Reports

MORE than $150,000 in local radio business has been billed by WMAQ (NBC) Chicago in the past few weeks, Harry C. Kopf, vice president and general manager, said last week. He issued details from the sales report of Rudi Neubauer, WMAQ sales manager, showing sale of more than 1,500 one-minute spots and participations, as well as 80 minutes of programming weekly which was bought by the Chrysler Dealers of Cook County through Olian Adv., Chicago.

Largest spot order, for 25 one-minute announcements weekly for 52 weeks, came from Dormin Inc., through Dowd, Redfield and Johnstone.

ILL. U. CLINIC

Set for May 1-2

RADIO NEWS CLINIC, sponsored by the U. of Illinois, will be held at the university's Robert Allerton Park near Monticello May 1-2.

Program participants include Jack Shelley, WHO Des Moines; Fred Hinshaw, WLBC Muncie, Ind.; William Ray, WMAQ Chicago; Glenn L. Farrington, WTAX Springfield; Glen Broughman, WQUA Moline; Laverne Waltman, WLPO La Salle; Robert Eickmeyer, WTAD Quincy; Bert DeBarr, WVLN Olney, Quincy Howe, WILL Urbana; Brooks Watson, WMBD Peoria, and Wick Evans, WDZ Decatur. Illinois Broadcasters Assn. is to be represented by Ray Livesay, WLBH Mattoon, past president of IBA.

PRESS STRIKE

Sees Tacoma Radio Boom

PRESSMEN'S strike which stopped publication April 12 of the *Tacoma News Tribune*, the city's only daily, has expanded news and feature coverage on Tacoma's radio stations and made business "awfully good," according to station executives.

A week after the strike hit Tacoma's afternoon and Sunday publication, all local stations reported success in (1) meeting the community's need for news, and (2) serving advertising requirements of local business.

To its normal 12 daily newscasts, KMO Tacoma swiftly added special commentary programs, two extra news shows Saturday and Sunday, and an extra sportcast daily, Jerry Geehan, general manager, reported. Notices of club meetings, Philharmonic concerts and other public events, and a quarter-hour of funeral and obituary notices, were being aired as a public service.

Mr. Geehan said advertisers who heretofore have used radio consistently found business up to standard, although department stores and others who threw in a quick spot schedule to substitute for their normal newspaper ads were not having equal success.

KTNT (FM), the transit-radio station owned by the *News Tribune*, took over the AP bureau for Pierce County (Tacoma) and added two persons to its news staff.

Burke Ormsby, KTNT director of news and special events, reported the station also launched a Sunday program with eight actors dramatizing the weekly comics. Over-all spot business at KTNT doubled after the strike began, he said.

KTAC (formerly KTBI) Tacoma, which began a concentrated news coverage when it went fulltime February 11, augmented its news schedule tremendously, according to H. J. Quilliam, president. Business at the station boomed after the strike began, he said.

WTMJ ANNIVERSARY

Observance Begins May 1

SPECIAL programs over WTMJ-AM-TV Milwaukee will mark the 30th anniversary of *Milwaukee Journal* radio service to the community May 1.

Festivities will begin an anniversary observance period which will be climaxed in August by a week-long celebration of the 10th anniversary of Milwaukee's Radio City. This summer also will mark the 25th anniversary of WTMJ's affiliation with NBC.

Spot Radio

(Continued from page 23)

and more attention to maintaining a satisfactory margin between revenues and expenses in the coming months, according to Irwin Maier, board chairman of the advertising bureau. He reported Wednesday that national advertisers set a new record in newspaper-space purchases last year, spending a total of $513 million, a figure almost double the comparable newspaper revenue in 1946.

Some $2,226 million is estimated as the newspaper take from advertisers this year, he said, to lead the next largest medium, direct mail, by a two-to-one margin. Radio's income from the total advertising bill will be about $690 million and television's, $484 million, he added.

Newspapers, however, still "simply cannot stand any real decline in revenue," he noted.

Agendas for closed sessions Tuesday, first day of the convention, indicated possible discussion for a wide range of radio-TV topics, from newspaper monitorship of competing radio newscasts to promotion of newspaper-owned radio stations.

Representatives of papers with less than 10,000 circulation, meeting separately, did not raise any radio-founded subjects, it was reported, while those from papers with 10,000-50,000 circulation asked only one question: "How many papers in cities under 50,000 population have applied for or definitely intend to apply for a TV station?" Five of the 200 papers represented answered affirmatively.

Delegates at the advertising session Wednesday also heard how to sell national retail advertising from William A. Greene, Bureau of Advertising assistant director, and bureau staff members who reported on local saturation campaigns conducted in newspapers for Bab-O, Colgate and Personna blades, corporations which turned AM and TV advertising budgets over to newspapers as a result.

A sales presentation, prepared for Motorola, was outlined to show the thesis that advertising limited to 63 TV markets had reached only 58.1% of the consumers, so that, it was argued, only $30,000 of every $100,000 spent for advertising was reaching effective coverage.

Another corporation, Tidewater Oil, was reported as turning from radio to newspaper advertising on grounds that its greatest sales period occurred at the time of lowest radio audience. Another advertiser increasing its newspaper purchases was Campbell Soup Co., identified as increasing expenditures from $220,000 in 1948 to over $1 million in 1951.

Louis N. Brockway, executive vice president of Young & Rubicam, speaking Wednesday as vice chairman of the Advertising Council, said that 579 daily newspapers had joined the two-month old newspaper cooperation plan to donate a one-column, three-inch space—often on the front page—to public service messages twice a month. "It means a circulation of 27 million readers every 15 days . . . and some of the space you cannot buy at any price," he reported.

First-day meetings stressed freedom of the press, with ANPA President Charles F. McCahill setting the pace by urging that Presidential powers of seizure be made plain and explicit by law. His speech was followed by an address from Dr. Alberto Gainza Paz, publisher in exile of Argentina's *La Presna*, who gave similar warnings on press restrictions.

Discussion groups later in the day yielded an unpublicized restriction on newspapers, based on radio reporting: Presence of a radio in a newsroom for the purpose of receiving and reporting police calls is listed as a federal offense.

Slocum Named Secretary

Election of ANPA officers and directors, final business before adjournment Thursday afternoon, resulted in naming of Richard W. Slocum of the *Philadelphia Bulletin* and previously an ANPA director, as secretary. Two newly elected directors were Franklin D. Schurz of the *South Bend* (Ind.) *Tribune* and H. H. Cahill of the *Seattle* (Wash.) *Times*. Re-elected officers were Mr. McCahill, president; George C. Biggers, *Atlanta* (Ga.) *Journal* and *Constitution*, vice president, and W. L. Fanning, *Westchester County Publishers*, White Plains, N. Y., treasurer.

Special meetings for associated newspaper groups were held Monday, the day before the ANPA sessions started, and included a labor conference panel at which Richard P. Doherty, employer-employe relations director of the NARTB and industry member of the Wage Stabilization Board, was a speaker. Other organizations which met during the week included the AP, UP, INS, New York State Publishers Assn., Pennsylvania Newspaper Publishers Assn., Publishers Bureau of New Jersey and the American Assn. of Newspaper Representatives.

ROBERT ATKINSON, owner of Atkinson Co., Los Angeles, radio station representative, adds to duties by representing list of West Coast Radio Sales, that city.

IRON LUNG DJ

Polio Patient Has Show

STEVE SPEARMAN, who is 21 and a patient at Houston's Southwest Respiratory Polio Center, is building a successful career for himself as a disc jockey.

With the aid of John Norman, radio and video program producer, Mr. Spearman tapes the show while in his iron lung. The show is presented at 8 p.m. Saturday over KXYZ Houston and then is shipped to Hot Springs, Ark., for broadcast to Mr. Spearman's hometown listeners.

Mr. Spearman handles most of the program details himself. He answers his own fan mail, selects his own music and each week dictates the shows continuity to Mr. Norman. Most of the writing is in dialogue form, with Mr. Norman helping out as straight man. In this way, the iron lung's mechanical rhythm is effectively camouflaged.

Although often discussing hospital goings-on, Mr. Spearman rarely mentions his illness seriously. Listeners sometimes fail to discover that he is an iron lung patient.

Mr. Norman (standing), head of John Norman Productions, holds mike while Mr. Spearman tapes his show.

Flood Funds

(Continued from page 27)

Eularick and Lyle Bremser of KFAB Omaha, News Director Austin Schneider of KCSJ Sioux City, Iowa, Robert O'Brien of KFWI Council Bluffs, Iowa, and Julian Hoshal of KSTP St. Paul. Doing the job for WPTR were News Editor Will Roger Stevens, announcer Bob Austin and engineers James Cruise Jr. and Bob Englebrat, according to H. W. Maschmeier, program director.

The 5 kw installation of KTRI Sioux City, Iowa, was inundated by the flood and Station Manager E. H. Huber flashed a distress call to Collins Radio Co., Grand Rapids, for a 250w transmitter, which in 15 hours was trucked 300 miles, installed and was carrying the program from the station's downtown studio. Chuck Lowder, Collins field service engineer, and KTRI Chief Engineer Willard Easterly worked all night April 14 restoring the station to the air. James Knights Co., Sandwich, Ill., ground crystals and shipped them by air for the new transmitter.

WKTY LaCrosse, Wis., met the occasion with a performance that drew this comment from one disaster official: "As outstanding useful services to disaster workers as I have ever seen." News coverage included an area-wide air trip by newsman Charlie Kearns, who used a self-powered tape recorder to document his survey for listeners. By receiving walkie-talkie relays from Coast Guard Auxiliary patrolmen, and transmitting coded messages to Coast Guard boats, the station was instrumental in halting racing motor boat drivers, who threatened sand and earthen dikes along low-lying city areas with large waves.

'Ohio Story' Change

TRANSCRIBED dramatic program, *The Ohio Story*, shifts from WTAM to WGAR Cleveland effective June 2 and plans are underway to expand the series to perhaps 15 other Ohio stations, WGAR reported last week. Starring Nelson Olmstead, the series has been sponsored for five years on WTAM by Ohio Bell Telephone Co. and has won newspaper poll awards as outstanding Cleveland dramatic program. Agency is McCann-Erickson.

WDGY MINNEAPOLIS SALE TO HAGMAN GROUP APPROVED

APPROVAL of sale of 50 kw WDGY Minneapolis-St. Paul for $425,000 from Stuart Investment Co. to group of Twin Cities businessmen headed by Clarence T. (Swanee) Hagman [B•T, March 24, Feb. 11] was given by FCC Friday. Authorization was made contingent on Mr. Hagman divesting himself of all interest in WLOL Minneapolis, amounting to about 1% of outstanding stock. Mr. Hagman until February was general manager of WLOL.

Associated equally with Mr. Hagman in ownership of 30-year-old WDGY (on 1130 kc with 25 kw nighttime power) are H. J. Lang, electronic welding company owner and San Diego (Calif.) auto supply businessman; George E. Lau, operator of coffee shop chain; Clarence W. Levy, furniture retailer. WDGY lost $90,000 in 1951, transfer application revealed.

Stuart Investment Co. continues to own KFOR Lincoln and KOIL Omaha.

ASCAP POSTPONES ELECTION OF OFFICERS

ELECTION of officers of ASCAP for coming year, scheduled for last Thursday's meeting of society's board of directors at their first regular session since their own election, has been postponed for "a couple of weeks," ASCAP spokesman said Friday.

Official explanation for postponement was absence of some board members from meeting, which others felt should be present before undertaking such important task as choosing organization's officers. Unofficial reports are that directors present were unable to agree on successor to Otto A. Harbach, who is said to have refused to serve another term as president on ground that at 78 he is entitled to relinquish burden of official duties.

Meeting also reached no decision regarding reinstitution of post of general manager, which was discontinued following death of John Paine some years ago. Since then, duties have been divided among executives heading legal, foreign, sales and accounting activities.

After months of negotiations, ASCAP has signed contracts with Functional Music of Chicago and Air Music of New York, "beep" services supplying background music to stores, factories, restaurants, etc., Jules M. Collins, sales manager of ASCAP, announced Friday. Contracts provide for retroactive payment for use of ASCAP-licensed music by these companies, Mr. Collins said.

LEE ENTERPRISES INC. SUES

ON behalf of its WOR-AM-TV New York, Thomas S. Lee Enterprises filed suit Friday with county clerk, Superior Court of New York, to collect $8,638.02 allegedly due from Cavanaugh-Shore & Co., New York agency, and Antuner Co., N. Y., for time charges and money allegedly refunded by stations to customers of Antuner. Lee Enterprises also sued Cavanaugh-Shore for $4,105.90, allegedly due for commercial announcements for agency. Defendants could not be reached late Friday for comment.

WBKB-CBS COOPERATION

WBKB (TV) Chicago to make complete facilities available to CBS-TV network for coverage of both political conventions this July, under sponsorship of Westinghouse Electric Corp., CBS-TV announced Friday.

CONSTITUTIONAL TV

TELEVISION thus far is only instrument by which steel companies have been able to compete on equal terms with President Truman, Wage Stabilization Board and CIO, Clarence B. Randall, Inland Steel Co. president, told National Press Club luncheon Friday.

"Perhaps television should be superimposed on the Constitution," he quipped, "but it should be done by Constitutional means." Mr. Randall said he faced "largest audience which any private citizen had ever addressed" in his April 9 reply to President's seizure of steel mills.

SHARP REVENUE RISE SHOWN FOR DuMONT NETWORK

DuMONT TV Network has shown consistent rise in revenue over past 15 months, Chris J. Witting, director and general manager, reported in statement for publication today (Monday). Revenues for 1951 were up 196% over 1950 and in first quarter of 1952 increased another 68% over like period of last year, he said.

During January, February and March of this year, in average week, DuMont placed 712 station quarter-hours of business with its affiliates, against 636 quarter-hours year ago and 230 quarter-hours in 1950, network reported. Meanwhile, average commercial DuMont network has risen to 15.5 stations, with at least five sponsors increasing their networks substantially in recent months and 13 indicating plans for remaining on air all summer.

CLIENT SERVICE BUREAU ORGANIZED BY WLWT

WLWT (TV) Cincinnati announced Friday formation of Client Service Dept. to be headed by Frederic Gregg. Mr. Gregg for past year has been in charge of promotion for Crosley television outlets.

New department will offer complete promotion and merchandising service to TV advertisers. Operating on six-figure budget with full staff of specialists, department will be completely self-contained unit embracing all phases of promotion, merchandising, exploitation and related client and station activity.

TEST DRAMA'S RATING

WOR-TV New York's experimental *Broadway TV Theatre*—same play each night Monday through Friday—attained unduplicated Pulse rating of 32.3 in its opening week, April 14 through 18, when "Trial of Mary Dugan" was presented, WOR-TV spokesmen reported Friday. They said this meant show was seen by 918,000 families (not counting duplications) during that week. President Theodore C. Streibert regarded this rating as "merely a start" and predicted audience for series, sponsored by General Tire & Rubber Co. and R. J. Reynolds Tobacco Co., "will continue to increase, and that the plays will build themselves."

PEOPLE...

DAVID T. HARRIS, salesman at KFBK Sacramento, Calif., advanced by McClatchy Broadcasting Co. to KWG Stockton as manager. He succeeds Howard L. Bailey, now manager of Bee Engraving, Sacramento.

K. BRUCE MITCHELL, director of Western Union international communications since 1947, appointed vice president of same area.

JOHN E. KUCERA, head of time-buying section of Biow Co. Media Dept., named radio-TV chairman of National Assn. for Mental Health.

WADE CHAPMAN and **BERNARD SLAVIN** to Christiansen Adv. Agency, Chicago, as account executives, from BBDO, same city, and Hixon & Jorgensen, Los Angeles.

E. HOY McCONNELL named manager of radio sales for Capehart-Farnsworth Corp., Ft. Wayne, Ind.

NEW NBC SPAC GROUPS TO MEET THIS WEEK

FIRST meeting of NBC's new Stations Planning & Advisory Committee to be held Tuesday and Wednesday in New York, with Harry Bannister officiating for first time since taking over as stations relations vice president.

Committee to convene at 10 a.m. Tuesday with NBC President Joseph H. McConnell and Mr. Bannister giving welcome, followed by morning-long closed session for elections, etc. Combined SPAC will hear summer radio presentation in early afternoon by Jack Herbert, vice president for radio network sales, with separate radio and TV sessions following.

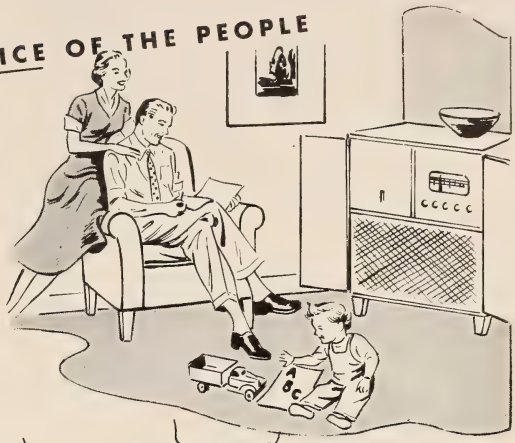
Radio group to hear further talks on their departmental activities by following: Mr. Herbert; Fred Dodge, merchandising director; Hugh M. Beville, director of plans and research; Jake Evans, manager of advertising and promotion; Syd Eiges, vice president for press and exploitation; Charles Barry, vice president for radio network programs; Henry Cassidy, director of radio news and special events, and William McAndrew, director of public affairs.

Television group simultaneously scheduled for departmental talks by Sylvester L. Weaver Jr., vice president in charge of NBC TV network; Joseph V. Heffernan, financial vice president; George Frey, vice president and director of TV network sales; Davidson Taylor, general production executive; Mr. McAndrew; Ed Madden, vice president of TV network operations and sales; Carl Stanton, manager of TV commercial program planning, and Fred Wile, vice president and director of TV network production.

Morning of second day to be spent by combined SPAC in closed session and in afternoon, Radio and TV groups will separate for further conferences with NBC officials.

New SPAC consists of:

RADIO—Richard O. Dunning, KHQ Spokane; Ralph Evans, WHO Des Moines and WOC Davenport; B. T. Whitmire, WFBC Greenville, S. C.; Robert B. Hanna Jr., WGY Schenectady; P. A. Sugg, WKY Oklahoma City; Allen M. Woodall, WDAK Columbus, Ga.; Ed Yocum, KGHL Billings, Mont., and Willard C. Worcester, WIRE Indiapapolis.



TV—Martin Campbell, WFAA-TV Dallas; E. R. Vadeboncoeur, WSYR-TV Syracuse; Stanley Hubbard, KSTP-TV Minneapolis-St. Paul; Lee Wailes, Fort Industry Co.'s WSPD-TV Toledo.

CHASE BUYS CANDY FIRM

CHASE CANDY Co., St. Louis, has purchased Shotwell Mfg. Co., Chicago, which makes Puritan and Hostess marshmallows and candy. Respective agencies are Glee R. Stocker & Assoc., St. Louis, and Reincke, Meyer & Finn, Chicago.

The Newsweekly of Radio and Television

21ST year

WOR-tv channel 9

the station that gave New York an amazing new concept of tv programming, "Broadway TV Theatre," has packaged another unique buy . . .

"TONIGHT'S NEWSREEL"

Every day, all of channel 9's Fox Movietone United Press films are wrapped into one complete newsreel . . . and shown continuously — exactly like a newsreel theatre. An entirely new and up-to-the-minute newsreel every night!

The station whose programming genius gave advertisers UNDUPLICATED AUDIENCE . . . with "Broadway TV Theatre" . . . now gives sponsors complete audience turnover — among the alert, responsive viewers who make up the news audience in America's Number 1 market.

"Tonight's Newsreel" is available now at rates that are astonishingly low.

Results are what we love...
and what WTVR sponsors get

Getting results for sponsors is our business. And our formula for making sponsors happy is simple indeed. We take a big helping of public service, mix it with top network programs, add the program and engineering knowhow we've acquired during our 26 years. Oh, yes, we can't forget the friendly warmth that characterizes WTVR announcers. Sponsors like these ingredients. Have you tasted the result?

Havens & Martin Stations are the *only* complete broadcasting institution in Richmond. Pioneer NBC outlets for Virginia's first market. Represented nationally by John Blair & Company

WHEREVER radio station WFAA is heard, housewives are familiar with a jingle that goes, "Better buy Burleson's honey." You can find Burleson's on grocers' shelves in major markets all over the Southwest. It wasn't that way back in the early 1930's . . .

A WFAA salesman had just finished speaking on the power of radio advertising before the Waxahachie, Texas, Rotary Club. T. W. Burleson walked up and introduced himself, explaining that he operated a small honey packing business. Radio interested him, but when they got around to discussing cost, the old gentleman snorted, "Just for rich folks!" and stalked out the door.

"Young whippersnapper!" he cried . . .

"That $600 will break us!"

Instead, it built a honey of a business for the Burlesons

It was two years later that young Ed Burleson, just out of college, was in Dallas trying to build distribution for his father's growing business. Radio looked like the answer, and Ed signed a $600 contract with WFAA for a year's schedule of announcements. Ed Burleson got a stormy reception when he reached home with the news.

Within six months though, the elder Burleson had reason to change his opinion of radio, and by the end of the second year's contract, sales of Burleson's honey had jumped 400%! From that day to this, radio has had a large share of Burleson advertising – over the station that helped make it a honey of a business – WFAA.

WFAA-820 is a honey of a station, too. Ask the Petry man about it today!

CLOSED CIRCUIT

WATCH for developments on new RCA multiple-purpose TV method (probably to be designated as Telespot) until now highly classified. Dr. Charles B. Jolliffe, RCA vice president and technical director, demonstrated system to FCC, civil defense and military representatives in Washington Friday. Method entails principle of Ultrafax high-speed transmission.

ACTION OF Senate Rules in reporting so-called Gathings resolution authorizing House Interstate and Foreign Commerce Committee to investigate blood and thunder programming in TV, stems from mounting opposition to that type of programming and to commercials—mainly beer. Committee expected to counsel with NARTB TV Board of Review on enforcement and presumably will give it strong backing in effort to bring moderations and restraint into programming because of effect on juvenile audiences. Chairman of committee likely to be Rep. Lindley Beckworth (D-Tex.).

TAILORED price regulations for radio-TV industry will be out in next fortnight. OPS staff is poring over final draft now, which is understood to provide ceilings at retail-wholesale level. Regulation based on manufacturers' price survey recently completed by agency, and will cover receivers, phonographs, other radio-TV appliances.

UNITED Paramount Theatres' pitch at government agencies for closed circuit theatre telecasts didn't stop at Justice and State Dept. discussions (see story page 31). It's authoritatively learned that UPT executive also solicited Defense Dept. for recommendation as to feasibility of medium. Defense reportedly rejected bid on grounds it would place itself on record as supporting one medium to exclusion of others.

WATCH Sen. Hubert Humphrey (D-Minn.) for possible fireworks on "political" institutional advertising by large corporations. Senator is studying answer from Internal Revenue Bureau on his query as to what administrative action it could take, and whether legislative authority is needed to take action, against firms which deduct expenditures for this type of advertising on their income tax.

SOME Congressional quarters tried to pull quickie on military personnel procurement authorities by agreeing to thaw funds freeze for recruiting if Defense Dept. would consent to deduction from fiscal '53 moneys. But Air Force-Army officials wouldn't nibble. Question still hangs in the air. (Story page 34.)

REQUEST to include entire state of West Virginia in TV Zone I, instead of splitting state between Zones I and II, will be filed this week with FCC by WHIS Bluefield, W. Va. Petition will point to unfair discrimination between cities in West Virginia under present plan, which provides 170-mile co-channel minimum separation in Zone I and 190-mile separation in Zone II.

CURIOUS phase of TV life under NARTB

(Continued on page 6)

RADIO-TELEVISION BARRED, PRESS TO COVER HEARING

BAN against radio and television coverage of preliminary hearings in damage suit filed by Sen. Joseph R. McCarthy (R-Wis.) against Sen. William Benton (D-Conn.) was imposed Friday by Sen. Benton's counsel. Suit asks $2 million damages from Sen. Benton.

Explanation given for action was that Theodore Kiendl, attorney handling case for Sen. Benton, had sponsored New York State law banning microphones and cameras from many types of judical and public proceedings. He was represented as feeling it would be inconsistent on his part to allow proposed pickup of hearing, scheduled to start this morning (Monday). Mr. Kiendl is member of firm of Davis, Pope, Wardwell & Kiendl, New York.

Both Sen. Benton and Sen. McCarthy had said they had no objection to cameras and microphones at hearing. Press will be admitted to proceeding.

RATES DOWN 27% IN TEN YEARS—GRABHORN

"RADIO RATES, in relation to circulation, have decreased themselves—and not because of advertiser pressure—by some 27% over the last 10 years," Murray Grabhorn of Edward Petry & Co., station representation firm, declared in speech prepared for delivery yesterday (Sunday) at meeting of Kansas Broadcasters Assn. in Wichita. He called on radio to "hold the line" on rates.

His statement was part of answer to one made at recent AAAA's convention by Melvin Brorby, of Needham, Louis & Brorby, that trends within various media, comparing 1951 with 1952, showed that cost-per-thousand for magazines had risen 7%, for outdoor advertising 5%, for network radio time 16%, for spot radio time 22% [B•T, April 7].

Mr. Grabhorn said he "respectfully" took issue with Mr. Brorby's analysis regarding radio: "I want to compare his analysis, based on 32 random stations, with a matched sample more than three times as big—97 stations, to be exact," Mr. Grabhorn said. He explained latter study, made by statistical tabulating co. for NARTSR, showed "average Class A one-hour rate had increased 12.8% from July 1941 to July 1951. In dollars and cents, the average went from $145 to $163."

But, he noted, radio circulation gained 54% in same period, and if rates had gone up at same place they'd average $223 per Class A hour instead of $163.

HORMEL PLANS TV

GEORGE A. HORMEL & Co., Austin, Minn., will put its network radio show, the Hormel *All Girl Review*, on television next fall, spotting a series of half-hour films in various markets. Kling Studios, Chicago, will handle the photography, expected to start late this month with a series of 13 shows featuring 60 of the girl musicians and vocalists. Arrangements were completed last week by Jay C. Hormel, board chairman, who will supervise production, and Fred Niles, Kling vice president in charge of TV and motion pictures. Agency is BBDO, Minneapolis.

BUSINESS BRIEFLY

SOFT DRINK SHOW ● New Grape Corp., Atlanta, buying once-a-week half hour transcribed Ziv package show in 47 radio markets for 26 weeks. Agency, Liller Neal & Battle, Atlanta.

SPOTS FOR SHOES ● Thom McAn Shoes, through Neff-Rogow, N. Y., planning May 16 to 29th radio spot campaign using 6:30-8a.m. and evening periods to appeal to male audience.

10-WEEK CAMPAIGN ● Junket Brand Foods, Little Falls, N. Y., planning 10-week spot campaign using mostly participation shows in top radio markets, starting May 26. Agency, McCann-Erickson, N. Y.

DAIRY RESUMES ● Foremost Dairies, which cancelled its national radio campaign short while ago is resuming on all its stations with two-week schedule starting Thursday for its tangerine juice. Schedule may be extended is successful. Agency, Fletcher D. Richards, N. Y.

TEST FOR MEXSANA ● Mexsana Skin Cream, N. Y., buying five-market test campaign

(Continued on page 98)

RADIO STILL BEST CBS PROCLAIMS IN ADS

"AFTER Four Years of TV, What's Happening to Radio?" was answered in full-page CBS Radio ads in *The New York Times* and *Herald Tribune* Friday: With CBS Radio's fall schedule "already 80% as far along as last year's schedule was on Sept. 1," network said "radio is building early momentum for one of the biggest seasons in its history."

Noting that public continues to buy half million AM sets monthly, advertisements reported that half of radio listening is outside of living rooms, with result that "in total listening, people spend more time with radio than with any other medium."

"In terms of advertising," full-page spread continues, "a mass advertiser may choose to spend a dollar for 944 radio listeners . . . or 365 television viewers . . . or 334 magazine readers . . . or 240 newspaper readers.

"In terms of advertising frequency, he may choose to reach a given number of prospects once in newspapers . . . or 1.3 times in magazines . . . or 1.5 times in television . . . or 3.9 in radio—at no difference in cost."

Advertisement, which broke Thursday in *Wall Street Journal* and is scheduled later this month for *Newsweek*, *Business Week*, and four trade publications, appeared in New York just as CBS-TV clinic was being held (see story, page 66).

HANNA HEADS DISC GROUP

MICHAEL R. HANNA, WHCU Ithaca, N. Y., member of NARTB board, named chairman of new NARTB Transcription Rules Committee. Group was authorized by board at February meeting to look into possibility of revising FCC rules covering announcement of transcribed programs. Chairman Hanna will name other members of committee, with first meeting scheduled in near future.

CAN TWO AM'S GET ONE TV STATION?

CAN two AM stations in same city get together, apply for and be granted TV station without running afoul of FCC's duopoly regulations? Question was put squarely up to the Commission Friday when KFBI Wichita repeated same questions posed early in March by Senator Edwin C. Johnson (D-Col.) in letter to FCC Chairman Paul A. Walker [B•T, April 21]. At that time, Chairman Walker replied by saying that question had not been taken up by the Commission. [See Editorial, page 52 which closed earlier].

Essence of problem is this: Commission rule prohibits ownership or control of two AM stations in same community. Some AM broadcasters are considering joining to set up new corporation to apply for TV in order to obviate contested hearings for channels, also to make it easier financially. Some FCC staff officials have questioned whether ownership of TV station in this manner might not jeopardize ownership of AM stations.

Declaratory ruling is therefore requested on four questions propounded by Sen. Johnson: (1) Can owners of two or more AM stations in same city be granted TV station and be permitted to retain their AM stations which are run as separate entities, (2) Would combination of two AM owners for TV put that application at disadvantage in hearing with other applicants not engaged in broadcasting, (3) Is there any prejudice at FCC regarding granting of such an application, (4) Would joint application for TV by two AM station owners be in conflict with public interest, provided each radio station is operated separately.

FACILITIES ARE EXTENDED BY RADIO FREE ASIA

THREE shortwave bands now used by Radio Free Asia for broadcast programs into Far East, according to John W. Elwood, director. Transmission facilities now include Guam and second Manila transmitter. Programs travel on 9490, 11,940 and 6110 kc. Mr. Elwood described it as "an important step toward covering all of Southeast Asia with a radio barrage of truth to expose the false promises of the Communist."

FCC DIVISION CHIEFS

APPOINTMENT of division chiefs in recently established FCC Field Engineering & Monitoring Bureau was announced Friday. Following were named: Stacy W. Norman, Inspection & Examination Div.; George L. Jensen, Engineering Div.; Irving L. Weston, Monitoring Div. All three have been with FCC and predecessor agencies since late 1920's. Field Engineering & Monitoring Bureau is headed by George L. Turner, with Frank M. Kratokvil as assistant chief and head of Field Operating Div.

DuMONT BUYS NIELSON

DuMONT Television Network has signed for the National Television Index Service and the New York TV ratings reports of the A. C. Nielsen Co., Chicago market research firm. DuMont operates WABD (TV) in New York. Contract handled by Chris Witting, DuMont general manager, and Arthur C. Nielsen.

In this Issue—

Can department stores use radio as they do newspapers? Pomeroy's of Pottsville, Pa., is applying field tactics to find out. A test campaign, thus far successful, makes use of radio-only on WPAM. *Page 23.*

In a Sears, Roebuck experiment, reported by Advertising Research Bureau, radio outpulls the printing medium. *Page 24.*

A feature, "The Tale of the Cautious Grocer," tells how radio's power makes money for a Kentucky grocer who had little to spare. *Page 30.*

In a $1.5 million transaction, KPHO-AM-TV Phoenix is being purchased by Meredith Publishing Co. *Page 23.*

With some 18 BMI clinics held in the nation last week, another 24 are slated in the next ten days. Attendance is up at all of them. *Page 26.*

Annual George Foster Peabody Award winners announced in New York re-emphasize that broadcasters can achieve merit in programming. *Page 28.*

On Capitol Hill, a probe of radio-TV programming threatens *(Page 25)*, as the McFarland bill clears for House debate. *Page 29.*

NBC radio affiliates pledge confidence in the network's plans at the first 1952 Stations Planning and Advisory Committee meeting. But some privately see a defeatist attitude. *Page 29.*

TV Engineers are thumbing through a new National Bureau of Standards' report on VHF propagation. Their question: Is there a new threat to television? *Page 65.*

Another problem is the possible affect on 80-90% of 17 million TV sets in use today by ham operations on the 21 mc band authorized by FCC. *Page 67.*

In Washington, a joint committee with FCC, industry and aviation representation, sits down to talk over height and sites for TV towers this week. *Page 68.*

Broadcasters at Ohio Assn. of Radio-TV Broadcasters management clinic may ponder FCC Comr. Robert F. Jones' speech attacking the final TV allocations plan. *Page 67.* And CBS-TV in a New York clinic went through the subject of new TV station construction from A to Z. *Page 66.*

Full particulars of closed circuit TV, already perceived by federal civil defense planners, are currently under the watchful eye of certain government agencies for possible future use. *Page 32.*

Upcoming

May 5: ABC Affiliates, Fort Worth Hotel, Fort Worth.

May 5-6: NBC radio workshop, Chicago.

May 7: BAB Sales Clinic, Kansas City.

May 8-9: NBC radio workshop, New Orleans.

(BMI Clinics and Other Upcomings page 38)

Closed Circuit

(Continued from page 5)

Code is unexpected public apathy during two-month operation. Cause of unconcern thought to be excitement of Presidential race, steel crisis and other big news. (Not documented in NARTB's video code is headachy problem of controlling cameramen and other strongly unionized personnel involved in bosomy shots and off-color antics).

STILL CONCERNED over purported aid and comfort given bookies by horse race broadcasts, FCC has cited another station on renewal—WLAP Lexington, Ky. Station, it's understood, has Saturday afternoon program on race-by-race coverage but presumably handle only local area results, whereas other stations previously cited carried technical information on all races.

ACTIVITY getting hotter on Department of Justice Anti-Trust suit against National Football League et al. Counsel for League last week began taking depositions of government witnesses.

SPECULATION points to Rep. Oren Harris (D-Ark.) as eventual communications leader in House Interstate and Foreign Commerce Committee. Second ranking member (follows Chairman Robert Crosser (D-Ohio) is Rep. Lindley Beckworth (D-Tex.) who announced for Senate Friday.

TV EDUCATIONAL FUNCTIONS OUTLINED BY DR. DUNHAM

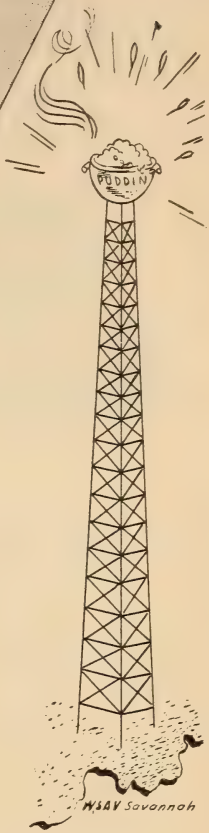
BEST functions of educational TV were outlined Friday afternoon by Dr. Franklin Dunham, Radio-TV Chief for U. S. Office of Education, at 35th annual meeting of American Council on Education at Chicago's Palmer House.

Functions which can be performed best by commercial stations, he said, are entertainment, newscasting, commentary and forum discussions and sports and special events. "Buff" zone, which can be programmed by either commercial or educational stations with success, include cultural, developmental and backgrounding the news. Realm of educational TV best served are talks "on level of the BBC", high-level discussions, dramatized research and direct teaching. He advocated "swift action" in the one-year limit.

Appearing during general TV discussion session were George E. Probst, radio director, U. of Chicago, Ralph Steetle, executive director, Joint Committee on Education TV; Davidson Taylor, NBC vice president; I. Keith Tyler, director, Institute for Education by Radio and TV, Carroll V. Newsom, Associate Commissioner of Higher Education, New York State. The Rev. Theodore M. Hesburgh, C. S. C., executive vice president, U. of Notre Dame, was moderator.

FREQUENCY CHANGE ASKED

APPLICATION for change of frequency from Channel 9 to Channel 8, with 316 kw and 1,000-ft. antenna height above ground was filed Friday by WXEL (TV) Cleveland. Also refiled was application for Youngstown, Ohio, by WKBN which is seeking UHF Channel 27, with 203 kw and 509 ft. antenna height above average terrain.



WXEL plans to spend $237,000 to make the changeover required by the FCC's final TV report, and also to change its main studio location from Parma, Ohio, to 1630 Euclid Ave., Cleveland. Transmitter will remain at Parma.

WKBN plans to spend $353,000 to build the station, $250,000 for first year's operating costs, expects $225,000 first year's revenue.

Summer 'Boom-State'

The tremendous impact of Station WGY on an enlarged summer-time audience is ably demonstrated by one of WGY's sponsors—the Catskill Game Farm. In 1951, this organization abandoned its advertising schedule in newspapers and other radio stations to use WGY *exclusively*. Through spot announcements in the morning and night-time stations breaks, the result was a 250 percent increase in attendance.

Reaching all the summer resorts in the Adirondack, Catskill and Berkshire Mountains and Vermont, sales messages carried by WGY also reach the many tourists and vacationers in Saratoga Springs, Lake George, Lake Champlain and Cooperstown, New York. The WGY area is surely one of America's foremost vacation areas.

Motorists visiting "WGY-Land" learn the station's location on the dial through seven striking, colorful 8' x 24' Scotchlite billboards which are located on the major traffic arteries leading into the WGY area.

You can realize outstanding results by doing your summer selling on Station WGY.

feature of the week

FOUR participating spots on television have opened a new market in the Seattle area for a metal polish produced and previously sold only in California.

When John C. Charles & Co., Los Angeles, decided to put its Formula #40, a liquid polish for brass, copper and chrome, into the Pacific Northwest market, it started with no distribution outlets. In fact, it had only a jobber, Emmett E. Egan & Co., Seattle, and a product which had originally been developed for shining sports equipment but now was being promoted for copper-bottom cooking utensils and such additional items as fireplace andirons and brass door knockers.

The product had sold well in California for three years, but in Seattle there was neither demand nor even awareness of Formula #40.

Egan & Co. took the account Dec. 20, 1951, and the television promotion started right then. The vehicle was Peter Lyman's *Telebuys Inc.*, aired on KING-TV Seattle Monday through Friday at 3:15-3:30 p.m. John Freiburg, a principal of the manufacturing company, appeared on the first program and thereafter Pete Lyman carried it alone.

After demonstrating the product on a copper-bottom pan, Mr. Lyman used a blackboard to invite viewers to write in. Offering a free sample of Formula #40, he suggested this wording on a postcard:

"Where can I buy Formula 40? My favorite store is ————."

Two such demonstrations and free-sample offers a week, in a two-week period, brought in 1,200 postcards.

The broker then separated the cards according to the stores named and showed them to the store managers as evidence that *their customers* wanted Formula #40. It was a convincing demonstration and it promptly opened, as retail outlets for the product, 300 independent supermarkets, the affiliated stores of three major food chains in Seattle and hardware and department stores.

Sent From Afar

Postcards came from as far north of Seattle as Port Townsend and Port Angeles and from as far south as Olympia, with one from Portland, Ore. One store in Seattle received mention on more than 400 of the cards.

Telebuys Inc. went off the air after Formula #40 had been on two weeks. With the distributorships opened, the sponsor stopped its TV advertising—temporarily.

As of March 14, however, Formula #40 was back on KING-TV with participating announcements on *The World Today* (6:45-7 p.m.). The new demonstrator of the product is Mary (Mrs. Emmett E.) Egan.

"We've got the distribution," Mr. Egan told BROADCASTING • TELECASTING. "Now we want to sell the product."

strictly business

"DAYTIME radio still has a strong place, depending on what you are advertising," according to Herbert M. Cleaves, sales and advertising manager of the Jell-O Division, General Foods, who a fortnight ago was promoted to the marketing managership, Associated Products Division.

His opinion on video advertising: "You have to weigh very carefully the rising costs against the possible sales potential of your product . . . For many products, television has priced itself out as an advertising medium."

As advertising head of the Jell-O Division, Mr. Cleaves' problem was not to get people to purchase the product but to use it more frequently—from the stocks on almost

JOHN BLAIR & CO.

agency

CHESTER T. BIRCH, advertising vice president, Andrew Jergens Co., Cincinnati, to Dancer-Fitzgerald-Sample, N. Y., as vice president in charge of service on Procter & Gamble account.

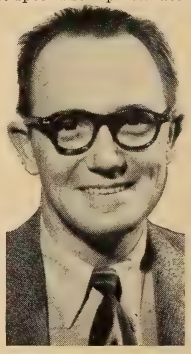
L. L. SCHULTZ, supervisor of creative work, Biow Co., N. Y., elected a vice president.

Mr. Schultz

DONALD M. SMITH Jr., merchandise account executive, Young & Rubicam, N. Y., to Grey Adv., same city, as account executive. **NOVAL WELCH**, assistant sales promotion manager, Servel Inc., joins Grey as account executive.

TOM SWICK, media department, Campbell-Ewald, N. Y., to McCann-Erickson, that city, as radio-TV time buyer.

HENRY A. MATTOON, vice president and member of plans board, Ruthrauff & Ryan, N. Y., to Dancer-Fitzgerald-Sample, N. Y., as vice president and copy supervisor.



on all accounts

DESPITE paradoxes in his behavior pattern, Fred Kilian, director of radio and television programming for Young & Rubicam, Chicago, adheres to a consistent approach in these media. He is a "ham actor" who never kept a scrapbook, a collegian who avoided attainment of even freshman status in almost four years of study, an ex-life insurance salesman who sold only one policy—to himself—and a broadcast specialist who sees "serenity and peace" in radio and only "hard work" in television.

Mr. Kilian, who was born in Toledo, as a harried undergraduate at the U. of Toledo, studied courses in each school except prelaw, thereby neglecting to get a concentration of credits in any course which would have given him at least a freshman rating.

He's been working since he was 9 (then as a library page), and trod the boards with stock companies at 15. In 1929, at age 18, he was assistant technical director at Chicago's Goodman Theatre and acted on a CBS network show there. He studied two years at Pasadena Playhouse in Hollywood, buttering his bread by appearing as a movie bit player and working as Onslow Stevens' stand-in. After graduation, he was an assistant director at Republic Pictures.

Mr. Kilian, in the past 10 years, has resigned himself to the hybrid role of talent and management, with the former claiming "I have a penchant for the latter, and the latter doing the same." As he has gained increasing technical ability and objective views toward the various media in which he has worked, Mr. Kilian has found for himself a proportionate lack of entertainment value in each. He figured once he had appeared in 300 plays, but had only seen 50 during the same period.

Mr. KILIAN

At Y&R he is responsible for broadcast programming of such clients as Schlitz beer (he was hired last July as radio supervisor for Schlitz on *Halls of Ivy*, NBC radio, and *Playhouse of Stars*, CBS-TV), Purity Bakeries, O-Cedar, Borden Co. (Chicago), Elgin National Watch Co. and International Harvester, Truck Division.

He has worked in Chicago television since 1947, when, as production manager at ABC, he tested the medium for ABC on the independently-owned WBKB (TV) with a show sponsored by General Mills and the Hub Store. In the fall of 1948, when ABC's WENR-TV took the air, he became program director. His shows got the highest local rat-

beat

B. FRANKLIN ESHLEMAN II elected vice president of Benjamin Eshleman Co., Phila. **BENJAMIN F. BUSCH Jr.** appointed agency's media and marketing director. **JOSEPH R. ROLLINS Jr.** will head radio-TV staff. **DAVID S. BURCAT** and **RAY McDEVITT** join agency in marketing and art departments respectively.

WAYNE TISS, vice-president in charge, BBDO Hollywood, elected to board of trustees, College of the Pacific, Stockton, Calif.

GEORGE E. SCOTT, formerly with Ruthrauff & Ryan, to Betteridge & Co., Detroit, as production manager.

JOHN F. HEINZ, Cities Service Oil Co., to J. Robert Mendte Inc., Phila., as account executive.

ALLEN L. BILLINGSLEY, president of Fuller & Ross & Smith Inc., Cleveland, elected to board of directors of Interchemical Corp.

ROSS ROY Inc. opens Dallas office at 823 Mercantile National Bank Bldg., that city, headed by **ORVILLE McDONALD,** account executive.

DICK KIRK joins J. Neal Ferguson & Assoc., Dallas, as account service man and copy writer.

WARD BYRON, executive producer, ABC-TV, and **FRANK WOODRUFF,** producer-director of *Bigelow Theatre* for Young & Rubicam, to Lennen & Mitchell in New York and Hollywood office respectively.

GEORGE W. MILLER III, Caloric Stove Corp., to John Falkner Arndt & Co., Phila.

PETER LORCHER joins Ruse & Urban Inc., Detroit, as head of newly created merchandising and specialties division.

J. M. KORN, head of J. M. Korn Adv., Phila., elected to board of governors of Pennsylvania chapter of AAAA.

BADGER, BROWNING & HERSHEY, N. Y., moves to 10th floor of International Bldg., 630 Fifth Ave.

RUTH KUNZE, administrative assistant, Philip Lesley Co., N. Y., named assistant account executive.

LOIS REA, Lowe Runkle, Oklahoma City, to H. M. Gross, Chicago, as production manager.

RUSSELL TOLG, radio-television director, BBDO, Chicago, was guest speaker last week at meeting of Alpha Delta Sigma advertising fraternity.

NEEDHAM & GROHMANN Inc., N. Y., relocates in RCA Bldg., Rockefeller Center, on 17th floor.

LUCKY LAGER BEER, through McCann-Erickson, for the third consecutive year is bringing major league baseball to San Francisco Bay Area fans. Shown just after signing of contract are (l to r) H. G. Fearnhead, general manager, KYA San Francisco; Burton C. Granicher, McCann-Erickson, and Ken Hildebrandt, KYA sales manager.

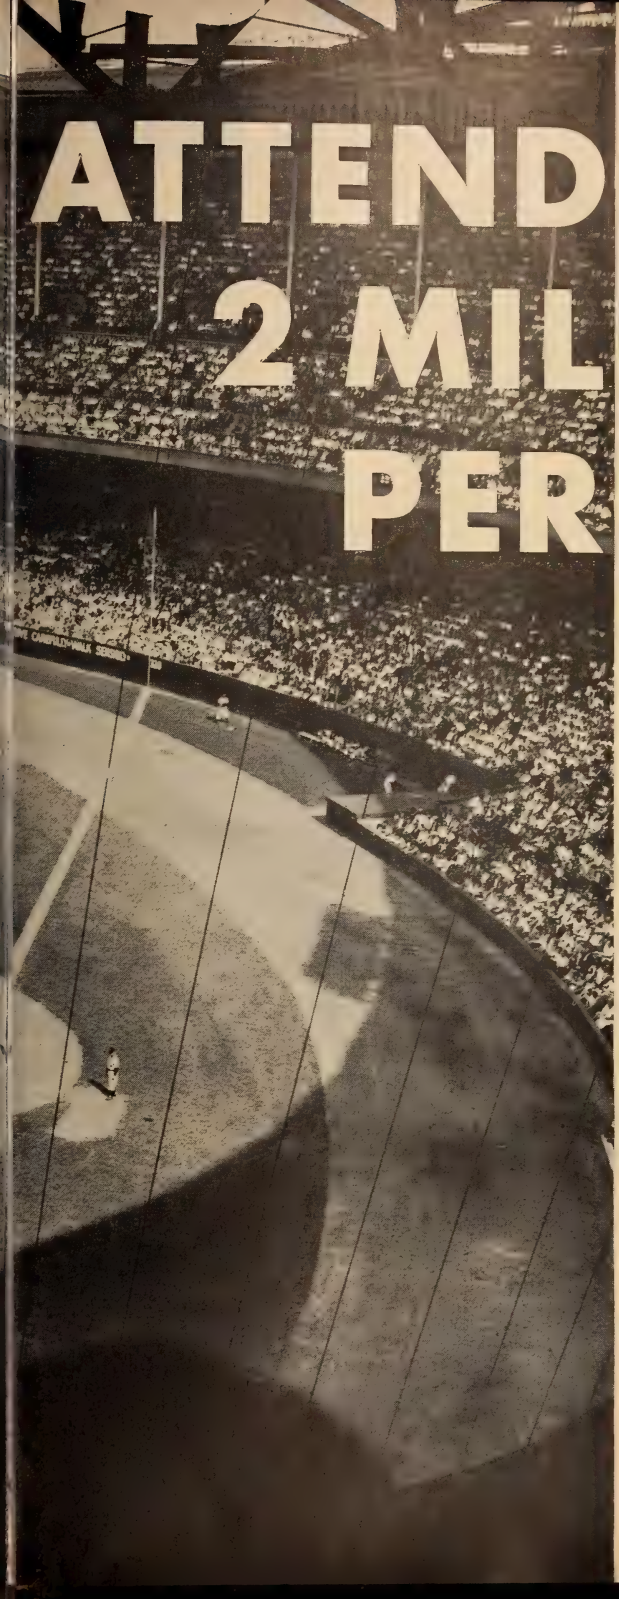
Sales lady

OF THE EVENING

WBEN'S new 11:20 p.m.-to-midnight disc show "Diane" has an established and loyal buying audience. Her careful selection of restful tunes, reading of romantic poetry and special attention to requests has made her a favorite with those at home and in cars.

Diane dominates Western New York 11:20 *p.m. to midnight Monday thru Friday.*

Her identity is cleverly concealed, adding an aura of mystery to the show. Her sponsors, however, agree that there's no secret about Diane's terrific sales power !



Why not use a segment of this popular show to air your wares — profitably !

BLIND MAN'S GUFF

Some people,
including Canadians,
take views on Canada's marketing problems
that are based on popular misconceptions . . .
case of the blind leading the blind.

Admittedly, there *are* "obstacles".

Canada *is* a vast country
. . . larger than the U.S. by one quarter.
Canada's population—14 millions—
is widely dispersed.
In the U.S. there are 45.1 people
to the square mile;
in Canada 3.57.
And most Canadians
live in semi-urban and rural areas.
Only 38% live in cities
of 30,000 or over.

Also,
25% of the population speaks French.

But there's a way round
these geographical and linguistic obstacles
Radio.

For Radio in Canada
is bi-lingual
and wears seven league boots.

94% of all Canadian families own a radio.

And Radio is Canada's most popular entertainer
and most effective salesman.

"In Canada you sell 'em when you tell 'em".

A message from the 103 member stations of the Canadian Association of Broadcasters whose voices are invited into over 3 million homes every day.

Standard Audit

EDITOR:

Thank you very much for your coverage of the matter of the proposed merger which has been in the wind lately. Through you we would also like to thank the broadcasters, reps and time buyers who have called and written expressing their hope that we continue with our original plan of bringing out our Standard Report of station circulation.

Because of our [belief] that a single measurement of circulation is absolutely necessary, we felt obligated to consider the merger proposals. We could not, however, decide that the merger was practicable for a number of reasons. Perhaps the most important of these is that we feel morally obligated to the 400 stations who have signed with us to produce a circulation measurement which is oriented to the individual needs of all types of stations rather than to the requirements of the networks or a few larger stations. A report which is originally planned and designed to satisfy station needs can usually be built up and processed to produce data of value to networks. The reverse is not always true.

Of course, the final decision as to the correctness of our thinking is up to the industry itself and we are perfectly willing to abide by their choice. We have no qualms in this regard, however, since experience has already demonstrated a wide acceptance of our type of measurement among both buyers and sellers of time.

Allocations Report

EDITOR:

In all the hurly burly of trying to read and analyze the Commission's TV allocation plan and order, I suddenly realized how important it was to all attorneys practicing before the FCC that BROADCASTING • TELECASTING was able to come out on the official release date (April 14) with a full and complete printed version of the gargantuan document. You and your staff obviously toiled through the long hours of the Easter holiday in order to provide a service that the Commission was not equipped to do. You have our congratulations and appreciation for a job well done. I regret that I cannot express the same sentiments with respect to the contents of the document but recognize that you had no control . . . over that factor.

Arthur W. Scharfeld
President
Federal Communications Bar Assn.
Washington, D. C.

* * *

EDITOR:

At this late date I want to add my word of appreciation for the extremely fine job you did on getting out the report and order of the FCC lifting the television freeze.

This emphasizes still further my personal opinion that BROADCASTING • TELECASTING is the best trade periodical published in any field.

Richard M. Fairbanks
President and General Manager
WIBC

Editorial Comment

EDITOR:

[I was] Perplexed when I read your editorial writer's bland statement (April 21) that no more than a half-dozen AM educational stations remain on the air. Thought maybe he meant those who had been on the air 30 years, but found there are more than three times that number dating to 1922 . . .

Thought also that his statement that "most" educational institutions are under the aegis of government must have been an error of typography, as I'm sure none of your editorial writers would ever stoop to glittering generalities . . .

Don Anderson
Special Program Writer
WOI-AM-FM Ames, Iowa

[EDITOR'S NOTE: What our editorial writer was referring to was non-commercial educational AM stations, of which not many are left.]

Complete Coverage

EDITOR:

I am sorry that I have not written to you sooner, but I have been rather snowed under since the convention. I did want to express to you my personal appreciation for the very wonderful coverage that you gave to the BAB at the convention and the follow-up story that appeared this week. . . .

It is certainly wonderful to have a trade magazine so thoroughly behind our radio industry in all of its activities.

Charles C. Caley
President and General Manager
WMBD-AM-FM Peoria, Ill.

LOCAL ADVERTISERS "KNOW" THE IMPACT OF FLORIDA'S SWEET MUSIC STATION NATIONAL ADVERTISERS ARE FINDING OUT "FAST"!!!!!

CASE HISTORY

A National Spot Advertiser (*) bought two quarter-hour shows weekly on WLOF in February of last year. Results were wonderful so the campaign was extended for a full 52 weeks. This year the advertiser increased the budget for WLOF by more than 400% because of the fine results from the shows. This account has signed a new contract with WLOF calling for an expenditure of $20,000 in 1952.

POMEROY'S PLAN

New Radio Format Used by Allied Store

By BRUCE ROBERTSON

IN AN 11-day radio campaign, Pomeroy's of Pottsville, Pa., sold coupon books worth $17,805 at a selling cost of 4.7%. A two-day Pomeroy's radio promotion on rugs produced sales totaling $2,415 at a selling cost of 1.4%. Announcements on WPAM Pottsville were the only means of advertising used in both campaigns.

Mr. Cuff

These two short-term promotions are only the beginning — albeit an auspicious one—of a long-term program of experimentation with the use of radio which Pomeroy's will undertake in the months ahead. Like the year-long radio test made in 1945 by Joske's of Texas, results of the Pomeroy's radio promotions will be available not only to other members of the Allied Stores group, to which both Pomeroy's and Joske's belong, but to other stores and radio stations throughout the country.

The Joske's radio experiment was conducted under the aegis of the NAB Dept. of Broadcast Advertising, now operating independently as Broadcast Advertising Bureau. Pomeroy's broadcast campaigns are being handled by the store, with Samuel H. Cuff, consultant to Allied, acting as general overseer of the store's radio activity.

A medium-sized store, under the $5 million volume class, Pomeroy's ratio of advertising costs to total sales is about 2-2½%; this is about one-third below the average in the nation. The store is no stranger to radio. Its radio expenditures have been running at the rate of about 16% of its newspaper advertising dollar volume, a remarkably high proportional allocation of advertising funds to radio for a department store to make.

Pomeroy's president, Robert B. Gable, is a full-fledged radio engineer and the author of a book on that subject, and the store has won numerous awards for its use of radio.

Unlike the Joske's radio pattern of "beamed broadcasting" which entailed continuing sponsorship of a variety of programs aimed at specific segments of the total audience—women, children, men—as well as those designed for the entire family group, the Pomeroy's tests will comprise in toto an experiment in using radio in the same way as department stores use newspapers—to sell specific articles of merchandise.

"Look at the advertising of a store in a week's newspapers," Mr. Cuff suggested, "and you will find an appreciable variation from day to day, with the largest amount of space used on Thursday and none, or very little, on Saturday. This is not at all like the typical radio pattern of commercial programs broadcast for the advertiser at the same time each day or each week. The reason is that the radio formula was developed by the networks primarily to meet the needs of national advertisers, whereas department stores have developed a pattern of buying space in newspapers based on their own requirements."

At Pomeroy's, the radio experimental plan is to attempt to use radio in the same way that the store uses newspapers—to promote the sale of those items the store management and the department heads are most anxious to move at any particular time. In other words, the idea is to make radio fit the department store pattern.

"Perhaps," Mr. Cuff commented, "the natural resistance of department store buyers to changing their habitual advertising methods may explain in part the relatively small place radio has in the overall department store advertising picture."

Ultimate Benefit Cited

Mr. Cuff pointed out that while station operators and salesmen are understandably adverse to having regular schedules cancelled in favor of short intensive store campaigns, they will be more happy about the situation when they find that over a period of several months the store's radio expenditures have substantially increased as a result of its own increased profits from using radio in its own way.

The coupon book campaign run by Pomeroy's on WPAM started on Sunday, March 30, with 34 spots on that day and the next, and continued through Wednesday, April 9, when 26 spots were used. The complete pre-Easter campaign included a total of 255 announcements. Coupon books are a form of advance credit, store money exchangable for merchandise now but to be paid later. A typical announcement read:

"Waiting for payday for Easter shop? Your favorite color . . . style and size may be gone! Come to Pomeroy's second floor credit department . . . ask for a coupon book . . . pay nothing down . . . no red tape . . . buy anything in the store . . . immediately! With each coupon book taken out Pomeroy's gives you free . . . a beautiful Dorset-Rex compact. Don't hesitate . . . this offer is good for———more

KPHO-AM-TV SALE

Meredith to Pay $1.5 Million

SALE of KPHO-AM-TV Phoenix, Ariz., for $1.5 million by John C. Mullins and associates to Meredith Publishing Co. was announced last week.

Upon FCC approval of the sale, the publishers of *Better Homes & Gardens* and *Successful Farming*, headquartered in Des Moines, will hold five broadcast stations—two AM and three TV. Meredith now owns WOW-AM-TV Omaha and WHEN (TV) Syracuse, N. Y.

Meredith is also applying for TV in Albany and Rochester, N. Y.

Included in the contract for the sale of the Phoenix stations is a separate agreement naming Mr. Mullins as managing director and consultant under the new ownership. Also remaining as consultants are present stockholders John B. Mills (owner of Westward Ho Hotel), chairman of the board of Phoenix Broadcasting Inc. (KPHO) and of Phoenix Television Inc. (KPHO-TV); Dr. J. N. Harber, secretary-treasurer of both companies; author Erskine Caldwell, vice president, and Riney B. Salmon, vice president.

Terms of the management and consultant contracts were not divulged.

Mr. Mullins and Mr. Mills were scheduled to fly to Honolulu Friday to further plans for a radio and TV station there.

KPHO, established in 1943, operates on 910 kc with 5 kw. It is an ABC affiliate. KPHO-TV, on Channel 5 with 17.5 kw output, was established in 1949 as KTLX (TV) by Texas oilmen W. L. Pickens, R. L. Wheelock and H. H. Coffield. In 1950 it was sold to Mr. Mullins and associates, including Rex Schepp-KPHO interests. Later that year Mr. Schepp sold out his interests to the Mullins group. It was at that time that Mr. Mullins bought KPHO from Mr. Schepp. KPHO-TV was renewed last week on a regular basis (story page 74).

Mr. Meredith

Mr. Mullins

Messrs. Pickens, Wheelock and Coffield also established KEYL (TV) San Antonio in 1950, and sold the station to Fort Industry Co. in 1951 for $1,050,000 [B•T, Oct. 15, Aug. 6, July 23, 1951]. They are still TV applicants for Corpus Christi and New Orleans VHF stations and for Dallas and Houston for UHF outlets.

Meredith Publishing Co. bought WOW-AM-TV in 1951 for $2,525,000 [B•T, Oct. 1, Aug. 13, 1951]. WOW is an NBC affiliate on 590 kc with 5 kw. WOW-TV is on Channel 6 with 17.2 kw.

Meredith-owned WHEN (TV) in west central New York is on Channel 8 with 27 kw.

Fred O. Bohen is president of Meredith Publishing Co. E. T. Meredith Jr. is vice president and general manager. Payson Hall is controller. All three are active in the operation of Meredith-owned broadcast properties.

RADIO POWER

Outpulls Newspaper Ad In Sears, Roebuck Test

RADIO easily outpulled newspaper advertising in drawing traffic to three Sears, Roebuck & Co. stores in the St. Louis area and produced a much heavier dollar volume of purchases, according to an advertising survey conducted March 27-29 by Advertising Research Bureau Inc.

The two media were pitted against each other on equal terms, according to Joseph B. Ward, ARBI president. Radio advertising was placed on KXOK St. Louis. ARBI tests measure effectiveness of retail advertising by a point-of-sale measurement. Equal money is spent in two media, advertising the same merchandise during the test period.

Sears stores spent $745.70 for a newspaper advertisement carried March 26 in the *St. Louis Post Dispatch*. The ad totaled 110 column inches. Spot announcements, 50 in all, were carried on KXOK at a total cost of $752.50. The schedule consisted of five announcements March 26, with 20 the next day, 18 the third day and seven on the last day of the test.

A trained interviewer was stationed in each of the stores—North Store, South Store and East St. Louis Store. They interviewed 86% of all customers showing an interest in the test merchandise.

Combined results for the three stores show radio produced 41.6% of store traffic for the test merchandise, Coldspot refrigerators and Kenmore gas ranges. The newspapers produced 25.7%.

In percent dollar value of purchases, the radio advertising produced 45.1% of the total amount compared to 29.8% for the newspaper despite the fact 57.6% of newspaper traffic purchased merchandise compared to 48.6% of radio traffic.

Analysis of traffic by days indicated radio produced 33.9% of traffic the first day of the test, 39.2% the second day and 49.5% the third day. This showed a sharp growth in radio impact during the three days. On the other hand the newspaper produced 29% of traffic the first day, slightly more to 31.4% the second day and with figures toppling back to 17.2% the third day.

Radio traffic was divided rather evenly by source, 53.3% of its total coming from in-city sources and 45.8% from outside the city, with 0.9% unascertained. Of newspaper traffic, 69.7% came from the city and 28.8% outside the city, with 1.5% unascertained.

The radio announcements proved radio definitely superior to newspaper lineage in attracting customers to the North Store and East St. Louis Store. On the other hand, the newspaper attracted nearly twice as much traffic to the South Store.

Comparative Pull

From the standpoint of dollar results, radio produced 47.9% of dollar value of purchases at the North Store compared to only 27.4% for the newspaper. At the South Store, newspaper produced 49.8% of dollar sales compared to 27.5% for radio.

Radio's superiority was most strikingly shown at the East St. Louis Store, where its dollar sales were six times those of the newspaper. At this store radio produced 60.5% of dollar value of purchases against only 10.3% for the newspaper. Radio drew 48.2% of the traffic in this store compared to 10.7% for the newspaper.

Tabulated results of the ARBI tests are shown at left.

HI-LITE Industries, Chicago (plastic dishes), has named Olian Adv., also Chicago, as its agency. Radio spots will be used.

NEW ARBI GAUGE

Lists Radio vs. Press Pull

NEW system of rating radio stations on the basis of ability to compete with newspapers in attracting business to stores was announced at the Washington State Assn. of Broadcasters April 25 meeting (see story page 46) by Joseph B. Ward, president of Advertising Research Bureau Inc., Seattle (see St. Louis ARBI survey, this page).

Awards are given to stations achieving an "ARBIndex" rating of more than 1.0. ARBIndex was described by Mr. Ward as the ratio of performance at the point of sale of a radio station and a newspaper, based on ARBI surveys in which an equal sum is spent in both media for identical goods advertised simultaneously. If the station and newspaper draw the same number of people, the station gets a rating of 1, the newspaper being the constant factor. A 2 to 1 ratio would give an ARBIndex rating of 2.0.

Mr. Ward explained the ratings are not comparable to listenership ratings but instead measure effectiveness in drawing traffic. Seven out of 10 stations included in past ARBI surveys have qualified for the certificate, Mr. Ward said.

If a station has an ARBIndex of between 1.1 and 1.5, Mr. Ward explained, its advertising rates are in good shape. If the rating is between 1.5 and 2.0, the rates would appear to be too low, with the station giving too much value to the retailer in comparison with newspaper pulling power. If the index is less than 1.0, the station's rates likely are too high, according to Mr. Ward.

Offering several tips on increasing local business, he advised time salesmen to confer with store buyers, who actually make media decisions. He said ARBI surveys show that people who come into retail stores because of advertising buy three times as much as shoppers who come for other reasons.

PROGRAM PROBE? *Hill Group Clears Resolution*

A SWEEPING proposal that radio and television programs be studied and investigated in the House was approved by its Rules Committee last week.

In a sudden maneuver, a resolution (H Res 278) was cleared through the sentinel committee and placed before the House for action.

If approved by the House, the Interstate and Foreign Commerce Committee or its subcommittee would be empowered to make a full-scale study and investigation of radio-TV programs. It would be in a position of passing judgment on what it believes to be "offensive and undesirable radio and television programs."

The study would "determine the extent to which the radio and television programs currently available to the people of the United States contain immoral or otherwise offensive matter, or place improper emphasis upon crime, violence, and corruption."

Under the resolution, authored last year by Rep. A. C. Gathings (D-Ark.), House probers would make recommendations for the "elimination" by legislation of these so-called offensive or undesirable programs.

Suggestions also would be forthcoming on how, through legislation, the House could "promote higher radio and television standards."

Freedom of committee action would be permitted by giving the unit subpena power to require appearance of whomever it wished to have testify and submission of any books, records, correspondence, memoranda, papers or documents it would wish to study.

Rep. Gathings appeared before the Rules Committee last Tuesday. He explained that in effect he wanted a probe of radio-TV programming whether it be by a special committee or by the Interstate & Foreign Commerce group. The rules group, with Rep. Eugene Cox (D-Ga.) in the chair, apparently agreed with him.

The rules unit has seen fit in the past to approve a similar request. Only difference then, when it cleared Rep. Gathings' resolution lumping together comic books, magazines and pocket-size books, was the placing of all these media within jurisdiction of a select committee [B•T, March 31]. Now the probe will be split with radio-TV coming under the purview of Chairman Robert Crosser's (D-Ohio) commerce group, and the other media under a specially set up committee.

Five Man Subcommittee

It was expected that a five-man subcommittee will be named, headed by Rep. Lindley Beckworth (D-Tex.) and that it will confer with the recently-named NARTB-TV Code Review Board. Greatest complaint, it's understood, has been against blatant beer commercials.

Wading through the maze of resolutions and rescinding actions by Rep. Gathings and the Rules Committee, the situation in layman's language narrows down to this:

1. Originally, in 1951, Rep. Gathings proposed his investigation of radio and television programs. He wanted the House Commerce group to do the investigating [B•T, April 21, 7].

2. This year, Rep. Gathings asked for a select, 15-man committee to look into radio and television and while it was at it, also study comic books, magazines and pocket-size books.

3. The Rules Committee okayed this request. But the House Commerce group objected because if any investigating was to be done on radio and TV, it wanted the say.

4. Subsequently, Rep. Gathings agreed with the Crosser Committee and the House leadership went along. The question then boiled down to the original Gathings resolution directing the commerce group to take full responsibility. Query was, how did the Crosser Committee feel?

The answer was signed, sealed and delivered on Tuesday when Rep. Oren Harris (D-Ark.), representing Rep. Crosser and the full commerce group, stated the committee backed the Gathings request.

What followed was routine. The Rules Committee accepted this as a green light and rescinded its original approval of a resolution to lump all media together, separated radio and TV from the printed media, and okayed the new concept: The Commerce group to investigate radio and television, a special committee to probe printed media.

Rep. GATHINGS

Final test remaining is what will happen to the Gathings resolution in the House. If approved by the House, the action will serve as a mandate that the study and investigation be conducted.

Significantly, the Gathings resolution provides that the study shall be conducted whether the House is in session, in recess or adjourned.

'PORSCHE' QUERY
Rates Asked by Auto Firm

MANUFACTURERS of the "Porsche" automobile, a German car, are thinking of directing a radio spot campaign toward American buyers and have written to radio managers asking for station rates.

A letter signed by Richard von Frankenber, director of publicity for Porsche, located at Stuttgart-Zuffenhausen, Schweiberdinger Str. 141, Germany, requests the following information:

(1) The cost of air time for quarter-hour programs once a week in both Class A and B time for a minimum of 13 weeks.

(2) These rates should apply as follows: The cost when supplied with transcribed programs, and when a staff announcer is used for the introductions and sign-off.

(3) The cost differential between the price Porsche would pay when its organization supplies the transcribed program, and when the station staff prepares, for instance, one quarter-hour news broadcast per week for 13 weeks.

NATIONAL SPOT BUYS
Nine Ready Plans

By FLORENCE SMALL

FOLLOWING on a period of comparative quiet, radio spot business came alive last week as at least nine national advertisers moved into spirited spot action, led by the three major cold-remedy manufacturers.

The most significant features of the cold remedy activity are: (1) the remarkably early disclosure of plans in this strongly competitive field, and (2) the unusual out-of-season projects being undertaken by these firms.

Seeck and Kade Inc., New York (Pertussin), has placed an unusual three-week schedule on independent stations in about 25 to 30 secondary markets starting this week.

The firm's agency, Erwin, Wasey & Co., New York, is also preparing a radio spot presentation which will include availabilities on women's participation shows in about 100 markets. The radio and TV spot schedule is understood to be a larger one than last season's. The orders will be placed in mid-June but with starting dates set for next October.

Vick Chemical Co., through Morse International, New York, is currently preparing its radio and TV spot budget. The actual buying of radio spots will start about July 1 for a late September or early October launching.

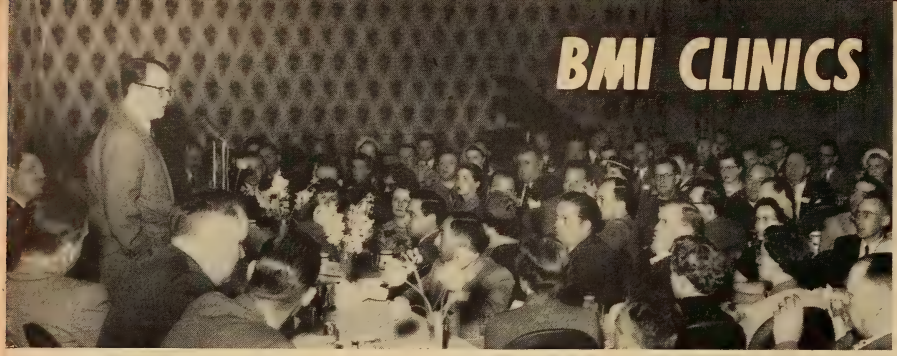
Grove Labs., St. Louis, through Harry B. Cohen Adv., New York, is placing a 17-week schedule using one-minute transcriptions in about nine states, starting June 2 in the malaria belt area. For its cold remedies, Grove Labs. is also planning to start buying its fall campaign around July 1.

Hadacol Campaign

Hadacol Inc., Lafayette, La., is understood to be buying radio spots again. Firm is placing its campaign direct and is buying from 18 to 30 spots per week in 100 cities located in the following states: Oklahoma, Arkansas, western Tennesee, Georgia, Alabama, Mississippi, eastern Texas, and Louisiana, effective early this month. Although the spots are being bought directly by the advertiser the transcriptions were produced by the Erwin, Wasey advertising agency in New York.

Lever Brothers, New York, on behalf of its silver dust, has started a daytime radio spot campaign in 60 markets. Contracts, placed through Sullivan, Stauffer, Colwell & Bayles, New York, are for 26 weeks.

Blatz Brewing Co., Milwaukee, through William H. Weintraub Co., New York, is preparing a spot announcement campaign to start May 5. Schedule will first break in Wisconsin.



Stoppers Inc., New York (Clover, an all-day deodorant), through Donahue & Coe, New York, is taking under advisement a spot radio schedule which, if approved, will start late in July or early August. Definite decision should be forthcoming shortly.

Remington Records Inc., New York, through its newly appointed agency, The Bobley Co., New York, effective May 15 will buy spot announcements on nine Good Music stations to promote its "3 Master Work Recordings For The Price of 1" in a nationwide drive to compete for the classical record market. Contracts are for 13 weeks.

Firm also plans to use film spots to start in about two weeks but the station and market list has not yet been prepared. It will be national.

In addition, Loew's Theatres, New York, is placing both TV and radio spots in about 25 cities to promote the motion picture, "Singing in the Rain" (see NEW BUSINESS, page 18). Donahue & Co., New York, is agency.

BMI CLINICS

President Carl Haverlin of BMI addresses the April 24 clinic at Calgary, Alta.

SOME 18 BMI program clinics—attended by an estimated 1,400 broadcasters—were held in various parts of the country within the last fortnight, with another 24 scheduled for the next ten days.

Attendance at the total of more than 40 sessions scheduled for the April 27-May 16 period in the United States and Canada was reported as "continuing to run far ahead" of the similar series held last year.

Twelve traveling teams of three or four speakers each—joined by several local speakers in every city—are making the tour, accompanied by BMI officials and field men.

Nine clinics held last week and one held April 24 in Calgary, Alberta, reported their progress this week, as follows:

PHOENIX, April 28

Radio's meeting the challenge of television was the focal point of 85 station executives who traveled from five states to hear how to get radio "off the spot," prime topic Monday at the first BMI clinic ever held in Arizona.

Keynote was sounded by Murray Arnold, program director of WIP Philadelphia, who said flatly: "Radio is on the spot. Let's get moving now. Radio must have new material, new ideas, new faces and—most of all—new sounds if we are to meet the competition of television." The one big shortcoming is lack of progressiveness, he charged, hitting at radio programming which has become, in too many cases, "stagnant."

Best way to meet the TV challenge, he advised, is through local color and local talent. The program director proposed that executives stay at home occasionally to listen to their own stations, look for flaws and find errors that can be corrected, even though the valuable experience can also be a "brutal" one.

"A fast buck is not the best buck," according to George Higgins, managing director of KMBC Kansas City, who spoke on the relationship between programming and sales. "Too often a salesman has sold a program which has no chance to sell the particular product it's supposed to sell," he regretted. "There is nothing worse we can do in radio."

Emphasizing personal contacts by salesmen, KMBC, he said, has its representatives accompanied by a continuity writer once a week to visit every client the station has. The big point is cooperation between program and sales departments, Mr. Higgins noted, with the result of fresh and salable material that pleases the advertiser.

Clinic chairman was Ralph Wentworth, BMI field representative, assisted by Glenn Dolberg, BMI station relations manager. Albert Johnson of KOY, president of the newly founded Arizona Broadcasters Assn., opened the session, which also featured the following speakers: Wayne Sanders, manager of KCNA Tucson; James Russell, president of KVOR Colorado Springs, Frank Burke, editor of *Radio Daily*, Jack Williams, KOY Phoenix program director and Ed Frech, program director, KFRE Fresno, Calif.

* * *

HOLLYWOOD, April 29

Murray Arnold, program director of WIP Philadelphia, charged radio with derelictions and said the industry must inject "new program twists and aids" to offset competition and the loss of audience confronting it today.

The Hollywood meeting, co-sponsored by Southern California Broadcasters Assn., had James I. Cox, BMI West Coast representative, acting as chairman. George Higgins, managing director of KMBC Kansas City, advised management to police its "own operations," stressing that every department is important to the station's success and every employe a public relations man. He said staff members should be sales minded.

Ed Frech, program director of KFRE Fresno, said radio has been "taking quality for quantity and taking easy money for bad programs." It now must correct its own errors and must raise its programs and sales standards, he said. said.

James Russell, president of KVOR Colorado Springs, echoed a statement by Mr. Frech on the importance of local public service and news programming, saying an NARTB radio survey indicates 76.1% of women and 82.9% of men prefer news programs to all others, yet only 7% of the average station's time is devoted to locally produced newscasts.

Maurice Mitchell, vice president and general manager of Associated Program Service, New York, advised station managements to use sales aids sent them.

Alan Torbet, general manager of KROW Oakland, said his station builds programs for ten different types of audiences daily, and by this means has developed an excellent sales tool for its account executives, besides giving advertisers their choice of the type of audience they wish to reach. He said KROW sales executives, using charts, are able to show advertisers how to cut down on newspaper space and spend the money on radio.

Mark L. Haas, vice president and program director, KMPC Hollywood, spoke on "Radio's Inferiority Complex," chiding radio management for its fear, because radio is "still the most effective mass influence, greatest advertising medium and foremost exponent and practitioner of public service."

* * *

NASHVILLE, April 29

In Nashville last Tuesday, BMI conducted a clinic in cooperation with Tennessee Assn. of Broadcasters. Perry Sheftall, WJZM Clarksville, opened the meeting as TAB president with Jim Sparnon, BMI field representative, serving as clinic chairman.

Bruce Wallace, manager of public service, WTMJ Milwaukee, spoke on the topic, "Seek the Right Kind of Public Service Programs"; Al Kenngott, program director of WKDA Nashville, on "Building Record Shows vs. Playing Records"; Hugh Smith, program service director of KPIX (TV) San Francisco, on "Sundial or Stopwatch."

Robert J. Burton, BMI vice president, reviewed the copyright situation. Other speakers were: Carter M. Parham, president of WDEF Chattanooga, "Building Station Relations in Your Community"; Catherine Peden, sales manager of WHOP Hopkinsville, Ky., recently named "Woman of the Year" in Hopkinsville, "Better Programs—More Sales"; Ralph Snelgrove, owner and general manager of CKBB Barrie, Ont., "A Big Quarter Kilowatt of Personality."

Ninety-one broadcasters attended the clinic. Ralph W. Hardy, NARTB government relations director, spoke at the dinner meeting, discussing the radio legislative situation. WSM Nashville provided talent for the program. The TAB membership adopted a resolution in favor of a proposal to revise the state constitution so it can be amended.

* * *

BATTLE CREEK, MICH., April 30

Announcement of the Michigan state legislature's approval of a measure relieving broadcasters from paying 3% sales and use taxes on broadcasting equipment and electricity was made by Dan E. Jayne of WELL Battle Creek, president of the Michigan Assn. of Broadcasters, at MAB's joint meeting with the BMI clinic.

He said the tax exemptions will allow savings in operation of existing stations and give even greater relief for those entering television. The action followed a long campaign against the tax by Michigan broadcasters.

Burt Squire, BMI field representative, presided at the clinic.

Speakers and their topics were: Hal Bumpus, news director, KVOR Colorado Springs, Col., "Local News Builds Local Interest and Sales"; John McLaughlin, advertising manager, Kraft Foods Co., "What the Advertiser Expects from Radio"; Leonard Kapner, president, WCAE Pittsburgh, "Music Is Exactly What You Make It"; Sydney M. Kaye, vice chairman of the board and general counsel of BMI, "Copyright Hints and Pitfalls"; Gus Hagenah, vice president, Standard Radio Inc., "Music Hath Charms"; Robert Tincher, vice president and general manager, WNAX Yankton, S. D., "Programming Begins in the Front Office." A tape recording of a speech made at an earlier BMI clinic by George J. Higgins, managing director and vice president in charge of sales, KMBC-KFRM Kansas City, on "Sales and Programming" also was played.

* * *

RICHMOND, VA., May 1

Gordon Phillips, assistant manager of WROV-AM-FM Roanoke, told listeners at the Richmond clinic that "intelligent programming builds sales and profits." Mr. Phillips said: ". . . There is nothing

Several Coincide With State Assn. Meets

RADIO HOMES

Vermont, Nevada Data Reported

NUMBER of radio homes in Vermont rose from 80,253 in 1940 to 98,855 in 1950, or 96.8% saturation, according to final figures for the state made available by the U. S. Census Bureau. Figures also were made available for Nevada, where the number of radio homes rose during the decade from 26,200 to 45,570, or 93.4% of saturation (see tables this page).

Radio saturation in Vermont was highest, 98.3%, in urban areas. It was lowest, 95.7%, in rural nonfarm areas. The city of Rutland had the highest saturation, 98.7%. Among counties, Chittenden was highest with 98.0% of all homes having radios.

In Nevada, 1950 radio ownership ranged from 96.5% in urban to 88.8% in rural non-farm areas. Reno had 97.2% saturation compared to 96.8% in Las Vegas. Among counties, Douglas topped the list with 96.5% saturation.

First state breakdown on radio and TV ownership under the 1950 Census covered Delaware [B•T, April 14].

TV In Vermont

Television ownership in Vermont as of April, 1950, when the decennial Census was taken, showed a saturation of 1.7%, or a total of 1,730 television homes. The state has no TV stations but gets some reception from other northeastern states.

At the time of the Census enumeration, nationwide TV ownership was less than a third the current figure.

Nevada had TV saturation of 0.5% in April 1950, or a total of 265 sets, according to the Census Bureau. Only possible reception was from distant stations.

THE STATISTICS in this table are extracted from a final report of the 1950 Census of Housing, Series H-A, Nos. 45 and 28 respectively, for Vermont and Nevada, which will be available in about six weeks from the Superintendent of Documents, Washington 25, D. C., at 25¢ per copy for Vermont and 30¢ for Nevada.

Statistics on distribution of the population in Vermont and Nevada are presented in a final report of the 1950 Census of Population, Series P-A, Nos. 45 and 28 respectively, now available from the Superintendent of Documents at 10¢ per copy for Vermont and 15¢ for Nevada. Descriptions and maps of "urbanized areas" are presented in this report.

Statistics on characteristics of the population in Vermont and Nevada are presented in a final report of the 1950 Census of Population, Series P-B, Nos. 45 and 28 respectively, available from the Superintendent of Documents, at 30¢ per copy for Vermont and also for Nevada. Descriptions of Standard Metropolitan Areas are presented in this report.

A Standard Metropolitan Area is generally described as a county or group of contiguous counties with at least one city of 50,000 or more. In New England, it is defined on a town or city rather than county basis.

An urbanized area contains at least one city of 50,000 or more and includes surrounding closely settled incorporated and unincorporated areas.

BRIGHTMAN NAMED

To Demo Publicity Post

APPOINTMENT of Samuel C. Brightman as acting director of publicity for the Democratic National Committee was announced last week by Chairman Frank E. McKinney.

Mr. Brightman, a former newsman at KSD St. Louis and Washington correspondent for the *Louisville Courier-Journal*, has been on the committee publicity staff for the past five years. He succeeds Charles Van Devander, who resigned as publicity director April 15.

Mr. Van Devander, previously Washington bureau chief for the *New York Post*, was reported last week to have accepted the post of campaign manager for Sen. Robert Kerr (D-Okla.), a Presidential aspirant.

Mr. Brightman also served on the news staffs of the *St. Louis Star-Times* and *Cincinnati Post* and saw Army service from 1942 to 1945. He is a native of Missouri.

'CHAPEL' SERIES

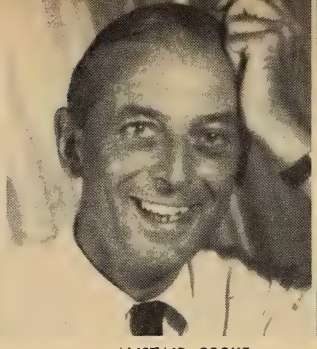
World Plans Second Release

WORLD Broadcasting System's *Chapel by the Side of the Road* was reported last week by Herbert Gordon, vice president in charge of production, as so successful that a second transcribed radio series of the Bible readings will be produced.

Chapel, featuring actor Raymond Massey as the reader, is currently heard on more than 400 stations. Local station managers, Mr. Gordon said, indicate that their audience mail is rising as a result of the program, which listeners consider a "solace" and "source of inspiration."

World also plans a series of transcribed lullabies from all nations and has signed soprano Mimi Benzell to record them. Other performers recently contracted for by World include Muggsy Spanier and his Dixeland Band and the Circle C Boys, popular western music group.

Andrews Named



NEW Director of the Point Four Technical Assistance Program is Stanley Andrews, former owner of KARK Little Rock, Ark. He was officially sworn in last Thursday. He was highly commended at the ceremonies by State Secretary Dean Acheson. On leave from his Agriculture Dept. post as Director of the Foreign Agricultural Office to which he was appointed in 1949, Mr. Andrews edited the *Arkansas Farmer* in addition to his radio activities.

Ghilain Joins WMAL

DUAL role with the Evening Star Broadcasting Co. will be filled by John E. Ghilain May 15 when he joins WMAL-AM-TV Washington as assistant to the director of programs and director of advertising and publicity, according to Kenneth H. Berkeley, vice president and general manager. Mr. Ghilain was head of radio-television advertising, publicity and sales promotion department for NBC's WRC-AM-FM WNBW (TV) Washington.

PEABODY WINNERS

Ten Are Honored

MERITORIOUS accomplishments in radio and television in 1951 were recognized with distinguished George Foster Peabody awards at the 12th annual presentation in New York last Thursday.

Ten awards were announced at a luncheon meeting of the Radio Executives Club in the Grand Ballroom of the Hotel Roosevelt. They were presented by Edward Weeks, editor of the *Atlantic Monthly* and chairman of the Peabody National Advisory Board.

The citations were divided into five for radio, four for television and one, a combination radio-TV award. Several hundred radio-TV leaders convened for the occasion, which was broadcast and telecast by most major networks and WQXR New York.

Drawing encomiums in the radio classification were CBS Radio, WQXR New York, NBC for its *Bob and Ray*, KPOJ (MBS) Portland, Ore. and Alistair Cooke on BBC. WSB-AM-TV Atlanta was cited for "meritorious regional public service by radio and television."

In the video category, top plaudits went to Edward R. Murrow's *See It Now* on CBS Television, NBC-TV's Gian Carlo Menotti, ABC-TV's *Celanese Theatre*, and WCAU-TV (CBS-TV) Philadelphia.

The occasion marked the sixth consecutive year that the presentations highlighted a luncheon session of the Radio Executives Club of New York presided over by I. E. (Chick) Showerman, president.

The awards, announced by Dean John E. Drewry, U. of Georgia's Henry W. Grady School of Journalism, "are designed to recognize the most distinterested and meritorious public service" and to "perpetuate" the memory of the late George Foster Peabody. The awards were set up with the assistance of NARTB and are administered by the Henry W. Grady School of Journalism and a distinguished National Advisory Board.

CBS Radio drew a radio educational program citation for its *The Nation's Nightmare*, lauded as a "shattering and fearless documentary series on syndicated crime in the United States." The program and producer, Irving Gitlin, were

HOUSE FCC BILL

Cleared for Early Debate

THE HOUSE's "traffic cop," its Rules Committee, waved ahead the Senate-passed McFarland bill (S 658) last week with hopes pinned on an early vote in the lower chamber.

It is now up to House managers to set a definite day for debate, a maximum of three hours to be allowed. That point should be reached within two weeks, Capitol Hill observers agree.

By action of the House Rules Committee, through which all legislation in that body must pass on the way to the floor, the bill to modernize FCC functions and procedures can be further amended during debate.

Once the House passes the bill, it is certain to go to joint Senate-House conference.

Rep. Oren Harris (D-Ark.), who has been acting as chief lieutenant for House Interstate and Foreign Commerce Committee Chairman Robert Crosser (D-Ohio), appeared before the Rules Committee last Tuesday.

He presented the background, outlining in general the bill's purposes and provisions, in order to justify the granting of a "rule"—i.e., clearance for formal House action.

Rep. Harris told the committee, under acting chairmanship of Rep. Eugene Cox (D-Ga.), that in the "public interest something ought to be done" to facilitate the processing of station licenses.

First Since 1934

He noted the bill was "rather complicated" and "highly technical" and that he wouldn't "endeavor to explain technical" portions of the bill "even if I could."

But, he said, S 658 would be the first major legislation in communications since the Act now on the books was enacted in 1934. Since that date, he said, there has been "much progress and development in communications, particularly in radio and television."

Rep. Harris said that the Commerce Committee in agreeing on its own version of the McFarland bill, sponsored by Majority Leader Ernest W. McFarland (D-Ariz.) in the Senate for the past four years, found it necessary to consult with the committee's own staff, the staff of the Senate Commerce Committee, with FCC and with the radio-TV industry.

In brief he said, the key purposes of the bill are:

(1) Improve FCC's organizational setup, particularly the administrative functions of the FCC and its staff. (2) Clarify and improve FCC's procedure of granting permits and licenses for radio and television (a point, he said, of greater importance today because of the freeze lift in TV). (3) Develop new administrative changes. (4) Modify and change FCC procedures and rules in hearings. (5) Impose special requirements upon FCC in its exercise of quasi-judicial functions as compared to rule-making.

Not all of the committee was in accord, Rep. Harris admitted, particularly in the technical phases of the bill. He cited organizational setup as one field of disagreement.

Long a foe of FCC, Rep. Cox questioned its very existence, bringing up his charges of previous years that it has "brow-beaten and intimidated" licensees. Rep. Clarence Brown (R-Ohio), a key member of the committee, who once served on the Commerce group, noted that his chief concern has been the "great abuse of power and a great deal of favoritism" allegedly attributed to the FCC.

Rep. Brown said he favored this bill. It is an "excellent piece of work as a whole," he declared. If there is anything left to correct, Rep. Brown continued, the House can do so with "minor bills."

Prodded by Rep. Cox, Rep. Harris asserted the committee had come to the conclusion that the FCC has not performed its function . . . "the staff has been performing the function of what was the Commission's." The bill, he said, would correct this.

Asked by Rep. Cox as to "what extent did FCC help write the bill?" Rep. Harris explained that among others the views of former FCC Chairman (then Chairman) Wayne Coy; Comr. Robert F. Jones; Joseph H. Ream, executive vice president of CBS Inc. and a member of its board of directors; Judges Justin Miller, NARTB board chairman, and Frank Roberson, Washington radio attorney, were solicited.

"Sometimes the FCC was not in agreement," Rep. Harris said. Rep. Brown interjected: "This is not a Commission bill."

Difference of Opinion

Rep. Harris also assured Rep. Cox that the McFarland bill contains provisions for the "protection" of the individual licensee's rights.

Becoming more specific in analyzing sections of the bill, Rep. Harris said there were differences of opinion among committee members on the new section dealing with newspapers' rights when licenses are granted and the so-called "anti-double jeopardy" provision which the House unit knocked out of the bill.

Rep. Harris Ellsworth (R-Ore.), of the rules group, who has an interest in KRNR Roseburg, Ore., noted that the bill apparently would prevent the FCC from formulating policy "by failing to act" on cases.

In other explanations, Rep. Harris said S 658, as amended by the House committee, would provide for FCC panels—that is authorization for the Commission to divide itself into member panels of three. He said this would expedite action in consideration of TV cases.

Additionally, the bill would provide for an administrative assistant for each of the Commissioners and de-emphasize the legal staff, putting them in "a different category," Rep. Harris concluded.

POINT-OF-SALE

Plan Begun at WTAM

VARIATION of the NBC "chain lightning" merchandising plan was set up at WTAM Cleveland by new NBC General Manager Hamilton Shea on his first official day there. The plan gives advertisers point-of-sale promotion with housewives buying regularly in 348 food stores controlling 79% of Cuyahoga County's food volume, Mr. Shea said.

Advertisers may now reach four-fifths of potential food buyers in Cleveland with radio and in-store displays, Mr. Shea said.

NBC SPAC MEET

Vote Confidence in Network

A PLEDGE of confidence in NBC's network radio plans was issued by the network's Stations Planning & Advisory Committee after its first 1952 meeting last week, though reports persisted that some members had privately expressed disappointment at what they considered a defeatist attitude.

The formal statement was explicit in its commendation of NBC's sales, programming, advertising and promotion plans, extending congratulations to the network for "its realistic approach to the future development of network radio and the forward looking plans it is making to broaden radio's effectiveness and service and increase billings."

Yet some SPAC members were said to feel that an overly pessimistic attitude was reflected in some officials' statements, such as one attributed to Harry Bannister, former WWJ Detroit manager who was making his first SPAC appearance as NBC station relations vice president, and who was said to have admonished that radio is up against a trend.

NBC officials for the most part declined to comment on specific reports as to developments at the two-day session, maintaining that it was a strictly private meeting whose proceedings should be kept confidential by both network representatives and SPAC members.

Network officials, while recognizing that criticism existed, appeared to take the position that their approach was realistic and also aggressive, that criticism stemmed from lack of understanding of all network problems, and that the major stations represented on SPAC do appreciate NBC's position and like its plans.

In the committee elections, P. A. Sugg, manager of WKY Oklahoma City, was named SPAC chairman and E. R. Vadeboncoeur, vice president and general manager of WSYR-TV Syracuse, was chosen vice chairman. Richard O. Dunning, president and general manager of KHQ Spokane, was elected secretary for radio and Lee B. Wailes, executive vice president of Fort Industry Co., secretary for television.

Summer Presentation

Elections were held at the opening session Tuesday morning. In the afternoon meeting the committee viewed NBC's summer radio presentation which, produced under the direction of Jacob A. Evans, manager of the radio advertising and promotion department and unveiled in March [B•T, March 31], has won praise from all segments of the industry.

Then the committee divided into separate radio and TV groups for sessions with NBC officials representing each medium.

The TV section's meeting reportedly went smoothly. Most NBC-TV sponsors are remaining on the air this summer, which was regarded as a healthy sign. There were said, however, to have been two main subjects of complaint: (1) what was considered a lack of sufficient attention to the quality of morning programming, and (2) comics giving free on-the-air plugs to non-sponsoring products.

Network officials were said to have taken the position that they currently are concentrating heavily on development of their revolutionary new early-morning *Today* show and accordingly cannot devote full attention to other morning shows at the moment.

Regarding free plugs, it was said that some comics have been called on the carpet, though some SPAC members expressed doubt that network officials shared their concern.

The extent of commercialism in coverage of New York's Easter Parade drew specific complaint, it was understood, with network authorities agreeing and pledging that it would not happen again.

Text of the SPAC statement on NBC's radio plans, follows:

"The NBC summer sales plan is a vigorous and well-documented presentation pointing up in dramatic fashion the greatly increased values of network radio as a sales medium.

"We are enthusiastic over NBC's expanded advertising and promotion plans and particularly over the plans for on-the-air and newspaper promotion. We believe these will do much to enlarge the radio audience and promote radio's value to advertisers.

"The NBC summer programming schedule offers an abundance of sensibly priced programs which we

(Continued on page 36)

YOUNG grocer Wyndall Smith had a well-known business problem: His new store just was not grossing enough. But the solution wasn't quite as simple as the diagnosis. Particularly, when it was considered that Wyndall's Super Shopping Center was out on Highway 60, east of Owensboro, Ky., away from many potential customers. Then Wyndall Smith turned to radio. That was eleven years ago. This year as he renews his radio, prosperous Grocer Smith has this local success story to tell.

Wyndall's Super Shopping Center, located east of Owensboro, Ky.

★ ★ ★

THE TALE OF THE CAUTIOUS GROCER

IT DOESN'T take "big money" to advertise your business on radio. But clever and forceful use of radio can put a small business into the big business class.

Back in 1941, Wyndall's Super Shopping Center, located east of Owensboro, Ky., on U. S. Highway 60, was struggling along, using such newspaper advertising as the firm could afford. The young owner, Wyndall Smith, knew that he had to do something to attract patrons from downtown Owensboro and the surrounding countryside if his store was to prosper.

Trained as a trouble shooter for a national chain grocery, he was accustomed to the use of newspapers. He followed the precepts of that chain and bought newspaper space. Still his store was grossing only $50,000 a year. Something had to be done.

But Mr. Smith was a cautious merchant. He decided to try a limited investment on WOMI Owensboro. Results were pleasing. He increased the budget. Now 40% of his advertising budget goes into radio on both WOMI and WVJS. Business last year totalled $1,500,000.

Mr. Smith, who is now only 36, uses announcements for saturation coverage of his market to tell of specials and perishable goods but also likes local institutional programs for good will building which he believes has been a factor in making and keeping his store the largest super market with the largest gross business of any similar store in western Kentucky.

He carries a schedule of daily announcements using on each the name of one of the many communities within the Owensboro retail shopping area and asking residents of that community whether they would like to have a free trip to Owensboro at Wyndall's expense. The announcement then explains that the savings at Wyndall's will give the listeners a free trip to Owensboro and leave them money in their pockets when they go home.

In addition Wyndall's uses early evening programs on both stations, featuring recorded and transcribed music and service announcements for civic and church groups. Wyndall's low prices are also featured on each program.

Wyndall Smith (l) signs a contract for 1952 with WOMI Owensboro. Hugh Potter, WOMI manager, points out that this is the eleventh year that the firm has used radio.

LeBlanc's Hadacol Style Emulated

During the period when Sen. Dudley LeBlanc was creating a sensation with testimonial announcements for his well advertised Hadacol, Wyndall's had announcements transcribed locally which used a similar approach and burlesqued them to the extent that they amused the listeners and created much customer comment.

One of these Hadacol-type commercials used a small girl's voice telling how her mother had trouble making her income cover the cost of necessities before they discovered Wyndall's, but since trading regularly at Wyndall's the family was able to eat well and buy the clothing it needed. Another announcement used a woman's voice with a pronounced Mississippi drawl. Others were done by men, all of whom testified as to Wyndall's quality foods and bargain prices. They were corny but they did a job for Wyndall's and radio.

Radio Quickly Moves Unusual Shipments

In addition to his regular schedule, Mr. Smith orders as many as ten extra announcements in a morning or afternoon during the peach or apple season when he brings in fresh fruit from distant points in one of his farm-to-market trucks.

"If it was not for radio I couldn't afford to gamble on bringing in perishable merchandise in large quantities," Mr. Smith declared during a recent tape-recorded interview which was presented at the NARTB District 7 meeting at Louisville. "Radio, like gas, is fast", he agreed.

Results have sold Wyndall Smith on the continued and increasing use of radio advertising. One story he likes to recall occurred during the war-time shortage period.

Having received 7,000 packages of cigarettes from a supplier, he called WOMI and ordered one announcement to be used at 11 a.m., advising that the cigarettes would go on sale at 11:30 a.m., with a limit of two packages to a customer. By 1:30 p.m., 3,500 customers had passed through the checkout aisles and all of the cigarettes were gone as a result of that one announcement. One factory located about a half mile from Wyndall's had to practically shut down when its employes learned directly or indirectly by radio that the scarce smokes were to go on sale.

The ease with which radio can be put to work for a food center is another plus value it has for Wyndall's. Mr. Smith explains:

With radio and radio alone you can keep the public as near you as your telephone. You can pick up your phone, turn in your order and give the station a list of the specials you have to offer. You don't have to wait for a layout man to draw up his copy, have it set into type and a proof run before getting your items advertised that afternoon or the next morning. It's easy for a busy merchant to use radio advertising. Where time is an element and shortage of help is a problem, this means a lot.

Wyndall's Acceptance Is Radio's Success Story

With radio repeating it day in and day out over the years, Wyndall's slogan, "Where prices are born and not raised", has become a buy word in the Owensboro area and Wyndall's has become one of radio's best users and boosters in the food field in Western Kentucky.

PARAMOUNT HEARING

Raibourn Queried

FCC COUNSEL continued its probe into the part Paramount has played in the development of television last week during the ABC-United Paramount Theatres merger hearing.

Testifying was Paul Raibourn, Paramount vice president in charge of television. He was quizzed, mostly, on whether Paramount allegedly tried to suppress TV development through its holdings in Scophony Corp. of America—a continuation of a line of questioning begun two weeks ago. Commission Counsel Arthur Gladstone introduced numerous exhibits tending to indicate that Paramount may have tried to keep TV "under control." In addition, Mr. Raibourn was questioned about speeches he made and letters he wrote and received.

A letter, written in June, 1941, by Dr. Allen B. DuMont, was addressed to Arthur Israel Jr., then a Paramount executive. Initials on the letter indicated it had been sent into Mr. Raibourn's office.

Dr. DuMont lamented the fact that Paramount was not lending more active financial support to his company, and wrote:

. . . I feel that the [DuMont] management has more than accomplished what it promised to do and we are in a very good position at the present time to be an outstanding company in this field. In spite of this we are faced with the statement repeated six months ago to me and again recently by Mr. Stanton Griffis, chairman of the board of Paramount, that he would not put a dime in television and could not see any possibility in the near future for anything commercial in this field. In view of these facts, I believe that Paramount should either see that we are properly financed or make some arrangement to give up interest in this company so that we could proceed along other lines and take care of this very important necessity.

I have tried to carry along for a long period of time and give the impression on the outside that everything was going along fine and that we and Paramount were interested in furthering and promoting television. Unless I have some backing from Paramount in this connection there is only one alternative for me to do and that is call a spade a spade, and if we cannot become properly financed take the steps I have outlined previously.

Confidential Note Exhibited

Another FCC exhibit was a confidential memorandum from Mr. Raibourn to Barney Balaban, now president of Paramount Pictures. The January, 1945, note revealed that Paramount had the power to stop action by any group of stockholders in Scophony Corp. of America through Paramount's control of Class B stock. This note contained a recommendation from Mr. Raibourn that Paramount sell its interest in Scophony.

Scophony was largely controlled by British Scophony and had a number of theatre TV patents. It was also working on such inventions as the dark-trace (Skiatron) TV tube.

In his memo on the Scophony situation, Mr. Raibourn wrote:

. . . We are minority stockholders in Scophony, although we are in a position to stop action by others which might be detrimental to our interests through the fact that stock cannot be disposed of, or licenses granted without our permission.

We are, however, the only one of the group who can dispose of our interest. . . .

Because of our position as a minority stockholder (1/6 interest in non-management stock) (we had to take this kind of interest or patent rights would have probably flowed to RCA, GE and the AT&T), I have been unable to point this situation in the direction in which I would like to see it move. General Precision Equipment has an entirely different attitude on a number of matters than we have.

I should like your permission to sell our interest, providing a satisfactory profit can be obtained. This recommendation is made in spite of the fact that they may turn out to have unusually valuable patents and is basically predicated on the fact that I am sure we do not wish to go into the manufacturing and development program necessary to a proper exploitation of our rights in this situation.

Disagreement between Mr. Raibourn and Arthur Levey, Scophony president, is evident in an exchange of correspondence between the two.

In July, 1945, Mr. Levey wrote to Earle G. Hines, president of General Precision Corp., objecting to the way the Class B stockholders acted in their relationships with Scophony. A copy of the letter was sent to Mr. Raibourn. Mr. Levey said:

. . . The record shows that the "B" stockholders have continually sought primarily to maintain "exclusivity" of their licenses rather than permit the company (SCA) to progress through contacts developed through the management (Arthur Levey) which could have resulted in providing very substantial revenue to the company as well as essential technical advancement. . . .

According to the record, "B" stockholders have consistently discouraged every prospect, I, as the management, have developed to bring revenue into the company from "outside" sources, so that SCA would not have to remain dependent upon them ("B" stockholders). . . .

Near the beginning of his cross-examination last week, Mr. Raibourn went into a complex technical discussion of the German and American approaches to the problem involved with the Skiatron tube used in the Scophony system. The Commission counsel apparently was exploring the possibilities of cartel implications in the Scophony situation.

Preceding Mr. Levey today (Monday) will be Donald A. Stewart, manager of DuMont Television Network's film department. Chris Witting, DuMont network general manager, may also be called to testify today.

To Take Stand Again

Due to return for re-direct examination are Barney Balaban and A. H. Blank, who is president of Tri-States Theatre Corp., a UPT subsidiary. He was scheduled to testify last week but an illness in his family prevented his appearance.

Estimates as to how long it will be before the Commission readies its final decision on the merger were undergoing more revision last week.

If all the testimony is completed by May 15, this may be the schedule for resulting phases of the merger question, based upon estimates made by Hearing Examiner Leo Resnick earlier in the hearing:

Proposed findings of fact, due 60 days after the hearing, would be submitted August 15.

Hearing Examiner Resnick said he would need about three months after that in which to prepare his decision—which would be about Nov. 15.

Then, allowing 60 days for oral argument, the Commission could issue its final decision Jan. 15.

Film Expenditures

THREE TV networks (ABC, CBS and DuMont) spent $3,576,552 on films in 1951, it was disclosed at the Paramount hearing last week when they submitted figures in answer to request by DuMont [B•T, March 24]. Also placed in the record was United Paramount Theatres' expenditure of between $30 and $31 million for films exhibited in its 600 owned theatres. Motion picture exhibitors as a whole were estimated to have spent $462 million on rentals for the 19,000 movies houses in '50.

ABC spent $1,310,195 for films in 1951. Of this amount $884,260 was for feature pictures. CBS spent $1,706,900, of which $615,000 was for features and $1,064,900 for syndication of shorts to affiliates. DuMont spent $559,457, of which $241,651 was for features. NBC figures were not introduced since it is not a party to the hearing.

WHITE TO NBC

Will Head TV Film Operations

FRANK WHITE, leaving the Mutual presidency at the end of this month [B•T, April 28], will team up with NBC, effective about July 1, in charge of developing and expanding its TV film and film syndication operations.

NBC President Joseph H. McConnell announced Wednesday that the retiring MBS president would join NBC "in an executive capacity" and that his first assignment would be "a special project in connection with television film development."

It was assumed that he would get vice presidential rank at an early meeting of the NBC board of directors.

NBC was said to be planning to expand in the TV film syndication field on a major scale, with Mr. White slated for the key role in plotting the expansion. His first moves are expected to be largely exploratory, preliminary to recommending and executing detailed plans.

Mr. White, whose resignation as Mutual president reportedly stemmed from failure to come to terms with board chairman Thomas F. O'Neil on the scope of his sphere of operations under General Tire & Rubber Co.'s new ownership of the network, leaves Mutual on May 31.

He plans then to take a month's vacation, reporting to NBC about July 1.

He leaves Mutual on friendly terms with Mr. O'Neil, who takes over the presidency himself, and with other members of Mutual management and its affiliates, who have repeatedly praised his success in developing the network during his three years as president.

It is at Mr. O'Neil's request that he is continuing in office this month, to assist the new president in his transition to that office. Mr. White's three-year contract expired April 30. When he leaves, Mr. O'Neil becomes both president and board chairman.

Mr. O'Neil reportedly told members of the Mutual affiliates advisory committee, in closed session following disclosure of Mr. White's resignation, that his differences with the retiring president were jurisdictional rather than ideological. He also made clear that no changes in Mutual's type of network operation are now contemplated, and that Mutual plans to get into the TV network field, probably on a film basis [B•T, April 28].

NBC will be the third network Mr. White has served. He entered radio in 1937 as treasurer of CBS, advancing to vice president and treasurer in 1942 and continuing until 1947, when he was elected president of CBS's Columbia Records Inc. He headed CRI until assumption of the Mutual presidency May 1, 1949.

Before he entered radio, Mr. White was assistant to the president of Union News Co. from 1924-29, treasurer of the Literary Guild of America 1929-35, treasurer of Stage Pub. Co. 1935-36 and treasurer and business manager of Newsweek Inc. 1936-37.

CLOSED CIRCUIT TV

Federal Agencies Mull

FULL-BLOWN potentials of closed circuit television, already perceived by federal civil defense planners, are currently under the watchful eye of certain government agencies, it was learned authoritatively last week.

While details were not immediately available, it was known that at least three government departments—aside from the Federal Civil Defense Administration—have conferred with executives of United Paramount Theatres Inc. on the possible use of this selective communications medium.

Whether a central government coordinating unit was charting the blueprint or whether plans were being instigated at the individual agency level was not known.

These departments—Agriculture, Justice and State—were understood to be studying plans for utilization of theatre telecasting after the pattern already weaved successfully by FCDA. There also was an indication that UPT is broaching agency heads with the plan on a no-cost-to-government basis.

Federal CD officials have held two such demonstrations and were planning a third along the Atlantic seaboard. It was learned, however, that FCDA has agreed to defer its next showing (previously set for around May 1) pending the outcome of this multi-agency study.

First Inkling

First inkling of this new vista came during the 22d annual Institute for Education by Radio-Television at Columbus, Ohio, last month [B•T, April 28, 21]. It was contained in an address by Irvin Sulds, representing United Paramount Theatres Inc.

Noting that the theatre industry has been "happy to cooperate" with FCDA on its series of programs, Mr. Sulds added:

"Other government agencies are interested also in the training and information potentials of theatre television. Our staff has held several meetings with the Dept. of Agriculture and the Dept. of Justice, as well as the State Dept."

As presently envisioned, the plan could provide for the realization of certain objectives by each government agency along the lines demonstrated by civil defense planners.

Official confirmation of preliminary discussions was given to BROADCASTING • TELECASTING last Monday by Charles Jackson, White House special assistant. He acknowledged there had been early forays into the subject by these agencies, which "have been studying the system." He said he knew of no group, however, which may be coordinating the project on a government level. Mr. Jackson noted the "tremendous" possibilities of this medium.

The consensus among government authorities who were contacted last week attested to the conviction that closed circuit video opens up a new door to government departments and that, once the movement is launched, a number of departments are prepared to come in and pursue specialized programs.

These objectives would range in nature, depending on the agency involved. Training concepts may be pursued by the Agriculture and Defense Depts., according to this line of thinking, while the Treasury Dept. presumably would concentrate its programming on savings bond campaigns.

Throughout the plan runs a single common denominator: reaching a selective audience during non-regular movie going hours at a reasonable cost. As in the case of FCDA, the government agency would produce the program and rent out theatre facilities and AT&T lines. At present, theatre exhibitors have sustained certain costs for ushers, etc.

Economy Factor Potent

Perhaps the most compelling argument for such demonstrations is the economy factor pointed up by federal CD planners: the agency has shown that it can reach, through two-way communication, some 35,000 people in a one-hour program for a mere 20¢ per seat—or about $7,000. It has generally been conceded, though, that if the project is pursued on a widespread scale, some arrangement would be made with theatre owners on cost factors.

UPT and FCDA authorities also have noted certain limitations: (1) Lack of agency funds to launch the project on a large scale this year; (2) number of theatres equipped for TV (some 75 in 30 cities); (3) use of so-called "obituary" time set aside by theatre exhibitors (usually early morning or late evening hours); (4) FCC's postponement of theatre TV hearings on specific channels which could be set aside for the medium.

Mr. Sulds of UPT feels it will be possible "to have a far-flung hookup of theatres embracing the major cities of the nation perhaps with two, three or even four theatres" or limit the closed circuit tie-up to a few cities on a regional basis covering theatres of relatively small seating capacity.

"Closed circuit theatre television complements broadcast television" and "adds the specific approach to the general approach" bridging small groups thousands of miles apart.

Mr. Sulds has pointed out that in any event, United Paramount views the FCDA experiments with enthusiasm—"both from the standpoint of public service and also from the point of view of advancing the art."

A Justice Dept. spokesman told BROADCASTING • TELECASTING last week that a UPT executive had contacted his agency some months ago on a possible program on delinquency aimed at a juvenile audience. He reported that UPT indicated it would be willing to foot the bill and that the demonstration would be a great public service venture for theatres. He identified the UPT official as Mr. Sulds but said nothing had come of the idea.

Another possibility held out for the Justice Dept. was a demonstration to reach top-level factory or plant officials to apprise them of anti-sabotage measures.

It also was learned that UPT had approached a State Dept. official with a proposal for a theatre TV showing for public school students involving UNESO.

The Treasury Dept. is watching closed circuit developments with keen interest, but has mapped no concrete plans for its use, according to Elihu Harris, assistant director in charge of promotion for the Saving Bonds Div.

While the Defense Dept. has had no actual experience with closed circuit TV as yet, both the Army and the Navy have conducted instructional television programs for servicemen. Col. Ed Kirby, chief of the Army Dept.'s Radio-TV Branch, said the medium holds "attractive possibilities" for the military.

Ken Gapen, assistant director for radio-TV information, Dept. of Agriculture, felt his agency would probably experiment in the medium "if it were to develop." He foresaw "effective educational use" of closed circuit video for training specialists "especially in an emergency." But there was no indication which officials UPT has contacted in the Agriculture Dept.

There was immediate speculation that if the above-mentioned government agencies embark on closed circuit video, others might follow suit—viz., the Office of Price Stabilization, the Office of Defense Mobilization, the Dept. of Labor, Federal Security Agency, etc.

KIRO SEATTLE

Has 25th Anniversary

TWENTY - FIFTH anniversary was observed last week by KIRO Seattle, CBS affiliate. Network programs and personalities saluted the Seattle outlet on its first quarter century in broadcasting. Station was founded April 27, 1927 as KPCB.

Station itself marked the occasion by moving studios and offices to a new location at 1530 Queen Ave. [B•T, Jan. 21].

Full page birthday advertisement appeared in local newspapers April 27. Copy carried statements by Saul Haas, president of the station, regarding outlet's activities and its CBS programming.

Like putting money in the bank

Yes, sir! When you buy WITH in Baltimore, it's just like putting money in the bank! First of all, you don't need big money. WITH's rates are LOW . . . and a *little* money does a BIG job for you. WITH delivers you more listeners-per-dollar than any other radio or TV station in town. And that means *low cost results!*

Follow the lead of the local folks! They know advertising media best. *And WITH regularly carries the advertising of twice as many local merchants as any other station in Baltimore.*

So save money in Baltimore. Let a *small* appropriation do the job for you. Get all the details from your Forjoe man. And get them today!

W-I-T-H

IN BALTIMORE

TOM TINSLEY, PRESIDENT • REPRESENTED BY FORJOE AND COMPANY

RECRUITING

Media Funds Thawed

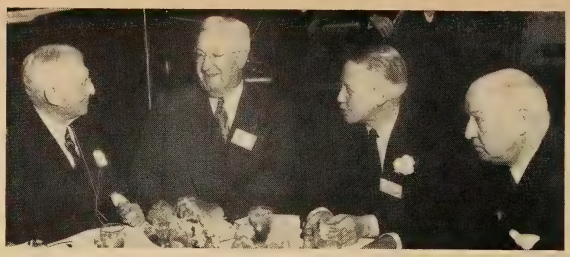
ANOTHER chunk of cold cash, stiffening until late 1951 in a congressional deep freeze, has been released and made available for additional media Armed Services recruiting activities, it was learned authoritatively last week.

An estimated $200,000 which had been frozen by congressional whim in fiscal 1951 allocations will be used to continue a small advertising program involving spot announcements and other media. It was not revealed immediately what radio's share will be.

The revelation that extra funds now are available for use came less than a month after House action which threatened to suspend virtually all paid advertising after July 1 [B•T, April 14].

Some $95,000-plus has been expended in recent weeks on the interim program calling for spot drives over some 500 independent outlets of the Keystone Broadcasting System and 13 50-kw stations for Air Force and Army personnel recruitment.

It was understood Grant Advertising Inc. is drawing up plans to extend the campaign, now nearing expiration, on a limited scale for broadcast commitments. The campaign is to be firmed up within the next fortnight, along with the amount to be derived for broadcasting commitments from May 1 possibly through September.



These remaining 1950-51 funds —the $550,000 interim media campaign also came out of that budget, as did network shows ($200,000) dropped last fall—had been held in reserve since December by the Defense Dept. The freeze was lifted with the understanding that the monies be expended on "directionalized" campaigns—viz., spot radio, selected magazines and pamphlets, and other "pinpoint" media.

This development will keep Military Personnel Procurement Service officials in business through the summer at least while efforts are aimed at unfreezing other refrigerated funds.

The House last month voted to cut the $12.5 million 1953 recruiting budget to the bone. The actual slicing was contained in an amendment paring Army maintenance and operation. About $1,050,000 was earmarked by Air Force-Army for radio, TV and other advertising. The bill (HR 7391) pends before a Senate Appropriations subcommittee.

But even so, other money still frozen prompted one procurement authority to comment: "Not only is much cold but much is frozen." He referred to an estimated $2 million-plus budget for 1951-52 still attached on Capitol Hill.

Of the $2.1 million tabbed for 1952 activities, about $400,000 already has been siphoned off for radio spots and television production [B•T, March 17].

OVER 200 business and civic leaders last Tuesday attended dedication of of the new, $6 million Lever House, Manhattan's newest and most modern structure. Among guests at a dedication luncheon at the Waldorf-Astoria were (l to r): Bernard M. Baruch, U. S. elder statesman; John Hancock, Lever Bros. chairman; Frank Stanton, CBS president, and James A. Farley, Coca-Cola Export Inc. executive.

Pomeroy Plan—New Radio Format

(Continued from page 23)

days. Only at Pomeroy's in Pottsville."

The compacts—a $1.25 item—were given to coupon book buyers at the store's cosmetic section, which did a landoffice business in powder, perfume, etc., with the new coupon holders. More than three-fourths of the coupons were immediately exchanged for merchandise, largely of the high-mark-up variety, the store reported.

A cost analysis of the campaign showed that the spots produced $17,805 worth of sales at a cost of 4.7%. Incidentally, a similar campaign in 1951, when no compacts were given away, produced only $9,905 in sales. The whole question of premiums in connection with radio advertising drives is now being thoroughly tested and carefully analyzed.

The rug campaign was an entirely different affair, two days of announcements (Thursday and Friday, April 24-25) for a two-day sale (Friday and Saturday). A typical announcement explains the sale:

"As a salute to home furnishings week Pomeroy's of Pottsville offers . . . for two days only . . . 30 nine-by-twelve room size rugs at less than their 1939 prices.

"Think of it . . . a seamless . . . all . . . wool . . . rich . . . pile . . . nine . . . by . . . twelve . . . Axminster . . . rug . . . at a Pre-War Price . . . and . . . You Pay No Money Down . . .

"This sale lasts only two days . . . that's only two days. Remember, there are only 30 rugs . . . you have a choice of five colors . . . the sale lasts only two days . . . Friday and Saturday Only. And You Pay No Money Down. Don't miss this chance of a lifetime. It's at Pomeroy's in Pottsville."

The WPAM schedule for this two-day campaign included 18 announcements. Rug sales totaled $1,451, and the rug buyers also made other purchases totaling $964, making a grand total of $2,415.

"In appraising these results," the report on the sale cautiously notes, "it is important to remember that, although former promotions costing very much more than this one, had failed to move the merchandise even though there had been several of these and they had run over a long period of time, it is still necessary to remember that this was a very special value promotion.

"Perhaps the most important point of the test is to show that the right kind of radio commercial will move this sort of 'distressed' merchandise when other media will not."

Radio station executives may obtain full reports on these and succeeding Pomeroy's radio campaigns, including descriptions of the merchandise; the gimmick, if any is used copies of all announcements; a detailed analysis of costs and sales results, and all other pertinent data, from Dept. Store Studies, in care of WPAM, at $15 for each month's studies. There will be at least two reports each month, Mr. Cuff said, possibly more.

In addition to the Pottsville tests, he said, similar test campaigns will be conducted simultaneously by other stores in the same general area, so that one method can be judged against others.

milestones

► LAST Tuesday marked the 20th anniversary of *One Man's Family*, which started as a sustainer on NBC April 29, 1932, got a West Coast sponsor in 1933 and went coast-to-coast on NBC starting May 4, 1934. Program is now on NBC radio, Monday-Friday, 7:45-8 p.m., and NBC television, Saturday, 7:30-8 p.m., with Miles Lab sponsoring radio and alternate weeks on TV.

► CBS Radio *People Are Funny*, sponsored by Mars Inc., Chicago (Mars candy bars), starring Art Linkletter, enjoyed 10th anniversary on coast-to-coast radio last month.

► "RED" WOODWARD has celebrated his 20th anniversary as staff musician for WBAP Fort Worth. For 14 years, Mr. Woodward has been assistant musical director.

N. J. MEET

Comr. Hyde Speaks Today

TALK by FCC Comr. Rosel H. Hyde today (Monday) leads the two-day agenda for the annual meeting of the New Jersey Broadcasters' Assn., announced Wednesday by Paul Alger, association president and manager of WSNJ Bridgeton.

Executives from 21 commercial AM and TV stations are expected to attend the meetings, starting today in the Hotel Dennis, Atlantic City, for an intensive study of broadcast-management problems.

In addition to Comr. Hyde's luncheon speech Monday, the first day's program will include a report on the New Jersey civil defense test of its state radio network by Fred Weber, owner of WFPG Atlantic City and radio-TV director of the emergency network, and Robert Stone, state CD public information officer; a review of the television scene in New Jersey by Irving Rosenhaus, president of WAAT-WATV (TV) Newark; network plans for radio, by Hugh Higgins, CBS Radio merchandising director; radio representation, by Tom Flanigan, managing director of the National Assn. of Radio and Television Broadcasters.

Presentation of young composers' radio awards by Robert McDougal, WAAT educational director; national radio-TV functions during air raids, by FCC Coordinating Engineer J. H. Eichel; radio law by Dwight Rorer, member of the Federal Communications Bar Assn.; "What the Agency Faces in Recommending TV and Radio," by Walter Erickson, radio director of Gray & Rogers, Philadelphia; a trade paper's place in radio by Norman Knight, vice president of *Sponsor* magazine; radio from a retailer's perspective by Murray Klahr, advertising manager of Blatt department store, Atlantic City; and "Political Policies and Prices" by Harry Goodwin, general manager of WNJR Newark.

Second day of the meeting will be devoted to a BMI program sales-promotion clinic, headed by Bob Fuller as BMI chairman. Talks will include:

Making your station a positive community force, by Tom Tighe, general manager of WJLK Asbury Park; the community station, by Seymour N. Siegel, director of WNYC New York; copyright laws, by Sydney M. Kaye, general counsel and vice chairman of the board, BMI; classical music programming, Charles Payne, program director of KIXL Dallas; local news, Merrill Morris, news director of WMTR Morristown; accounts servicing and sales copy, Sam Carey, program service manager of WRVA Richmond, Va., and continuous block programming, Nat Shoehalter, assistant director of educational activities, WAAT.

KNEW

SPOKANE, WASHINGTON

is pleased to announce

the appointment of

WEED

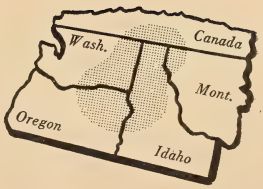
AND COMPANY

as

NATIONAL ADVERTISING REPRESENTATIVES

EFFECTIVE MAY 1, 1952

Spokane is the hub of the great Inland Empire, as large as New England and rated one of the nation's top markets. It includes a large part of 4 states, 37 counties and a part of Canada.



Over 1 Million People — Over 1 Billion Dollars Buying Power

RADIO STATION KNEW 5000 WATTS 790 KC.

SPOKANE, WASHINGTON

BURL C. HAGADONE,
President & General Manager

C. E. RODELL,
Station Manager

BMI Clinics

(Continued from page 26)

more cancerous to the growth of a station than selling without a purpose."

He said program men "must provide sales with vehicles that will produce results not only for the advertiser, but for the station. We are on a long haul—this is not a short subway ride."

BOISE, IDA., May 2

Henry H. Fletcher, general manager of KSEI Pocatello, Ida., spoke on "Radio's Short Cut to Suicide." Mr. Fletcher said that "one way in which radio operators can grease the skids for radio's destruction . . . is through unethical, unwise and unprincipled operation of their stations." Broadcasters should "look beyond their noses," he said, "in realizing that unless results are obtained for the man who buys your station time, that advertiser is not going to come back again and again to hand you his money."

RALEIGH, N. C., May 2

"Radio should balance its diet and budget with women's programs," Mrs. Frances Jarman of WDNC Durham, N. C., told clinic delegates at the Raleigh meeting. "Don't be caught with your kilocycles down—never underestimate the power of a woman on the air of your station!"

COLUMBUS, OHIO, May 2

Walberg L. Brown, manager of WDOK Cleveland, advocated programs of classical music at the Columbus clinic. "Classics can and will be enjoyed by a great many people who do not necessarily have any formal musical background," he said.

Mr. Brown said WDOK programmers "have found Beethoven, Tchaikovsky, Wagner, Brahms and Rachmaninoff valuable friends to cultivate. In addition to being eminently respectable, they have been practical, and valuable allies in the sometimes puzzling competition of local programming."

DENVER, May 2

Ray Perkins, KFEL Denver disc jockey, addressed the afternoon session of the Denver clinic on "Music Is Our Business."

Mr. Perkins, differing in viewpoint from Mr. Brown's sentiments at the Columbus clinic, said broadcasters must recognize the much larger demand for "pop tunes." He said the economy and practicality of pop records or short transcribed library numbers, make this type of musical programming the major undertaking.

He acknowledged "the rising public taste for classical and 'light classical' music," however.

CALGARY, ALTA., April 24

A record attendance was established at the Calgary meeting sponsored by the Western Assn. of Broadcasters, with 126 persons attending from ten Alberta stations, some coming as far as 600 miles.

Other meetings were held as follows: April 28, Owensboro, Ky.; April 29, Charleston, W. Va.; April 30, Sioux Falls, S. D.; May 1, Omaha and Salt Lake City; May 2, Little Rock, and May 3, Jackson, Miss.

AMONG 90 Southern California Broadcasters attending BMI program clinic April 29 at the Hollywood Roosevelt were (seated, l to r) Mrs. Alan Torbet; Alan Torbet, KROW Oakland; Frank Burke, editor, *Radio Daily;* Norman Nelson, SCBA, and Mrs. Jim Cox; second row (l to r) Ed Frech, KFRE Fresno; George Higgins, KMBC Kansas City, Mo.; Murray Arnold, WIP Philadelphia; James Russell, KVOR Colorado Springs; Charles Hamilton, KFI Los Angeles, and Ned Connor, KRKD Los Angeles; third row (l to r) Maurice Mitchell, Associated Program Service; Glenn Dolberg, director, station relations, BMI; Cal Smith, KFAC Los Angeles; Jim Cox, BMI, and Mark Haas, KMPC Los Angeles.

William Hiter Grant

WILLIAM HITER GRANT, 64, vice president of Outdoor Adv. Inc., and manager of the firm's Philadelphia office, died April 22 at Bryn Mawr Hospital. He is survived by his wife; a daughter, Constance Joan, and a sister, Mrs. Ruth H. Greene.

NARTB SESSIONS

Board, Code, Dues Groups to Meet

REVIEW agency to maintain the new combination dues plan of NARTB, adopted last February by the joint Radio-TV boards, will start operating next week.

The new unit will hold it first meeting Thursday at NARTB Washington headquarters, one of a series of NARTB meetings slated to wind up in mid-June. Chairman of the dues committee is Harold Essex, WSJS Winston-Salem, N. C.

Under the dues plan, NARTB gives discounts ranging from 10% to 25% provided all units owned and/or operated by the same company are association members. Network dues are not included in this arrangement.

The Essex committee will have the job of reviewing cases where ownership status is in doubt, determining whether or not joint fees should be paid. Operators of two stations get a 10% discount under the plan, covering their total bill. Other discounts: three units 15%; four units 20%; five or more units 25%.

Committee Members

On the committee with Chairman Essex are Clair R. McCollough, WGAL-AM-TV Lancaster, Pa., and Robert T. Mason, WMRN Marion, Ohio.

Mr. Essex, a radio director for District 4, also is chairman of the board's Finance Committee, which is scheduled to meet June 11 in Washington. Other members are Kenyon Brown, KWFT Wichita Falls, Tex.; Ben Strouse, WWDC Washington, and Lee Jacobs, KBKR Baker, Ore.

The Television Code Review Board, charged with the job of scanning all TV program complaints and supervising code operation and programming, will meet in Washington June 5-6. Chairman is John E. Fetzer, WKZO-TV Kalamazoo, Mich. Mr. Fetzer was in Europe when the code group held two spring meetings but is expected to attend the third session.

NARTB's TV Board will meet June 9-10 at The Homestead, Hot Springs, Va. Robert D. Swezey, WDSU-TV New Orleans, is chairman of the new board, elected during the NARTB Chicago convention. The Radio Board will meet June 12-13 in Washington. The Radio and TV Boards met separately, and then jointly, at Bandera, Tex., last February but no joint session is planned in June.

CONTEST has been started to name horse owned by Bill Williams, star of *Adventures of Kit Carson,* TV film series sponsored by Coca-Cola Bottling Co. on KECA-TV Hollywood. Winner receives $100 U. S. Savings Bond.

NBC SPAC Meet

(Continued from page 29)

are confident will not only build audience but do an effective job for sponsors.

"NBC action in engaging the Nielsen Coverage Service is a step which will provide up-to-date, comprehensive information on all facets of radio listening, including nationwide data, on out-of-home and multiple-set listening which has never been adequately measured before.

"We members of SPAC congratulate NBC on its realistic approach to the future development of network radio and the forward looking plans it is making to broaden radio's effectiveness and service and increase billings."

SPAC members, in addition to the officers elected, were B. T. Whitmire, WFBC Greenville, S. C.; Ralph Evans, WHO Des Moines and WOC Davenport; Robert B. Hanna Jr., WGY Schenectady; Allan M. Woodall, WDAK Columbus, Ga.; Ed Yocum, KGHL Billings, Mont.; Willard C. Worcester, WIRE Indianapolis; Martin Campbell, WFAA-TV Dallas, and Stanley E. Hubbard, KSTP-TV Minneapolis-St. Paul.

DAY RATES LOW

Reports NARTB Researcher

ONE out of every three U. S. radio stations is under-pricing its quarter-hour daytime rate according to a study conducted by Richard M. Allerton, NARTB research director.

In surveying AM station rates, Mr. Allerton found that 58% of stations have a quarter-hour daytime rate amounting to 40% of the one-hour daytime rate, according to the NARTB, *Radio Newsletter.* "Parenthetically, this 40% relationship to the hour rate would seem to be a normally accepted relationship," he explained.

It was found that 7.3% of stations set a higher relationship of quarter-hour to hour rate, ranging from 41% to 62%.

On the other hand, 34.7% of the stations have rate cards with quarter-hour time charge that is lower than 40% in relationship to the hour rate. Practically all of these stations range from 30% to 40%, according to the survey, the bulk of them narrowing down to the 33-37% bracket.

Mr. Allerton said the survey is not designed to show that AM station one-hour rates are high or low. "The significant point is: Nearly 35% of AM stations are under-pricing their quarter-hour rate," he added.

Gard Picks Ross Roy

GARD Industries, Chicago, manufacturers of weather-proof sprays for fabric and leather goods, names Ross Roy, Chicago, to handle its advertising. Radio and TV will be used.

Past is Prologue——

"FOR OUTSTANDING PUBLIC SERVICE"

NATIONAL HEADLINERS CLUB AWARD to St. Petersburg Times for the "outstanding public service by a newspaper" in 1951.

We are proud to receive the National Headliners Club Award for Outstanding Public Service which cites our sponsorship of Florida's new law making public all political campaign contributions and expenditures. This measure — known as the "St. Pete Times bill" when it was in the State Legislature — is but one item in a list of public service achievements unequalled in Florida and outstanding nationally. The record dates back to early days of the century for The St. Petersburg Times and back to the beginning of its teammate, Radio Station WTSP. Here are a few of hundreds of items:

INFORMING VOTERS—Free air time, free newspaper space give all candidates opportunity to tell their story.

GET-OUT-THE-VOTE—WTSP-Times campaigns bring surprisingly high percentages of voters to polls, spur interest in government.

WINNERS-LOSERS PARTY—Each election night all candidates watch vote count in WTSP studio, broadcast comments, go home in spirit of harmony beneficial to the community.

GOOD GOVERNMENT—Unblinking spotlight has kept city and county governments free of scandal since Times won divorce of Pinellas County from Tampa-dominated Hillsborough nearly 40 years ago.

RACE RELATIONS—WTSP-Times won referendum for Negro housing project after it was rejected by City Council. Times won top Florida award of 1951 for editorial on touchy subject of Negroes in colleges.

LABOR RELATIONS—WTSP brought leaders together in special broadcast to air both sides of city bus strike, major step toward settlement.

MILLION REFUND—Times crusade for utilities regulation (begun when Florida was one of three states without state controls) has brought $1,100,000 refund to electricity users. Current campaign for donation of those refunds to a building fund may provide a long-sought civic auditorium.

HEALTH—Forums by medical society members on various health problems produce overflow audiences, heavy mail.

SHUT-INS—WTSP beams programs at large number of men in Veterans Hospital and high number of elderly shut-ins . . . daily baseball play-by-play . . . golf matches . . tarpon roundup . . . yacht race . . . high school and junior college events . . . parades . . . meetings.

SENIOR CITIZENS—Two WTSP-Times campaigns under way for removal of $50 a month earnings by pensioners; and for establishment of a craft and handiwork program.

F-Y-I FORUMS—WTSP's For-Your-Information forums give community facts on many civic problems. One result: Switch from street cars to buses.

BETTER LIVING—This aim of WTSP adult education clinic has co-operation of YMCA, YWCA, PTA, Library, Junior College, Art Group, Classroom Teachers, Council of Human Relations.

BRIDGES—Since its founding The Times has been leader in drive for better and more and toll-free bridges and highways in Tampa Bay area. Recent result: New Gulf Coast Highway (U.S. 19) and Bay bridge.

REALTORS FORUM—WTSP service to inform home owners and home seekers.

BONDS—Times broke up municipal bond monopoly, saving thousands of dollars in refinancing; won reappraisals for tax equality.

FUN—WTSP-Times support has aided symphony concerts, local operetta, other cultural projects in addition to Halloween parties, treasure hunts, Santa Claus arrivals, amateur sports competition and many other entertainment projects.

Local ownership and a continuing policy of public service have built the WTSP-Times record of performance which now becomes a challenge for the future.

AMA CLINIC

Cott Talks on Sales

"TODAY, all business is in show business, and the competitive system of selling makes every salesman a showman," Ted Cott, vice president of NBC and general manager of WNBC-WNBT New York, said Tuesday.

Speaking at the New York American Marketing Assn.'s 1952 marketing clinic held in cooperation with the Sales Executives Club, Mr. Cott, whose subject was "Factfinding: Merchandising That Makes for Greater Sales," said: "There must be a marriage of the retailer and the manufacturers, and the advertising medium is an available and vital matchmaker."

Freedom of choice—whether it is between two candidates for public office or two cans of beer on the self-service shelf—is a basic American concept, and it is important for a product to have an extra plus to win the election of the consumer or the voter, he asserted. NBC's "Operation Chain Lightning," he said, is a case in point; by promotional partnerships with 11 food chains, the station is able to give promotional positions to the station's clients, which have resulted in making radio advertising a twin of merchandising.

Research was nominated by Mr. Cott to serve as the best man at the retailer-manufacturer wedding, although "It is too often the handy choice to prove a point without a true realization that it also points a way." He cited the sets-in-use figure for radio which indicates "an untouched audience, a new frontier, an expanding market of 58%. . . . The sets *not*-in-use is an exciting opportunity."

Identifying merchandising as imagination, Mr. Cott urged much wider use of ingenuity, with statistics as the starting point for a jump-off into action. "We need more people to take more chances," he concluded, "and the fastest way to get there is on an impulse."

DANCE Educators of America, N. Y., have named Donald O'Connor, alternate star of NBC-TV *Colgate Comedy Hour*, as TV dancer of the year.

NLRB DECISIONS

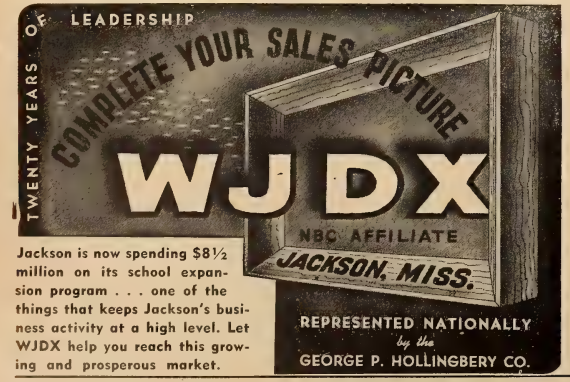
NBC, 3 Stations Affected

NATIONAL Labor Relations Board has announced decisions and orders affecting KTOK Oklahoma City; WJPS Evansville, Ind.; WOOD-AM-TV Grand Rapids, Mich., and NBC Chicago.

Results of an election at NBC Chicago involving staff newswriters showed that all of the six votes cast were for the National Assn. of Broadcast Engineers & Technicians, CIO. No votes were cast for the Radio Writers Guild of the Authors League of America.

In another election, held at WOOD-AM-TV, Local 1295 of International Brotherhood of Electrical Workers, AFL, received 15 votes to 9 cast for NABET. Election involved all broadcast engineers and technicians at the AM and TV stations, including regular parttime technicians.

At WJPS, NLRB granted a request of IBEW to withdraw its petition for certification of representatives, thereby closing the case.



An election to be held within 30 days of April 10 was reported ordered at KTOK. All broadcast technicians and engineers at the studios in Oklahoma City and at the transmitter in Moore, Okla., including the assistant engineer, are to vote for or against Local 1141 of IBEW.

TIME QUESTION

Clock Battle in Northwest

NORTHWEST area of the nation, Oregon and Washington, was split between daylight saving and standard time last week. Despite a decision by Gov. Douglas McKay that Oregon would stay on standard time, a ruling that was protested by the Oregon Assn. of Broadcasters and others, the Portland City Council at late week voted to authorize daylight time. Oregon City, Forest Grove and Vancouver, Wash., were expected to follow.

However, Tacoma City Council stood pat on standard time in face of 1,456 signatures on a protest petition. Seattle and other western Washington cities adopted daylight time while the eastern portion and most rural areas retained standard time.

CBS, Publicists Agree

CLIMAXING four months of negotiations, CBS Hollywood and the Publicists Guild reached agreement last week. Retroactive to Jan. 1, new contract is being submitted to the Wage Stabilization Board for approval, and includes a 15% weekly wage increase across-the-board, thereby raising the average weekly salary from $99 to $115. Negotiations next are to start between the Publicists Guild and ABC Hollywood.

NBC TEAMWORK

Workshop Urges Cooperation

IMPORTANCE of close teamwork between network and affiliates in promoting and selling radio was stressed last week in the first of four regional Promotion-Press-Merchandising Workshops sessions scheduled by NBC for its radio affiliates.

Some 48 representatives of 3[illegible] stations attending the first meeting, held Thursday and Friday in New York, heard NBC executives outline plans, problems, prospects and techniques of making the most out of radio as the No. 1 sales medium.

Stressing the "mutuality" of interests of network and affiliates John K. Herbert, vice president in charge of Radio Sales, told the group that strong promotional activities build audiences for both the network and its individual affiliates, and that proper merchandising produces maximum sales returns.

He asserted faith in network radio and its ability to sell itself on basic values, and deplored what he called "the electronic complex" which causes some advertisers to feel that they must make a choice between the broadcast media, radio and TV.

Charles C. Barry, radio programs vice president, emphasized the need for promotional efforts in support of program structures. He also stressed the difference between the size of radio and that of TV—105 million sets against 16.5 million.

Public relations activities were outlined by William F. Brooks, public relations vice president, while the problems of "Glamourizing Publicity and Publicizing Glamour" were discussed by Press Vice President Sydney H. Eiges. Henry Cassidy, director of news and special events, reviewed "News Coverage in an Election Year."

Fred N. Dodge, director of merchandising, described merchandising as "the magic touch." After showing NBC's new "summer radio" presentation, Advertising and Promotion Manager Jacob A. Evans reviewed "Promoting Radio in a Television Age" and Audience Promotion Supervisor Clyde L. Clem gave a progress report "Up to Now," and, in another talk, presented summer audience promotion plans. "Radio Research for the Future" was appraised by Plans and Research Director Hugh M. Beville, while Mr. Evans wound up the workshop's first day by emphasizing "timely" promotion as the keynote for the future.

Friday's meeting was to be devoted primarily to group discussion sessions, after opening talks by Mr. Clem and Co-op Sales Manager Ludwig Simmel.

Station Relations Vice President Harry R. Bannister welcomed the group at the opening meeting and Station Relations Director Fred Shawn conducted the Friday session.

We are proud to introduce...

Gayle V. Grubb

Vice-President
and
Managing Director
WJBK-AM • WJBK-TV

Mr. Grubb, the new Vice-President and Managing Director of WJBK-AM and WJBK-TV, was formerly a Vice-President of the American Broadcasting Company's Radio and Television operations in San Francisco. A veteran of 28 years radio experience, he brings to WJBK a vast background in radio and television acquired as manager of Radio Stations KFAB, Lincoln, Nebraska, and WKY in Oklahoma City. Since 1945, Mr. Grubb was in charge of KGO and KGO-TV in San Francisco.

The entire staff of WJBK and the companion stations, owned and operated by The Fort Industry Company, say: "Welcome to Detroit!"

SET SALES

Drop 40% From Last Year For Both Radio, TV

OUTPUT of radio and television receivers dropped over 40% below that of the first quarter of 1951, according to a three-month analysis listed last week by Radio-Television Mfrs. Assn. Figures cover the entire industry.

Radio set output was down 44% and TV 40%, RTMA estimated. Output of radio sets totaled 2,367,800 in the quarter, of which 975,892 were manufactured in March, a five-week month. Output of TV sets totaled 1,324,831 for the quarter.

RTMA found that 123,685 radio sets manufactured during the first quarter had FM circuits, with 27,107 TV sets containing FM band tuning facilities.

Receiving tubes sold amounted to 85,934,322 units compared to 118,277,243 in the same 1951 quarter. March tube sales totaled 30,935,220 units compared to 44,413,146 a year ago. Of the March tubes, 27,812,601 were of the entertainment type. Total value of receiving tube sales by RTMA member companies for the first quarter was $61,051,463.

Analyzing the output of television picture tubes, RTMA found 98% were 16 inches or larger in the first quarter compared to 94% a year ago. Most tubes were rectangular.

Picture tube sales to manufacturers totaled 370,206 units in March, with a value of $8,582,538 compared to 608,396 units valued at $16,064,425 in the same month a year ago. First quarter tube sales totaled 1,040,829 units valued at $23,898,653 compared to 1,822,793 tubes valued at $49,892,454 a year ago.

Set production by months for the quarter of 1952 is shown below.

* * *

	Television	Home Sets	Portables	Auto	Clock	Total Radio
January	404,933	288,723	68,433	195,147	80,152	632,455
February	409,337	312,705	72,866	267,779	106,103	759,453
March (five weeks)	510,561	357,689	99,720	343,314	175,169	975,892
TOTAL	1,324,831	959,117	241,019	806,240	361,424	2,367,800

LOUDSPEAKERS

Larger Inventories Sought

PLEA for easing of materials and larger inventories to meet expected demand by set-makers for loudspeakers after July 1 has been placed before the National Production Authority.

Loudspeaker manufacturers told NPA April 24 the current 45-day speaker inventory will be inadequate when industry swings into peak production during the third and fourth quarters. Under present conditions, set-makers would have to wait before receiving these components. Copper wire inventory shortages were reported in particular.

The loudspeaker industry group also asked more data on cobalt and nickel. NPA said there is a "temporary balance" between supply and demand but pointed out military needs will mount. The industry group conceded it would be "risky" at this time to remove controls on these alloys but said it would face production lags because of curtailed civilian needs.

Certain carbon steel also has figured in NPA actions. NPA removed "second-quality" or rejected steel from controls and told manufacturers they need not file requirements for the fourth quarter. Applications (CMP 4-B) for materials to make all-type radio-TV appliances — receivers, phonographs, record-players, etc.—were sent out to firms last week.

While carbon steel is used for chassis and tubes, industry spokesmen felt the order would have little effect on manufacturers when viewed against other shortages and fulfillment of current civilian demand for sets.
